(1) Appeals shall be submitted to the Secretary, U.S. Department of Labor, Washington, D.C. 20210, ATTENTION: ASET. A copy of the appeal shall simultaneously be provided to the Governor.

(2) The Secretary shall not accept an appeal dated later than 30 days after receipt of written notification of the denial from the Governor.

(3) The appealing party shall explain why it believes the denial is contrary to the provisions of Section 101 of the Act.

(4) The Secretary shall accept the appeal and make a decision only with regard to determining whether or not the denial is inconsistent with Section 101 of the Act. The Secretary may consider any comments submitted by the Governor. The Secretary shall make a final decision within 30 days after this appeal is received (Sec. 101(a)(4)(C)).

§ 628.2 Private industry council.

(a) The chief elected official(s) of the SDA shall establish and the Governor shall certify the private industry council (PIC) pursuant to Section 102 of the Act.

(b) Pursuant to Section 103 of the Act, the PIC shall provide policy and program guidance for all activities under the job training plan for the SDA. In accordance with agreements negotiated with the appropriate chief elected official(s), the PIC shall determine the procedures for development of the job training plan and select the grant recipient and administrative entity for the SDA. The PIC may exercise independent oversight over activities under the job training plan, and oversight shall not be circumscribed by agreements with the appropriate chief elected official(s) of the SDA.

(c) The employment service shall develop jointly with each appropriate PIC and chief elected official(s) for the SDA those components of the plans required under the Wagner-Peyser Act

of 1933, as amended, applicable to the SDA (Sec. 501(d)).

§ 628.3 Selection of SDA grant recipient, administrative entity and service providers.

(a) Pursuant to Section 109(b)(1) of the Act, a selection shall be made of the SDA grant recipient and the entity to administer the job training plan developed pursuant to Section 104 of the Act. These may be the same or different entities. The specific functions and responsibilities of these entities shall be spelled out in accordance with the agreement(s) between the PIC and the chief elected official(s), which should specifically address the provisions of Section 141(i) of the Act.

(b) Service providers shall be selected in accordance with (1) the agreement negotiated pursuant to Section 103(b)(1) of the Act, and (2) the provisions of Sections 107, 181(j)(2) and 205(b)(4) of the Act.

§ 628.4 Job training plan.

The Governor may issue instructions and schedules that will assure that job training plans and modifications for SDAs within the State conform to all requirements of the Act.

§ 628.5 Review and approval.

(a) (1) If the Governor disapproves the SDA job training plan or modification, the Governor shall notify the PIC and the appropriate chief elected official(s) for the SDA in writing as provided in Section 105(b)(2) of the Act.

(2) The Governor shall provide the PIC and the appropriate chief elected official(s) for the SDA 20 days to correct the deficiencies and resubmit the plan or modification. The Governor shall make a final decision and shall notify the PIC and the appropriate chief elected official(s) for the SDA of the final disapproval or approval within 15 days after the plan or modification was resubmitted.

(b) Pursuant to Section 105(b)(2) of the Act, any final disapproval of the job training plan or modification may be appealed to the Secretary.

(1) Appeals to the Secretary shall be submitted jointly by the PIC and the appropriate chief elected official(s) for the SDA to the Secretary, U.S. Department of Labor, Washington, D.C. 20210. ATTENTION: ASET. A copy of the appeal shall be simultaneously provided to the Governor.

(2) The Secretary shall not accept an appeal dated later than 30 days after receipt of the final disapproval from the Governor.

(3) The Secretary shall accept the appeal and make a decision only with regard to determining whether or not the disapproval is clearly erroneous within the context of Section 105(b)(1) of the Act. The Secretary may consider any comments submitted by the Governor. The Secretary shall make a final decision within 45 days after the appeal is received in accordance with Section 105(b)(2) of the Act.

§ 628.6 State SDA submission.

(a) Pursuant to Section 105(d), when the SDA is the State, the Governor shall, not less than 60 days before the beginning of the first of the two program years covered by the job training plan, submit to the Secretary, in a form determined by the Governor, a summary of the approach taken to meet the requirements of Section 104 of the Act as well as an assurance that the plan and the plan review comply with Sections 105 and 108 of the Act.

(b) The State's plan shall be considered approved unless, within 30 days of receipt of the submission described in paragraph (a), the Secretary notifies the Governor in writing of discrepancies between the submission and specific provisions of the Act.

(c) Nothing in this section shall preclude the Secretary from revoking approval in the event the assurance is not met.

PART 629—GENERAL PROVISIONS GOVERNING PROGRAMS UNDER TITLES I, II, AND III OF THE JOB TRAINING PARTNERSHIP ACT

Subpart A—Program Design Requirements

Sec.

629.1 General program requirements.
629.2 Public service employment prohibition.
629.3 Nondiscrimination and nonsectarian activities.

Subpart B—Payments, Benefits and Working Conditions

629.21 Needs-based payments.
629.22 Benefits and working conditions.

Subpart C—Administrative Standards and Procedures

629.31 Grant payments.
629.32 Program income.
629.33 Insurance.
629.34 Procurement.
629.35 Management systems, reporting and recordkeeping.
629.36 Reports required.
629.37 Allowable costs.
629.38 Classification of costs.
629.39 Limitations on certain costs.
629.40 Matching funds.
629.41 Property management standards.
629.42 Audits.
629.43 Oversight and monitoring.
629.44 Sanctions for violations of the Act.
629.45 Closeout [Reserved].
629.46 Performance standards.

Subpart D—Grievances, Investigations, and Hearings

Sec.

629.51 Scope and purpose.
629.52 State grievance and hearing procedures for non-criminal complaints at the Governor and subrecipient level.
629.53 Non-criminal grievance procedure at employer level.
629.54 Federal handling of administrative and civil complaints.
629.55 Federal handling of criminal complaints and reports of fraud, abuse and other criminal activity.
629.56 Opportunity for informal review.
629.57 Hearings before the Office of Administrative Law Judges.
629.58 Other authority.

Authority: Job Training Partnership Act, Sec. 169, Pub. L. 97–300, 96 Stat. 1322 (29 U.S.C. 1501 et seq.).

Subpart A—Program Design Requirements

§ 629.1 General program requirements.

(a) The conditions prescribed in Sections 141, 142 and 143 of the Act apply to all programs under Titles I, II and III of the Act, except as provided elsewhere in the Act or these regulations.

(b) Recipients shall ensure that: (1) An individual enrolled in a JTPA program meets the requirements of Sections 167(a)(5) of the Act, Section 3 of the Military Selective Service Act (50 U.S.C. App. 453) and other requirements applicable to programs funded under the specific section or title of the Act under which the participant is enrolling (Sec. 504); and

(2) An individual is enrolled within 45 days of the date of application, or a new application must be taken.

(c) Programs operated under Titles I, II and III of the Act are not subject to the provisions of 41 CFR Part 29–70, except as otherwise explicitly provided in these regulations.

§ 629.2 Public service employment prohibition.

No funds available under Titles I, II–A or III of the Act may be used for public service employment (Sec. 141(p)).

§ 629.3 Nondiscrimination and nonsectarian activities.

(a) Recipients, SDA grant recipients and other subrecipients shall comply with the nondiscrimination provisions of Section 167 of the Act.

(b) Pursuant to Section 167(a) of the Act, the employment or training of participants in sectarian activities is prohibited.

Subpart B—Payments, Benefits and Working Conditions

§ 629.21 Needs-based payments.

(a) Subject to the provisions of Sections 108 and 142(a)(1) of the Act and in accordance with a locally developed formula or procedure, payments based on need may be provided to individual participants in cases where such payments are necessary to enable individuals to participate in a training program funded under the Act (Sec. 204(27)).

(b) Documentation supporting the locally developed formula or procedure for needs-based payments shall be maintained in accordance with instructions from the Governor (Sec. 204(27)).

(c) The formula or procedure shall provide for the maintenance of an individual record of the determination of the need for, and the amount of, any participant's needs-based payment.

§ 629.22 Benefits and working conditions.

(a) Where participants are not covered under a State's workers' compensation law, they shall be provided with adequate on-site medical and accident insurance. Income maintanence coverage is not required for these participants (Sec. 143(a)(3)).

(b) Where participants are engaged in activities not covered under the Occupational Safety and Health Act of 1970, they shall not be required or permitted to work, be trained, or receive services in buildings or surroundings or under working conditions which are unsanitary, hazardous or dangerous to the participants' health or safety. Participants employed or trained for inherently dangerous occupations, e.g., fire or police jobs, shall be assigned to work in accordance with reasonable safety practices (Sec. 143(a)(2)).

Subpart C—Administrative Standards and Procedures

§ 629.31 Grant payments.

(a) JTPA grant payments will be made to the Governor in accordance with Section 203 of the Intergovernmental Cooperation Act (42 U.S.C. 4213) and Treasury Circular No. 1075 (31 CFR Part 205).

(b) The Governor shall establish procedures that will minimize the time elapsing between the receipt of advanced funds and disbursement. Failure to establish such procedures or to take action to correct deficiencies in (1) financial management systems, or (2) fund drawdown and advance payment procedures may result in the Governor being funded through reimbursement by Treasury check payment.

§ 629.32 Program income.

Income generated under any program shall be used to further program objectives and may be retained by that program, unless the Governor requires that such income be turned over to the State. Program income may be used to satisfy the matching requirements of Sections 123(b) and 304 of the Act.

§ 629.33 Insurance.

(a) *General.* Each Governor, SDA grant recipient or subrecipient shall follow its normal insurance procedures except as otherwise indicated in this section.

(b) The DOL assumes no liability with respect to bodily injury, illness or any other damages or losses, or with respect to any claims arising out of any activity under a JTPA grant or agreement whether concerning persons or property in the Governor's, SDA grant recipient's or other subrecipient's organization or any third party.

(c) Governors, SDA grant recipients and subrecipients shall secure insurance coverage for injuries suffered by participants who are not covered by existing worker's compensation. Contributions to a reserve for a self-insurance program, to the extent that the type and extent of coverage and the rates and premiums would have been allowed had insurance been purchased to cover the risks, are allowable and are chargeable to participant support or training as appropriate (Sec. 143(a)(3)).

§ 629.34 Procurement.

Subject to the provisions of Section 107 of the Act, recipients and subrecipients shall administer procurement systems that reflect applicable State and local law, rules and regulations as determined by the Governor.

§ 629.35 Management systems, reporting and recordkeeping.

(a) The Governor shall ensure that financial systems within the State provide fiscal control and accounting procedures sufficient to (1) permit preparation of required reports; (2) permit the tracing of funds to a level of expenditure adequate to establish that funds have not been used in violation of the restrictions on the use of such funds; and (3) demonstrate compliance with matching requirements. (Secs. 104(b)(9), 164(a)(1), 165(a)(1), 156(c)(2), and 182).

(b) The financial management system and the participant data system shall provide federally-required records and reports that are uniform in definition, accessible to authorized Federal and State staff, and verifiable for monitoring, reporting, audit and evaluation purposes (Secs. 165(a)(1), 165(a)(2), and 182).

(c) Pursuant to Section 165(a) of the Act, the Governor shall ensure that records shall be maintained of each participant's enrollment in a JTPA program in sufficient detail to demonstrate compliance with the relevant eligibility criteria attending a particular activity and with the restrictions on the provision and duration of services and specific activities authorized by the Act.

(d) The Governor shall ensure that records shall be maintained of such participant information as may be necessary to develop and measure the achievement of performance standards established by the Secretary.

(e) The Governor shall insure that procedures are developed for retention of all records pertinent to all grants and agreements, including financial, statistical, property and participant records and supporting documentation, for a period of three years from the date of obligation of funds. Records for nonexpendable property shall be retained for a period of three years after final disposition of the property.

(f) The aforementioned records will be retained beyond the three years if any litigation or audit is begun or if a claim is instituted involving the grant or agreement covered by the records. In these instances, the records will be retained until the litigation, audit or claim has been finally resolved.

(g) In the event of the termination of the relationship with a subrecipient, the Governor or SDA grant recipient shall be responsible for the maintenance and retention of the records of any subrecipient unable to retain them.

§ 629.36 Reports required.

(a) The Governor shall report to the Secretary pursuant to instructions issued by the Secretary. Reports shall be submitted quarterly for the first year and annually thereafter. Reports shall be submitted to the Secretary within 45 calendar days after the end of the report period (Sec. 165(a)(2)).

(b) [Reserved]

§ 629.37 Allowable costs.

(a) *General.* To be allowable, a cost must be necessary and reasonable for proper and efficient administration of the program, be allocable thereto under these principles, and, except as provided herein, not be a general expense required to carry out the overall responsibilities of the Governor or subrecipient. Costs charged to the

program shall be consistent with those normally allowed in like circumstances in nonfederally sponsored activities and with applicable State and local law, rules or regulations, as determined by the Governor.

(b) Direct and indirect costs shall be charged in accordance with 41 CFR 29–70.102.

(c) The Governor shall issue guidelines on allowable costs for SDA and statewide programs that shall include provisions that:

(1) Costs resulting from violations of, or failure to comply with, Federal, State or local laws and regulations are not allowable;

(2) Entertainment costs are not allowable;

(3) Insurance policies offering protection against debts established by the Federal Government are not allowable JTPA costs; and

(4) Personal liability insurance for PIC members is allowable.

(d) The cost of legal expenses required in the administration of grant programs is allowable. Legal services furnished by the chief legal officer of a State or local government or staff solely for the purpose of discharging general responsibilities as a legal officer are unallowable. Legal expenses for the prosecution of claims against the Federal Government are unallowable.

§ 629.38 Classification of costs.

(a) To comply with the limitations on certain costs contained in Section 108 of the Act, allowable costs shall be charged against the following cost categories: training; administration; and participant support.

(b) Costs are allowable to a particular cost category to the extent that benefits are received by such category.

(c) For State-administered programs, the Governor is required to plan, control and charge expenditures against the aforementioned cost categories.

(d) The Governor is responsible for ensuring that SDA grant recipients and other subrecipients plan, control, and charge expenditures against the aforementioned cost categories.

(e) In assigning costs to the training category pursuant to paragraph (a) of this section, the Governor shall ensure that:

(1) Training costs include: The costs associated with on-the-job training services; employer outreach necessary to obtain job listings or job training opportunities; salaries, fringe benefits, equipment and supplies of personnel directly engaged in providing training (including remedial education; job related counseling for participants; employability assessment and job development; job search assistance; including preparation for work and labor market orientation); books and other teaching aids; equipment and materials used in providing training to participants; classroom space and utility costs; and tuition and entrance fees that represent instructional costs which have a direct and immediate impact on participants. In addition, 50 percent of the costs of a limited work experience program, and 250 hours of youth tryout employment, are considered allowable training costs. A limited work experience program is one that meets the requirements of Section 108(b)(3) of the Act. Youth tryout employment is that which meets the requirements of Section 205(d)(3)(B) of the Act.

(2) Costs which are billed as a single unit charge do not have to be allocated or prorated among the several cost categories but may be charged entirely to training when the agreement:

(i) Is for training;

(ii) Is fixed unit price; and

(iii) Stipulates that full payment for the full unit price will be made only upon completion of training by a participant and placement of the participant into unsubsidized employment in the occupation trained for and at not less than the wage specified in the agreement.

(3) Training costs shall not include the direct or indirect costs associated with the supervision and management of the program.

(4) Training costs do not include supportive service costs as defined in Section 4 of the Act or other participant support costs which are determined to be necessary at the local level.

(5) All costs of employment generating activities to increase job opportunities for eligible individuals in the area and the remaining 50 percent of the costs of a limited work experience program, as well as 100 percent of the costs of other work experience programs, are not allowable training costs (Sec. 108(b)(2)(A)).

(6) The salaries and fringe benefits of project directors, program analysts, labor market analysts, supervisors and other administrative positions shall not be charged to training. The compensation of individuals who both instruct and supervise other instructors shall be prorated among the training and administration cost categories based on time records or other verifiable means.

(7) Construction costs may be allowable training or participant support costs only when funds are used to:

(i) Purchase equipment, materials and supplies for use by participants while on the job and for use in the training of such participants. Examples of such equipment, materials and supplies are handtools, workclothes and other low cost items; and

(ii) Cover costs of a training program in a construction occupation, including costs such as instructors' salaries, training tools, books, and needs-based payments and compensation to participants.

(8) The cost of incorporating a PIC or consortium administrative entity for the purpose of carrying out programs under the Act shall not be charged to training but may be charged to other cost categories as appropriate.

(9) Any single cost which is properly chargeable to training and to one or more other cost categories shall be prorated among training and the other appropriate cost categories.

§ 629.39 Limitations on certain costs.

(a)(1) Not less than 65 percent of the funds for programs under Titles I, II, and III of the Act may be expended for the costs of training and participant support, except as provided in paragraph (b) of this section.

(2) Administrative costs are limited to 15 percent of funds available. The 15 percent limitation on administrative costs may not be waived.

(b) Funds allotted under the following sections of the Act are exclusions to the paragraph (a) of this section requirement:

(1) Section 202(b)(4);

(2) Section 202(b)(1), to carry out activities pursuant to Section 123(c)(2)(A);

(3) Section 202(b)(3); and

(4) Section 301(a).

(c)(1) Not less than 70 percent of the funds for programs under Titles I, II–A, and III of the Act may be expended for the costs of training, except as provided in paragraphs (d) and (e) of this section.

(2) There is an established 30 percent limitation on combined administrative and participant support costs. This limitation may be waived by the Governor only in accordance with paragraph (e) of this section.

(d) Funds allotted under the following sections of the Act are exclusions to the paragraph (c) of this section requirement:

(1) Section 202(b)(4);

(2) Section 202(b)(1), to carry out activities pursuant to Section 123(c)(2);

(3) Section 202(b)(3), to provide technical assistance to SDAs within the State that do not qualify for incentive grants;

(4) Section 251; and

(5) Section 301(a).

(e) Expenditures may not be in excess of the limitation contained in paragraph

(c) of this section except as provided for in Section 108(c).

(f) The provisions of this section do not apply to any designated service delivery area which served as a concentrated employment program grantee for a rural area under the Comprehensive Employment and Training Act (Sec. 108(d)).

(g) Administrative funds within a service delivery area may, at the discretion of and pursuant to requirements established by the Governor, be pooled and used for all administrative costs of programs within the service delivery area assisted with funds under the Act.

§ 629.40 Matching funds.

The Governor shall define and assure the provision of adequate resources to meet the matching requirements of Sections 123(b) and 304 of the Act.

§ 629.41 Property management standards.

(a) Personal or real property procured with JTPA funds or transferred from programs under the Comprehensive Employment and Training Act must be used for purposes authorized by the Act. Subject to the Secretary's rights to such property, the Governor shall maintain accountability for property in accordance with State procedures and the records retention requirements of § 629.35.

(b) The JTPA program must be reimbursed the fair market value of any unneeded property retained by the Governor for use in a non-JTPA program. The proceeds from the sale of any property or transfer of property to a non-JTPA program must be used for purposes authorized under the Act.

§ 629.42 Audits.

(a) At least once every two years, the State shall perform or have performed, on a timely basis, independent financial and compliance audits of the Title II and III funds received by the State and shall be responsible for assuring that audit requirements are met with respect to PICs, SDA grant recipients, and other subrecipients receiving Title II and III funds throughout the State (Sec. 164(a)(2)). All such audits shall be conducted in accordance with the auditing standards specified in Section 164(a)(3) of the Act.

(b) The State shall submit the audit report(s), covering all Title II and III funds received by the State, to the cognizant Federal audit agency or the Inspector General, of the Department, as appropriate, when completed. The Inspector General shall determine the acceptability of such audit reports and shall forward each acceptable audit report to the Secretary for action pursuant to § 629.42(f) of this Part.

(c) The Governor may request the Secretary to exempt subrecipients from the audit requirements, except as otherwise provided in Section 164(a)(2) of the Act. This exemption request may be approved by: (1) the Secretary or (2) the cognizant Federal audit agency, when the Secretary delegates this authority to such agency (Sec. 164(a)(2)).

(d) Within a timely period after the State submits the audit report to the appropriate Federal official, the Governor shall submit an audit resolution report documenting the Governor's disposition of the reported questioned costs, i.e., whether allowed or disallowed, the basis for allowing questioned costs, and corrective actions taken.

(e) If the Governor intends to request waivers of liability under Section 164(e)(2) of the Act, such requests must accompany the audit resolution report along with supporting documentation.

(f) After receiving the audit resolution report, the Secretary shall review the report(s), the Governor's disposition, and any liability waiver request. If the Secretary is in agreement with all aspects of the Governor's disposition of the audit(s), the Secretary shall so notify the Governor, constituting final agency action on the audit(s). If the Secretary is in disagreement with the Governor's conclusion on specific points in the audit(s), the Secretary shall resolve the audit(s) through the initial and final determination process described in Subpart D of these regulations.

(g) Audits conducted or arranged by the Inspector General will generally supplement rather than duplicate audits of recipients, PICs, SDAs, or other subrecipients.

§ 629.43 Oversight and monitoring.

(a) The Secretary is authorized to monitor and investigate pursuant to Section 163 of the Act.

(b) The Governor is responsible for oversight of all SDA grant recipient activities and State supported programs.

(c) The PIC and local elected official(s) may conduct such oversight as they, individually or jointly, deem necessary or delegate to an appropriate entity pursuant to their mutual agreement.

§ 629.44 Sanctions for violations of the Act.

(a) Pursuant to Sections 164 (b), (d), (e), (f), (g), and (h) of the Act, the Secretary may impose appropriate sanctions and corrective actions for violations of the Act, Regulations, or grant terms and conditions. Additionally, sanctions may include the following:

(1) Offsetting debts, arising from misexpenditure of grant funds, against amounts to which the Governor is or may be entitled under the Act, except as provided in Section 164(e)(1) of the Act. The debt shall be fully satisfied when the Secretary reduces amounts allotted to the Governor by the amount of the misexpenditure; and

(2) Determining the amount of Federal cash maintained by the Governor or subrecipient in excess of reasonable grant needs, establishing a debt for the amount of such excessive cash, and charging interest on that debt.

(b) Except for actions under Section 164(f) and 107 of the Act, to impose a sanction or corrective action, the Secretary shall utilize initial and final determination procedures outlined in Subpart D.

(c) To impose a sanction or corrective action regarding a violation of Section 107 of the Act, the Secretary shall utilize the procedures of 29 CFR Part 31.

(d)(1) The Secretary shall hold the Governor responsible for all funds under the grant. The Governor shall hold subrecipients, including SDA grant recipients, responsible for JTPA funds received through the grant.

(2) The Secretary shall determine the liability of the Governor for misexpenditures of grant funds in accordance with Section 164(e) of the Act, including the requirement that the Governor shall have taken prompt and appropriate corrective actions for misexpenditures by a subrecipient.

(3) Prompt, appropriate, and aggressive debt collection action to recover any funds misspent by subrecipients ordinarily shall be considered a part of the corrective action required by Section 164(e)(2)(D) of the Act. In this regard, the Governor may request advance approval from the Secretary for contemplated corrective actions. Such requests may address debt collection actions or options which the Governor plans to initiate or to forego. The Governor's request shall include a description and assessment of all actions taken by the subrecipient to collect the misspent funds.

(4) In making the determination required by Section 164(e)(2) of the Act, the Secretary may determine, based on a request from the Governor, that the Governor may forego certain collection actions against a subrecipient where that subrecipient was not at fault with respect to the liability criteria set forth in Section 164(e)(2)(A) through Section 164(e)(2)(D) of the Act. The Secretary shall consider such requests in assessing

whether the Governor's corrective action was appropriate in light of Section 164(e)(2)(D) of the Act. At that time, the Secretary shall also consider advance approvals (previously granted pursuant to paragraph (d)(3) of this section) in light of the Governor's demonstrated efforts to undertake the approved course of action.

(5) The Governor shall not be released from liability for misspent funds under the determination required by Section 164(e) of the Act until the Secretary determines that further collection action, either by the Governor or subrecipient, would be inappropriate or would prove futile.

(e) The Governor shall have the authority to reduce allocations to a service delivery area if (1) the Secretary offsets a debt against funds allotted to the Governor and (2) the debt resulted from a misexpenditure by the SDA grant recipient, or its subrecipients.

(f) Nothing in this section shall preclude the Secretary from imposing a sanction directly against a subrecipient as authorized in Section 164(e)(3) of the Act. In such a case, the Secretary shall inform the Governor of the Secretary's action.

§ 629.45 Closeout [Reserved].

§ 629.46 Performance standards.

(a) The Secretary shall prescribe performance standards for adults and youth under Title II–A and dislocated workers under Title III in accordance with Section 106 of the Act. Standards for youth employment competencies shall prescribe the framework for competency development.

(b) The Governor shall establish SDA standards within the parameters set annually by the Secretary pursuant to Section 106 of the Act and apply the standards in accordance with Section 202(b)(3) of the Act.

(c) Pursuant to initial and annual instructions issued by the Secretary, the Governor shall:

(1) Collect the data necessary to set standards pursuant to Section 165 of the Act; and

(2) Submit reports according to Sections 106 and 121(b)(3) of the Act.

(d) Pursuant to Section 106(h)(1) of the Act, the Governor shall, after exhaustion of remedies below, impose a reorganization plan if a subrecipient fails to meet performance standards for two consecutive years.

(1) Prior to imposition of a reorganization plan, the Governor must offer the subrecipient opportunity for a hearing.

(2) Should the hearing determination uphold the Governor's imposition of a reorganization plan, the subrecipient may appeal to the Secretary.

(3) Appeals shall be submitted to the Secretary, U.S. Department of Labor, Washington, D.C. 20210, Attention: ASET. A copy of the appeal shall simultaneously be provided to the Governor.

(4) The Secretary shall not accept an appeal dated later than 30 days after receipt of written notification from the Governor.

(5) The appealing party shall explain why it believes the Governor's decision is contrary to the provisions of Section 106 of the Act.

(6) The Secretary shall accept the appeal and make a decision only with regard to determining whether or not the Governor's decision is inconsistent with Section 106 of the Act. The Secretary may consider any comments submitted by the Governor. The Secretary shall make a final decision within 60 days after this appeal is received (Sec. 106(h)).

Subpart D—Grievances, Investigations, and Hearings

§ 629.51 Scope and purpose.

(a) *General.* This subpart establishes the procedures to receive, investigate and resolve grievances, and conduct hearings to adjudicate disputes under the Act. Complaints of discrimination pursuant to Section 167(a) of the Act will be handled under 29 CFR Parts 31 and 32.

(b) *Non-JTPA remedies.* Whenever any person, organization or agency believes that a Governor, SDA grant recipient or other subrecipient has engaged in conduct that violates the Act and that such conduct also violates a Federal statute other than JTPA, or a State or local law, that person, organization or agency may, with respect to the non-JTPA cause of action, institute a civil action or pursue other remedies authorized under other Federal, State, or local law against the Governor, SDA grant recipient or other subrecipient without first exhausting the remedies in this subpart. Nothing in the Act or these regulations shall:

(1) Allow any person or organization to join or sue the Secretary with respect to the Secretary's responsibilities under JTPA except after exhausting the remedies in this subpart;

(2) Allow any person or organization to file a suit which alleges a violation of JTPA or these regulations without first exhausting the administrative remedies described in this subpart; or

(3) Be construed to create a private right of action with respect to alleged violations of JTPA or the regulations.

§ 629.52 State grievance and hearing procedures for non-criminal complaints at the Governor and subrecipient level.

(a) *Policy.* This section deals with the handling of non-criminal complaints. Criminal complaints are to be handled as specified in § 629.55.

(b) *Procedures at Governor and SDA levels.*

(1) Pursuant to Section 144(a) of the Act, each Governor shall maintain a State level grievance procedure and shall insure the establishment of procedures at the SDA grant recipient level for resolving any complaint alleging a violation of the Act, regulations, grant or other agreements under the Act. The procedures must include the handling of complaints and grievances arising in connection with JTPA programs operated by each SDA grant recipient and subrecipient under the Act. These procedures must also provide for resolution of complaints arising from actions, such as audit disallowances or the imposition of sanctions, taken by the Governor with respect to audit findings, investigations, or monitoring reports (Sec. 144(a)).

(2) The grievance hearing procedure shall include written notice of the date, time and place of the hearing, an opportunity to present evidence, and a written decision.

(c) *State review.* (1) If a complainant does not receive a decision at the SDA grant recipient level within 60 days of filing the complaint or receives a decision unsatisfactory to the complainant, the complainant then has a right to request a review of the complaint by the Governor. The request for review shall be filed within 10 days of receipt of the adverse decision or 10 days from the date on which the complainant should have received a decision. The Governor shall issue a decision within 30 days. The Governor's decision is final.

(2) The Governor shall also provide for an independent State review of a complaint initially filed at the State level on which a decision was not issued within 60 days or on which the complainant has received an adverse decision. A decision shall be made within 30 days. The Governor's decision is final.

(d) *Federal review of local level complaints without decision.*

(1) Should the Governor fail to provide a decision as required in paragraph (c) of this section, the complainant may then request from the Secretary a determination whether reasonable cause exists to believe that the Act or its regulations have been violated.

(2) The Secretary shall act within 90 days of receipt of the request and where there is reasonable cause to believe the Act or regulations have been violated shall direct the Governor to issue a decision adjudicating the dispute pursuant to State and local procedures. The Secretary's action does not constitute final agency action and is not appealable under the Act (Sec. 166(a) and Sec. 144(c)). If the Governor does not comply with the Secretary's order within 60 days, the Secretary may impose a sanction upon the Governor for failing to issue a decision.

(3) The request shall be filed no later than 10 days from the date on which the complainant should have received a decision as required in paragraph (c) of this section. The complaint should contain the following:

(i) The full name, telephone number (if any), and address of the person making the complaint;

(ii) The full name and address of the respondent against whom the complaint is made;

(iii) A clear and concise statement of the facts, including pertinent dates, constituting the alleged violation;

(iv) The provisions of the Act, regulations, grant or other agreements under the Act believed to have been violated;

(v) A statement disclosing whether proceedings involving the subject of the request have been commenced or concluded before any Federal, State or local authority, and, if so, the date of such commencement or conclusion, the name and address of the authority and the style of the case; and

(vi) A statement of the date the complaint was filed with the Governor, the date on which the Governor should have issued a decision, and an attestation that no decision was issued.

(4) A request will be considered to have been filed when the Secretary receives from the complainant a written statement sufficiently precise to evaluate the complaint and the grievance procedure used by the State and SDA grant recipient.

§ 629.53 Non-criminal grievance procedure at employer level.

(a) Governors, SDA grant recipients and other subrecipients shall assure that other employers, including private-for-profit employers of participants under the Act, also have a grievance procedure relating to the terms and conditions of employment available to their participants (Sec. 144(b)).

(b) Employers under paragraph (a) of this section may operate their own grievance system or may utilize the grievance system established by the Governor or SDA grant recipient under § 629.52. Employers shall inform participants of the grievance procedure they are to follow.

(c) An employer system shall provide for, upon request by the complainant, a review of an employer's decision by the SDA grant recipient and the Governor, if necessary, in accordance with § 629.52(b).

§ 629.54 Federal handling of administrative and civil complaints.

(a) (1) The Comptroller General and Inspector General's authority to conduct audits, evaluations and investigations is as specified in § 629.42.

(2) The Secretary is authorized to monitor States (Sec. 163(a)).

(3) The Secretary shall each fiscal year investigate several States to evaluate whether the use of funds received under the Act is in compliance with the provisions of the Act (Sec. 165(b)(1)(A)).

(4) The Secretary may receive complaints alleging violations of the Act or regulations through the Department's incident reporting system.

(b) As a result of the findings or content of any of the activities listed in paragraph (a), of this section, the Secretary may:

(1) Direct the Governor to handle a complaint through local grievance procedures established under § 629.52; or

(2) Investigate and determine whether the Governor or subrecipients are in compliance with the Act and regulations (Sec. 163(b) and (c)).

(c) (1) The Secretary shall notify the Governor of the findings of the Secretary's investigation and shall give the Governor a period of time, not to exceed 60 days, depending on the nature of the findings, to comment and to take appropriate corrective actions.

(2) The Governor shall offer an opportunity for a hearing at the State level to those subrecipients adversely affected by the results of an investigation, audit or monitoring activity as specified in § 629.52(b). The Governor shall inform the Secretary of actions undertaken, including any disposition of an audit conducted by the State to deal with the Secretary's findings if one was undertaken within the time frame specified by the Secretary.

(3) The Secretary shall review the complete file of the investigation and the Governor's actions. The Secretary's review shall take into account the provisions of § 629.44. If the Secretary is in agreement with the Governor's handling of the situation, the Secretary shall so notify the Governor. This notification shall constitute final agency action.

(d) *Initial and final determination.* (1) *Initial determination.* If the Secretary is dissatisfied with the Governor's disposition of an audit as specified in § 629.42 or other resolution of costs, with the Governor's response to findings pursuant to parargraph (c) of this section, or if the Governor failed to comply with the Secretary's decision pursuant to § 629.52(d)(2), the Secretary shall make an initial determination of the matter in controversy including the allowability of questioned costs or activities. Such determination shall be based upon the requirements of the Act, regulations, grants, contracts or other agreements, under the Act.

(2) *Informal resolution.* The Secretary shall not revoke a Governor's grant in whole or in part, nor institute corrective actions or sanctions, without first providing the Governor with an opportunity to present documentation or arguments to resolve informally those matters in controversy contained in the Secretary's initial determination. In the case of an initial determination pursuant to an audit, the informal resolution period shall be at least 60 days from issuance of the initial determination and no more than 170 days from the receipt by the Secretary of the final approved audit report. If the matters are resolved informally, the Secretary shall issue a final determination pursuant to paragraph (d)(3) of this section, which notifies the parties in writing of the nature of the resolution and may close the file.

(3) *Final determination.* (i) If the Governor and the Secretary do not resolve any matter informally, the Secretary shall provide each party with a final written determination by certified mail, return receipt requested. In the case of audits, the final determination shall be issued not later than 180 days after the receipt by the Secretary of the final approved audit report.

(ii) The final determination shall:

(A) Indicate that efforts to informally resolve matters contained in the initial determination have been unsuccessful;

(B) List those matters upon which the parties continue to disagree;

(C) List any modifications to the factual findings and conclusions set forth in the initial determination;

(D) Establish a debt if appropriate;

(E) Determine liability, method of restitution of funds and sanctions; and

(F) In the case of a final determination imposing a sanction or corrective action, offer an opportunity for a hearing in accordance with § 629.57.

(iii) The final determination constitutes the final agency action unless a hearing is requested.

(e) Nothing in this section shall preclude the Secretary from issuing an initial and final determination directly to a subrecipient in accordance with the authority of Section 164(e)(3) of the Act. In such a case, the Secretary shall inform the Governor of the Secretary's action.

§ 629.55 Federal handling of criminal complaints and reports of fraud, abuse and other criminal activity.

All information and complaints involving fraud, abuse or other criminal activity shall be reported directly and immediately to the Secretary of Labor.

§ 629.56 Opportunity for informal review.

(a) Parties to a complaint under § 629.57 may choose to waive their rights to an administrative hearing before the Office of Administrative Law Judges (OALJ) by choosing to transfer the settlement of their dispute to an individual acceptable to all parties for the purpose of conducting an informal review of the stipulated facts and rendering a decision in accordance with applicable law. A written decision will be issued within 60 days after the matter is submitted for informal review.

(b) The waiver of the right to request a hearing before the OALJ will automatically be revoked if a settlement has not been reached within the 60 days provided in paragraph (a) of this section.

(c) The decision rendered under this informal review process shall be treated as a final decision of an Administrative Law Judge pursuant to Section 166(b) of the Act.

§ 629.57 Hearings before the Office of Administrative Law Judges.

(a) *Jurisdiction.* The jurisdiction of the OALJ extends only to those complainants identified in Sections 164(f) and 166(a) of the Act. All other disputes arising under the Act shall be adjudicated under the appropriate recipient or subrecipient grievance procedures or other applicable law.

(b) *Sanctions.* For the purpose of this section, "sanctions" will not include actions required by authority other than this Act. For example, the imposition of interest charges where required by the Debt Collection Act of 1982 is not a sanction for the purpose of this section.

(c) *Procedures for filing request for hearing.* (1) Within 21 days of receipt of the determination imposing the sanction or corrective action, or denying financial assistance, the applicant, Governor, SDA grant recipient or other subrecipient of funds may transmit by certified mail, return receipt requested, a request for hearing to the Chief Administrative Law Judge, United States Department of Labor, Room 700, Vanguard Building, 1111 20th Street, N.W., Washington, D.C. 20036, with one copy to the departmental official who issued the determination and one copy to the Special Counsel to the Assistant Secretary of Labor.

(2) The 21-day filing requirement is jurisdictional; failure to timely request a hearing acts as a waiver of the right to hearing.

(3) The request shall specifically state those issues of the determination upon which review is requested. Those provisions of the determination not specified for review, or the entire determination when no hearing has been requested within the 21 days, shall be considered resolved and not subject to further review. Only alleged violations of the Act, regulations, grant or other agreements under the Act fairly raised in the determination and the request for hearing are subject to review.

(4) The same procedure set forth in paragraphs (c) (1) through (3) of this section applies in the case of a complainant who has not had a dispute adjudicated by the informal review process of § 629.56 within the 60 days, except that the request for hearing before the OALJ must be filed within 15 days of the conclusion of the 60-day period. In addition to including the determination upon which review is requested, the complainant must include a copy of any Stipulation of Facts and a brief summary of proceedings.

(d) *Service and filing.* Copies of all papers required to be served on a party or filed with the OALJ shall be filed simultaneously with the OALJ and served upon the parties of record or their representatives, and shall contain proof of such service.

(e) *Rules of Procedure.* The rules of practice and procedure promulgated by the OALJ shall govern the conduct of hearings under this section.

(f) *Prehearing procedures.* In all cases, the OALJ should encourage the use of prehearing procedures to simplify and clarify facts and issues.

(g) *Subpoenas.* Subpoenas necessary to secure the attendance of witnesses and the production of documents or things at hearings shall be obtained from the OALJ and shall be issued pursuant to the authority contained in Section 163(b) of the Act, incorporating 15 U.S.C. Section 49.

(h) *Timely submission of evidence.* The OALJ shall not permit the introduction at the hearing of documentation relating to the allowability of costs if such documentation has not been made available for review either at the time ordered for any prehearing conference, or, in the absence of such an order, at least three weeks prior to the hearing date.

(i) *Burden of production.* The Department shall have the burden of production to support the Secretary's decision. To this end, the Secretary shall prepare and file an administrative file in support of the decision. Thereafter, the party or parties seeking to overturn the Secretary's decision shall have the burden of persuasion.

(j) *Relief.* In ordering relief, the OALJ shall have the full authority of the Secretary under Section 164 of the Act, except with respect to the provisions of paragraph (e) of that section.

(k) *Timing of decisions.* The OALJ should render a written decision not later than 90 days after the closing of the record.

§ 629.58 Other authority.

Nothing contained in this subpart shall be deemed to prejudice the separate exercise of other authorities in pursuit of remedies and sanctions available outside the Act.

PART 630—PROGRAMS UNDER TITLE II OF THE JOB TRAINING PARTNERSHIP ACT

Sec.

630.1 Adult and youth programs under Part A of Title II.
630.2 Summer youth employment and training programs under Part B of Title II.

Authority: Job Training Partnership Act, Sec. 169, Pub. L. 97–300, 96 Stat. 1322 (29 U.S.C. 1501 et seq.).

§ 630.1 Adult and youth programs under Part A of Title II.

(a) Funding for programs under this section shall be provided in accordance with Sections 162, 201 and 202 of the Act. Funds may be used to provide services specified in Section 204 of the Act to persons meeting eligibility criteria specified in Sections 141(e) and 203 of the Act.

(b)(1) Pursuant to Section 203(b) of the Act, not less than 40 percent of funds shall be expended for services to eligible youth.

(2) To the extent that the ratio of economically disadvantaged youth to economically disadvantaged adults in the SDA differs from the ratio of such individuals nationally as published by the Secretary, the percentage specified in paragraph (b)(1) of this section shall be reduced or increased by a local adjustment factor. This factor, which may be obtained by dividing the SDA ratio of economically disadvantaged

youth to economically disadvantaged adults by the national ratio as published by the Secretary, may be multiplied by 40 percent to derive the youth service level for the SDA. The Governor may provide for an alternative methodology to develop the local adjustment factor depending on the availability of data (Sec. 203(b)(2)).

(c) Funds may be used to conduct exemplary youth programs under Section 205 of the Act, as follows:

(1) Except for tryout employment authorized under Section 205(d)(3)(B) of the Act, exemplary youth programs may be modified to accommodate local conditions as specified in the job training plan (Sec. 205(a)); and

(2) Tryout employment in private for-profit worksites may be conducted only in accordance with Section 205(d) of the Act (Sec. 141(k)).

§ 630.2 Summer youth employment and training programs under Part B of Title II.

(a) Funding for programs under this section shall be provided in accordance with Sections 162 and 251 of the Act to provide services specified in Section 252 of the Act to economically disadvantaged youth meeting eligibility criteria set forth in Sections 141(e) and 253 of the Act.

(b) Not more than 15 percent of the funds available for programs under this section may be used for the costs of administration.

PART 631—PROGRAMS UNDER TITLE III OF THE JOB TRAINING PARTNERSHIP ACT

Subpart A—General Provisions

Sec.
631.1 Scope and purpose.

Subpart B—Formula Allocated Programs

631.11 General.
631.12 State plan.
631.13 Limitations on use of funds.
631.14 Matching funds.

Subpart C—Discretionary Program

631.21 General.
631.22 Eligibility for funding.
631.23 Application for funding and selection criteria.

Subpart D—Program Design and Management

631.31 Allowable activities, coordination and consultation, planning and review.
631.32 Reallotment of funds based on non-utilization.
631.33 Reporting requirements.
631.34 Role of Title III training in determining unemployment benefit eligibility.

Authority: Job Training Partnership Act, Sec. 169, Pub. L. 97-300, 96 Stat. 1322 (29 U.S.C. 1501 et seq.).

Subpart A—General Provisions

§ 631.1 Scope and purpose.

This part contains the regulations governing programs designed to serve dislocated workers as authorized under Title III of the Act. Programs are operated pursuant to two allotments: (a) at least 75 percent of the funds appropriated for Title III shall be allotted by formula to the Governors; and (b) up to 25 percent of the funds appropriated for Title III may be reserved for distribution to Governors at the Secretary's discretion. Planning, application and other requirements applicable to formula funded programs are set forth in Subpart B of this Part. Requirements applicable to discretionary programs are set forth in Subpart C of this Part. Program design and management requirements applicable to all programs operated under Title III of the Act are set forth in Subpart D of this Part.

Subpart B—Formula Allocated Programs

§ 631.11 General.

(a) The Secretary shall allot at least 75 percent of the funds appropriated for Title III among the States pursuant to the formula in Section 301(b) of the Act.

(b) The allotment for the Virgin Islands, Guam, the Northern Mariana Islands, American Somoa and the Trust Territory of the Pacific Islands shall be based on the following computation: Allotments for these areas, pursuant to Section 201(a) of the Act, as a proportion of total allotments pursuant to Section 201 of the Act, applied to total funds available for allotment, pursuant to Section 301(b) of the Act.

§ 631.12 State plan.

(a) To receive financial assistance for formula allocated programs under Title III of the Act, the Governor shall include in the Governor's coordination and special services plan, submitted pursuant to Section 121 of the Act, a statement of intent to operate programs in compliance with matching provisions of Section 304 of the Act.

(b) If the Governor has stated, pursuant to paragraph (a) of this section an intent to operate formula allocated programs under Title III and subsequently determines not to operate such programs during the period covered by the Governor's coordination and special services plan, the Governor shall notify the Secretary of such a determination in writing on a timely basis.

§ 631.13 Limitations on use of funds.

(a) Subject to paragraph (b) of this section no more than 15 percent of the funds allotted pursuant to Section 301(b) of the Act may be used for administrative costs. In addition, the total of administrative costs and participant support costs may not exceed 30 percent (Sec. 307(a)).

(b) These limitations apply to that amount of Federal funds which is equivalent to no more than 50 percent of the total combined amount of Federal and non-Federal funds allotted to the formula funded State programs (Sec. 307(b)).

§ 631.14 Matching funds.

To qualify for financial assistance under Title III of the Act, the Governor shall provide matching funds pursuant to Section 304 of the Act as defined at § 629.40 of these regulations.

Subpart C—Discretionary Program

§ 631.21 General.

Of the funds appropriated for Title III, up to 25 percent may be awarded to Governors submitting applications for such funds based upon selection criteria determined by the Secretary pursuant to the provisions of this subpart.

§ 631.22 Eligibility for funding.

The Secretary shall make available to Governors funds reserved under Section 301(a) of the Act to serve individuals who are affected by mass layoffs, natural disasters, Federal Government actions (such as relocations of Federal facilities), high unemployment areas or designated enterprise zones. These circumstances must be sufficiently severe so that:

(a) The needs cannot be met by other JTPA programs or other State and local programs; and

(b) A substantial number of individuals concentrated in a labor market area or industry is affected.

§ 631.23 Application for funding and selection criteria.

To qualify for consideration for funding under this subpart, Governors shall submit applications to the Secretary pursuant to instructions issued by the Secretary on an annual basis specifying application procedures, selection criteria, and approval process.

Subpart D—Program Design and Management

§ 631.31 Allowable activities, coordination and consultation, planning and review.

(a) Allowable activities are specified in Section 303 of the Act. They shall be

coordinated with other programs in accordance with Section 308 of the Act. Affected labor organizations shall be consulted pursuant to Section 306 of the Act.

(b) Governors shall involve appropriate PICs and local elected officials in planning and providing opportunities for review in accordance with Sections 302 and 305 of the Act.

§ 631.32 Reallotment of funds based on non-utilization.

(a) The Secretary may reallot any amount of any allotment under this part to the extent that it is determined that the Governor will not be able to obligate such amount within one year of allotment (Sec. 301(d)).

(b) When the Secretary determines that a reallotment from a Governor is appropriate, the Governor and the general public shall be given a notice of the proposed action to remove funds. Such notice shall include specific reasons for the actions being taken and shall invite the Governor and the general public to submit comments on the proposed reallotment of funds. These comments shall be submitted to the Secretary within 30 days from the date of the notice. After considering any comments received, the Secretary shall notify the Governor of any decision to reallot funds.

(c) The procedures set out in this section are in lieu of any other procedures which might otherwise be applicable under the Grievances, Investigations and Hearings provisions in Part 629, Subpart D.

(d) The Secretary may reallot funds using:

(1) The formula allocation described at Subpart B of this Part; or

(2) Procedures established in Subpart C of this Part.

§ 631.33 Reporting requirements.

The reporting requirements in § 629.36 apply to programs operated under this Part, except that the Secretary may establish special requirements for discretionary programs operated under Subpart C of this Part as part of the annual announcement of fund availability and selection criteria.

§ 631.34 Role of Title III training in determining unemployment benefit eligibility.

Whenever training opportunities pursuant to Section 302(c) of the Act are identified, information concerning the opportunities shall be made available to the individuals. Pursuant to Section 302(d) of the Act, the acceptance of training assisted under Title III shall be deemed to be acceptance of training with the approval of the State within the meaning of any other provision of Federal law relating to unemployment benefits.

PART 632—NATIVE AMERICAN PROGRAMS UNDER TITLE IV, PART A OF THE JOB TRAINING PARTNERSHIP ACT [RESERVED]

PART 633—MIGRANT AND SEASONAL FARMWORKER PROGRAMS UNDER TITLE IV, PART A OF THE JOB TRAINING PARTNERSHIP ACT [RESERVED]

PART 634—LABOR MARKET INFORMATION PROGRAMS UNDER TITLE IV, PART E OF THE JOB TRAINING PARTNERSHIP ACT [RESERVED]

PART 635—VETERANS' EMPLOYMENT PROGRAMS UNDER TITLE IV, PART C OF THE JOB TRAINING PARTNERSHIP ACT [RESERVED]

PART 636—[RESERVED]

PART 637—[RESERVED]

PART 638—[RESERVED]

Signed at Washington, D.C. this 9th day of March, 1983.

Raymond J. Donovan,

Secretary of Labor.

Part IV

Environmental Protection Agency

Approval and Promulgation of State Implementation Plans

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-5-FRL 2253-5]

Approval and Promulgation of Implementation Plans; Indiana

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rulemaking.

SUMMARY: EPA is proposing to approve a revision to the Indiana State Implementation Plan (SIP) for sulfur dioxide (SO_2). This revision would approve a site-specific emission limitation of 9.57 pounds of SO_2 per million British Thermal Units (lbs/MMBTU) for the Indiana-Michigan Electric Company's (IMEC) Breed plant. These changes in the Indiana plan are being proposed at the request of the State. The State has demonstrated that the National Ambient Air Quality Standards (NAAQS) are protected if this change is approved.

DATE: Comments on this revision and on EPA's proposed action must be received by May 16, 1983.

ADDRESSES: Copies of the SIP revision, technical support document, and the supporting data are available at the following addresses for review. (It is recommended that you telephone Robert B. Miller at (312) 886-6031 before visiting the Region V office).

Air Programs Branch, Region V, Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604.

Indiana Air Pollution Control Division, 1330 W. Michigan Street, Indianapolis, Indiana 46206

Comments on this action should be addressed to: Gary Gulezian, Chief, Regulatory Analysis Section (5AP-11), Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Robert B. Miller, Air Programs Branch, Region V, Environmental Protection Agency, (312) 886-6031.

SUPPLEMENTARY INFORMATION: Under Section 107(d) of the Clean Air Act (CAA), the Administrator of EPA determined the status of attainment of the NAAQS for SO_2[1] in each area of Indiana (43 FR 8962 (March 3, 1978) and 43 FR 45993 (October 5, 1978)). EPA determined that Sullivan County, the County in which IMEC's Breed Plant is located, was attaining the NAAQS. On June 29, 1979 Indiana submitted a revised SO_2 plan for all counties in Indiana which established a 6.0 lbs/MMBTU emission limit for all existing fuel combustion sources in the State, except certain site-specific limits set forth in an appendix to the regulation. On March 12, 1982, EPA approved this regulation, recodified at 325 IAC Article 7, with certain exceptions (47 FR 10860).

325 IAC Article 7 provides that Indiana may adopt operating permits which contain site-specific emission limits less stringent than those contained within 325 IAC Article 7, as long as the NAAQS are protected with the less stringent limits. These relaxed limits supersede those in 325 IAC Article 7 and must be submitted to EPA as revisions to the SIP. Pursuant to this provision, Indiana adopted an operating permit for Breed that contained a 9.57 lbs/MMBTU SO_2 emission limit and submitted it to EPA on February 26, 1981.[2] EPA reviewed the technical information submitted with this revision and found that additional information was required to assure that the NAAQS would be maintained at the revised emission limits. Therefore, EPA returned the SIP revision to Indiana for additional information on August 20, 1981. On June 22, 1982, Indiana resubmitted the Breed emission limit to EPA with additional technical information.

The technical information submitted included computer dispersion modeling analyses which were based on EPA's CRSTER model, the reference model for single sources in rural areas. The CRSTER modeling predicts that at the revised emission limit Breed contributes second-high concentrations of 128 micrograms of SO_2/cubic meter ($\mu g/m^3$) on a 24-hour basis and 936 $\mu g/m^3$ on a 3-hour basis. It predicts an annual maximum contribution of 5 $\mu g/m^3$. When background SO_2 levels are added to the Breed contributions, these predicted ambient levels are below the NAAQS. Additionally, available data from the three continuous ambient SO_2 monitors operated by IMEC in the neighborhood of the Breed Plant do not show violations of the NAAQS for the three available years, 1979 to 1981.

Information presented by the State indicates that the 9.57 lbs/MMBTU[3] emission limit within the permit is based on the sulfur content of the coal "as burned" on the second highest sulfur content day in 1975 at Breed. Fuel data for subsequent years show that the sulfur content has not changed significantly since 1975. The 9.57 lbs/MMBTU emission limit is, therefore, essentially a worst-case, status quo rate.

Impact on SO_2 Nonattainment Areas

Vigo County, Indiana is the only SO_2 nonattainment area within 50 kilometers (km) of the IMEC Breed plant. Breed is approximately 35 km from the area in Vigo County where the predicted SO_2 concentrations are highest. On May 13, 1982, EPA approved the SO_2 SIP for Vigo County (47 FR 20583). EPA's approval was partially based on data from a modeling analysis performed by the local task force. This analysis shows, that the revised emission limits for Vigo County sources protect the SO_2 NAAQS. To further assess the impact of Breed's emissions in relationship to the Vigo County SIP, EPA remodeled Vigo County, using the proposed Breed emission limits, at the critical receptors for the five worst case days identified by the Vigo County modeling submitted by the State on which Breed could possibly contribute to impacts from the Virgo County sources. This analysis shows that the addition of Breed's contribution to the modeled impacts from the Vigo County sources does not result in a violation of the 24-hour SO_2 NAAQS (the constraining standard) on any day modeled. Therefore, it is concluded that the Breed revision will not interfere with the ability of the Vigo County SO_2 SIP to ensure attainment and maintenance of the SO_2 NAAQS in Vigo County.

Interstate Impact and Prevention of Significant Deterioration (PSD)

EPA also reviewed the proposed revision for consistency with Section 110(a)(2)(E) of the Clean Air Act. Due to present limitations on modeling, the modeling was limited to a 50km radius around the Breed Plant. (See *Guideline on Air Quality Models* (EPA-450/2-78-027, April 1978).)

The IMEC Breed plant is located in west central Indiana, approximately six km from the Wabash River, which forms the Indiana-Illinois border. Illinois is the only State within 50 km of the plant. The second highest predicted concentrations at receptors in Illinois within 50 km of the Breed plant are 76 $\mu g/m^3$ (24-hour) and 396 $\mu g/m^3$ (3-hour). These constraining impacts in Illinois are well below the corresponding NAAQS. Also, based on the CRSTER model results, Breed's predicted SO_2 impacts at 15 km

[1] The primary SO_2 NAAQS is violated when, in a calendar year, either: (1) the annual arithmetic mean value of a site's SO_2 concentration exceeds 80 micrograms per cubic meter of air (80 $\mu g/m^3$) (the annual primary standard), or (2) the maximum 24-hour concentration of SO_2 at any site exceeds 365 $\mu g/m^3$ more than once (the 24-hour primary standard). The secondary SO_2 NAAQS is violated when the maximum 3-hour concentration at any site exceeds 1,300 $\mu g/m^3$ more than once.

[2] This permit also contains requirements related to visible emissions. EPA will take separate action on that portion of the permit at a later time.

from the facility decrease to 62 $\mu g/m^3$ for the 24-hour NAAQS (49% of maximum), and to 265 $\mu g/m^3$ for the 3-hour NAAQS (28% of maximum). Because SO_2 concentrations decrease markedly within a short distance from the facility and fall well below the corresponding standards, Breed is not expected to contribute significantly to SO_2 concentrations in any area—nonattainment or attainment—in either nearby Illinois or distant States.

Under Part C of the Act, SIP relaxations must be reviewed for PSD increment consumption if the PSD baseline has been triggered in the affected area. However, since no PSD permit application for an SO_2 source has been submitted in Sullivan County and no such application has been submitted in any surrounding county for an SO_2 source which would trigger the PSD baseline in Sullivan County, the PSD baseline has not been triggered in the County. (This SIP revision itself does not trigger the baseline, since it is not associated with an increase in emissions from the Breed facility.) Since the baseline has not been triggered, the revision cannot consume PSD increment in the Sullivan County. Emissions from this plant will be reflected in whatever baseline concentration is established in the future in both Sullivan County and any more distant areas in which the baseline has not yet been triggered.

Based on emissions data supplied by Indiana, EPA believes that the revision establishes emission limitations no higher than the level of actual emissions over the past several years. For this reason, the emissions from this plant are already reflected in the PSD baselines in those areas in Indiana, Illinois, and surrounding States in which the baseline has already been triggered. Therefore, the revision will not consume PSD increments in those areas.

For the reasons discussed above, EPA believes that this proposed revision will neither prevent attainment nor intefere with PSD measures in other States. Therefore, EPA believes that the revision would be consistent with Section 110(a)(2)(E) of the Act.

All interested persons are invited to submit written comments on EPA's proposed SIP action. Written comments received by the date specified above will be considered in determining whether EPA will take action as proposed. After review of all comments submitted, EPA will publish in the **Federal Register** the Agency's final action.

Under 5 U.S.C. 605(b), the Administrator has certified that SIP approvals do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709).

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

[Region II Docket No. 4; A-2-FRL 2194-4]

Approval and Promulgation of Implementation Plans; Revisions to the New York State Implementation Plan

AGENCY: Environmental Protection Agency.

ACTION: Notice of proposal.

SUMMARY: This notice announces the receipt of a request from the State of New York to revise its State Implemenation Plan (SIP). If approved by the Environmental Protection Agency (EPA), this revision would allow Orange and Rockland Utilities, Inc., to reconvert units 4 and 5 of its Lovett generating station from oil to coal. The revision would impose either a sulfur dioxide emission limit not to exceed 1.0 pound of sulfur dioxide per million British thermal units (Btu) heat input (equivalent to the use of 0.7 percent sulfur content coal) for units 4 and 5 if both are operated on coal, or an emission limit not to exceed 1.5 pounds of sulfur dioxide per mission Btu input (1.0 percent sulfur content coal equivalent) for one unit if the other unit is either operated on fuel oil (at 0.37 percent sulfur content, by weight) or natural gas or is not operated. Both of these options produce a similar air quality impact and therefore can be considered identical.

DATE: Comments must be received on or before April 14, 1983.

ADDRESSES: All comments should be addressed to: Jacqueline E. Schafer, Regional Administrator, Environmental Protection Agency, Region II Office, 26 Federal Plaza, New York, New York 10278.

Copies of the proposal are available for public inspection during normal business hours at:

Environmental Protection Agency, Air Programs Branch, Room 1005, Region II Office, 26 Federal Plaza, New York, New York 10278

New York State Department of Environmental Conservation, Division of Air, 50 Wolf Road, Albany, New York 12233

New York State Department of Environmental Conservation, Region 3 Office, 202 Mamaroneck Avenue, White Plains, New York 10601

FOR FURTHER INFORMATION CONTACT: William S. Baker, Chief, Air Programs Branch, Room 1005, Environmental Protection Agency, Region II Office, 26 Federal Plaza, New York, New York 10278, (212) 264-2517.

SUPPLEMENTARY INFORMATION: On June 7, 1982 New York State submitted to the Environmental Protection Agency (EPA) a proposed revision to its State Implementation Plan (SIP). Supplemental information modifying the State's proposed revision was sent to EPA on October 14, 1982. This request, if approved by EPA, would allow Orange and Rockland Utilities, Inc. (O&R), to reconvert units 4 and 5 of its Lovett facility from oil to coal. The Lovett generating station is located on the west bank of the Hudson River in Tomkins Cove in the town of Stony Point, Rockland County, New York.

The current normally applicable regulatory sulfur dioxide emission limitation for coal-fired power plants in this part of New York State is 0.2 pounds of sulfur dioxide per million Btu heat input (0.14 percent sulfur content coal equivalent). The revision New York has submitted, established under State procedures as a "special limitation," would impose either a sulfur dioxide emission limit not to exceed 1.0 pound of sulfur dioxide per million British thermal units (Btu) heat input (equivalent to the use of 0.7 percent sulfur content coal) for units 4 and 5 if both are operated on coal or an emission limit not to exceed 1.5 pounds of sulfur dioxide per million Btu heat input (1.0 percent sulfur coal equivalent) for one unit if the other unit is either operated on complying fuel oil (at 0.37 percent sulfur content by weight) or natural gas or is not operated. Both of these options produce a similar air quality impact and therefore can be considered identical. It should be noted that the State rejected O&R's initial request to burn coal with a sulfur content of 1.5 percent, by weight, in both units on the basis that such operation would violate the National Ambient Air

Quality Standards and the Prevention of Significant Deterioration (PSD) increments for sulfur dioxide. The sulfur dioxide emission limits ultimately adopted by the State for inclusion in its SIP require the purchase of the lowest sulfur content coal which is reasonably available. This special limitation, authorized by Section 225.2 of Title 6 of the Official Compilation of Codes, Rules and Regulations of the State of New York, also requires O&R to meet eleven conditions which are described in detail in the State's submittal.

The State's submittal consists of an order signed by the Commissioner of the New York State Department of Environmental Conservation (NYSDEC), a public hearing officer's report, proof of publication of the State's hearing notice and a technical report prepared by NYSDEC in support of its SIP revision. The SIP revision was submitted in accordance with all EPA requirements under 40 CFR Part 51, including a public hearing, which was held by the State on June 22 and 23, 1981.

In addition to requiring O&R to burn low sulfur coal, the State found that O&R should raise the height of the affected stacks to "Good Engineering Practice" (GEP) height. The purpose of raising stacks to GEP height is to reduce the potential for emissions to be brought down to the ground level in excessive concentrations. At the Lovett plant, this phenomenon, known as "aerodynamic downwash", results from disturbed wind flow around the power house building. The State has determined that the GEP stack height for units 4 and 5 is 475 feet. Currently, the stack for unit 4 is 206 feet tall and the stack for unit 5 is 239 feet tall. In making its GEP finding, the State indicated that these two existing stacks would be combined into a single stack and raised to the GEP height.

EPA has conducted a thorough review of New York's SIP revision submittal, including the State's modeling of the sulfur dioxide impact of the Lovett coal conversion. EPA's *Guideline on Air Quality Models* (EPA–450/2–78–027, April 1978) states that no refined, widely available models applicable to complex terrain have been identified. The *Guideline* recommends, therefore, that a complex terrain situation, such as that found near the Lovett plant, be modeled on a case-by-case basis. The State investigated several air quality models to evaluate the impact of the Lovett coal conversion. None of the models the State reviewed, however, has been validated as being able to predict accurately the effect of burning low sulfur coal at the Lovett plant. While EPA believes that the State has made a good faith effort using the available data and modeling techniques to predict the air quality impact of the conversion, the Agency notes that the State's use of several unverified assumptions may have caused an inaccurate estimation of the sulfur dioxide concentrations for the extremely complex terrain that surrounds the Lovett facility.

Following receipt of the New York submittal, EPA performed its own modeling of the Lovett conversion's air quality impact. Although this modeling indicated that the SIP revision might not protect the national standards, the complex terrain modeling uncertainties discussed above prevent the Agency from verifying whether violations will occur. While in most instances EPA can rely on its *Guideline* models to fulfill relatively easily Section 110(a)(2)'s requirement that the Agency determine whether a SIP limitation will assure attainment of air quality standards, the uncertainties of models applicable to the Lovett plant complicate the Agency's task under that Section.

In this case, EPA considered another important factor relevant to the validity of the revision. Although the dispersion modeling performed by the State predicts protection of all ambient sulfur dioxide standards, New York has also required that, if this SIP revision is approved, O&R will perform a study to measure actual sulfur dioxide concentrations following the coal conversion. Air quality monitors would be positioned to measure the maximum impact of emissions from the Lovett facility. This monitoring study would enable EPA and the State to evaluate the State's initial modeling assumptions and to narrow the range of uncertainties in the modeling analysis. This would allow the State to validate an appropriate model soon after the post-conversion startup. If this modeling or monitoring were to show that a revised sulfur dioxide emission limit is necessary to protect national standards, the State would be required to submit such a revision and achieve the standards as expeditiously as practicable.

The facts discussed above leave EPA with essentially two options. The Agency could decide to approve the Lovett revision. The primary fact supporting approval is that only post-conversion monitoring can verify the accuracy (or inaccuracy) of the State's complex terrain modeling results. Alternatively, EPA could disapprove the proposed Lovett revision, based on the State's admitted difficulty in substantiating the accuracy of its modeling.

EPA believes that the second of these approaches would be tantamount to presuming the inadquacy of the State's attainment demonstration because of the uncertainties associated with state-of-the-art complex terrain modeling. The Agency is reluctant to presmue inadequacy in this case, given the strenuous, good faith efforts of the State and O&R to provide an adequate demonstration. Given the uncertainties and limitations on the analytical tools available here, the Agency believes this may be a proper case in which to expand its consideration beyond primary reliance on modeling in making regulatory decisions. In addition, it should be noted that the coal conversion would not affect the Lovett facility's ability to revert to burning low sulfur coal. Thus, the plant could easily avoid violations by complying with whatever stricter limitations might be proved necessary by the post-conversion monitoring results. This additional fact supports approval of the revision.

EPA reviewed the Lovett revision for consistency with Section 110(a)(2)(E) of the Clean Air Act. For the reasons discussed in EPA's technical background document, the Agency believes that the revision would neither prevent attainment of the ambient sulfur dioxide standards nor interfere with PSD measures in other States.

Because of the uncertainties presented here, EPA has decided that the proper course is to solicit public comment on the adequacy of the proposed Lovett SIP revision. This notice is issued as required by Section 110(a) of the Clean Air Act, as amended, to advise the public that comments may be submitted on or before [30 days from date of publication] on whether the proposed SIP revision should be approved or disapproved. The Administrator's decision regarding approval or disapproval of this proposed SIP revision will be based on whether it meets the requirements of Section 110 of the Clean Air Act and EPA regulations in 40 CFR Part 51.

Pursuant to the provisions of 5 U.S.C. 605(b) the Administrator has certified that SIP approvals under Section 110 of the Clean Air Act will not have a significant economic impact on a substantial number of small entities (46 FR 3709; January 27, 1981). The attached rule, if promulgated, constitutes a SIP approval under Section 110 within the terms of the January 27 certification. This action only approves State actions. It imposes no new requirements.

Under Executive Order 12291, EPA must judge whether a regulation is "Major" and therefore subject to the requirement of a Regulatory Impact Analysis. This regulation is not Major because, generally, it only proposes to approve a regulation that currently applies under New York State law.

The Office of Management and Budget has exempted this proposed rule from the requirements of Section 3 of Executive Order 12291.

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons, Intergovernmental relations.

(Sec. 110 and 301 of the Clean Air Act, as amended (42 U.S.C. 7410 and 7601))

Dated: October 25, 1982.

Jacqueline E. Schafer,

Regional Administrator, Environmental Protection Agency.

Department of the Interior

Office of Surface Mining Reclamation and Enforcement

Abandoned Mine Reclamation Fund; Fee Collection and Coal Production Reporting; Final Rule

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 870

Abandoned Mine Reclamation Fund; Fee Collection and Coal Production Reporting

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Final rule.

SUMMARY: The Office of Surface Mining (OSM) has revised the fee collection regulations establishing a different interest rate to be assessed against delinquent fee payments and requiring that all quarterly fee payments of $100,000 or more per company be made by electronic transfer of funds to the Treasury Financial Communications System.

The previous interest rate of 12% per annum, promulgated by OSM on May 15, 1978, for reclamation fee debts, was established under an exception granted by the Department of the Treasury. That exception has now been revoked, and OSM is required to use the standard rate which varies quarterly and is required to be used by all Federal agencies. Use of the Treasury Financial Communications System for accounts of $100,000 or more will expedite the Government's collection efforts.

EFFECTIVE DATE: April 1, 1983.

FOR FURTHER INFORMATION CONTACT: Dr. Phyllis Thompson, Chief, Division of Abandoned Mine Land Reclamation, 1951 Constitution Ave., NW., Washington , D.C. (202) 343-7951.

SUPPLEMENTARY INFORMATION:

Background

Section 402(b) of the Surface Mining Control and Reclamation Act of 1977 (the Act) (30 U.S.C. 1232(b)) provides that a reclamation fee on produced coal shall be paid no later than thirty days after the end of each calendar quarter. Section 412(a) of the Act (30 U.S.C. 1242(a)) authorizes the Secretary of the Interior to do all things necessary or expedient, including promulgation of rules and regulations, to implement and administer the provisions of the Act relating to Abandoned Mine Reclamation (Title IV).

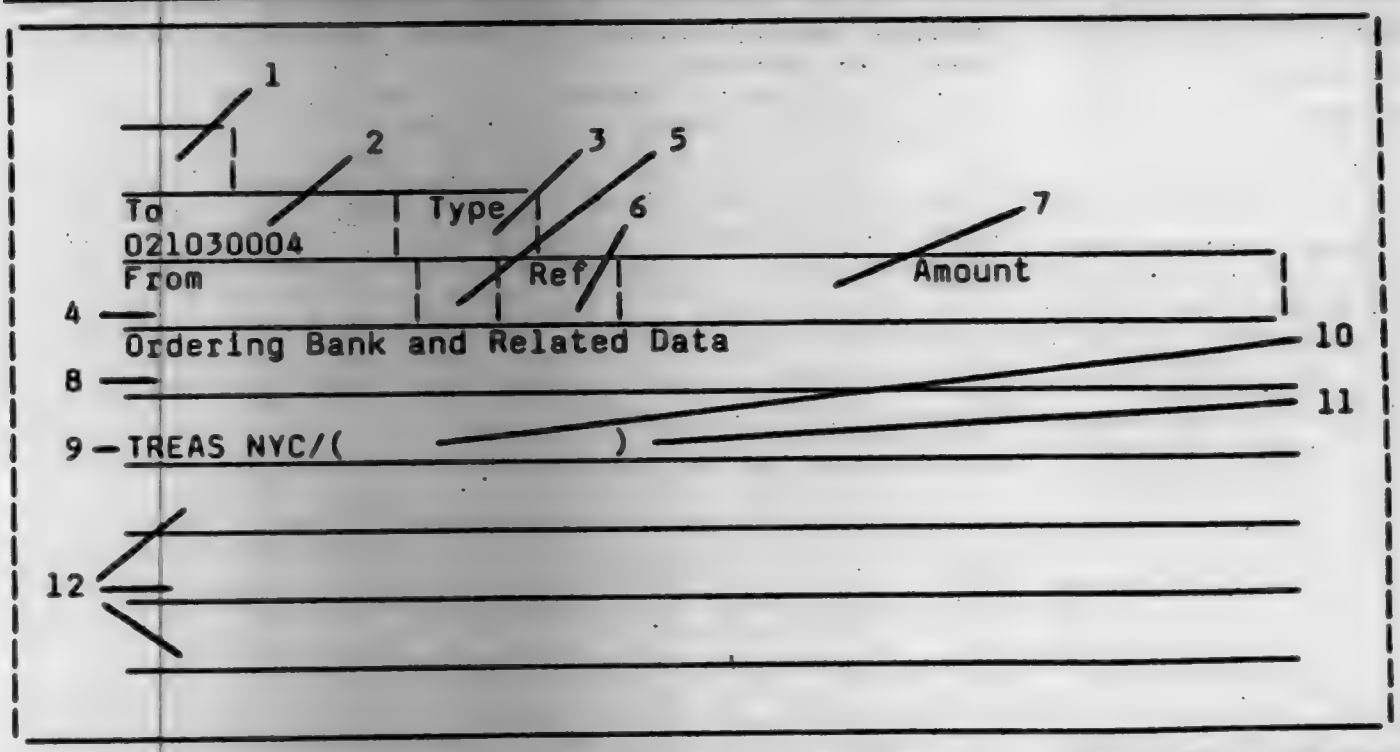
On June 30, 1982 (47 FR 28574), OSM published the latest revised rules to implement Section 402. On October 6, 1982, OSM published a proposed rule concerning the electronic transfer of fee payments and revised interest rates on delinquent fee payments. The previous interest rate of 12% per annum, promulgated by OSM on May 15, 1978, for reclamation fee debts (43 FR 20795), was established under an exception granted by the Department of the Treasury. That exception has now been revoked in the interest of applying a uniform Government-wide system. OSM is required to use the standard rate which varies quarterly. This rule establishes the interest rate on late reclamation fee payments as the same rate used for all Federal claims in applying late charges on late payments due the Federal Government. This interest rate is transmitted to Federal agencies quarterly as required under the Treasury Fiscal Requirements Manual (TFRM 6-8020.20). This percentage rate (a per annum figure) is based on the current value of funds to the Treasury and is transmitted to all Federal agencies via TFRM bulletins prior to the first day of each calendar quarter. For example, the percentage rate to be applied during the period of July 1 through September 30, 1981, was 16.19% (TFRM Bulletin No. 81-09) while the rate for this same period during 1982 was 14.28% (TFRM Bulletin No. 82-16).

Unless the Department of the Treasury grants an exception, this interest rate must be applied to all debts owed to Federal agencies (I TFRM 6-8020.20).

The revised rule also requires those companies which owe $100,000 or more for quarterly reclamation fees to submit such payments through the use of the Treasury Financial Communications System (TFCS). Approximately 100 companies pay $100,000 or more per quarter to OSM. In fact, payments from these companies total $35-$40 million per quarter. Instead of submitting checks to OSM for these amounts, these companies must have their banks wire funds through the Federal Reserve System to the account of the United States Treasury at the Federal Reserve Bank of New York (FRBNY). Through use of the TFCS for these large accounts, the Department will be able to expedite and streamline its fee collection efforts.

The Treasury Financial Communications System is the computer-to-computer link between the U.S. Department of the Treasury and the Federal Reserve Bank of New York. This system provides the capability for: (1) Automated receipt and processing of funds transfer and (2) computer-assisted generation of funds transfer between Treasury, Federal Reserve banks, and other banks utilizing the Federal Reserve Communications System (FRCS). The TFCS also integrates such traffic into Treasury's Government-wide Accounting System which accounts for all Federal receipts and outlays. Treasury maintains an account at FRBNY. As a result, banks that maintain an account at a Federal Reserve bank may send funds transfers to Treasury through the FRCS for credit to the Account of the U.S. Treasury at FRBNY. Funds transfers between Treasury and banks that do not maintain an account at a Federal Reserve bank are processed through correspondent banks that do maintain an account at a Federal Reserve bank.

Following are the TFCS funds transfer message format and specific instructions from the Treasury Fiscal Requirements Manual for fund transfer messages to be used in paying reclamation fees:



Funds Transfer Message Format

Item 1—PRIORITY CODE—The priority code will be provided by the sending bank. (Note: Some Federal Reserve district banks may not require this item.)

Item 2—TREASURY DEPARTMENT CODE—The nine-digit identifier "021030004" is the routing symbol of the Treasury. This item is a constant and is required for all funds transfer messages sent to Treasury.

Item 3—TYPE CODE—The code will be provided by the sending bank.

Item 4—SENDING BANK CODE—This nine-digit identifier will be provided by the sending bank.

Item 5—CLASS CODE—The class code may be provided by the sending bank at its option (if permitted by its Federal Reserve district bank).

Item 6—REFERENCE NUMBER—The reference number may be inserted by the sending bank to identify the transaction.

Item 7—AMOUNT—The amount will include the dollar sign and the appropriate punctuation including cents digits. This item will be provided by the depositor.

Item 8—SENDING BANK NAME—The telegraphic abbreviation which corresponds to item 4 will be provided by the sending bank.

Item 9—TREASURY DEPARTMENT NAME—This item is of critical importance. It must appear on the funds transfer message in the precise manner as stated to allow for the automated processing and classification of the funds transfer message to the agency location code of the appropriate agency. The item is comprised of a rigidly formatted, nonvariable sequence of 11 characters defined as follows:

Character #(s)	Character(s)	Definition
1-5	TREAS	First part of Treasury Department telegraphic abbreviation.
6		Space (leave blank).
7-9	NYC	Second part of Treasury Department telegraphic abbreviation.
10	/	Slash.
11	(	Left parenthesis.

The 11 characters must be left-justified on line 5 of the funds transfer message and must appear as follows: TREAS NYC/(

Item 10—AGENCY LOCATION CODE—This item is of critical importance. It must appear on the funds transfer message in the precise manner as stated to allow for the automated processing and classification of the funds transfer message to the agency location code of the appropriate agency. The agency location code refers to three-, four-, or eight-digit numeric symbols used to identify Government departments and agencies (e.g., accounting stations, disbursing and collecting offices). OSM's unique code must be specified in the funds transfer message in order for the funds to be correctly classified to the agency. The code must immediately follow the left parenthesis of item 9, must contain no spaces, dashes, or other extra characters, and must be immediately followed by a right parenthesis. This item would appear on line 5 of the funds transfer message in conjunction with item 9 as shown below:

TREAS NYC/(14180001)

Item 11—AGENCY NAME—OSM

Item 12—THIRD PARTY INFORMATION—Information to identify the reason for the funds transfer should be provided here. "Reclamation FEES '83" is an example, meaning reclamation fees for the first quarter of 1983.

These instructions will be mailed to coal-producing companies, along with Forms OSM–1's and OSM–1(a)'s, which are forms used to report quarterly coal production to OSM. Submission of OSM–1's and OSM–1(a)'s will remain the same, except that companies required to use wire transfer should indicate on the reporting form(s) that fees have been submitted via wire transfer.

These rules changes—the new interest rate and the requirement for electronic transfer of payments totalling $100,000 or more per quarter per company—become effective for all reclamation fees due or overdue on April 1, 1983.

Disposition of Comments

Comments from representatives of industry and various organizations were received and considered in the rulemaking process. All substantive comments received are addressed in the following preamble.

All comments received are available for inspection in the Administrative Record, Room 5315, 1100 L St., N.W., Washington, D.C.

One commenter objected to the proposed rule because it allegedly goes beyond the intent of Congress. This commenter states that the proper interpretation of the "payment by" language in Subsection 402(b) of the Act

is "post marked by". This commenter believes that unless a statute requires receipt of documents or money by a certain date, legal compliance with the date only requires the deposit of the document or payment in the U.S. mail, properly addressed with postage prepaid.

OSM's response is that Congress has specifically granted the Secretary broad discretionary authority to do all things necessary or expedient, including the promulgation of rules and regulations, to implement and administer the provisions of Title IV. Since payment is due by the 30th day after the end of the calendar quarter, this rule is merely designed to more efficiently collect monies owed the United States. The operator has no specific legal right under SMCRA to define the manner of payment. The mode and manner of payment is an administrative decision and as such properly comes within the authority granted to the Secretary under Section 412(a) of the Act.

Another commenter pointed out that since the AML fund earns no interest, the Government has no legitmate need for receiving the money quicker, and it is better to let the operator enjoy the use of his monies for the four or five extra days. OSM's response is that the present rule results from an effort to improve the management process and administrative system of the Federal Government. As part of this reform effort initiated by the President, agencies were asked to improve their cash management procedures including the acceleration of collection procedures and the electronic transfer of funds. This rule is in furtherance of this objective and is reasonably designed to collect the debt owed the Government as efficiently as possible. Accordingly, no change has been made to the rule.

One commenter noted that the proposed rule would establish a selective rate structure which favors those who produce at a lessor volume. As an alternative this commenter suggested that equal treatment be given to all affected companies regardless of the amount of payment. OSM's response is that this is a reasonable classification which does not violate the equal protection clause of United States Constitution. This rule establishes an administrative procedure designed to more efficiently collect large fees owed to the Government and is therefore in furtherance of the trust fund responsibilities placed on the Secretary in Title IV of the Act.

Determination Under Executive Order 12291, the Regulatory Flexibility Act and the National Environmental Policy Act

The Department of the Interior has determined that this document is not a major rule under E.O. 12291 and certifies that this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.)

OSM has been granted a categorical exclusion from the procedures of the National Environmental Policy Act for the subject of reclamation fees imposed by Pub. L. 95-87 (46 FR 7487 January 23, 1981).

The information collection requirements contained in §§ 870.15 (c) and (d) were approved by OMB under 44 U.S.C. 3507 and assigned clearance number 1029-0063.

List of Subjects in 30 CFR Part 870

Coal mining, Reporting and recordkeeping requirements, Surface mining, Underground mining.

Dated: February 16, 1983.

Daniel N. Miller, Jr.,

Assistant Secretary for Energy and Minerals.

PART 870—ABANDONED MINE RECLAMATION FUND—FEE COLLECTION AND COAL PRODUCTION REPORTING

30 CFR 870.15 (c) and (d) are revised to read as follow:

§ 870.15 Reclamation Fee Payment

* * * * *

(c) As of April 1, 1983, delinquent reclamation fee payments are subject to interest at the rate established quarterly by the U.S. Department of the Treasury for use in applying late charges on late payments to the Federal Government, pursuant to I Treasury Fiscal Requirements Manual 6-8020.20. The Treasury current value of funds rate is published by the Fiscal Service in the Notices section of the Federal Register. Interest shall begin to accure on the 31st day following the end of the calendar quarter and will run until the date of payment or until judgment is rendered by a court of competent jurisdiction in an action at law to compel payment of debts. OSM will bill delinquent operators on a monthly basis and initiate whatever action is necessary to secure full payment of all fees and interest. All operators, including those with zero production, will receive Form OSM-1 or Form OSM-1(a) must submit a completed form, as well as any fee payment due.

(d) An operator who owes total quarterly reclamation fees of $100,000 or more for one or more mines must use the Treasury Financial Communications System, forward its payments by electronic transfer, and use OSM's approved form(s) to report production to the Denver address below. An operator who owes less than $100,000 quarterly reclamation fees for one or more mines may forward payments by electric transfer, or must submit a check or money order payable to Office of Surface Mining, in the same envelope with OSM's approved form(s) to: Office of Surface Mining Reclamation and Enforcement, U.S. Department of Interior, P.O. Box 25065—DFC, Denver, Colorado 80225.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.) Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/FHWA	USDA/SCS		DOT/FHWA	USDA/SCS
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/MA	LABOR		DOT/MA	LABOR
DOT/NHTSA	HHS/FDA		DOT/NHTSA	HHS/FDA
DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

List of Public Laws

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's List of Public Laws.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

The President

Proclamation 5031 of March 14, 1983

National P.O.W.–M.I.A. Recognition Day, 1983

By the President of the United States of America

A Proclamation

Since the earliest days of our Nation, America's men and women have answered the call to duty. In each of our country's conflicts, our prisoners of war have endured extreme hardships and have been required to make great sacrifices. But even when facing the most extreme adversity, they have proudly defended American ideals. Their burden has been magnified when they were subject to mistreatment, torture, or death in violation of fundamental moral standards and international codes of conduct.

Our country is also acutely aware of the deep suffering experienced by the families of our servicemen held captive or missing in action. These families have faced a haunting uncertainty and awesome silence that tear at their hearts and earns the deep esteem of their countrymen.

American P.O.W.'s and M.I.A.'s are heroes who have gone beyond courage and beyond duty to an honored place in the souls of their fellow Americans. They symbolize the kind of singular sacrifice and devotion that has repeatedly proven instrumental in shaping our Nation's destiny. This country will never forget nor fail to honor those who have so courageously garnered our highest regard.

By Joint Resolution, the Congress has designated April 9, 1983, as National P.O.W.–M.I.A. Recognition Day. On this day, I firmly believe that we should recognize the special debt all Americans owe to our fellow citizens who gave up their freedom in the service of our country and to the families who have undergone a great travail.

We shall continue to remember our missing servicemen. Our Nation must never forget them. Resolution of their fate is, and will remain, a matter of the highest national priority. On April 9, 1983, a P.O.W.–M.I.A. Flag will fly over the White House, the Departments of State and Defense, and the Veterans Administration as a symbol of our unswerving commitment to resolving the fate of all servicemen still missing.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby designate Saturday, April 9, 1983, as National P.O.W.–M.I.A. Recognition Day, a day dedicated to all former American prisoners of war, to those still missing, and to their families. I call on all Americans to join in honoring those who have been held captive in war and their loved ones.

I call upon State and local officials and private organizations to observe this day with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this 14th day of March, in the year of our Lord nineteen hundred and eighty-three, and of the Independence of the United States of America the two hundred and seventh.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 48, No. 52
Wednesday, March 16, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

FEDERAL TRADE COMMISSION

16 CFR Part 13

[Docket C-3106]

McCaffrey and McCall, Inc.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Consent Order.

SUMMARY: In settlement of violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement requires a New York City advertising agency, among other things, to cease misrepresenting in advertisements that the Black Pro Shaver or any other drug or device will cure or minimize "razor bumps." The company is required to have a reasonable basis for advertising representations relating to the efficacy, performance or benefit of any drug, device or other product; is barred from making statements which are inconsistent with reliable scientific or medical evidence; and prohibited from misrepresenting the extent or results of product testing. The order also requires that the company maintain specific records for a period of three years and provide its sales and advertising personnel with a copy of the order.

DATE: Complaint and order issued March 7, 1983.[1]

FOR FURTHER INFORMATION CONTACT:
FTC/PA, Wallace S. Snyder, Washington, D.C. 20580. (202) 724–1499.

SUPPLEMENTARY INFORMATION: On Thursday, September 24, 1981, there was published in the **Federal Register**, 46 FR 47085, a proposed consent agreement with analysis In the Matter of McCaffrey and McCall, Inc., a corporation, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions or objections regarding the proposed form of order.

A comment was filed and considered by the Commission. The Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered its order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

The prohibited trade practices, and/or corrective actions, as codified under 16 CFR Part 13, are as follows: Subpart—Advertising Falsely or Misleadingly; § 13.170 Qualities or properties of product or service; § 13.190 Results; § 13.205 Scientific or other relevant facts; § 13.210 Scientific tests. Subpart—Corrective Actions and/or Requirements; § 13.533 Corrective actions and/or requirements; § 13.533–45 Maintain records. Subpart—Misrepresenting Oneself and Goods—Goods; § 13.1710 Qualities or properties; § 13.1730 Results; § 13.1740 Scientific or other relevant facts. Subpart—Neglecting, Unfairly or Deceptively, To Make Material Disclosure; § 13.1863 Limitations of product; § 13.1695 Scientific or other relevant facts.

16 CFR Part 232

Guides for Advertising Radiation Monitoring Instruments

AGENCY: Federal Trade Commission.

ACTION: Final revision of guides.

SUMMARY: In response to a request by the Federal Emergency Management Agency (FEMA), the Federal Trade Commission has decided to revise its "Guides for Advertising Radiation Monitoring Instruments" to reflect the new name of the agency responsible for establishing criteria applicable to the "Guides".

EFFECTIVE DATE: March 8, 1983.

FOR FURTHER INFORMATION CONTACT: FTC/PC, Lewis Franke, Washington, D.C. 20580. (202) 376-2891.

SUPPLEMENTARY INFORMATION: On November 8, 1967 the Commission published its "Guides for Advertising Radiation Monitoring Instruments". 32 FR 15533 (1967). Throughout the "Guides" reference is made to "Official OCD Criteria" or "Criteria for Radiation Instruments for Use by the General Public as published by the Office of Civil Defense".

By letter of November 24, 1982 the Federal Emergency Management Agency (FEMA) requested that the Commission revise the "Guides" to show the new name and address of the agency responsible for publishing the "Criteria". The Commission decided to grant the request and amends the "Guides" as of March 16, 1983.

List of Subjects in 16 CFR Part 232

Advertising, Civil defense, Radiation protection.

PART 232—[AMENDED]

§ 232.0-1 [Amended]

Section 232.0-1(e) of the Guides is amended by striking the term "OCD" and substituting therefor the term "Federal Emergency Management Agency (FEMA)". The words "Office of Civil Defense, Department of Defense, Washington, D.C. 20301" are stricken and substituted therefor are the words "Federal Emergency Management Agency, Washington, D.C. 20472". Footnote 1 is amended by striking the words "Office of Civil Defense, Department of Defense, Washington, D.C. 20301" and substituting therefor "Federal Emergency Management Agency, Washington, D.C. 20472".

§ § 232.1, 232.2 and 232.6 [Amended]

Sections 232.1, 232.2, and 232.6 are modified by striking the term "OCD" and substituting therefor the term "FEMA".

By the Commission.

Benjamin I. Berman,

Acting Secretary.

Revision of Financial Statement Requirements and Industry Guide Disclosure for Bank Holding Companies

AGENCY: Securities and Exchange Commission.

ACTION: Final rules.

SUMMARY: The Commission announces the adoption of final rules which amend Article 9 of Regulation S-X regarding financial statements filed for bank holding companies. The amendments to Article 9 are being adopted to (1) eliminate rules which are duplicative of generally accepted accounting principles ("GAAP"), (2) integrate and simplify the rules, (3) reflect current financial reporting practices, and (4) improve financial reporting generally. In addition, certain related amendments to the Guides for Statistical Disclosure by Bank Holding Companies have been adopted in order to incorporate a number of disclosures which have been eliminated from the requirements of Article 9. The Commission is also amending the proxy rules to eliminate the interim rule that requires only substantial compliance with Article 9 in annual reports to shareholders. Consequently, bank holding companies that are required to comply with the Commission's proxy rules will be required to include in annual reports to shareholders financial statements prepared in accordance with the requirements of Regulation S-X.

EFFECTIVE DATE: The rules adopted herein are applicable to financial statements for fiscal years ending on or after December 31, 1983, although earlier application of these rules in their entirety is permitted. Upon adoption of these rules, where comparative financial statements are presented, all reported periods should conform with the rules adopted herein.

FOR FURTHER INFORMATION CONTACT: Marc D. Oken (202-272-2157), Edmund Coulson (202-272-2130), or Eugene W. Green (202-272-2161), Office of the Chief Accountant, or Howard P. Hodges, Jr. (202-272-2553), Division of Corporation Finance, Securities and Exchange Commission, Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The Commission has adopted a comprehensive revision of Article 9 of Regulation S-X (17 CFR Part 210), which governs the form and content of financial statements filed for bank holding companies. This revision, undertaken as part of the Commission's project to coordinate disclosure requirements under the Securities Act of 1933 (15 U.S.C. 77a et seq.) and the Securities Exchange Act of 1934 (15 U.S.C. 78a et seq.), is intended to simplify and improve financial reporting requirements. The rules delete certain existing Article 9 requirements that are duplicative of GAAP or that are no longer necessary. The final rules generally reflect current financial reporting practices, except for the income statement presentation of investment securities gains or losses, the disclosure requirements for loans to related parties and parent company financial information. These issues are discussed further below.

Certain disclosure requirements (which were previously included in Article 9 and thus were required in the primary financial statements) have been relocated as part of the Industry Guides for Disclosure by Bank Holding Companies: Securities Act Industry Guide 3 and Exchange Act Industry Guide 3 ("Guide 3").[1] The most significant of these include information about short-term borrowings, disclosure of investment concentrations, and certain details about foreign activities. The Commission has concluded that these disclosures are primarily analytical in nature and thus are similar in character to the other types of disclosures called for by Guide 3.

[1] Items 301 and 302 of Regulation S-K (17 CFR Part 229).

The Commission solicited public comments on the proposed revision of Article 9 and Guide 3 in Release No. 33–6417 (July 9, 1982) (47 FR 32158 (July 26, 1982)). That release contained a detailed discussion of the proposed revisions. Rather than repeat those discussions, this release focuses on the principal differences from the proposal and the bases for such revisions.

The Commission received one hundred and ten letters of comment on the proposals. Most commentators expressed general support for the revisions; however, numerous suggestions were made regarding various aspects of the proposals. The two areas frequently commented on related to the proposed revision of the requirements for reporting investment security transactions and the proposed modification of the disclosure requirements dealing with loans to related parties. The Commission has carefully weighed the views of commentators and has accordingly made certain revisions to the proposed requirements. The views of commentators and the Commission response thereto are discussed below.

Investment Securities Gains or Losses. The proposed rules called for a change in the income statement format to report gains or losses on investment securities as a separate component of income before income tax expense, rather than as a separate item (less applicable taxes) after the caption entitled "income before securities gains or losses." This proposed elimination of the so-called two-step format of reporting income both before and after investment security transactions was commented on by approximately three-fourths of the respondents. A majority of those commentators opposed the proposed change. Objection to the proposed one-step approach was based primarily on the view that the two-step reporting format is a customary presentation which banks have used for many years, and that the inclusion of the effect of investment securities transactions as a part of income from banking operations is inappropriate and will result in a less useful presentation. A few commentators objected for other reasons, indicating that banks should have the ability to restructure their investment portfolio without penalizing current "operating" income with the related losses, or that the proposed change would increase the potential to manage or smooth reported earnings through the timing and selection of securities transactions.

Although the rule met with considerable opposition, a significant number of commentators strongly endorsed the change. Proponents indicated that a uniform net income approach was long overdue and that conforming the reporting format used by bank holding companies to that used by virtually all other entities would eliminate much of the confusion surrounding a bank holding company's actual earnings. These commentators generally agreed with the Commission that there is no conceptual basis for reporting investment transactions in a manner that implies that the gains or losses thereon represent something other than operating earnings. Further, the present reporting was viewed as being inconsistent in that security losses are excluded from operations, while the interest on the replacement security, which generally exceeds the interest on the previous security, is included in operating income. On this point, it was mentioned that the sale of securities generally has the same objective as the sale of mortgage loans and should be classified similarly.

Careful consideration has been given to the comments of respondents, particularly those of users, and the needs of investors. While the Commission understands that some persons believe that income before securities gains or losses provides a better basis upon which to evaluate trends, the Commission continues to believe that the two-step income format promotes the misconception that securities transactions are not part of normal banking operations, and that this format detracts from the importance of net income, which should be of primary importance to investors. Furthermore, there are many other discretionary items (similar to securities transactions) which are included in income before securities gains and losses.

For these reasons, and because of the potential for inappropriate reporting of certain transactions as security gains or losses, the Commission is adopting the one-step income statement format for bank holding companies as proposed, with one change. In response to commentator suggestions that the proposed presentation of securities gains or losses as a separate caption after other income and other expenses retains some of the complexity of the present two-step format, the final rules call for the presentation of investment securities gains and losses as a separate subcategory of other income.

In response to certain commentator suggestions that the one-step format will somehow influence investment policies regarding the content of the investment portfolio and the restructuring thereof (including the potential for registrants to manage earnings through the timing and selection of securities transactions), the Commission wishes to emphasize its belief that the revised reporting format should not have a bearing on prudent decision making. Furthermore, the Commission's existing disclosure requirements require specific disclosures about the content of the investment securities portfolio and the yields thereon. Such disclosures should provide users with the necessary information to evaluate management's investment policies and strategies.

In response to certain commentator suggestions that the one-step format will increase the potential for registrants to manage earnings, the Commission emphasizes the responsibility of bank holding companies, as well as all other registrants, to clearly identify and explain in the Management's Discussion and Analysis the nature and impact of all special, discretionary, or nonrecurring items (such as investment securities gains or losses) having a material effect on reported financial condition, changes in financial condition and results of operations.

The Commission is aware of certain private-sector initiatives to promote the adoption of the one-step income statement for the entire banking industry. This action would complement the Commission's action, which is only applicable to bank holding companies required to file with the Commission.

In addition, the FASB has a project on its agenda as part of its conceptual framework to explore display issues in reporting earnings.[2] This project will deal with, among other things, the purpose of the income statement, the concept of operating performance and how information should be displayed in the income statement (i.e., the reporting of details, subtotals, and which kind of items should be presented separately within the statement). The Commission expects that the outcome of this project (which has been under consideration for some time and is not yet near completion) should result in more useful financial reports for companies in all industries. Thus, the Commission encourages the FASB to aggressively pursue this project and stands ready to reconsider the provisions of Article 9

[2] FASB Exposure Draft, Proposed Statement of Financial Accounting Concepts, "Reporting Income, Cash Flows and Financial Position of Business Enterprises," (November 18, 1981). The comment period on this exposure draft expired May 3, 1982. After reviewing the comments received, the FASB decided that further development of concepts for reporting earnings should be delayed so as to be concurrent with the development of concepts for measurement and recognition criteria.

being adopted today, as well as other provisions of S–X governing the form and content of financial statements, based on its evaluation of the results of the FASB project.

Loans to Related Parties. The requirements regarding related party loan disclosures have been modified from the proposal in two significant ways. First, as proposed, the rules would have increased the range of relatives included as related parties by deleting the "same residence" provision of the existing requirement. In response to comments indicating that the inclusion of distant relatives was impractical and of little significance to investors, and also for purposes of achieving consistency with the revised Item 404 of Regulation S–K,[3] the Commission's final rules apply to members of the "immediate family" only. This revision will encompass more relatives than encompassed by the former rules, but will be significantly less burdensome than the proposal. Second, the proposed requirement that the amount of related party loans include loans to any corporation or organization of which an executive officer, director or principal shareholder of the registrant or any of its significant subsidiaries is an officer (but not a principal shareholder) has been deleted. This change is made in response to comments that the proposed rules would greatly expand the definition of related parties without providing meaningful information to financial statement users.

Certain other changes have been made in an effort to achieve greater consistency with the Commission's recent actions concerning Item 404 of Regulation S–K. The principal change in this respect is an exclusion from the related party loans required to be reported of all indebtedness which in the aggregate did not exceed $60,000 during the latest fiscal year.

Substantial commentary was also received regarding the proposed requirement to compute the weighted average amount of related party loans outstanding during the year and, in some cases, to discuss individual transactions when such weighted average amount significantly exceeded the amount of related party loans at the balance sheet date. In light of these comments, the final rules have been revised to amend this aspect of the proposal; the final rules call for an analysis of the amount of aggregate loans to related parties from the beginning to the end of the period for the latest fiscal year. The Commission believes that this disclosure should adequately inform investors as to the significance of loan transactions with related parties without imposing an undue burden on registrants.

A significant number of commentators suggested that the Commission eliminate all requirements for disclosure of related party loans because banks engage in lending transactions in the ordinary course of business. Many of these commentators suggested that no distinction is necessary for loans to related parties since such transactions are highly regulated and subject to certain legal requirements. Other commentators suggested that specific Commission requirements are unnecessary since GAAP adequately addresses this area under the Financial Accounting Standards Board's Statement of Financial Accounting Standards No. 57, "Related Party Disclosures" ("SFAS 57"). The Commission has considered the views of these commentators and continues to believe specific information about loans to related parties is material information for investors and shareholders. Furthermore, analysis of commentator letters indicates some confusion about the applicability of SFAS 57 to bank holding companies, since SFAS 57 contains an exception for certain related party transactions in the ordinary course of business. Therefore, the Commission has determined to retain its specific disclosure requirements to ensure consistent minimum disclosure in this important area.

Cash and Due from Banks. The proposed instruction regarding restricted cash balances has been modified with respect to the reference to Federal Reserve requirements. This change was made in response to statements by commentators that disclosure of such balances at the end of the year would rarely be of interest to investors, particularly since the reserve requirements are based on average balances. These commentators suggested that point in time disclosures are generally not meaningful since they could fluctuate significantly. The final requirements make reference to disclosure of average Federal Reserve balances. They also retain the general requirement to disclose withdrawal and usage restrictions and compensating balance requirements. (See section 203.02.b of the Codification of Financial Reporting Policies for related discussion of disclosures of average restricted balances.)

Short-Term Investments. The rules being adopted for interest-bearing deposits in other banks have been revised in response to the comments. Under the proposal, these deposits would have been presented in a new short-term investment category. Commentators stated that these deposits can have maturities longer than one year and that their risk characteristics differ from those of other short-term investments. Accordingly, the final rules require interest-bearing deposits in other banks to be included as a separate line item following cash and due from banks. In addition, the final rules require Federal funds sold and securities purchased under resale agreements to be shown as a separate caption, with all other short-term investments presented separately. This presentation is consistent with the new Bank Audit Guide which has been approved for issuance by the American Institute of Certified Public Accountants.

Nonperforming Loans. The Commission proposed several minor changes to the Guide 3 requirements involving the determination and reporting of nonperforming loans. Various commentators questioned these modifications as well as some requirements which were retained from the existing rules. Since the Commission plans to consider publishing a separate proposal regarding disclosures about nonperforming loans, no changes from the present requirements regarding nonperforming loans have been made in this release.

Bankers' Acceptances. In the proposing release, the Commission requested comments on the balance sheet presentation of banker's acceptance transactions. Although no changes were proposed to the present requirement to disclose on the balance sheet amounts due from customers on acceptances and banks' acceptances outstanding as assets and liabilities, the Commission noted that some have indicated that the current presentation should be reevaluated to determine whether these transactions should be reported as contingent liabilities.

Response to the inquiry was diverse. Some commentators maintained that acceptances are best characterized as contingent liabilities, while others stated their belief that the present practice is appropriate. A significant number of commentators suggested that this issue should be left to the private sector for resolution.

In the absence of a consensus as to the most appropriate accounting in this area, and considering the complexity of the issues, the Commission has

[3] On December 2, 1982, the Commission adopted final rules regarding disclosure of certain relationships and transactions involving management: Securities Act Release No. 6441 (December 13, 1982) (47 FR 55866).

determined that it will not take any further action at this time. Rather, the Commission encourages industry and accounting groups to continue to consider this issue, and if deemed necessary, to refer the matter to the Financial Accounting Standards Board for resolution.

Parent Company Financial Information. In the proposing release, the Commission requested comments on the need for parent company financial information when consolidated financial statements are presented for bank holding companies. The response to this inquiry indicates that many users and preparers of bank holding company financial statements strongly believe that information provided by separate financial statements of the parent company are necessary for informed decisions since intercompany loans, advances and cash dividends by bank subsidiaries are subject to substantial regulatory restrictions. The Commission believes that these views are valid and that the parent company information should be widely available to assist in making informed investment decisions. Accordingly, the final rules provide that the condensed parent only financial information currently provided in Schedule III (modified to prescribe certain separate disclosures about bank and non-bank subsidiaries which was previously required in a schedule) [4] be presented in the notes to the consolidated financial statements. The effect of the change will be to require parent company financial information in the annual reports to shareholders of bank holding companies.

Other. In addition to various editorial revisions, certain other substantive changes have been made in the final rules:

—The instructions in Article 9 concerning disclosure of the valuation of trading account assets have been deleted since GAAP calls for such assets to be carried at market value.

—A provision was added to Rule 9–03(7) allowing the registrant to use different loan categories than those specified if it results in a more meaningful presentation; this provision currently exists in Article 9 but was not included in the proposal.

—The requirements of Section V–A of Guide 3 regarding the types of deposits have been amended to provide for disclosures of the average rates paid thereon. Also, an instruction was added to allow the use of captions other than those specified for domestic deposits if appropriate. These changes were made in light of the impact of deregulation on the costs and sources of funds, and should provide additional useful information about these funding sources and provide flexibility to appropriately describe the nature of the deposits.[5]

[4] The requirement to provide information in a schedule about investments in and indebtedness of and to bank subsidiaries, and cash dividends paid by bank subsidiaries was rescinded by Accounting Series Release No. 302 in Securities Act Release No. 6359 (November 6, 1981) (46 FR 56171).

[5] As provided for in General Instruction No. 5 of Industry Guide 3, if information as to average rates paid on domestic deposits or the average balances of the categories of foreign deposits is not reasonably available on an historical basis, a waiver may be granted and thus these disclosures may be provided prospectively.

Codification Update

The "Codification of Financial Reporting Policies" announced in Financial Reporting Release No. 1 (April 15, 1982) (47 FR 21028) is updated to:

1. Add the following sentence to the bracketed introduction to Section 401:

In FRR 11, the Commission adopted further revisions to Article 9 to (1) eliminate rules which are duplicative of GAAP, (2) integrate and simplify the rules, (3) reflect current financial reporting practices, and (4) improve financial reporting generally. In addition, certain related amendments to the Guides for Statistical Disclosure by Bank Holding Companies (Industry Guide 3) were adopted in order to incorporate a number of disclosures which were eliminated from the requirements of Article 9. The Commission also amended the proxy rules to require bank holding companies to include in annual reports to shareholders financial statements prepared in accordance with Regulation S–X.

2. Add the section of this release entitled "Investment Securities Gains or losses" to § 401.04.

3. Add the last paragraph of the section of this release entitled "Loans to Related Parties" to § 401.02.

4. Include as § 401.06 the section of this release entitled "Bankers' Acceptances."

5. Include as § 401.07 the section of this release entitled "Parent Company Financial Information."

The Codification is a separate publication issued by the SEC. It will not be published in the **Federal Register**/ Code of Federal Regulations system.

List of Subjects in 17 CFR Parts 210, 231 and 241

Accounting, Reporting requirements Securities.

The Commission hereby amends 17 CFR Chapter II as follows

PART 210—FORM AND CONTENT OF AND REQUIREMENTS FOR FINANCIAL STATEMENTS, SECURITIES ACT OF 1933, SECURITIES EXCHANGE ACT OF 1934, PUBLIC UTILITY HOLDING COMPANY ACT OF 1935, INVESTMENT COMPANY ACT OF 1940, AND ENERGY POLICY AND CONSERVATION ACT OF 1975

1. By removing §§ 210.9–01 to 210.05 and adding new §§ 210.9–01 to 210.9–07 as follows:

Bank Holding Companies

§ 210.9–01 Application of §§ 210.9–01 to 210.9–07

This article is applicable to consolidated financial statements filed for bank holding companies and to any financial statements of banks that are included in filings with the Commission.

§ 210.9–02 General requirement.

The requirements of the general rules in §§ 210.1 to 210.4 (Articles 1, 2, 3, 3A and 4) should be complied with where applicable.

§ 210.9–03 Balance sheets.

The purpose of this rule is to indicate the various items which, if applicable, should appear on the face of the balance sheets or in the notes thereto.

Assets

1. *Cash and due from banks.* The amounts in this caption should include all noninterest bearing deposits with other banks.

(a) Any withdrawal and usage restrictions (including requirements of the Federal Reserve to maintain certain average reserve balances) or compensating balance requirements should be disclosed (see § 210.5–02–1).

2. Interest-bearing deposits in other banks.

3. *Federal funds sold and securities purchased under resale agreements of similar arrangements.* These amounts should be presented gross and not netted against Federal funds purchased and securities sold under agreement to repurchase as reported in Caption 13.

4. *Trading account assets.* Include securities or any other investments held for trading purposes only.

5. Other short-term investments.

6. *Investment securities* Include securities held for investment only. Disclose the aggregate book value of investment securities; show on the balance sheet the aggregate market value at the balance sheet date. The aggregate amounts should include securities pledged, loaned or sold under repurchase agreements and similar arrangements; borrowed securities and securities purchased under resale agreements or similar arrangements should be excluded.

(a) Disclose in a note the carrying value and market value of securities of (1) the U.S. Treasury and other U.S. Government agencies and corporations; (2) states of the

U.S. and political subdivisions; and (3) other securities.

7. *Loans.* Disclose separately (1) total loans, (2) the related allowance for losses and (3) unearned income.

(a) Disclose on the balance sheet or in a note the amount of total loans in each of the following categories:

(1) Commercial, financial and agricultural
(2) Real estate—construction
(3) Real estate—mortgage
(4) Installment loans to individuals
(5) Lease financing
(6) Foreign
(7) Other (State separately any other loan category regardless of relative size if necessary to reflect any unusual risk concentration).

(b) A series of categories other than those specified in (a) above may be used to present details of loans if considered a more appropriate presentation.

(c) The amount of foreign loans must be presented if the disclosures provided by § 210.9–05 are required.

(d) For each period for which an income statement is required, furnish in a note a statement of changes in the allowance for loan losses showing the balances at beginning and end of the period provision charged to income, recoveries of amounts charged off and losses charged to the allowance.

(e)(1)(i) As of each balance sheet date, disclose in a note the aggregate dollar amount of loans (exclusive of loans to any such persons which in the aggregate do not exceed $60,000 during the latest year) made by the registrant or any of its subsidiaries to directors, executive officers, or principal holders of equity securities (§ 210.1–02) of the registrant or any of its significant subsidiaries (§ 210.1–02), or to any associate of such persons. For the latest fiscal year, an analysis of activity with respect to such aggregate loans to related parties should be provided. The analysis should include the aggregate amount at the beginning of the period, new loans, repayments, and other changes. (Other changes, if significant, should be explained.)

(ii) This disclosure need not be furnished when the aggregate amount of such loans at the balance sheet date (or with respect to the latest fiscal year, the maximum amount outstanding during the period) does not exceed 5 percent of stockholders equity at the balance sheet date.

(2) If a significant portion of the aggregate amount of loans outstanding at the end of the fiscal year disclosed pursuant to (e)(1)(i) above relates to nonperforming loans, so state and disclose the aggregate amount of such nonperforming loans along with such other information necessary to an understanding of the effects of the transactions on the financial statements.

See, Industry Guide 3, Statistical Disclosure by Bank Holding Companies for definition of "nonperforming loans."

(3) Notwithstanding the aggregate disclosure called for by (e)(1) above, if any loans were not made in the ordinary course of business during any period for which an income statement is required to be filed, provide an appropriate description of each such loan (See § 210.4–08(L)(3)).

(4) Definition of terms. For purposes of this rule, the following definitions shall apply:

"Associate" means (i) a corporation, venture or organization of which such person is a general partner or is, directly or indirectly, the beneficial owner of 10 percent or more of any class of equity securities; (ii) any trust or other estate in which such person has a substantial beneficial interest or for which such person serves as trustee or in a similar capacity and (iii) any member of the immediate family or any of the foregoing persons.

"Executive officers" means the president, any vice president in charge of a principal business unit, division or function (such as loans, investments, operations, administration or finance), and any other officer or person who performs similar policymaking functions.

"Immediate Family" means such person's spouse; parents; children; siblings; mothers and fathers-in-law; sons and daughters-in-law; and brothers and sisters-in-law.

"Ordinary course of business" means those loans which were made on substantially the same terms, including interest rate and collateral, as those prevailing at the same time for comparable transactions with unrelated persons and did not involve more than the normal risk of collectibility or present other unfavorable features.

8. *Premises and equipment.*

9. *Due from customers on acceptances.* Include amounts receivable from customers on unmatured drafts and bills of exchange that have been accepted by a bank subsidiary or by other banks for the account of a subsidiary and that are outstanding—that is, not held by a subsidiary bank, on the reporting date. (If held by a bank subsidiary, they should be reported as "loans" under § 210.9–03.7.)

10. *Other assets.* Disclose separately on the balance sheet or in a note thereto any of the following assets or any other asset the amount of which exceeds thirty percent of stockholders equity. The remaining assets may be shown as one amount.

(1) Excess of cost over tangible and identifiable intangible assets acquired (net of amortization).

(2) Other intangible assets (net of amortization).

(3) Investments in and indebtness of affiliates and other persons.

(4) Other real estates.

(a) Disclose in a note the basis at which other real estate is carried. An reduction to fair market value from the carrying value of the related loan at the time of acquisition shall be accounted for as a loan loss. Any allowance for losses on other real estate which has been established subsequent to acquisition should be deducted from other real estate. For each period for which an income statement is required, disclosures should be made in a note as to the changes in the allowances, including balance at beginning and end of period, provision charged to income, and losses charged to the allowance.

11. Total assets.

Liabilities and Stockholders' Equity

Liabilities.

12. *Deposits.* Disclose separately the amounts of noninterest bearing deposits and interest bearing deposits.

(a) The amount of noninterest bearing deposits and interest bearing deposits in foreign banking offices must be presented if the disclosure provided by § 210.9–05 are required.

13. *Short-term borrowing.* Disclosure separately on the balance sheet or in a note, amounts payable for (1) Federal funds purchased and securities sold under agreements to repurchase; (2) commercial paper, and (3) other short-term borrowings.

(a) Disclose any unused lines of credit for short-term financing (§ 210.5–02.19(b)).

14. *Bank acceptances outstanding.* Disclose the aggregate of unmatured drafts and bills of exchange accepted by a bank subsidiary, or by some other bank as its agent, less the amount of such acceptances acquired by the bank subsidiary through discount or purchase.

15. *Other liabilities.* Disclose separately on the balance sheet or in a note any of the following liabilities or any other items which are individually in excess of thirty percent of stockholders' equity (except that amounts in excess of 5 percent of stockholders' equity should be disclosed with respect to item (4)). The remaining items may be shown as one amount.

(1) Income taxes payable.
(2) Deferred income taxes.
(3) Indebtedness to affiliates and other persons the investments in which are accounted for by the equity method.
(4) Indebtedness to directors, executive officers, and principal holders of equity securities of the registrant or any of its significant subsidiaries (the guidance in § 210.9–03.7(e) shall be used to identify related parties for purposes of this disclosure).
(5) Accounts payable and accrued expenses.

16. *Long-term debt.* Disclose in a note the information required by § 210.5–02.22.

17. *Commitments and contingent liabilities.*

18. *Minority interest in consolidated subsidiaries.* The information required by § 210.5–02.27 should be disclosed if applicable.

Redeemable Preferred Stocks

19. *Preferred stocks subject to mandatory redemption requirements or whose redemption is outside the control of the issuer.* See § 210.5–02.28.

Non-redeemable Preferred Stocks

20. *Preferred stocks which are not redeemable or are redeemable solely at the option of the issuer.* See § 210.6–02.29.

Common Stocks

21. *Common stocks.* See § 210.5–02.30.

Other Stockholders' Equity

22. *Other stockholders' equity.* See § 210.5–02.31.

23. *Total liabilities and stockholders' equity.*

§ 210.9-04 Income statements.

The purpose of this rule is to indicate the various items which, if applicable, should appear on the face of the income statement or in the notes thereto.

1. *Interest and fees on loans.* Include commitment and origination fees, late charges and current amortization of premium and accretion of discount on loans which are related to or are an adjustment of the loan interest rate.

2. *Interest and dividends on investment securities.* Disclosure separately (1) taxable interest income, (2) nontaxable interest income, and (3) dividends.

3. *Trading account interest.*

4. *Other interest income.*

5. *Total interest income.*

6. *Interest on deposits.*

7. *Interest on short-term borrowings.*

8. *Interest on long-term debt.*

9. *Total interest expense.*

10. *Net interest income.*

11. *Provision for loan losses.*

12. *Net interest income after provision for loan losses.*

13. *Other income.* Disclose separately any of the following amounts, or any other item of other income, which exceed one percent of the aggregate of total interest income and other income. The remaining amounts may be shown as one amount, except for investment securities gains or losses which shall be shown separately regardless of size.

(a) Commissions and fees and fiduciary activities.

(b) Commissions, broker's fees and markups on securities underwriting and other securities activities.

(c) Insurance commissions, fees and premiums.

(d) Fees for other customer services.

(e) Profit or loss on transactions in securities in dealer trading account.

(f) Equity in earnings of unconsolidated subsidiaries and 50 percent or less owned persons.

(g) Gains or losses on disposition of equity in securities of subsidiaries or 50 percent or less owned persons.

(h) Investment securities gains or losses. The method followed in determining the cost of investments sold (e.g., "average cost," "first-in, first-out," or "identified certificate) and related income taxes shall be disclosed.

14. *Other expenses.* Disclose separately any of the following amounts, or any other item of other expense, which exceed one percent of the aggregate of total interest income and other income. The remaining amounts may be shown as one amount.

(a) Salaries and employee benefits.

(b) Net occupancy expense of premises.

(c) Goodwill amortization.

(d) Net cost of operation of other real estate [including provisions for real estate losses, rental income and gains and losses on sales of real estate].

(e) Minority interest in income of consolidated subsidiaries.

15. *Income or loss before income tax expense.*

16. *Income tax expense.* The information required by § 210.4-08(h) should be disclosed.

17. *Income or loss before extraordinary items and cumulative effects of changes in accounting principles.*

18. *Extraordinary items, less applicable tax.*

19. *Cumulative effects of changes in accounting principles.*

20. *Net income or loss.*

21. *Earnings per share data.*

§ 210.9-05 Foreign Activities.

(a) *General requirement.* Separate disclosure concerning foreign activities shall be made for each period in which either (1) assets, or (2) revenue, or (3) income (loss) before income tax expense, or (4) net income (loss), each as associated with foreign activities, exceeded ten percent of the corresponding amount in the related financial statements.

(b) *Disclosures.* (1) Disclose total identifiable assets (net of valuation allowances) associated with foreign activities.

(2) For each period for which an income statement is filed, state the amount of revenue, income (loss) before taxes, and net income (loss) associated with foreign activities. Disclose significant estimates and assumptions (including those related to the cost of capital) used in allocating revenue and expenses to foreign activities; describe the nature and effects of any changes in such estimates and assumptions which have a significant impact on interperiod comparability.

(3) The information in paragraph (b) (1) and (2) of this section shall be presented separately for each significant geographic area and in the aggregate for all other geographic areas not deemed significant.

(c) *Definitions.* (1) "Foreign activities" include loans and other revenues producing assets and transactions in which the debtor or customer, whether an affiliated or unaffiliated person, is domiciled outside the United States.

(2) The term "revenue" includes the total of the amount reported at §§ 210.9-04.5 and 210.9-04.13.

(3) A "significant geographic area" is one in which assets or revenue or income before income tax or net income exceed 10 percent of the comparable amount as reported in the financial statements.

§ 210.9-06 Condensed financial information of registrant.

The information prescribed by § 210.12-04 shall be presented in a note to the financial statements when the restricted net assets (§ 210.4-08(e)(3)) of consolidated subsidiaries exceed 25 percent of consolidated net assets as of the end of the most recently completed fiscal year. The investment in and indebtedness of and to bank subsidiaries shall be stated separately in the condensed balance sheet from amounts for other subsidiaries; the amount of cash dividends paid to the registrant for each of the last three years by bank subsidiaries shall be stated separately in the condensed income statement from amounts for other subsidiaries. For purposes of the above test, restricted net assets of consolidated subsidiaries shall mean that amount of the registrant's proportionate share of net assets of consolidated subsidiaries (after intercompany eliminations) which as of the end of the most recent fiscal year may not be transferred to the parent company by subsidiaries in the form of loans, advances or cash dividends without the consent of a third party (i.e., lender, regulatory agency, foreign government, etc.). Where restrictions on the amount of funds which may be loaned or advanced differ from the amount restricted as to transfer in the form of cash dividends, the amount least restrictive to the subsidiary shall be used. Redeemable preferred stocks (§ 210.5-02.28) and minority interests shall be deducted in computing net assets for purposes of this test.

* * * * *

§ 210.9-07 Schedules.

(a) The following schedules, which should be examined by an independent accountant, should be filed unless the required information is not applicable or is presented in the related financial statements.

Schedule I—Indebtedness to Related Parties. The schedule prescribed by § 210.12-05 should be filed for each period for which an income statement is required in support of the amounts required to be reported by § 210.9-03.15(4) unless such aggregate amount does not exceed 5 percent of stockholders' equity at either the beginning or the end of the period.

Schedule II—Guarantees of Securities of Other Issuers. The schedule prescribed by § 210.12-08 should be filed as of the date of the most recent audited balance sheet with respect to any guarantees of securities of other issuers by the person for which the statements are being filed.

2. By revising § 210.12-01 as follows:

Form and Content of Schedules

General

§210.12-01 Application of §§ 210.12-01, to 210.12-29.

These sections prescribe the form and content of the schedules required by §§ 210.5-04, 210.6-10, 210.6-13, 210.6-24, 210.6-34, 210.7-05 and 210.9-07.

PART 231—INTERPRETIVE RELEASES RELATING TO THE SECURITIES ACT OF 1933 AND GENERAL RULES AND REGULATIONS THEREUNDER

3. By revising the Securities Act Industry Guide 3 (Statistical Disclosure by Bank Holding Companies) of Part 231 by adding new Item VII and by revising the general instructions and the remaining items. The full text of the revised industry guide, as proposed, is set out below.

Guide 3—Statistical Disclosure By Bank Holding Companies

General Instructions

1. This Guide applies to the description of business portions of those bank holding company registration statements for which financial statements are required.

2. Information furnished in accordance with this Guide should generally be presented in tabular form in the order appearing below. However, an alternative presentation, such as inclusion of the information in Management's Discussion and Analysis, may be used if in management's opinion such presentation would be more meaningful to investors.

3. When the term "reported period" is used in the Guide, it refers to each of the periods described below:

(a) Each of the last three fiscal years of the registrant, except as is provided in paragraphs (b) and (c) below;

(b) Each of the last five fiscal years of the registrant with respect to Items III and IV, except as is provided in paragraph (c) below;

(c) Each of the last two fiscal years with respect to all items, if the registrant had assets of less than $200,000,000 or net worth of $10,000,000 or less as of the end of its latest fiscal year; and

(d) Any additional interim period necessary to keep the information from being misleading.

The reported period shall not include an additional interim period under paragraph (d) above merely because an income statement is presented for such additional interim period, but the reported period shall include such an additional period if a material change in the information presented or the trend evidenced thereby has occurred.

4. Unless otherwise indicated, averages called for by the Guide are daily averages. Where the collection of data on a daily average basis would involve unwarranted or undue burden or expense, weekly or month-end averages may be used, provided such averages are representative of the operations of the registrant. The basis used for presenting averages need be stated only if not presented on a daily average basis.

5. Some of the information called for by the Guide which is prospective in nature may not be available on a historical basis. The staff should be advised of such situations prior to filing and if the requested information is unavailable and cannot be compiled without unwarranted or undue burden or expense, the requirement that such information be furnished may be waived. If possible, reasonably comparable date should be furnished instead. If certain requested information will not be available with respect to periods to be covered in future filings subject to the Guide, this should also be brought to the staff's attention.

6. The disclosure requirements of the Guide are also applicable to foreign registrants to the extent the requested information is available. If the information is unavailable and cannot be compiled without unwarranted or undue burden or expense, this should be brought to the staff's attention.

Note.—In evaluating the reasonableness of assertions by registrants that the compilation of requested information, such as historical data or daily averages, would involve an unwarranted or undue burden or expense, the staff takes into consideration, among other factors, the size of the registrant, the estimated costs of compiling the data the electronic data, processing capacity of the registrant and efforts in process to obtain the information in future periods.

7. In various places throughout this Guide, disclosure is called for regarding certain "foreign" data. For purposes of this Guide, this information need not be presented unless the registrant is required to make separate disclosures concerning its foreign activities in its consolidated financial statements pursuant to the test set forth in § 210.9–05 of Regulation S–X.

I. Distribution of Assets, Liabilities and Stockholders' Equity; Interest Rates and Interest Differential

A. *For each reported period present, average balance sheets.* The format of the average balance sheets may be condensed from the detail required by the financial statements provided that the condensed average balance sheets indicate the significant categories of assets and liabilities, including all major categories of interest-earning assets and interest-bearing liabilities. Major categories of interest-earning assets should include loans, taxable investment securities, non-taxable investment securities, interest-bearing deposits in other banks, Federal funds sold and securities purchased with agreements to resell, other short-term investments, and other (specify if significant). Major categories of interest-bearing liabilities should include savings deposits, other time deposits, short-term debt, long-term debt and other (specify if significant).

B. *For each reported period, present an anlaysis of net interest earnings as follows:*

1. For each major category of interest-earning asset and each major category of interest-bearing liability, the average amount outstanding during the period and the interest earned or paid on such amount.

2. The average yield for each major category of interest-bearing asset.

3. The average rate paid for each major category of interest-bearing liability.

4. The average yield on all interest-earning assets and the average effective rate paid on all interest-bearing liabilities.

5. The net yield on interest-earning assets (net interest earnings divided by total interest-earning assets, with net interest earnings equaling the difference between total interest earned and total interest paid).

6. This analysis may, at the option of the registrant, be presented in connection with the average balance sheet required by paragraph A.

C. *For the latest two fiscal year present (1) the dollar amount of change in interest income and (2) the dollar amount of change in interest expense.* The changes should be segregated for each major category of interest-earning asset and interest-bearing liability into amounts attributable to (a) changes in volume (changes in volume times old rate), (b) changes in rates (change in rate times old volume), and (c) changes in rate-volume (change in rate times the change in volume). The rate/volume variances should be allocated on a consistent basis between rate and volume variance and the basis of allocation disclosed in a note to the table.

Instructions. (1) Explain how nonaccruing loans have been treated for purposes of the analyses required by paragraph B.

(2) In the calculation of the changes in the interest income and interest expense, any out-of-period items and adjustments should be excluded and the types and amounts of items excluded disclosed in a note to the table.

(3) If loan fees are included in the interest income computation, the amount of such fees should be disclosed, if material.

(4) Tax exempt income may be calculated on a tax equivalent basis. A

brief note should describe the extent of recognition of exemption from Federal, state and local taxation and the combined marginal or incremental rate used.

(5) If disclosure regarding foreign activities is required pursuant to General Instruction 7 of this Guide, the information required by paragraph A, B and C of Item I should be further segregated between domestic and foreign activities for each significant category of assets and liabilities disclosed pursuant to paragraph A. In addition, for each reported period, present separately, on the basis of averages, the percentage of total assets and total liabilities attributable to foreign activities.

II. Investment Portfolio

A. As of the end of each reported period, present the book value of investments in obligations of (1) the U.S. Treasury and other U.S. Government agencies and corporations; (2) States of the U.S. and political subdivisions; and (3) other securities including bonds, notes, debentures and stock of business corporations, foreign governments and political subdivisions, intergovernmental agencies and the Federal Reserve Bank.

B. As of the end of the latest reported period, present the amount of each investment category listed above which is due (1) in one year or less, (2) after one year through five years, (3) after five years through ten years, and (4) after ten years. In addition, state the weighted average yield for each range of maturities.

Instruction. State whether yields on tax exempt obligations have been computed on a tax equivalent basis. (See Instruction (4) to Item I.) Any major changes in the tax-exempt portfolio should be discussed hereunder.

C. As of the end of the latest reported period, state the name of any issuer, and the aggregate book value and aggregate market value of the securities of such issuer, when the aggregate book value of such securities exceeds ten percent of stockholders' equity.

Instruction. The term "issuer" has the meaning given in section 2(4) of the Securities Act of 1933, except that debt securities issued by a state of the United States and its political subdivisions and agencies which are payable from and secured by the same source of revenue or taxing authority shall be considered to be securities of a single issuer. This information does not have to be provided for securities of the U.S. Government and U.S. Government agencies and corporations. Consideration should be given to disclosure of risk characteristics of the securities of an issuer and of differences in risk characteristics of different issues of securities of an issuer as may be appropriate.

III. Loan Portfolio

A. *Types of Loans.* As of the end of each reported period, present separately the amount of loans in each category listed below. Also show the total amount of all loans for each reported period which amounts should be the same as those shown on the balance sheets.

Domestic:

1. Commercial, financial and agricultural;
2. Real estate—construction;
3. Real estate—mortgage;
4. Installment loans to individuals;
5. Lease financing.

Foreign:

6. Governments and official institutions;
7. Banks and other financial institutions;
8. Commercial and industrial;
9. Other loans.

Instructions. A series of categories other than those specified above may be used to present details of loans if considered a more appropriate presentation. Furthermore, additional details of loans by category, or separate disclosure of other loan categories may be necessary or appropriate in some circumstances, to show unusual risk or uncertainties such as a substantial portion of total loans which are concentrated in one or a few industries or foreign countries.

B. *Maturities and Sensitivity to Changes in Interest Rates.* As of the end of the latest fiscal year reported on, present separately the amount of loans in each category listed in paragraph A (except that this information need not be presented for categories 3, 4 and 5, and categories 6 through 9 may be aggregated) which are: (1) Due in one year or less, (2) due after one year through five years and (3) due after five years. In addition present separately the total amount of all such loans due after one year which (a) have predetermined interest rates and (b) have floating or adjustable interest rates.

Instructions. (1) Scheduled repayments should be reported in the maturity category in which the payment is due.

(2) Demand loans, loans having no stated schedule of repayments and no stated maturity, and overdrafts should be reported as due in one year or less.

(3) Determinations of maturities should be based upon contract terms. However, such terms may vary due to the registrant's "rollover" policy," in which case the maturity should be revised as appropriate and the rollover policy should be briefly discussed.

C. *Nonperforming Loans.* As of the end of each reported period, state the aggregate amount of loans in each of the following categories for: (a) Loans accounted for on a nonaccrual basis; (b) loans which are contractually past due 90 days or more as to interest or principal payments (but not included in the non-accrual loans in (a) above); (c) loans, the terms of which have been renegotiated to provide a reduction or deferral of interest or principal because of a deterioration in the financial position of the borrower (exclusive of loans in (a) or (b) above); and (d) loans now current where there are serious doubts as to the ability of the borrower to comply with present loan repayment terms. In connection with (d), a separate discussion of the risk elements associated with such loans, including the relative magnitude of such risks, shall be given.

Instructions. (1) Loans in categories 4 and 5 of paragraph A need not be considered for disclosure pursuant to paragraph C unless the total amount which would be excluded exceeds 10 percent of total loans.

(2) A renewal of a loan at maturity on current market terms will not be considered a renegotiation for purposes of clause (c) of paragraph C.

(3) A loan remains in the category described in clause (c) until time as the terms are substantially equivalent to terms on which loans with comparable risks are being made.

(4) If a substantial portion of the loans stated pursuant to paragraph C are concentrated in one or a few industries, separate disclosure of the information required by this paragraph should be provided for such loans.

(5)The registrant may use different criteria and may present quantitative information in a different manner than described above if such presentation more effectively identifies and communicates the present risk elements in the loan portfolio.

IV. Summary of Loan Loss Experience

(A) An analysis of loss experience shall be furnished in the following format for each reported period:

ANALYSIS OF THE ALLOWANCE FOR LOAN LOSSES

	Reported period
Balance at beginning of period	$X.
Charge-offs:	
Domestic:	
Commercial, financial and agricultural	X.
Real estate-construction	X.
Real estate-mortgage	X.
Installment loans to individuals	X.
Lease financing	X.
Foreign	X.
Recoveries:	
Domestic:	
Commercial, financial and agricultural	X.
Real estate-construction	X.
Real estate-mortgage	X.
Installment loans to individuals	X.
Lease financing	X.
Foreign	X.
Net charge-offs	X.
Additions charged to operations	X.
Balance at end of period	$X.
Ratio of net charge-offs during the period to average loans outstanding during the period	X.

Instructions. (1) The above table is not intended to mandate a specific format for disclosure of this information. Registrants are encouraged to experiment with various disclosure formats in the interest of effective communication of this data; however, all the required information must be given.

(2) For each period presented, describe briefly the factors which influenced management's judgment in determining the amount of the additions to the allowance charged to operating expense. A statement that the amount is based on management's judgment will not be sufficient.

(3) If, in accordance with the instructions to paragraph III–A, information concerning loans has been presented in categories other than those specified in that paragraph, those other categories should be used to present the disclosures called for under this paragraph.

(4) If the registrant is required to present separate data as to its foreign activities pursuant to General Instruction 7 to this Guide, disclosure must be provided as to the changes in the allowance for loan losses applicable to loans related to foreign activities, including the balances at the beginning and end of the periods, charge-offs, recoveries, and additions charged to operations.

B. At the end of each reported period, furnish a breakdown of the allowance for loan losses in the following format:

ALLOCATION OF THE ALLOWANCE FOR LOAN LOSSES

Balance at end of period applicable to	Reported period	
	Amount	Percent of loans in each category to total loans
Domestic	$X.	X.
Commercial, financial and agricultural	X.	X.
Real estate-construction	X.	X.
Real estate-mortgage	X.	X.
Installment loans to individuals	X.	X.
Lease financing	X.	X.
Foreign	X.	X.
Unallocated	X.	N/A
	X.	100

Instructions. (1) See instructions (1) and (3) to paragraph A above.

(2) In lieu of the breakdown of the allowance for loan losses by loan category called for above, the registrant may furnish a narrative discussion of the risk elements in the loan portfolio and the factors considered in determining the amount of the allowance for loan losses. The discussion may be extended to risk elements associated with particular loan categories or subcategories. Information should also be furnished as to the approximate anticipated amount of chargeoffs by category during the next full year of operation.

V. Deposits

A. For each reported period, present separately the average amount of and the average rate paid on each of the following deposit categories which are in excess of 10 percent of average total deposits:

Deposits in domestic bank offices:

(1) Noninterest bearing demand deposits.

(2) Interest bearing demand deposits.

(3) Savings deposits.

(4) Time deposits.

Deposits in foreign banking offices:

(5) Banks located in foreign countries (including foreign branches of other U.S. banks).

(6) Foreign governments and official institutions.

(7) Other foreign demand deposits.

(8) Other foreign time and savings deposits.

B. Categories other than those specified for deposits in domestic bank offices above may be used to present the types of domestic deposits if they more appropriately describe the nature of the deposits.

C. If material, the registrant should disclose separately the aggregate amount of deposits by foreign depositors in domestic offices. Identification of the nationality of the depositors is not required.

D. As of the end of the latest reported period, state the amount outstanding of (1) time certificates of deposit in amounts of $100,000 or more and (2) other time deposits of $100,000 or more issued by domestic offices by time remaining until maturity of 3 months or less; over 3 through 6 months; over 6 through 12 months; and over 12 months.

E. As of the end of the latest reported period, state the amount outstanding of time certificates of deposits and other time deposits in amount of $100,000 or more issued by foreign offices. If the aggregate of such certificates of deposit and time deposits in amounts exceeding $100,000 represents a majority of total foreign deposit liabilities, the disclosure need not be given, provided that there is a statement that a majority of deposits were in amounts in excess of $100,000.

VI. Return of Equity and Assets

For each reported period, present the following:

(1) Return on assets (net income divided by average total assets).

(2) Return on equity (net income divided by average equity).

(3) Dividend payout ratio (dividends declared per share divided by net income per share).

(4) Equity to assets ratio (average equity divided by average total assets).

Instructions. (1) If mandatorily redeemable preferred stock is outstanding, furnish the ratios required under (2) and (4) above in a dual presentation including and excluding such stock in the calculations.

(2) Registrants should supply any other ratios which they deem necessary to explain their operations.

VII. Short-Term Borrowings

For each reported period, present the following information for each category of short-term borrowings reported in the financial statements pursuant to § 210.9–04.11:

(1) The amounts outstanding at the end of the reported period, the weighted average interest rate thereon, and the general terms thereof;

(2) The maximum amount of borrowings in each category outstanding at any month-end during each reported period;

(3) The approximate average amounts outstanding during each reported period and the approximate weighted average interest rate thereon.

Instruction. This information is not required to be given for any category of short-term borrowings for which the average balance outstanding during the

period was less than 30 percent of stockholders' equity at the end of the period.

4. By amending Part 231 by adding this release, Release No. 33–6458 (March 7, 1983) to the list of interpretive releases set forth thereunder.

PART 241—INTERPRETIVE RELEASES RELATING TO THE SECURITIES EXCHANGE ACT OF 1934 AND GENERAL RULES AND REGULATIONS THEREUNDER

5. By conforming Exchange Act Industry Guide 3 [Statistical Disclosure by Bank Holding Companies] to the amendments proposed for Securities Act Industry Guide 3.

6. By amending Part 241 by adding this release, Release No. 34–19570 (March 7, 1983) to the list of interpretive releases set forth thereunder.

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

7. By revising paragraph (b)(1) of § 240.14a–3 to read as follows:

§ 240.14a–3 Information to be furnished to security holders.

* * * * *

(b) * * *

(1) The report shall include, for the registrant and its subsidiaries consolidated, audited balance sheets as of the end of each of the two most recent fiscal years and audited statements of income and changes in financial position for each of the three most recent fiscal years prepared in accordance with Regulation S–X (Part 210 of this chapter), except that the provisions of Article 3 (other than § 210.3–03(e), 210.3–04 and 210.3–20) and Article 11 shall not apply. Any financial statement schedules or exhibits or separate financial statements which may otherwise be required in filings with the Commission may be omitted. Investment companies registered under the Investment Company Act of 1940 need include financial statements only for the last fiscal year except for statements of changes in net assets which are to be filed for the two most recent fiscal years. If the financial statements of the registrant and its subsidiaries consolidated in the annual report filed or to be filed with the Commission are not required to be audited, the financial statements required by this paragraph may be unaudited.

* * * * *

8. By revising paragraph (a)(1) of § 240.14c–3 to read as follows:

§ 240.14c–3 Annual report to be furnished security holders.

(a) * * *

(1) The report shall include, for the registrant and its subsidiaries consolidated, audited balance sheets as of the end of each of the two most recent fiscal years and audited statements of income and changes in financial position for each of the three most recent fiscal years prepared in accordance with Regulation S–X (Part 210 of this chapter), except that the provisions of Article 3 (other than § 210.3–03(e), 210.3–04 and 210.3–20) and Article 11 shall not apply. Any financial statement schedules or exhibits or separate financial statements which may otherwise be required in filings with the Commission may be omitted. Investment companies registered under the Investment Company Act of 1940 need include financial statements only for the last fiscal year except for statements of changes in net assets which are to be filed for the two most recent fiscal years. If the financial statements of the registrant and its subsidiaries consolidated in the annual report filed or to be filed with the Commission are not required to be audited, the financial statements required by this paragraph may be unaudited.

* * * * *

Authority

These amendments are being adopted pursuant to the authority in Sections 6, 7, 8, 10 and 19(a) [15 U.S.C. 77f, 77g, 77h, 77j, 77s] of the Securities Act of 1933; Sections 12, 13, 15(d) and 23(a) [15 U.S.C. 78l, 78m, 78o(d), 78w] of the Securities Exchange Act of 1934; Sections 5(b), 14 and 20(a) [15 U.S.C. 79e, 79n, 79t] of the Public Utility Holding Company Act of 1935; and Sections 8, 30, 31(c) and 38(a) [15 U.S.C. 80a–8, 80a–29, 80a–30(c), 80a–37(a)] of the Investment Company Act of 1940.

As required by Section 23(a)(2) of the Securities Exchange Act, the Commission has specifically considered the impact that the amendments will have on competition. The Commission finds that compliance with the amendments will not impose a burden on competition.

By the Commission.

George A. Fitzsimmons,

Secretary.

March 7, 1983.

[FR Doc. 83–6832 Filed 3–15–83; 8:45 am]

BILLING CODE 8010–01–M

ENVIRONMENTAL PROTECTION AGENCY

21 CFR Parts 193 and 561

[FAP 1H5321/R139, PH–FRL 2321–6]

Tolerances for Pesticides in Food and in Animals Administered by the Environmental Protection Agency; Dicamba

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes food and feed additive regulations to permit the combined residues of the herbicide dicamba and its metabolite in or on certain food and feed commodities. This regulation to establish maximum permissible levels for the combined residues of the pesticide in or on the commodities was requested, pursuant to a petition, by Velsicol Chemical Corporation.

EFFECTIVE DATE: March 16, 1983.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A–110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Robert Taylor, Product Manager (PM) 25, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 245, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–1800).

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the Federal Register of October 27, 1981 (46 FR 52417), that announced that Velsicol Chemical Corp., 341 East Ohio St. Chicago, Illinois 60611, had filed food/feed additive petition 1H5321 with the EPA. This petition proposed the establishment of a food and a feed additive regulations for the combined residues of the herbicide dicamba (3,6-dichloro-*o*-anisic acid) and its sugarcane metabolite (3,6-dichloro-5-hydroxy-*o*-anisic acid in or on sugarcane molasses at 0.5 ppm.

The petitioner subsequently amended the petition to propose the establishment of food and feed additive regulations for the combined residues of the herbicide dicamba (3,6-dichloro-*o*-anisic acid) and its sugarcane metabolite 3,6-dichloro-5-hydroxy-*o*-anisic acid in or on sugarcane molasses at 2.0 ppm.

No comments were received in response to this notice of filing.

The data submitted in the petition and other relevant material have been evaluated and discussed in a related document [1F2569/R539] establishing

tolerances on sugarcane, sugarcane fodder and forage, milk, meat, fat, meat byproducts, liver and kidney of cattle, goats, hogs, horses, and sheep which appears elsewhere in today's Federal Register.

The acceptable daily intake (ADI) based on the 2-year dog feeding study (NOEL of 1.25 mg/kg/day) and using a 100-fold safety factor is calculated to be 0.0125 mg/kg/day. The maximum permissible intake (MPI) for a 60-kg human is calculated to be 0.75 mg/day. The theoretical maximum residue contribution (TMRC) from existing tolerances for a 1.5 kg diet is calculated to be 0.1174 mg/day, which utilizes 15.65 percent of the ADI. The current action will add .00092 to the TMRC and utilize 0.13 percent of the ADI. The related document shown above, establishing tolerances on sugarcane, sugarcane fodder and forage, milk, liver, kidney, meat, fat and meat byproducts utilize 20.75 percent of the ADI. Other proposed but unapproved tolerances utilize 0.8 percent of the ADI.

Chemical analyses of dicamba indicate that certain formulations may contain low levels of dimethyl-*N*-nitrosamine (DMNA) as an impurity. Laboratory studies have shown that DMNA is carcinogenic in test animals. Therefore, although dicamba itself has not been shown to be oncogenic, the potential risk from the DMNA impurity must be considered. In addition, because these regulations relate to food and feed additives, the applicability of the Delaney Clause, section 409(c)(3)(A) of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 348(c)(3)(A), must be addressed.

The Delaney Clause requires the disapproval of any food or feed additive that has been shown to be a carcinogen in animal studies; it does not say that an additive shall be disapproved if any of its impurities (or constituents) are found to induce cancer. In this instance, the additive itself, dicamba, has not been shown to induce cancer. Recently, the Food and Drug Administration (FDA) has interpreted the Delaney Clause as not barring the approval of an additive with an undesired, nonfunctional oncogenic constituent, so long as the additive itself has not been shown to be oncogenic. Rather, FDA concluded, the impurity should be judged under the general safety provisions of the applicable section of FFDCA, using risk assessment as one of the decisions making tools. "D & C Green No. 8; Listing as a Color Additive in Externally Applied Drugs and Cosmetic", 47 FR 14138 (April 2, 1982); "Policy for Regulating Carcinogenic Chemicals in Food and Color Additives; Advanced Notice of Proposed Rulemaking", 47 FR 14464 (April 2, 1982). In issuing these regulations, the Agency has adopted and applied the FDA rationale for approving food and feed additives, for the reason set forth in the April 2, 1982 FDA publications.

The Agency has evaluated pertinent toxicology and residue information and has concluded that the potential oncogenic risk from any DMNA impurity in the dicamba to be used on sugarcane is very low. Even assuming a maximum theoretical residue level of DMNA in sugarcane and that all sugar in the diet is contaminated with DMNA, the potential oncogenic risk is estimated to be in the 10^{-8} range, well below the Agency's 10^{-6} action level for nitrosoamines. *See* "Pesticides Contaminated with *N*-nitroso Compounds; Proposed Policy", 45 FR 42854 (June 25, 1980). Further support for the Agency's decision is derived from the failure to detect any DMNA residues in samples of sugarcane treated with dicamba under customary conditions of use.

The pesticide is considered useful for the purpose for which a tolerance is sought, and it is concluded that the pesticide may be safely used in the prescribed manner when such use is in accordance with the label and labeling registered pursuant to the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (86 Stat. 973, 89 Stat. 751, 7 U.S.C. 136(a) *et seq.*). Therefore 21 CFR Parts 193 and 561 are amended as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this notice in the Federal Register, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-534, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new food or feed additive levels, or conditions for safe use of additives, or raising such food or feed additive levels do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24945).

(Sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1)))

List of Subjects in 21 CFR Parts 193 and 561

Food additives, Animal feeds, Pesticides and pests.

Dated: March 4, 1983.

Edwin L. Johnson,

Director, Office of Pesticide Programs.

Therefore, 21 CFR, Chapter I, is amended as follows:

PART 193—[AMENDED]

1. In Part 193 by adding a new § 193.465 to read as follows:

§ 193.465 Dicamba.

Tolerances are established for the combined residues of the herbicide dicamba [3,6-dichloro-*o*-anisic acid) and its metabolite 3,6-dichloro-5-hydroxy-*o*-anisic acid in or on the following processed foods when present therein as a result of application of this herbicide to growing crops.

Foods	Parts per million
Sugarcane molasses	2.0

PART 561—[AMENDED]

2. In Part 561 by adding a new § 561.427 to read as follows:

§ 561.427 Dicamba.

Tolerances are established for the combined residues of the herbicide dicamba (3,6-dichloro-*o*-anisic acid) and its metabolite 3,6-dichloro-5-hydroxy-*o*-anisic acid in or on the following processed foods when present therein as a result of application of this herbicide growing crops.

Foods	Parts per million
Sugarcane molasses	2.0

BILLING CODE 6560-50-M

DEPARTMENT OF DEFENSE

Corps of Engineers, Department of the Army

33 CFR Part 207

Puget Sound Area, Washington; Correction

AGENCY: Army Corps of Engineers, DOD.

ACTION: Final rule, correction.

SUMMARY: The Corps of Engineers published amendments to 33 CFR 207.750 in the **Federal Register** dated August 10, 1982 (47 FR 34534–34536). The regulations which establish the Hood Canal Naval restricted area were not changed as indicated in the preamble of that publication.

EFFECTIVE DATE: March 16, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Ralph T. Eppard at (202) 272–0200.

SUPPLEMENTARY INFORMATION: The regulations in 33 CFR 207.750(e) Hood Canal, Bangor; Naval restricted areas as published in column 3 on 48 FR 34534 in the issue of August 10, 1982 is corrected by amending subparagraph (e)(3) *The regulations* as follows:

1. Change *with* to within in paragraph (e)(ii) (B) and (D).
2. Change *wil* to will in paragraph (e)(ii)(E).
3. Change paragraph (e)(ii) (F) to (4), add Enforcement and add *or his/her authorized representatives,* in lieu of and such agencies as he/she may designate.

Dated: March 4, 1983.

Approved:

John O. Roach, II,

DA Liaison Officer, With the Federal Register.

PART 207—[CORRECTED]

Accordingly the amendatory language for § 207.750 on page 34534, column 3 is corrected by removing "(e)(3)(i)" and replacing it with "(e)(3)" and by removing "by adding a new paragraph (f) as follows:" and replacing it with "by adding new paragraphs (e)(4) and (f) as follows:".

As corrected, (e)(3) is revised and (e)(4) is added to read as follows:

§ 207.750 Puget Sound Area, Washington.

* * * * *

(e) Hood Canal, Bangor; Naval restricted areas.

* * * * *

(3) The regulations—(i) Area No. 1 No person or vessel shall enter this area without permission from the Commander, Naval Base, Seattle, Washington, or his/her authorized representative.

(ii) Area No. 2 (A) The area will be used intermittently by the Navy for magnetic silencing operations.

(B) Use of any equipment such as anchors, grapnels, etc., which may foul underwater installations within the restricted area, is prohibited at all times.

(C) Dumping of any nonbuoyant objects in this area is prohibited.

(D) Navigation will be permitted within that portion of this circular area not lying within Area No. 1 at all times except when magnetic silencing operations are in progress.

(E) When magnetic silencing operations are in progress, use of the area will be indicated by display of quick flashing red beacons on the pier located in the southeast quadrant of the area.

(4) Enforcement. The regulations in this subsection shall be enforced by the Commander, Naval Base, Seattle, Washington, or his/her authorized representative.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-3-FRL 2311-4; EPA Docket No. AW0 42 MD]

Approval and Promulgation of Implementation Plans; Approval of Revision of the Maryland State Implementation Plan

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This notice announces the Administrator's approval of a revision of the Maryland State Implementation Plan. The revision is a Secretarial Order which provides for an extension of the previous visible emission exception granted to the Maryland Cup Corporation's Reisterstown Road plant from the State's "no visible emissions" regulations. The variance allows visible emissions not to exceed 25% opacity from the company's four wax coaters with their related cooling and exhaust systems.

EFFECTIVE DATE: The variance expires on September 11, 1987. This action will be effective on May 16, 1983 unless notice is received by April 15, 1983 that someone wishes to submit adverse or critical comments.

ADDRESS: Written comments should be addressed to Mr. Henry J. Sokolowski of the EPA, Region III address shown below. Copies of the revision and associated support material are available for inspection during normal business hours at the following offices:

U.S. Environmental Protection Agency, Region III, Curtis Building, 6th and Walnut Streets, Philadelphia, Pennsylvania 19106, Attn: Patricia Gaughan

State of Maryland, Air Management Administration, Department of Health and Mental Hygiene, 201 West Preston Street, Baltimore, Maryland 21201, Attn: Mr. George Ferreri

Public Information Reference Unit, Room 2922, EPA Library, U.S. Environmental Protection Agency, 401 M Street SW. (Waterside Mall), Washington, D.C. 20460

The Office of the Federal Register, 1100 L Street NW., Room 804, Washington, D.C. 20408.

FOR FURTHER INFORMATION CONTACT: Patricia Gaughan (3AW12), 215/597–8176 at the EPA, Region III address indicated above.

SUPPLEMENTARY INFORMATION: The State of Maryland submitted a Secretarial Order on November 15, 1982, for the Maryland Cup Corporation as a revision to the Maryland State Implementation Plan. The revision renews an exception, originally approved by EPA on November 16, 1981, 46 FR 56915, for a period of five years to COMAR 10.18.01.08 which requires no visible emissions. It applies to four wax coaters and their related cooling and exhaust systems at the Corporation's Reisterstown Road plant located in Baltimore County. The exception allows visible emissions not to exceed 25% opacity and expires September 11, 1987. The State demonstrated that the revision would not impact attainment of National Ambient Air Quality Standards.

The company has been unable to find an effective means to control the visible emissions. During the variance period, the company will continue to research new control technology applicable to its operation.

The State of Maryland certified that a public hearing on this SIP was held on November 1, 1982, as required by 40 CFR 51.4.

EPA Action: EPA has determined that this revision has no impact on attaining the National Ambient Air Quality Standards. EPA approves this revision.

The Office of Management and Budget has exempted this rule from

requirements of Section 3 of Executive Order 12291.

Under 5 U.S.C. 605(b), the Administrator has certified that SIP approvals do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709).

Under Section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by April 18, 1983. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2)).

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons, Intergovernmental relations.

(42 U.S.C. 7401–7642)

40 CFR Parts 52 and 62

[A-10-FRL 2310-5]

Approval and Promulgation of State Plans for Designated Facilities and Pollutants: Oregon

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA today approves amendments to the Oregon Department of Environmental Quality (DEQ) rules for primary aluminum plants and for equipment burning salt-laden wood waste from logs stored in salt water as revisions to the Oregon State Implementation Plan (SIP). EPA also approves the DEQ plan for controlling fluoride emissions from existing primary aluminum reduction plants. These revisions and plan were submitted by the State of Oregon, after adequate opportunity for public, private, and industry input, to satisfy the requirements of Sections 110 and 111(d) of the Clean Air Act.

DATES: This action will be effective on May 16, 1983 unless notice is received before April 15, 1983 that someone wishes to submit adverse or critical comments. If such notice is received, EPA will open a formal thirty-day comment period on this action.

ADDRESSES: Copies of materials submitted to EPA may be examined during normal business hours at the following locations:

Central Docket Section (10A–82–20), West Tower Lobby, Gallery I, Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460

Air Programs Branch, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101

State of Oregon, Department of Environmental Quality, 522 S.W. Fifth, Yeon Building, Portland, Oregon 97207

A copy of the State's submittal may be examined at: The Office of Federal Register, 1101 L Street NW., Room 8401, Washington, D.C. 20408.

Comments should be addressed to: Laurie M. Kral, Air Programs Branch, M/S 532, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction.
II. Plan Revisions.
A. Rules for Primary Aluminum Plants.
B. Rules for Equipment Burning Salt-Laden Wood Waste from Logs Stored in Salt Water.
III. State Plan for Controlling Fluoride Emissions from Existing Primary Aluminum Reduction Plants.
IV. Summary of Action.

I. Introduction

Over the past several years the State of Oregon has submitted to EPA, as revisions to the Oregon SIP, a number of amendments to the DEQ rules for primary aluminum plants and equipment burning salt-laden wood waste from logs stored in salt water. Pursuant to Section 110 of the Act, EPA is today approving these revisions in order to make the Federally-approved SIP consistent with the current State air pollution control program. Section II describes each revision which EPA is approving. The State of Oregon has also submitted to EPA its plan for controlling fluoride emissions from existing primary aluminum reduction plants. Pursuant to Section 111(d) of the Act, EPA is today approving this plan which is described in Section III. Section IV summarizes EPA's action.

II. Plan Revisions

A. *Rules for Primary Aluminum Plants*

On February 21, 1974, DEQ submitted amendments to the existing rules for primary aluminum plants. These revisions:

(1) Added definitions of the terms "annual average," "monthly average," "opacity" and "Ringelmann smoke chart" to Oregon Administrative Rules, Chapter 340, Division 25, Section 260 (OAR 340–25–260);

(2) Added specific emission limitations for existing and new primary aluminum plants for total fluoride emissions and total organic and inorganic particulate matter emissions, and revised the standard for visible emissions for new plants from twenty percent to ten percent opacity (OAR 340–25–265);

(3) Added provisions to require more restrictive emission limits upon a finding by the Environmental Quality Commission (EQC) that the plant is located in a special problem area (OAR 340–25–270);

(4) Revised the requirements for monitoring programs (OAR 340–25–275);

(5) Revised the requirements for reporting (OAR 340–25–285);

(6) Deleted the requirements for special studies and revision of emission standards (previously OAR 340–25–285 and 290 respectively); and

(7) Renumbered the rule.

The DEQ however had not, at the time of submittal, met all the requirements for public hearings contained in 40 CFR 51.4.

On February 14, 1980, DEQ submitted further amendments to the rules for primary aluminum plants as an amendment to the February 21, 1974

submittal. These amendments extended the date for existing plants to comply with the emission limits for new plants from January 1, 1984 to January 1, 1986 (OAR 340–25–265(4)(b)), and extended the date for the EQC review of the feasibility of applying the limits for new plants to existing plants from 1979 to December 31, 1981 (OAR 340–25–265(5)). However, this submittal did not remedy the public hearing deficiency of the February 21, 1974 submittal.

Finally, on August 9, 1982, DEQ submitted further amendments to the rules for primary aluminum plants as an amendment to the two previous submittals. These amendments:

(1) Revised the definitions of "annual average" and "monthly average" in OAR 340–25–265;

(2) Revised the emission limits for total organic and inorganic particulate matter for plants using prebake cells;

(3) Deleted the provisions for compliance schedules and EQC feasibility studies in OAR 340–25–265(4) and 265(5) and required existing plants to comply with applicable emission limits immediately upon adoption of the rules (OAR 340–25–265(4));

(4) Revised the requirements for monitoring (OAR 340–25–290);

(5) Revised the requirements for reporting (OAR 340–25–285); and

(6) Made a number of minor revisions to correct citations to new statutes and rules.

In this submittal, DEQ certified that public hearings had been held on the entire rule for primary aluminum plants per 40 CFR 51.4

Since these rule revisions tighten the requirements of the current SIP and meet the applicable requirements of the Act, EPA is approving the rules, as submitted on February 21, 1974 and subsequently amended on February 14, 1980 and August 9, 1982.

B. Rules for Equipment Burning Salt-Laden Wood Waste from Logs Stored in Salt Water

On October 18, 1982, DEQ submitted an amendment to its rule for fuel burning equipment (OAR 340–21–020(2)) which exempts salt emissions from the current emission limitations for existing or new sources. This new subsection applies only to sources burning salt-laden wood waste on July 1, 1981, where salt in the fuel is the only reason for failure to comply with the emission limit and when the salt in the fuel results from storage or transportation of logs in salt water. Furthermore, this subsection establishes a new emission limit for subject sources of 0.6 grains per standard cubic foot for combined salt and particulate emissions, and a requirement that the plumes from the boiler stacks not exceed a darkness of Ringelmann 2 for more than 3 minutes in any one hour. The subsection also requires bi-annual particulate emissions source tests of the boiler stacks. With the submittal of the amended rule, DEQ requested the removal of the Air Contaminant Discharge Permit for the Weyerhaeuser plant in North Bend, Oregon (Permit Number: 06–0007) from the SIP.

The DEQ has certified that the only source impacted by this rule revision is the Weyerhaeuser plant in North Bend, Oregon. The new emission limit of 0.6 grains per standard cubic foot, which is equivalent to 320 pounds per hour for this source, represents an increase of 40 pounds per hour over the current SIP allowable limit of 280 pounds per hour which was approved by EPA on November 6, 1981 (46 FR 55101). However, the DEQ has indicated that the new limit of 320 pounds per hour reflects only a more accurate measurement of the flue gas flow rate and not an increase in actual emissions from the source. The annual emission limit of 1170 tons will not be changed. Therefore, since the only affected source is located in an attainment area and the rule revision will not result in an increase in emissions, EPA is approving the October 18, 1982 submittal and removing the previously approved Conditions 4, 5, and 6 of the Air Contaminant Discharge Permit for the Weyerhaeuser Company plant in North Bend, Oregon (Permit Number: 06–0007) from the SIP.

III. State Plan for Controlling Fluoride Emissions from Existing Primary Aluminum Reduction Plants

As discussed above in Section II. A., Rules for Primary Aluminum Plants, DEQ submitted emission limitations for total fluoride emissions to EPA as a SIP revision on February 21, 1974. Also on February 21, 1974, DEQ submitted revisions to the requirements for monitoring and reporting for primary aluminum plants. On January 13, 1981, DEQ submitted its plan for the control of fluoride emissions from primary aluminum reduction plants as required by Section 111(d) of the Act and 40 CFR 60, Subpart B of EPA regulations. Finally, as discussed above, DEQ submitted further amendments to the monitoring and reporting requirements for primary aluminum plants.

The DEQ rules contain emission limitations prescribing allowable rates of emissions which are as stringent as the EPA emission guidelines. The rules specify test methods and procedures for determining compliance which are equivalent to those in Appendix A, 40 CFR Part 60. The DEQ has certified that the two existing primary aluminum reduction plants subject to these emission limitations, Reynolds Metals Company in Troutdale, Oregon, and Martin-Marietta in The Dalles, Oregon, are in compliance with Federal and State regulations for fluoride emissions. The rules include adequate legal authority and specific provisions for monitoring, testing, and reporting.

EPA has determined that the DEQ plan satisfies the requirements of Section 111(d) of the Act and EPA's regulations. Therefore, EPA is approving the plan as submitted on January 13, 1981, as amended by the August 9, 1982 submittal.

IV. Summary of Action

EPA views as noncontroversial and routine any revision to State emission limitations, developed for implementing the requirements of Sections 110 and 111(d) of the Act, which are enforceable and allow no increase in either emissions or ambient air quality levels. EPA also views as noncontroversial and routine any revision to State procedures which do not conflict with the requirements of Federal law or regulations. EPA today is therefore approving, without prior proposal, the amendments to DEQ rules for primary aluminum plants submitted on February 21, 1974, February 14, 1980, and August 9, 1982, the amendments to DEQ rules for equipment burning salt laden wood waste from logs stored in salt water submitted on October 18, 1982, and the plan for the control of fluoride emissions from primary aluminum reduction plants submitted on January 13, 1981 as amended by the August 9, 1982 submittal.

The public should be advised that this action will be effective on May 16, 1983. However, if notice is received within 30 days that someone wishes to submit adverse or critical comments on any or all of the revisions approved herein, the action on those revisions will be withdrawn and two subsequent notices will be published before the effective date. One notice will withdraw the final action on those revisions and another will begin a new rulemaking by announcing a proposal of the action on those revisions and establishing a comment period.

Under Section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 16, 1983. This action may not be challenged later in proceedings to

enforce its requirements. (See sec. 307(b)(2) of the Act.)

Pursuant to the provisions of 5 U.S.C. 605(b), I certify that SIP approvals under Section 110 and plan approvals under Section 111(d) of the Clean Air Act will not have a significant economic impact on a substantial number of small entities.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

(Sec. 110(a), 111(d) and 301(a) of the Clean Air Act (42 U.S.C. 7410(a), 7411(d) and 7601(a)))

Note.—Incorporation by reference of the State Implementation Plan for the State of Oregon was approved by the Director of the Federal Register on July 1, 1982.

PART 52—[AMENDED]

Part 52 of Chapter I, Title 40, Code of Federal Regulations is amended as follows:

Subpart MM—Oregon

1. In § 52.1970, paragraphs (c) (57) and (58) are added as set forth below:

§ 52.1970 Identification of plan.

* * * * *

(c) * * *

(57) Amendments to the rules for primary aluminum plants submitted by the Oregon State Department of Environmental Quality on February 21, 1974 (OAR 340–25–255 to 290), February 14, 1980 (OAR 340–25–265(4)(b) and 265(5)) and August 9, 1982 (OAR 340–25–255 to 285)

(58) Amendments to the rules for equipment burning salt laden wood waste from logs stored in salt water (OAR 340–21–020) and removal of Conditions 4, 5, and 6 of the Air Contaminant Discharge Permit for the Weyerhaeuser Company plant in North Bend, Oregon (Permit Number: 06–0007) submitted by the Oregon State Department of Environmental Quality on October 18, 1982.

PART 62—[AMENDED]

Part 62 of Chapter I, Title 40, Code of Federal Regulations is amended as follows:

Subpart MM—Oregon

1. Section 62.9350 is renumbered as § 62.9500 and retitled as follows:

§ 62.9500 Identification of sources.

2. Section 62.9351 is renumbered as § 62.9501 and retitled as follows:

§ 62.9501 Identification of sources.

3. A new section is added as follows:

Plan for the Control of Designated Pollutants From Existing Facilities [Section 111(d) Plan]

§ 62.9350 Identification of plan.

(a) Identification of plan: Oregon Designated Facility Plan [Section 111(d) Plan].

(b) The plan was officially submitted as follows:

(1) Control of fluoride emissions from phosphate fertilizer plants, submitted by the Oregon State Department of Environmental Quality on June 1, 1977.

(2) Control of sulfuric acid mist emissions from sulfuric acid production units, submitted by the Oregon State Department of Environmental Quality on January 27, 1978.

(3) Control of fluoride emissions from primary aluminum reduction plants, submitted by the Oregon State Department of Environmental Quality on January 13, 1981 and August 9, 1982.

(c) Designated facilities: The plan applies to existing facilities in the following categories of sources:

(1) Phosphate fertilizer plants.

(2) Sulfuric acid production units.

(3) Primary aluminum reduction plants.

4. A new section is added as follows:

Fluoride Emissions From Primary Aluminum Reduction Plants

§ 62.9360 Identification of sources.

The plan applies to existing facilities at the following primary aluminum reduction plants:

(a) Reynolds Metals Company in Troutdale, Oregon

(b) Martin-Marietta in The Dalles, Oregon.

BILLING CODE 6560-50-M

40 CFR Part 65

[A-3-FRL No. 2322-2]

Approval of Delayed Compliance Order Issued by the Pennsylvania Department of Environmental Resources to InterRoyal Corporation

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: The Administrator of the Environmental Protection Agency hereby approves a Delayed Compliance Order issued by the Pennsylvania Department of Environmental Resources to InterRoyal Corporation. The Order requires the company to bring air emissions from its storage shelving manufacturing facility in Warren, Pennsylvania into compliance with certain regulations contained in the Federally approved Pennsylvania State Implementation Plan (SIP) by April 9, 1985. Because of the Administrator's approval, compliance with the Order by InterRoyal will preclude suits under the Federal enforcement and citizen suit provisions of the Clean Air Act for violations of the SIP regulations covered by the Order during the period the Order is in effect.

DATE: This rule will take effect March 16, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Joseph Arena, Air and RCRA Compliance Section (3AW22), Air & Waste Management Division, U.S. EPA, Region III, Sixth and Walnut Streets, Philadelphia, Pennsylvania 19106, (215) 597–4561.

ADDRESSES: A copy of the Delayed Compliance Order, and supporting material, and any comments received in response to a prior **Federal Register** notice proposing approval of the Order are available for public inspection and copying (for appropriate charges) during normal business hours at: U.S. EPA, Region III, Air & Waste Management Division (3AW22), Sixth and Walnut Streets, Philadelphia, Pennsylvania 19106.

SUPPLEMENTARY INFORMATION: On December 12, 1982 the Acting Regional Administrator of the Environmental Protection Agency's Region III Office published in the **Federal Register**, Vol. 47 No. 245, a notice proposing approval of a Delayed Compliance Order issued by the Pennsylvania Department of Environmental Resources to InterRoyal Corporation. The notice asked for public comments January 20, 1983 on the EPA proposal.

One public comment in favor of the proposal was received by this Office, therefore the delayed compliance order issued to InterRoyal Corporation is approved by the Administrator of EPA pursuant to the authority of Section 113(d)(2) of the Clean Air Act, 42 U.S.C. 7413(d)(2). The order places InterRoyal Corporation on a schedule to bring its shelving manufacturing facility in Warren into compliance as expeditiously as practicable with Title 25 Pennsylvania Code, § 129.52, "Surface Coating Process", a part of the federally approved Pennsylvania State Implementation Plan. The order also imposes interim requirements which meet Section 113(d)(1)(C) and 113(d)(7) of the act, and emission monitoring and reporting requirements. If the conditions of the Order are met, it will permit InterRoyal Corporation to delay compliance with the SIP regulations covered by the Order until April 9, 1985. The company is unable to immediately comply with these regulations. EPA has determined that its approval of the Order shall be effective (the date of publication of this notice) because of the need to immediately place InterRoyal Corporation on a schedule which is effective under the Clean Air Act for compliance with the applicable requirements of the Implementation Plan.

Tolerances and Exemptions From Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities; Dicamba

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes tolerances for the combined residues of the herbicide dicamba and its metabolite in or on certain raw agricultural commodities. This regulation to establish maximum permissible levels of dicamba was requested, pursuant to a petition, by Velsicol Chemical Corporation.

EFFECTIVE DATE: March 16, 1983.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A–110), Environment Protection Agency, Rm. 3708, 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Robert Taylor, Product Manager (PM) 25, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 245, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–1800).

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the Federal Register of October 27, 1981 (46 FR 52417), that announced that Velsicol Chemical Corp., 341 East Ohio St., Chicago, Illinois 60611, had filed pesticide petition 1F2569 with the EPA. This petition proposed the establishment of tolerances for the combined residues of the herbicide dicamba (3,6-dichloro-*o*-anisic acid) and its sugarcane metabolite 3,6-dichloro-5-hydroxyo-*o*-anisic acid in or on the raw agricultural commodity sugarcane at 0.05 part per million (ppm), and for the combined residues of dicamba and its demethylated metabolite 3,6-dichloro-2-hydroxybenzoic anisic acid in or on the raw agricultural commodities meat, fat, and meat byproducts at 0.03 ppm and kidneys at 0.2 ppm.

The petitioner subsequently amended the petition to propose the establishment of tolerances for the combined residues of dicamba (3,6-dichloro-*o*-anisic acid) and its sugarcane metabolite 3,6-dichloro-5-hydroxyo-*o*-anisic acid in or on the raw agricultural commodities sugarcane at 0.1 ppm, and sugarcane forage and fodder at 0.1 ppm, and for the combined residues of dicamba and its metabolite 3,6-dichloro-2-hydroxybenzoic acid in or on the raw agricultural commodities meat, fat, and meat byproducts (except liver and kidney) of cattle, goats, hogs, horses, and sheep at 0.2 ppm; liver and kidney of cattle, goats, hogs, horses, and sheep at 1.5 ppm and milk at 0.3 ppm.

No comments were received in response to this notice of filing.

The data submitted in the petition and other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerances are sought. The toxicology data considered in support of the proposed tolerances include several acute studies, a teratology study (rabbit) with a no-observed effect level (NOEL) of 10 milligrams/kilogram/day (mg/kg/day); a teratology study (rat) with a NOEL of 100 mg/kg; a 3-generation reproduction study (rat) with a NOEL of 500 ppm (25 mg/kg/day); a 2-year feeding/oncognice study (rat) with systemic and oncogenic NOEL's of 500 ppm (25 mg/kg/day), and a 2-year feeding study (dog) with a systemic NOEL of 50.0 ppm (1.25 mg/kg/day).

The acceptable daily intake (ADI) based on the 2-year dog feeding study (NOEL of 1.25 mg/kg/day) and using a 100-fold safety factor is calculated to be 0.0125 mg/kg/day. The maximum permissible intake (MPI) for a 60-kg human is calculated to be 0.75 mg/day. The theoretical maximum residue contribution (TMRC) for existing tolerances for a 1.5 kg diet is calculated to be 0.1174 mg/day, which utilizes 15.65 percent of the ADI. The current action will add 0.1566 to the TMRC and utilize 20.75 percent of the ADI. Food and feed additive regulations of 2.0 ppm for sugarcane molasses being established in related document [PAP 1H5321/R130] appearing elsewhere in today's Federal Register will utilize 0.13 percent of the ADI. Other proposed but unapproved tolerances will utilize 0.8 percent of the ADI.

Data currently lacking are an acute dermal LD_{50} study, an acute inhalation study, mutagenicity studies (multi-test evidence) and repeat of an oncogenic study in a rodent (mouse). The company has been notified of the above deficiencies and has agreed to perform the studies and to remove the use from the label should the results of the above studies exceed the risk criteria for chronic toxicity as stated in 40 CFR 162.11.

The nature of the residues is adequately understood and an adequate analytical method, gas chromatography

with an electron capture detector, is available for enforcement purposes. There are presently no actions pending against the continued registration of this chemical. Residues are likely to occur in meat, milk, but the residues should be adequately covered by the tolerances on these commodities.

Chemical analyses of dicamba indicate that certain formulations may contain low levels of dimethyl-*N*-nitrosamine (DMNA) as an impurity. Laboratory studies have shown that DMNA is carcinogenic in test animals. Therefore, although dicamba itself has not been shown to be oncogenic, the potential risk from the DMNA impurity must be considered.

The Agency has evaluated pertinent toxicology and residue information and has concluded that the potential oncogenic risk from any DMNA impurity in the dicamba to be used on sugarcane is very low. Even assuming a maximum theoretical residue level of DMNA in sugarcane and that all sugar in the diet is contaminated with DMNA, the potential oncogenic risk is estimated to be in the 10^{-8} range, well below the Agency's 10^{-6} action level for nitrosoamines. *See* "Pesticides Contaminated with *N*-nitroso Compounds; Proposed Policy", 45 FR 42854 (June 25, 1980). Further support for the Agency's decision is derived from the failure to detect any DMNA residues in samples of sugarcane treated with dicamba under customary conditions of use.

The pesticide is considered useful for the purpose for which the tolerances are sought. It is concluded that the tolerances would protect the public health and are established set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this notice in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

Director, Office of Pesticide Programs.

PART 180—[AMENDED]

Therefore, 40 CFR 180.227 is revised to read as follows:

§ 180.227 Dicamba; tolerances for residues

(a) Tolerances are established for the combined residues of the herbicide dicamba (3,6-dichloro-*o*-anisic acid) and its metabolite 3,6-dichloro-5-hydroxy-*o*-anisic acid in or on the raw agricultural commodities as follows:

Commodities	Parts per million
Asparagus	3.0
Barley, grain	0.5
Barley, straw	0.5
Corn, fodder	0.5
Corn, forage	0.5
Corn, grain	0.5
Grasses, hay	40.0
Grasses, pasture	40.0
Grasses, rangeland	40.0
Oats, grain	0.5
Oats, straw	0.5
Sorghum, fodder	3.0
Sorghum, forage	3.0
Sorghum, grain	3.0
Sugarcane	0.1
Sugarcane, fodder	0.1
Sugarcane forage	0.1
Wheat, grain	0.5
Wheat, straw	0.5

(b) Tolerances are established for the combined residues of the herbicide dicamba (3,6-dichloro-*o*-anisic acid) and its metabolite 3,6-dichloro-2-hydroxybenzoic acid in or on the raw agricultural commodities as follows:

Commodities	Parts per million
Cattle, fat	0.2
Cattle, kidney	1.5
Cattle, liver	1.5
Cattle, mbyp	0.2
Cattle, meat	0.1
Goats, fat	0.2
Goats, kidney	1.5
Goats, liver	1.5
Goats, mbyp	0.2
Goats, meat	0.1
Hogs, fat	0.2
Hogs, kidney	1.5
Hogs, liver	1.5
Hogs, mbyp	0.2
Hogs, meat	0.1
Horses, fat	0.1
Horses, kidney	1.5
Horses, liver	1.5
Horses, mbyp	0.1
Horses, meat	0.1
Milk	0.1
Sheep, fat	0.2
Sheep, kidney	1.5
Sheep, liver	1.5
Sheep, mbyp	0.2
Sheep, meat	0.1

[PP 2F2754/R525; PH-FRL 2321-4]

Tolerances and Exemptions From Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities; Flucythrinate

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a tolerance for residues of the insecticide flucythrinate in or on the commodity pears. This regulation to establish a maximum permissible level for residues of the insectide was requested, pursuant to a petition, by the American Cyanamid Company.

EFFECTIVE DATE: March 16, 1983.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A–110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Franklin D.R. Gee, Product Manager (PM) 17, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 207, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–2690).

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the **Federal Register** of November 3, 1982 (47 FR 49892), that announced that the American Cyanamid Company, P.O. Box 400, Princeton, NJ 08540, had submitted pesticide petition 2F2754 proposing to amend 40 CFR 180.400 by establishing a tolerance for residues of the insecticide ((±)cyano (3-phenoxyphenyl)methyl(+)-4-difluoromethoxy)-alpha-(1-methylethyl)

benzeneacetate in or on the raw agricultural commodity pears at 0.05 part per million (ppm).

The American National Standards Institute (ANSI) has adapted the common name "flucythrinate" for the above chemical name.

There were no comments received in response to the notice of filing.

The data submitted in the petition and other relevant material have been evaluated. The toxicological data considered in support of the proposed tolerance included an acute oral rat toxicity study with a median lethal dose (LD_{50}) of 81 milligrams (mg)/kilogram (kg) for male rats and 67 mg/kg for female rats; a 21-day delayed hen neurotoxicity study with a no-observed-effect level (NOEL) of 5,000 mg/kg, the highest dose tested (HDT); teratology studies (in rats and rabbits) with a NOEL of 8.0 mg/kg/day (HDT) for rats and a NOEL of 60 mg/kg/day (HDT) for rabbits; a 3 generation rat reproduction study with a NOEL of 30 ppm; 90-day subchronic rat and dog feeding studies with a NOEL of 60 ppm for rats and 150 ppm for dogs (HDT); 24-month rat chronic feeding/oncogenicity study which resulted in a systemic NOEL of 60 ppm (no oncogenic effects were noted at 120 ppm (HDT): an 18-month mouse oncogenic study (no oncogenic effects at 120 ppm (HDT); and the following mutagenicity studies: an Ames test at 1,000 μg/Plate (HDT) and a rat dominant lethal test at 10.0 mg/kg (HDT) (both negative).

Data considered desirable but currently lacking are a 6-month dog feeding study and a second neurotoxicity study in hens at higher dosage levels.

The petitioner has agreed in writing to (1) submit the 6-month dog study (which has been extended and will be reported as a 2-year dog study) and (2) repeat the 21-day delayed neurotoxicity study in hens at higher dose levels and submit the results to the Agency by April 30, 1983.

The acceptable daily intake (ADI) is calculated to be 0.0150 mg/kg/day based on the 3-generation rat reproduction study and its NOEL of 30 ppm (mg/kg) using a 100-fold safety factor. The maximum permissible intake (MPI) is calculated to be 0.9000 mg/day for a 60-kg person.

Currently published tolerances result in a theoretical maximum residue contribution (TMRC) of 0.0384 mg/day and utilize 4.27% of the ADI. The current action will increase the TMRC to 0.0386 mg/day and will result in the utilization of 4.29 percent of the ADI.

An adequate analytical method, gas chromatography, is available for enforcement purposes. There are currently no regulatory actions pending against the registration of this pesticide and no other relevant considerations in establishing this tolerance.

The nature of the residue is adequately understood for this tolerance. Because pears are not generally considered to be an animal, feed, there is no expectation of secondary residues in meat, milk, poultry and eggs.

The pesticide is considered useful for the purpose for which the tolerance is sought. It is concluded that the tolerance will protect the public health and is therefore established as set forth below.

Any person adversely affected by this regulation may, withihn 30 days after publication of this notice in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Pursuant to the requiremens of the Regulatory Flexibility Act (Pub. L. 96-534, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

BILLING CODE 6560-50-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

42 CFR Part 124

Revision of Income Criteria for Eligibility for Uncompensated Services

AGENCY: Health Resources and Services Administration, PHS, HHS.

ACTION: Rule-related notice.

SUMMARY: This notice announces the applicability of the recent revision of the poverty income guidelines to uncompensated services programs administered by health care facilities pursuant to Titles VI and XVI of the Public Health Service Act.

DATE: The revision of the guidelines must be implemented by affected facilities by March 20, 1983.

FOR FURTHER INFORMATION CONTACT: Martin J. Frankel, Director, Division of Facilities Compliance, OHF, BHMORD, HRSA, Room 5-30, 3700 East-West Highway, Hyattsville, Maryland 20782, (301) 436-7795.

SUPPLEMENTARY INFORMATION: On February 17, 1983, the annual revision of the "Poverty Income Guidelines" was issued, effective upon publication (48 FR 7010). That revision affects, among others, health care facilities that have received construction assistance under Title VI or Title XVI of the Public Health Service Act, 42 U.S.C. 291, *et seq.*, and 42 U.S.C. 300q, *et seq.*, respectively. The regulations applicable to those facilities provide that the eligibility of persons for uncompensated services is to be determined in accordance with the current poverty income guidelines of the Department of Health and Human Services, formerly published by the Community Services Administration (CSA). See 42 CFR 124.508(a). The statute which gave this Department authority to revise the guidelines also provides that any reference in law to the poverty income guidelines constitutes a

reference to, in this case, the present revision. Pub. L. 97–35, 083(c)(1).

A discussion of the 30-day delay in the effective date can be found in the **Federal Register**, Volume 47, No. 79, page 17480, published on April 23, 1982.

Dated: March 10, 1983.

Robert Graham,

Administrator, Assistant Surgeon General.

Proposed Rules

Federal Register
Vol. 48, No. 52
Wednesday, March 16, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF ENERGY

Economic Regulatory Administration

10 CFR Part 205

[Docket No. ERA-R-83-01]

Proposed Amendment to Electric Power System Permits and Reports; Applications, Administrative Procedures and Sanctions—Fees To Pay Costs of Environmental Studies for Transmission Facilities Related to International Border Crossings

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby gives notice of a proposed rulemaking requiring applicants for Presidential Permits for the construction, maintenance and operation of electrical transmission lines associated with international border crossings to pay the costs of preparing and issuing any Environmental Impact Statement (EIS) necessary for ERA to comply with the National Environmental Policy Act of 1969 (NEPA). Environmental Assessments (EA), if required, may be prepared by the applicant pursuant to 40 CFR 1506.5(b), for the review and adoption by ERA. The applicant may also request that ERA arrange for the preparation of the EA, if required, at the applicant's expense. ERA proposes two alternatives. Under Alternative 1, when ERA determines that preparation of an environmental document is required, the applicant would enter into a contractual agreement with an independent third party contractor, selected by ERA. The independent third party contractor could be a government-owned, contractor-operated National Laboratory, or a private company qualified to conduct an environmental review and prepare an environmental document under the supervision of ERA. Under Alternative 2, when ERA determines that preparation of an environmental document is required, the applicant would be requested to submit a fee to ERA to cover the direct costs incurred by DOE in hiring a contractor to prepare the environmental document. The costs for which the applicant would be responsible would include the contractor's expenses to produce the draft and final environmental documents. DOE employee salaries and other fixed costs, as set forth in OMB Circular A–25, would not be charged to the applicant. Prior to the preparation of any Presidential Permit application, a potential applicant is encouraged to contact ERA and discuss the scope of the proposed project.

DATES: Written comments must be received not later than May 16, 1983. If requested or determined by ERA to be necessary, a public hearing will be held and the public so notified.

ADDRESSES: Written comments or requests for hearing should be addressed to the Office of Fuels Programs, Economic Regulatory Administraation, Department of Energy, Room GA–017, 1000 Independence Avenue, SW., Washington, D.C. 20585 (Docket No. ERA–R–83–01).

FOR FURTHER INFORMATION CONTACT:

Garet Bornstein, Office of Fuels Programs, Department of Energy, Room GA–017, 1000 Independence Avenue SW., Washington, D.C. 20585, (202) 252–5935

Lise Courtney M. Howe, Office of General Counsel, Department of Energy, Room 6A–141, 1000 Independence Avenue, SW., Washington, D.C. 20585, (202) 252–2000.

SUPPLEMENTARY INFORMATION:

I. Background and Purpose.
II. Proposed Rule.
III. Procedural Matters.
IV. Comment Procedures.

I. Background and Purpose

The authority to issue Presidential Permits pursuant to Executive Order No. 10485 was transferred to the Secretary of Energy by Executive Order No. 12038 (43 FR 4957). This responsibility was delegated by the Secretary to the Administrator of the Economic Regulatory Administration (DOE Delegation Order No. 0204–04, October 1, 1977)

The ERA regulations relating to the application for the construction, maintenance and operation of electric power transmission facilities appurtenant to international border crossings were published on October 28, 1980 (45 FR 71560) and are contained in 10 CFR 205.320 *et seq.* The regulations require any person, firm, cooperative, corporation or other entity to obtain a Presidential Permit for the operation of electric power transmission or distribution facilities crossing the border of the United States. The regulations specifically require that each applicant provide information regarding the project, the transmission lines to be covered by the Permit, and the environmental factors and impacts associated with all the transmission facilities and line routing alternatives. Two conformed copies of the application and a filing fee of $150 must accompany the original application. Persons receiving Presidential Permits also are required to file an annual report with ERA covering each month of the preceding calendar year, detailing by category the kilowatt hours of energy received or delivered and the associated cost and revenue.

Although DOE presently does not require applicants for Presidential Permits to pay the costs of preparing EIS's required by NEPA, in another program DOE does. *See* 10 CFR 504.9, Environmental Requirements for Certifying Powerplants (Fuel Use Act Coal Conversion Prohibition Order). In addition, such direct payment is consistent with the third party agreement regulations of the Environmental Protection Agency's National Pollutant Discharge Elimination System Program (40 CFR 6.604(g)).

II. Proposed Rule

ERA proposes in 10 CFR 205.328 that applicants seeking Presidential Permits pursuant to 10 CFR 205.320 *et seq.* will be responsible for the direct payment of costs associated with preparing any environmental documentation necessary for ERA to comply with NEPA. Two alternative methods are proposed.

Under Alternative 1, DOE will determine, on the basis of environmental information provided by the applicant pursuant to the application requirements of § 205.322 (c) and (d), if the preparation of an EA or EIS is required. If it is determined that an EIS is required, the applicant would enter

into a contractual agreement with an independent third party, which could be a government-owned, contractor-operated National Laboratory, a privately-owned consulting firm, or otherwise qualified company. This third party would be selected by ERA and must be qualified to conduct and prepare an EIS under the supervision of ERA. The party would be required to file a disclosure document stating that it does not have any conflict of interest, financial or otherwise, in the outcome of either the environmental process or the Permit application. ERA would approve the information to be developed and supervise the gathering, analysis, and presentation of the information. ERA would also have the authority to approve and modify any statement, analysis, or conclusion contained in the third party prepared environmental documents. Subsection 205.328(c) of Alternative 1 provides that ERA may waive the direct payment requirement where such waiver is determined by ERA to be in the public interest. If it is determined that an EA is required under Alternative 1, the applicant may prepare and environmental assessment pursuant to 40 CFR 1506.5(b) for review and adoption by DOE, or the applicant may enter into a contractual agreement with and independent third party, selected by ERA, who would prepare the EA, as set forth above.

Under Alternative 2, DOE will determine, on the basis of environmental information provided by the applicant pursuant to the application requirements of § 205.322 (c) and (d), if the preparation of an EA or an EIS is required. If it is so decided, DOE would determine a fee to cover the costs incurred by ERA in engaging a contractor to prepare the environmental impact statement. The fee would include the contractor's fee in preparing the EIS. DOE employee salaries and other fixed costs, as set forth in OMB Circular A–25, would not be charged to the applicant. The necessary environmental studies would proceed once the applicant has submitted the fee. Any balance of the fee remaining once all costs are incurred would be returned to the applicant. As in Alternative 1, ERA may waive the direct payment requirement where such waiver is determined by ERA to be in the public interest. If it is determined that an EA is required, the applicant may prepare the EA pursuant to 40 CFR 1506.5(b) for review and adoption by DOE, or it may choose to follow the procedure set forth above for Altenative 1.

One of these alternatives could be adopted in the final rule, or both of the alternatives could be included in the regulations. If both were included, provision could be made to select, based upon mutual agreement by the applicant and DOE, the alternative most appropriate to project goals.

ERA solicits comments on the appropriateness of requiring applicants to fund environmental analyses associated with NEPA compliance, and whether the alternatives as proposed would impact on the overall feasibility of projects. Further, should ERA put a specific limitation on the costs to be paid by the applicant under the first alternative? How might such a limitation be determined? Under the second alternative, would it be preferable to pay the fee on a time basis? Finally, ERA solicits any other suggestions that would make the NEPA process more responsive to the planning requirements of applicants.

III. Procedural Matters

A. Environmental Analysis

DOE has determined that these proposed regulations do not constitute a major Federal action significantly affecting the quality of the human environment and, therefore, do not require the preparation of an EIS.

B. Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980, Pub. L. 96–354 (5 U.S.C. 601–612), requires, in part, that an agency prepared an initial regulatory flexibility analysis for any proposed rule, unless it determines that the rule will not have a "significant economic impact" on a substantial number of small entities. Very few small entities within the meaning of the Regulatory Flexibility Act will be affected in any manner by these proposals because only a limited number of small entities seek such permits. DOE hereby certifies that these proposals, if adopted, are not likely to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act. Therefore, DOE is not required to publish an initial regulatory flexibility analysis under Section 603(b) of that Act.

C. Executive Order No. 12291

Section 3 of Executive Order No. 12291 (46 FR 13193, February 19, 1981) requires that DOE determine whether a proposed rule is a "major rule," as defined by section 1(b) of Executive Order No. 12291 and prepare a regulatory impact analysis for each major rule.

DOE has determined that these proposed regulations are not a major rule under Executive Order No. 12291, and do not require the preparation of a regulatory impact analysis. These proposals will be unlikely to result in an annual effect on the economy of $100 million or more. DOE foresees no major increase in costs or prices for consumers, industries, geographic regions, or Federal, State or local government agencies. DOE does not consider it likely that the proposals will result in significant adverse effects on competition, employment, investment, or productivity. Therefore, no regulatory impact analysis is required.

Pursuant to section 3(c)(3) of Executive Order No. 12291, these proposals were submitted to the Office of Management and Budget for review at least 10 days prior to publication in the **Federal Register.**

D. Paperwork Reduction Act of 1980

The information collection requirement proposed under Section 205.328 is not subject to clearance under the Paperwork Reduction Act of 1980, Pub. L. 96–511, because less than 10 applications are received annually. Collectively, only 80 applications have been received since the program began in 1939.

IV. Comment Procedures

A. Written Comments

The public is invited to submit written comments with respect to the regulations to the Office of Fuels Programs, Economic Regulatory Administration, Room GA–017, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585. Comments should be identified on the outside of the envelope and on the documents submitted to DOE with the designation, "Environmental Requirements for Presidential Permit Applications," Docket No. ERA–R–83–01.

Five copies should be submitted. All written comments and related information must be received by the Department of Energy not later than May 16, 1983, to ensure consideration.

B. Public Hearing

After reviewing written comments, ERA will decide whether a public hearing is needed to make a determination on a Final Rule. If it is decided to hold a public hearing, public notice will be given by announcement in the **Federal Register.**

(Department of Energy Organization Act, Pub. L. 95-91, 91 Stat. 565 (42 U.S.C. 7101), E.O. 10485, 18 FR 5397, 3 CFR 1949-1953 Comp., p. 970, as amended by E.O. 12038, 43 FR 4957, 3 CFR 1978 Comp., p. 136, Department of Energy Delegation Order No. 0204-4 (46 FR 60726))

Issued in Washington, D.C. on March 4, 1983.

Rayburn Hanzlik,

Administrator, Economic Regulatory Administration.

In consideration of the foregoing, the Department of Energy proposed to amend Part 205 of Chapter II, Title 10, Code of Federal Regulations, by adding § 205.328 to describe fees and clarify environmental requirements for Presidential Permit applicants.

Alternative 1

§ 205.328 Environmental Requirements for Presidential Permits.

(a) *NEPA Compliance.* Except as provided in paragraph (c) of this section, when an applicant seeks a Presidential Permit, the applicant will be responsible for the costs of preparing any necessary environmental document, including an Environmental Impact Statement (EIS), arising from ERA's obligation to comply with the National Environmental Policy Act of 1969 (NEPA). ERA will determine whether an EA or EIS is required within 45 days of the receipt of the Presidential Permit application and environmental information submitted pursuant to 10 CFR 205.322 (c) and (d). ERA will use the environmental information as the basis for making this determination. ERA may also use other information which the applicant may not have.

(1) If an EIS is determined to be necessary, the applicant shall enter into a contract with an independent third party, which could be a government-owned, contractor-operated National Laboratory, or a qualified private entity selected by ERA. The third party contractor must be qualified to conduct an environmental review and prepare an EIS, as appropriate, under the supervision of ERA, and may not have a financial or other interest in the outcome of the proceedings. The NEPA process must be completed and approved before ERA will issue a Presidential Permit.

(2) If an EA is determined to be necessary, the applicant may prepare an environmental assessment pursuant to 40 CFR 1506.5(b) for review and adoption by EPA, or the applicant may enter a third party contract as set forth in this section.

(b) *Environmental Review Procedure.* Except as provided in paragraph (c) of this section, environmental documents, including the EIS, where necessary, will be prepared utilizing the process set forth above. ERA, the applicant, and the independent third party, which could be a government-owned, contractor-operated National Laboratory or a private entity, shall enter into an agreement in which the applicant will engage and pay directly for the services of the qualified third party to prepare the necessary environmental documents. The agreement shall outline the responsibilities of each party and its relationship to the other two parties regarding the work to be done or supervised. ERA shall approve the information to be developed and supervise the gathering, analysis and presentation of the information. In addition, ERA will have the authority to approve and modify any statement, analysis, and conclusion contained in the environmental documents prepared by the third party. Before commencing preparation of the environmental document, the third party will execute an ERA-prepared disclosure document stating that it does not have any conflict of interest, financial or otherwise, in the outcome of either the environmental process or the Permit application.

(c) *Financial Hardship.* Whenever ERA determines that there is reason to believe it is in the public interest for the Federal government to bear all or a portion of the costs, ERA may waive the requirement set forth in paragraphs (a) and (b) of this section and perform the necessary environmental review, completely or in part, with its own resources.

(d) Prior to the preparation of any Presidential Permit application and environmental assessment, a potential applicant is encouraged to contact ERA and discuss the scope of the proposed project.

Alternative 2

§ 205.328 Environmental Requirements for Presidential Permits.

(a) *NEPA Compliance.* Except as provided in paragraph (b) of this section, applicants seeking Presidential Permits will be financially responsible for the expenses of any contractor chosen by ERA to prepare any necessary environmental document arising from ERA's obligation to comply with the National Environmental Policy Act of 1969 (NEPA) in issuing such Presidential Permits.

(1) ERA will determine whether an Environmental Import Statement (EIS) or an Environmental Assessment (EA) is required within 45 days of receipt of the Presidential Permit application and the environmental information submitted pursuant to 10 CFR 205.322(c) and (d). ERA will use the environmental information as the basis for making this determination. ERA also may use other information which the applicant may not have.

(2) If an EIS is required, ERA will notify the applicant within 90 days after the submission of the application and environmental information of the fee for completing the EIS. The fee shall be based on the expenses incurred by DOE in choosing a contractor to prepare the EIS and the fee charged to ERA by the contractor. DOE employee salaries and other fixed costs, as set forth in OMB Circular A-25, shall not be included in the applicant's fee. Fee payment shall be by check, draft, or money order payable to the Treasurer of the United States, and shall be submitted to ERA. Upon submission of the environmental fee, ERA will provide the applicant a tentative schedule of completion of the EIS.

(3) If an EA is determined to be necessary, the applicant may prepare an environmental assessment pursuant to 40 CFR 1506.5(b) for review and adoption by ERA, or the applicant may choose to have ERA prepare the EA pursuant to the fee arrangement set forth above.

(4) The NEPA process must be completed and approved before ERA will issue a Presidential Permit.

(b) *Financial Hardship.* Whenever ERA determines that there is reason to believe that it is in the public interest for the Federal government to bear all or a portion of the costs associated with the environmental process, ERA may waive the requirement set forth in paragraph (a) of this section and perform the necessary environmental review in part or completely with its own resources.

(c) Prior to the preparation of any Presidential Permit application, a potential applicant is encouraged to contact ERA and discuss the scope of the proposed project.

10 CFR Part 625

Sale of Strategic Petroleum Reserve Petroleum

AGENCY: Procurement and Assistance Management Directorate, Assistant Secretary for Management and Administration, DOE.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Department of Energy (DOE) proposes to adopt a rule governing price competitive sales of petroleum from the Strategic Petroleum

Reserve (SPR) in the event that the SPR is drawn down to respond to a severe energy supply interruption or to meet obligations of the United States under the International Energy Program. DOE is proposing to adopt a rule that will establish a framework for conducting the price competitive sale of the petroleum and for entering into contracts with those offerors who are awarded contracts for the purchase of SPR petroleum.

DOE solicits written comments with respect to this proposal.

DATE: Comments by May 2, 1983.

ADDRESSES: Send comments to: Lynn Warner, MA–863.1, Department of Energy, Room 1J–027, 1000 Independence Avenue, SW., Washington, D.C. 20585.

FOR FURTHER INFORMATION CONTACT:

Marcia L. Morris, MA–863.1, Procurement and Assistance Management Directorate, Department of Energy, Room 1J–027, 1000 Independence Avenue, SW., Washington, D.C. 20585, (202) 252–9073;

SUPPLEMENTARY INFORMATION:

I. Background
II. Proposed Rule
III. Public Comment on the Standard Sales Provisions
IV. Comment Procedures
V. Other Matters

I. Background

A. Legislative Background

The Energy Policy and Conservation Act (EPCA), Pub. L. 94–163, 42 U.S.C. 6201 *et seq.*, signed into law on December 22, 1975, authorized the creation of the SPR. The objective of the SPR is to provide for the storage of substantial quantities of petroleum in order to diminish U.S. vulnerability to the effects of a severe energy supply interruption, and to facilitate carrying out U.S. obligations under the Agreement on an International Energy Program.

An SPR Plan, which includes detailed proposals for development of the SPR, was transmitted to the Congress as Energy Action No. 10 on February 16, 1977, and became effective on April 18, 1977. Subsequently, to accelerate the development schedule, Plan Amendment No. 1 was transmitted to the Congress by the Federal Energy Administration (FEA), a predecessor agency of the Department of Energy, as Energy Action No. 12 on May 15, 1977, and became effective on June 20, 1977. Plan Amendment No. 2, which authorized expansion of the SPR to one billion barrels, was transmitted to the Congress by the DOE as Energy Action DOE No. 2 on May 18, 1978, and became effective on June 13, 1978. Plan Amendment No. 3, setting forth the method of withdrawal and distribution of the SPR oil, was transmitted to the Congress as Energy Action DOE No. 5 on October 21, 1979, and became effective on November 15, 1979.

In the Energy Emergency Preparedness Act of 1982 (EEPA), Pub. L. 97–229, Congress required that a new "Drawdown" (distribution) Plan replacing SPR Plan Amendment No. 3 be transmitted to the Congress; it provided that this amendment would take effect on the date transmitted, without Congressional review. The Plan was transmitted to Congress on December 1, 1982, and took effect on that date. The purpose of this rulemaking proceeding is to provide a framework for implementing policies and procedures set out in the new SPR Distribution Plan.

Section 161(d) of the EPCA stipulates that drawdown and disbribution of the SPR may not be made unless the President finds that such actions are "required by a severe energy supply interruption or by obligations of the United States under the international energy program." A severe energy supply interruption is defined in section 3(8) of the EPCA as a national energy supply shortage which the President determines:

(A) Is, or is likely to be, of significant scope and duration, and of an emergency nature;

(B) May cause major adverse impact on national safety or the national economy; and

(C) Results, or is likely to result, from an interruption in the supply of imported petroleum products, or from sabotage or an act of God.

The International Energy Program referred to in section 161(d) is the Agreement on an International Energy Program (IEP) signed by the United States on November 18, 1974. This Agreement authorizes, under specific conditions, an emergency program among participating countries pursuant to which member countries would share the world-wide crude oil supplies available to them. The existence of IEP obligations can serve as a basis for authorizing an SPR drawdown. However, there is no requirement that the SPR be drawn down and used to satisfy these obligations.

Section 161(b) provides that "no drawdown and distribution of the Reserve may be made except in accordance with the provisions of the Distribution Plan contained in the Strategic Petroleum Reserve Plan which has taken effect pursuant to section 159(a)."

B. Regulatory Background

The previous SPR Distribution Plan, Plan Amendment No. 3, contained a number of alternative distribution methods which relied upon the Secretary's rulemaking authority under section 161(e) of EPCA. To establish the regulatory framework for such distribution methods, DOE in 1980 adopted 10 CFR Part 220 as well as conforming amendments to its Standby Mandatory Crude Oil Allocation Program and Buy/Sell Program. Part 220 limited the distributions of SPR oil to refiners and established three regulatory mechanisms for allocating SPR oil.

Under the original Part 220, the allocation alternatives available to the Secretary were: First, allocations of SPR crude oil to small refiners under the Buy/Sell Program in such amounts as the Secretary deemed appropriate; second, allocation under the Standby Mandatory Crude Oil Allocation Program, which intself contained several allocation alternatives; and third, allocation of SPR crude oil outside of these programs in such manner as the Secretary determined to be necessary to attain the objectives of the Emergency Petroleum Allocation Act.

Part 220 also established procedures for the conduct of sales, consisting of four basic steps. The first step was the acceptance by refiners of the Sales Agreement which was to set forth the most fundamental provisions of a contract of sale. The second step, upon a Presidential decision to draw down the SPR, was the issuance of the Notice of Sale. In addition to specifying the quantity and quality of crude oil available for sale, the location of the oil and the date and time for submission of offers, the Notice of Sale was to set forth any limitations on the eligibility of refiners to participate in that sale. For example, Part 220 permitted the Secretary to limit the sale to refiners assigned an allocation on the buy/sell list, or refiners capable of supplying a particular product to a particular region. The third step was the evaluation of offers; the fourth, award of contracts.

For crude oil allocated under Part 220, a framework for setting a price was adopted. DOE was to establish a price for its high sulfur and low sulfur crudes with provisions for adjustment for gravity and sulfur content. The price was not to be significantly higher or lower than the highest and lowest prices respectively, in comparable sales of allocated crude oil occurring in the month of sale. In determining prices DOE was to consider (1) the weighted average per barrel landed cost of all crude oil delivered to refiners in the month of sale, (2) data reported to DOE on transactions between affiliated and non-affiliated entities and (3) such other data as DOE considered appropriate.

On January 28, 1981, President Reagan issued Executive Order No. 12287, eliminating the existing regulatory programs to which the original Part 220 related. Part 220 was amended on March 30, 1981, to delete all references to the Buy/Sell Program and eliminate use of that program as a means for distributing SPR oil. No further changes have been adopted to Part 220; however, in accordance with the new Distribution Plan, those regulations will be reviewed and revised to conform to the new Distribution Plan which relies primarily on price competitive sales for distributing SPR petroleum.

Part 220 was adopted under authority of § 161(e) of the EPCA which authorized the Secretary to provide by rule for the allocation of SPR petroleum. The proposed rule is to be adopted under the general authority of the Secretary to promulgate rules to the extent necessary to implement the SPR Plan. The proposed rule will cover all price competitive sales of SPR petroleum. Part 220 will continue to cover only the allocation of SPR petroleum in accordance with the new Distribution Plan.

C. SPR Facilities

The SPR is being developed in three phases, each of which increases the program's overall storage capacity and drawdown capability. As of March 1, 1983, over 300 million barrels of oil were in storage in the SPR; virtually the entire permanent storage capacity currently available is filled with oil.

Phase I consisted of the development of five underground oil storage facilities, with a capacity of approximately 250 million barrels, and a marine terminal. The Phase I facilities are oil storage sites at Bryan Mound in Texas and Bayou Choctaw, West Hackberry, Sulphur Mines and Weeks Island in Louisiana, and the Department of Energy's marine terminal at St. James in Louisiana. Four of these storage sites utilize existing solution-mined (leached) caverns; the fifth site is a conventional salt mine. Construction of Phase I facilities began in July 1977 and was completed in 1980.

Phase II is the ongoing expansion of three Phase I sites by 290 million barrels. The Bryan Mound site will be expanded by 120 million barrels and the West Hackberry site by 160 million barrels; an additional cavern, which has an existing capacity of 10 million barrels, is being acquired at Bayou Choctaw. Solution-mining of new caverns is under way at Bryan Mound, West Hackberry and Bayou Choctaw. Phase II development and fill are scheduled to be completed by 1986.

Phase III involves the further expansion of two existing SPR sites, and the planned development of a new site at Big Hill, Texas.

The SPR now has the capability to withdraw petroleum from its sites for distribution at a sustainable rate of 1.7 million barrels per day. Upon the completion of Phase II fill, distribution capability will increase to 3.5 million barrels per day. At a level of 750 million barrels SPR withdrawal capacity would be 4.5 million barrels per day.

II. Proposed Rule

The new SPR Distribution Plan provides that the principal method of distributing SPR oil will be price competitive sale. The Plan also provides that in any calendar month, the Secretary may direct the distribution of up to 10 percent of the volume of the SPR oil sold in that calendar month, in such manner as he determines at his discretion; the price of such oil shall be the average price of SPR oil sold at the most recent competitive sale. However, the proposed rule applies only to the sale of SPR oil through price competition. It adopts procedures governing the process by which DOE will conduct the price competitive sale of SPR oil during drawdown and distribution. The rule is adopted under the general authorization to the Secretary by the Department of Energy Organization Act, Pub. L. 95–91, 42 U.S.C. 7101 *et seq.*, and by EPCA to promulgate rules, regulations or orders necessary or appropriate to implement the SPR Plan.

It is critical to the early achievement of the SPR's desired sales and delivery schedules that the Government's contracting procedures for the sale of SPR oil be both flexible and expeditious. The purpose of the proposed rule is to facilitate the sales process, primarily by providing for the establishment of Standard Sales Provisions, containing contract clauses which, it is expected, will be contained in contracts for the sale of SPR petroleum.

Price competitive sale of SPR petroleum involves four basic steps: the issuance of the Standard Sales Provisions; the issuance of a Notice of Sale; the selection of the highest offers; and award of sales contracts. The Standard Sales Provisions are contract of sale terms and conditions to be developed in accordance with the proposed rule and published in the Federal Register as an appendix to the final rule. Notices of Sale will be issued after a Presidential decision to draw down the SPR; they will announce the amount, type and location of the SPR petroleum to be sold, the delivery period, and procedures for submitting bids, and provide other pertinent information. Award of contracts will be made to the offerors complying with the terms and conditions specified in the Notice of Sale as applying to that particular sale, and offering the highest prices.

The proposed rule would require the development and publication in the Federal Register of the Standard Sales Provisions containing contract clauses which the Notice of Sale may make applicable to particular price competitive sales of SPR petroleum. These provisions will include any contract clauses that are required by law, regulation, SPR programmatic considerations, or sound business practice. They also will include purchaser financial and performance responsibility measures or descriptions thereof. Such measures are intended to reduce the risk of purchases by persons who lack the capability or intent to take timely delivery of the SPR petroleum, or the financial ability to pay for it. It is DOE's intention to develop firm, binding guarantees of the offeror's full performance and payment under the contract, which each offeror would have to undertake before contract award. These measures would require tangible evidence of the offeror's ability to perform; examples include contractual clauses covering liquidated damages and the furnishing of letters of credit, or of payment and performance bonds. The Standard Sales Provisions differ from the Basic Sales Agreement used under the previous Distribution Plan in three ways: First, the Standard Sales Provisions place greater emphasis on purchaser financial and performance guarantees; second, they contain model contract terms and conditions that may be changed at the discretion of the Secretary by means of the Notice of Sale; finally, there will be no presigning of the Standard Sales Provisions.

The proposed rule provides that at his discretion, the Secretary or his designee may specify in the Notice of Sale, which of the terms and conditions in the Standard Sales Provisions would or would not apply to a particular sale. In the Notice of Sale the Secretary also may revise such terms and conditions, or add new ones which would apply to that particular sale, consistent with the SPR Distribution Plan adopted on December 1, 1982. Offerors, as part of their offers for SPR petroleum, would agree to all contractual provisions and financial and performance responsibility measures made applicable by the Notice of Sale, and comply with the responsibility measures in accordance with the Notice of Sale. The proposed rule provides that no contract may be awarded to an offeror who has not unconditionally agreed to all contractual provisions and responsibility measures made applicable by the Notice of Sale. It is expected that the terms and conditions set out in the Notice of Sale and the Standard Sales Provisions will not be part of the contract documents as such, but rather will be incorporated by reference, and the proposed rule so provides.

The proposed rule would require the publication of the Standard Sales Provisions in the **Federal Register** and in the Code of Federal Regulations as an appendix to the final rule. The proposed rule also provides for the periodic review and republication in the **Federal Register** of the Standard Sales Provisions, including any revisions. It is anticipated that the Notice of Sale will specify, by referencing the **Federal Register** and the Code of Federal Regulations in which the latest version of the Standard Sales Provisions were published, the contractual provisions contained or described therein that apply to that particular sale. To the extent practicable, public comment will be sought on terms, conditions and measures included in the Standard Sales Provisions.

Time may be of the essence in a severe energy supply interruption. Failure to achieve the SPR drawdown rate as determined by the President could lessen the effect of an SPR drawdown. Buyers who defaulted on their sales contracts could undermine achievement of the desired drawdown rate, with potentially adverse consequences for the national economy or the national safety. In order to assure that the drawdown objectives of the SPR are achieved and that only responsible offerors are awarded contracts, the proposed rule also would provide that the Secretary or his designee may exclude a firm from participating in any future sale of SPR petroleum when that firm had previously bid, was awarded a contract, and failed to take delivery of the petroleum in accordance with the terms of the contract. This exclusion would be in addition to any remedies for breach which may be provided for in the contract of sale. The ineligibility would not come into effect until after the firm had been given an opportunity to submit information or argument in opposition to the ineligibility. The Secretary or his designee must consider the firm's response, if any, before making the purchaser ineligible for future award of SPR sales contracts. The ineligibility shall continue for the legnth of time determined by the Secretary of his designee as appropriate under the circumstances. The purchaser shall be notified of the result of the ineligibility proceedings. The proposed rule provides that at his discretion, the Secretary or his designee may permit any such firm that petitions for reinstatement to participate in future SPR sales.

In addition to the remedies available to the Government under the contract and this rule, a purchaser who defaults on a contract also may be subject to debarment procedures under other applicable DOE regulations.

III. Public Comment on the Standard Sales Provisions

Prior to the close of the comment period for this proposed rule DOE expects to publish a draft of the Standard Sales Provisions in the **Federal Register** for written public comment. The public comment period will be forty-five days. After the close of the comment period, DOE will publish in the **Federal Register** the final version of the Standard Sales Provisions, a summary of the comments received and DOE's response to those comments. DOE believes that because of its reliance on private industry to move the SPR petroleum into commerce, public comment is essential to the development of effective, efficient procedures for the sale and delivery of the SPR petroleum.

IV. Comment Procedures

A. Written Comments

You are invited to participate in this proceeding by submitting information, views, or arguments with respect to the proposed adoption of 10 CFR Part 625. Comments should be submitted no later than May 2, 1983, to the address indicated in the "**ADDRESSES**" section of this preamble and should be identified on the outside envelope and on the document with the designation: "Sale of Strategic Petroleum Reserve Petroleum". Ten copies should be submitted. All comments received will be available for public inspection in the DOE Reading Room, Room 1E–190, James Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, between the hours of 8 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Any information or data submitted which you consider to be confidential must be so identified and submitted in writing, one copy only. We reserve the right to determine the confidential status of such information or data and to treat it according to our determination.

B. Public Hearing

DOE believes that the amendment proposed in this Notice presents no substantial issue of fact or law and is unlikely to have a substantial impact on the Nation's economy or large numbers of individuals or businesses. Accordingly, DOE is not scheduling a public hearing as provided by section 501(c) of the Department of Energy Organization Act (DOE Act), Pub. L. 95–91, and the Administrative Procedure Act (5 U.S.C. 553). If a significant number of persons should request an opportunity for oral presentation of views, data and arguments, a public hearing could be held after public notice.

V. Other Matters

A. Section 404 of the DOE Act

Pursuant to the requirements of Section 404(a) of the Department of Energy Organization Act (DOE Act, 42 U.S.C. 7101 *et seq.*, Pub. L. 95–91, as amended), we are referring this rule to the Federal Energy Regulatory Commission (FERC) for a determination as to whether the proposed rule would significantly affect any matter within the Commission's jurisdiction. The Commission has until the close of the public comment period to make that determination.

B. Section 7 of the FEA Act

Under section 7(a) of the Federal Energy Administration Act of 1974 (15 U.S.C. 787, *et seq.*, Pub. L. 93–275, as amended), the requirements of which remain in effect under section 501(a) of the DOE Act, the delegate of the Secretary of Energy shall, before promulgating proposed rules, regulations, or policies affecting the quality of the environment, provide a period of not less than five working days during which the administrator of the Environmental Protection Agency (EPA) may provide written comments

concerning the impact of such rules, regulations, or policies on the quality of the environment. Such comments shall be published together with publication of notice of the proposed action.

A copy of this proposed rulemaking, including this determination that the Secretary does not see the proposed rule as having unfavorable impacts on the quality of the environment beyond those addressed in the Environmental Impact Statements prepared to date on the SPR, was sent to the EPA. The EPA Administrator has reserved the right to make additional comments in accordance with the EPA's duties and responsibilities under section 309 of the Clean Air Act.

C. Executive Order 12291

Section 3 of Executive Order (E.O.) 12291 (46 FR 13193, February 19, 1981) requires that DOE determine whether a proposed rule is a "major rule", as defined by section 1(b) of E.O. 12291, and prepare a regulatory impact analysis for each major rule. A "major rule" is defined in E.O. 12291 as one likely to result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions, or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. The rule is essentially of an administrative nature and is not expected to impact upon the prices received for the SPR petroleum or impose additional costs on firms offering to buy the SPR petroleum. Thus the annual effect of the rule on the economy will be minimal. Furthermore, the proposed rule does not affect the prices to be charged for the SPR petroleum, because under the SPR Distribution Plan those prices are required to be set by price competitive sales. Accordingly there will be no major increases in costs or prices as a result of this proposed rule.

D. Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 Pub. L. 96–354, (5 U.S.C. 601–612) requires, in part, that an agency prepare an initial regulatory flexibility analysis for any proposed rule, unless it determines that the rule will not have a "significant economic impact" on a substantial number of small entities. The propose rule, which is administrative in nature, does not impose any additional burden on small entities but rather only sets forth the contracting procedures for the sale of the SPR petroleum which the SPR Distribution Plan requires to be made by competitive sales. Accordingly, DOE does not believe the proposed rule has significant impact on small entities, and as required by section 605(b), DOE certifies that the amendment will not have a significant economic impact on a substantial number of small entities.

E. Environmental Review

DOE has determined that the proposed amendment, which is essentially administrative in nature, clearly is not a major federal action with significant environmental impact. Consequently, the proposed amendment does not require preparation of an Environmental Assessment or Environmental Impact Statement under the National Environmental Policy Act of 1969, as amended, 42 U.S.C. 431 *et seq.*

(Federal Energy Administration Act of 1974, Pub. L. 93–275; Department of Energy Organization Act, Pub. L. 95–91; Energy Policy and Conservation Act, Pub. L. 94–163)

List of Subjects in 10 CFR Part 625

Strategic petroleum reserve, Drawdown sales.

In consideration of the foregoing, Chapter II, Title 10 of the Code of Federal Regulations is proposed to be amended as set forth below.

Issued in Washington, D.C. March 8, 1983.

Hiliary J. Rauch,

Director, Procurement and Assistance Management Directorate.

Part 625 is proposed to be added to 10 CFR Chapter II to read as follows:

PART 625—PRICE COMPETITIVE SALE OF STRATEGIC PETROLEUM RESERVE PETROLEUM

Sec.

625.1 Application and purpose.
625.2 Definitions.
625.3 Standard sales provisions.
625.4 Publication of the standard sales provisions.
625.5 Failure to perform in accordance with SPR contracts of sale.

Authority: Federal Energy Administration Act of 1974, Pub. L. 93–275; Department of Energy Organization Act, Pub. L. 95–91; Energy Policy and Conservation Act, Pub. L. 94–163.

§ 625.1 Application and purpose.

This part shall apply to all price competitive sales of SPR petroleum by DOE. Timely drawndown of the SPR requires preannouncement, to the extent practicable, of contract terms and conditions applicable to price competitive sales of SPR petroleum. This section provides the rules for developing standard contract terms and conditions and financial and performance responsibility measures; notifying potential purchasers of those terms, conditions and measures; choosing applicable terms, conditions and measures for each sale of SPR petroleum; and notifying potential purchasers of which terms, conditions and measures will be applicable to particular sales of SPR petroleum.

§ 625.2 Definitions.

(a) *DOE.* DOE means the Department of Energy established by Pub. L. 95–91 (42 U.S.C. 7101 *et seq.*) and any component thereof.

(b) *Notice of Sale.* The Notice of Sale is the document announcing the sale of SPR petroleum, the amount, type and location of the SPR petroleum being sold, the delivery period and the procedures for submitting bid; specifying which previously published contractual provisions or financial and performance responsibility measures are applicable to that particular sale of SPR petroleum; and providing other information, terms, conditions or measures pertinent to a particular sale.

(c) *Price Competitive Sale.* A price competitive sale of SPR petroleum is one in which contract awards are made to those responsive, responsible persons offering the highest prices; sales conducted pursuant to rules adopted under section 161(e) of the Energy Policy and Conservation Act (EPCA), Pub. L. 94–163 (42 U.S.C. 6201 *et seq.*), are not price competitive sales.

(d) *Purchaser.* A purchaser is any person (including a Government agency) who submits a successful offer for SPR petroleum, agrees to requirements imposed by this rule and the Notice of Sale, and enters into a contract with DOE to purchase SPR petroleum.

(e) *SPR.* SPR means the Strategic Petroleum Reserve, established by Title I, Part B of EPCA.

(f) *SPR Petroleum.* SPR petroleum means crude oil, residual fuel oil or any refined petroleum product (including any natural gas liquid and any natural gas liquid product) owned or contracted for by DOE and in storage in any permanent SPR facility, or temporarily stored in other storage facilities, or in transit to such facilities (including petroleum under contract but not yet delivered to a loading terminal).

(g) *Standard Sales Provisions.* The Standard Sales Provisions contain or describe contract clauses, terms and

conditions of sale, and financial and performance responsibility measures, which may be applicable to the sale of SPR petroleum under this Part.

§ 625.3 Standard sales provisions.

(a) *Contents.* The Standard Sales Provisions shall contain contract clauses which may be applicable to price competitive sales of SPR petroleum, including terms and conditions of sale, and purchaser financial and performance responsibility measures, or descriptions thereof. At his discretion, the Secretary or his designee may specify in a Notice of Sale which of such terms and conditions, or financial and performance responsibility measures, shall apply to a particular sale of SPR petroleum; and, he may specify any revisions in such terms, conditions and measures, and any additional terms, conditions and measures which shall be applicable to that sale, that are consistent with the SPR Drawdown Plan adopted on December 1, 1982.

(b) *Acceptance by Offerors.* All offerors must, as part of their offers for SPR petroleum in response to a Notice of Sale, agree without exception to all contractual provisions and financial and performance responsibility measures which the Notice of Sale makes applicable to the particular sale.

(c) *Award of Contracts.* No contract for the sale of SPR petroleum may be awarded to any offeror who has not unconditionally agreed to all contractual provisions and financial and performance responsibility measures which the Notice of Sale makes applicable to the particular sale.

(d) *Contract Documents.* The terms and conditions which the Notice of Sale makes applicable to a particular sale may be incorporated into a contract for the sale of SPR petroleum by reference to the Notice of Sale.

§ 625.4 Publication of the standard sales provision.

(a) *Publication.* The Standard Sales Provisions shall be published in the **Federal Register** and in the Code of Federal Regulations as an appendix to this rule.

(b) *Revisions of the Standard Sales Provisions.* The Standard Sales Provisions shall be reviewed periodically and republished in the **Federal Register**, with any revisions.

(c) *Notification of Applicable Clauses.* The Notice of Sale will specify, by referencing the **Federal Register** and the Code of Federal Regulations in which the latest version of the Standard Sales Provisions was published, which contractual terms and conditions and contractor financial and performance responsibility measures contained or described therein are applicable to that particular sale.

§ 625.5 Failure to perform in accordance with SPR contracts of sale.

(a) *Ineligibility.* In addition to any remedies available to the Government under the Contract of Sale, in the event that a purchaser fails to perform in accordance with applicable SPR petroleum sale contractual provisions, and such failure is not excused by those provisions, the Secretary or his designee, at his descretion, may make such purchaser ineligible for future awards of SPR petroleum sales contracts.

(b) *Determination of Ineligibility.* No purchaser shall be made ineligible for the award of any SPR sales contract prior to notice and opportunity to respond in accordance with the requirements of this subsection.

(1) Upon the determination that a purchaser is to be considered for ineligibility, the purchaser shall be sent by certified mail return receipt requested, the following:

(i) Notification that the Secretary or his designee is considering making the purchaser ineligible for future awards;

(ii) Identification of the SPR sales contract which the purchaser failed to comply with, along with a brief description of the events and circumstances relating to such failure;

(iii) Advice that the purchaser may submit in writing for consideration by the Secretary or his designee in determining whether or not to impose ineligibility on the purchaser, any information or argument in opposition to the ineligibility; and

(iv) Advice that such information or argument in opposition to the ineligibility must be submitted within a certain time in order to be considered by the Secretary or his designee, such time to be not less than 21 days.

(2) After the elapse of the time period established under section (1) for receipt of the purchaser's response, the Secretary or his designee, at his discretion, and after consideration of the purchaser's written response, if any, may make the purchaser ineligible for future awards of SPR petroleum sales contracts. Such ineligibility shall continue for the time period determined by the Secretary or his designee, as appropriate under the circumstances.

(3) The purchaser shall be notified of the Secretary's decision.

(c) *Reconsideration.* Any purchaser who has been excluded from participating in any SPR sale under (a) may request that the Secretary reconsider the purchaser's ineligibility. The Secretary or his designee, at his discretion, may reinstate any such purchaser to eligibility for future competitive sales.

BILLING CODE 6450-01-M

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Part 700

Definitions; Limited Income Credit Unions

AGENCY: National Credit Union Administration.

ACTION: Proposed rule.

SUMMARY: The Federal Credit Union Act authorizes Federal credit unions serving predominantly low income members, as defined by the NCUA Board, to accept insured share accounts from nonmembers. The NCUA Board proposes to amend its definition of low income credit unions to include those serving predominantly students. This will enable such credit unions to accept insured share accounts from alumni, alumni organizations, philanthropic organizations and others.

DATE: Comments must be received on or before April 11, 1983.

ADDRESS: Send coments to Secretary, NCUA Board, 1776 G Street, NW., Washington, D.C. 20456.

FOR FURTHER INFORMATION CONTACT: Harry Blaisdell, Director, Department of Administration, at the above address or telephone (202) 357–1065.

SUPPLEMENTARY INFORMATION: Federal credit unions "serving predominantly low income members", as that phrase is defined by the NCUA Board, are authorized pursuant to section 107(6) of the Federal Credit Union Act (12 U.S.C. 1757(6)) to receive insured share, share draft and share certificate accounts from nonmembers.

Section 700.1(i) of NCUA's regulations (12 CFR 700.1(i)) defines "predominantly" to mean a simple majority. Section 700.1(h) defines "low income members" to include members below certain income levels published by the U.S. Department of Labor, certain members residing in public housing projects and members who qualify as

recipients in community action programs.

The NCUA Board now proposes to expand the latter definition to include credit union members who are students. This would enable credit unions serving predominantly students, e.g. credit unions sponsored by colleges or universities or student groups thereof, to receive insured accounts from individuals and organizations such as alumni, alumni groups, local corporations and philanthropic organizations. These funds would in turn be used for purposes such as student loans for books, tuition and housing.

The NCUA Board requests comments on whether the proposal is generally advisable, whether any limits should be placed on the action by defining the term "student" or otherwise, and on any other issues relevant to the proposal.

Regulatory Flexibility Act

The NCUA Board has determined that the proposed action would not have a significant economic effect on a substantial number of small credit unions, and therefore a regulatory flexibility analysis has not been prepared in connection with the proposal.

(12 U.S.C. 1752(5), 1757(6), 1766(a))

List of Subjects in 12 CFR Part 700

Credit unions.

Accordingly, the Board requests comments as described above. Comments must be received on or before April 11, 1983.

Dated: February 9, 1983.

Rosemary Brady,

Secretary to the NCUA Board.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 65

[A-3-FRL 2322-1]

State and Federal Administrative Orders Permitting a Delay in Compliance With State Implementation Plan Requirements; Pennsylvania Department of Environmental Resources to Philadelphia Textile Finishers, Inc.

AGENCY: Environmental Protection Agency.

ACTION: Proposed rulemaking.

SUMMARY: EPA is proposing to approve an administrative order issued by the Pennsylvania Department of Environmental Resources to Philadelphia Textile Finishers, Inc. The order requires the company to bring air emissions from its fabric coating facility in Norristown, Pennsylvania into compliance with certain regulations contained in the federally approved Pennsylvania State Implementation Plan (SIP) by October 31, 1983. Because the order has been issued to a major source and permits a delay in compliance with provisions of the SIP, it must be approved by EPA before it becomes effective as a delayed compliance order pursuant to the Clean Air Act (the Act). If approved by EPA, the order will constitute an addition to the SIP. In addition, a source in compliance with an approved order may not be sued under the federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the Order. The purpose of this notice is to invited public comment on EPA's proposed approval of the order as a delayed compliance order.

DATE: Writen comments must be received on or before April 15, 1983.

ADDRESSES: Comments should be submitted to Director, Air & Waste Management Division, EPA Region III, Sixth & Walnut Streets, Philadelphia, Pennsylvania 19106. The State order, supporting material, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT: Ben Mykijewycz, Environmental Engineer, Air & RCRA Compliance Section, Air & Waste Management Division, U.S. EPA Region III, 6th and Walnut Streets, Philadelphia, Pennsylvania 19106, Telephone: (215) 597–9387.

SUPPLEMENTARY INFORMATION: Philadelphia Textile Finishers, Inc. operates, among other processes, two fabric coating lines at its plant in Norristown, Pennsylvania. The order under consideration addresses emissions from the surface coating processes, listed above, which are subject to § 129.52 of Title 25 of the Pennsylvania Code. The regulation limits the emissions of volatile organic compounds (VOC), and is part of the federally approved Pennsylvania State Implementation Plan. The order requires final compliance with the regulation by October 31, 1983 through the use of low solvent coatings.

Because this order has been issued to a major source of VOC emissions and premits a delay in compliance with the applicable regulation, it must be approved by EPA before it becomes effective as a delayed compliance order under Section 113 (d) of the Clean Air Act (the Act). EPA has reviewed the order and has found that the order does satisfy the requirements of this subsection.

If the order is approved by EPA, source compliance with its terms would preclude federal enforcement action under Section 113 of the Act against the source for violations of the regulation covered by the order during the period the order is in effect. Enforcement against the source under the citizen suit provisions of the Act (Section 304) would be similarly precluded. If approved, the order would also constitute an addition to the Pennsylvania SIP. However, source compliance with the order will not preclude assessment of any noncompliance penalties under Section 120 of the Act, unless the source is otherwise entitled to an exemption under Section 120(a)(2)(B) or (C).

All interested persons are invited to submit written comments on the proposed order. Written comments received by the date specified above will be considered in determining whether EPA may approve the order. After the public comment period, the Administrator of EPA will publish in the **Federal Register** the Agency's final action on the order in 40 CFR Part 65.

[A-3-FRL-2332-3]

State and Federal Administrative Orders Permitting a Delay in Compliance With State Implementation Plan Requirements; Proposed Approval of an Administrative Order Issued by Pennsylvania Department of Environmental Resources to All-Steel, Inc.

AGENCY: Environmental Protection Agency.

ACTION: Proposed rulemaking; invitation for public comment.

SUMMARY: EPA has proposed to approve an administrative order issued by the Pennsylvania Department of Environmental Resources to All-Steel, Inc. The order requires the company to bring air emissions from its metal furniture coating facility in Hazle Township, Pennsylvania into compliance with certain regulations contained in the federally approved Pennsylvania State Implementation Plan (SIP) by December 30, 1983. Because the order has been issued to a major source and permits a delay in compliance with provisions of the SIP, it must be approved by EPA before it becomes effective as a delayed compliance order pursuant to the Clean Air Act (the Act). If approved by EPA, the order will constitute an addition to the SIP. In addition, a source in compliance with an approved order may not be sued under the federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the Order. The purpose of this notice is to invite public comment on EPA's proposed approval of the order as a delayed compliance order.

DATE: Written comments must be received on or before April 15, 1983.

ADDRESSES: Comments should be submitted to Director, Air & Waste Management Division, EPA Region III, Sixth & Walnut Streets, Philadelphia, Pennsylvania 19106. The State order, supporting material, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT: Joseph S. Arena, Environmental Scientist, Air & RCRA Compliance Section, Air & Waste Management Division, U.S. EPA Region III, 6th & Walnut Streets, Philadelphia, Pennsylvania 19106, Telephone: (215) 597–4561.

SUPPLEMENTARY INFORMATION: All-Steel, Inc. operates a metal furniture coating facility at Hazle Township, Pennsylvania. The order under consideration addresses emissions from the surface coating processes, listed above, which are subject to § 129.52 of Title 25 of the Pennsylvania Code. The regulation limits the emission of volatile organic compounds (VOC), and is part of the federally approved Pennsylvania State Implementation Plan. The order requires final compliance with the regulation by December 30, 1983 through the use of low solvent coatings.

Because this order has been issued to a major source of VOC emissions and permits a delay in compliance with the applicable regulation, it must be approved by EPA before it becomes effective as a delayed compliance order under Section 113(d) of the Clean Air Act (the Act). EPA has reviewed the order and has found that the order does satisfy the requirements of this subsection.

If the order is approved by EPA, source compliance with its terms would preclude federal enforcement action under Section 113 of the Act against the source for violations of the regulation covered by the order during the period the order is in effect. Enforcement against the source under the citizen suit provision of the Act (Section 304) would be similarly precluded. If approved, the order would also constitute an addition to the Pennsylvania SIP. However, source compliance with the order will not preclude assessment of any noncompliance penalties under Section 120 of the Act, unless the source is otherwise entitled to an exemption under Section 120(a)(2)(B) or (C).

All interested persons are invited to submit written comments on the proposed order. Written comments received by the date specified above will be considered in determining whether EPA may approve the order. After the public comment period, the Administrator of EPA will publish in the Federal Register the Agency's final action on the order in 40 CFR Part 65.

Cyano(3-Phenoxyphenyl)Methyl 4-Chloro-Alpha-(1-Methylethyl)Benzeneacetate; Proposed Tolerances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that tolerances be established for residues of the insecticide cyano(3-phenoxyphenyl)methyl 4-chloro-alpha-(1-methylethyl)benzeneacetate in or on the raw agricultural commodities eggplant and peppers. The proposed regulation to establish maximum permissible levels for residues of the insecticide in or on the commodities was requested in a petition by the Interregional Research Project No. 4 (IR–4).

DATE: Comments must be received on or before March 31, 1983.

ADDRESS: Written comments to: Emergency Response Section, Process Coordination Branch, Registration Division (TS–767C), Environmental Protection Agency, Rm. 716B, CM #2, 1921 Jefferson Davis Highway, Arlington, VA. 22202.

FOR FURTHER INFORMATION CONTACT: Donald Stubbs (703–557–1192) at the above address.

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petition number 2E2653 to EPA on behalf of the IR–4 Technical Committee and the Agricultural Experiment Stations of Florida, Massachusetts, Maryland, New Jersey and Puerto Rico.

This petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of tolerances for residues of the insecticide cyano(3-phenoxyphenyl)methyl 4-chloro-alpha-(1-methylethyl)benzeneacetate in or on the raw agricultural commodities eggplant and peppers at 1.0 ppm.

The data submitted in the petition and other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerances are sought. The toxicological data considered in support of the proposed tolerances included an acute oral rat toxicity study with a median lethal dose (LD_{50}) of 1–3 grams(g)/

kilogram(kg) of body weight (bw) (water vehicle) and 450 milligrams (mg)/kg of bw (dimethyl sulfoxide (DMSO) vehicles); a 90-day dog feeding study with a no-observed-effect level (NOEL) of 500 ppm (12.5 mg/kg, highest dose tested); a 90-day rat feeding study with a NOEL of 125 ppm (6.25mg/kg); an 18-month mouse feeding study with a NOEL of less than 100 ppm (15mg/kg) and with no oncogenic effects observed at the highest level fed (3,000 ppm); a 24-month mouse feeding study with a NOEL of 10–50 ppm (1.5–7.5 mg/kg) for males and 50–250 ppm for females (7.5–37.5 mg/kg) and (no oncogenic effects were noted at 1,250 ppm (187.5 mg/kg, the highest dose tested); a 24-month rat feeding study that demonstrated no oncogenic effects at 1,000 ppm (50 mg/kg, only level tested, significantly decreased body weight was observed at this dose level); a 2-year rat feeding study with a NOEL of 250 ppm (12.5 mg/kg, highest level fed), no oncogenic effects were observed; a three-generation rat reproduction study with a NOEL of 250 ppm (12.5 mg/kg, highest level fed); teratology studies (in mice and rabbits), each negative at 50 mg/kg/day (highest dose tested); and the following mutagenicity studies: mouse dominat lethal (negative at 100 mg/kg of bw, which was the highest level fed); mouse host-mediated bioassay (negative at 50 mg/kg of bw, which was the highest level fed); Ames test *in vitro* (negative), and a bone marrow cytogenic study in the Chinese hamster (negative at 25 mg/kg of bw). The following studies assessing neurological effects were performed: A hen study negative at 1.0 g/kg of bw for 5 days, repeated at 21 days; a rat (8-day) acute study with a NOEL of 200 mg/kg of bw; a 15-month rat feeding study which resulted in a systemic NOEL of 500 ppm (25 mg/kg) and a NOEL of 1,500 ppm (75 mg/kg) with respect to nerve damage.

The acceptable daily intake (ADI), based on the 2-year rat feeding study (NOEL of 12.5 mg/kg, or 250 ppm) and using a 100-fold safety factor, is calculated to be 0.1250 mg/kg of body weight (bw)/day. The maximum permitted intake (MPI) for a 60 kg human is calculated to be 7.5 mg/day. The theoretical maximum residue contribution (TMRC) from existing tolerances for a 1.5 kg daily diet is calculated to be 0.6284 mg/day; the current action will increase the TMRC by 0.00229 mg/day (0.36 percent). Published tolerances utilize 8.38 percent of the ADI; the current action will utilize an additional 0.03 percent.

The nature of the residues is adequately understood and an adequate analytical method, electron-capture gas chromatography, is available for enforcement purposes. There are presently no actions pending against the continued registration of this chemical.

Based on the above information considered by the Agency and the fact that there are no animal feed items involved, there will be no secondary residues in meat, milk, poultry or eggs; the tolerances established by amending 40 CFR 180.379 would protect the public health. It is proposed, therefore, that the tolerances be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 15 days after publication of this notice in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. As provided for in the Administrative Procedure Act (5 U.S.C. 553(d)(3)), the comment period time is shortened to less than 30 days because of the necessity to expeditiously provide additional means for control of Colorado potato beetles which severely infest eggplant crops during the spring and summer growing season. Comments must bear a notation indicating the document control number, (PP 2E2653/P287). All written comments filed in response to this petition will be available in the Emergency Response Section, Registration Division, at the address given above from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346a(e)))

BILLING CODE 6560-50-M

40 CFR Part 180

[PP 2E2760/P283 PH-FRL 2321-2]

1-Naphthaleneacetic Acid; Proposed Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that a tolerance be established for residues of the plant growth regulator 1-naphthaleneacetic acid (NAA) in or on the raw agricultural commodity sweet cherries. The proposed regulation to establish a maximum permissible level for residues of NAA in or on the commodity was requested in a petition submitted by the Interregional Research Project No. 4 (IR–4).

DATE: Comments must be received on or before April 15, 1983.

ADDRESS: Written comments to: Emergency Response Section, Process Coordination Branch, Registration Division (TS–767C), Environmental Protection Agency, Rm. 716B, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: Donald Stubbs (703–557–1192) at the address given above.

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petition 2E2760 to EPA on behalf of the IR–4 Technical Committee and the Agricultural Experiment Stations of Oregon and Washington.

This petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of a tolerance for residues of the plant growth regulator 1-naphthaleneacetic acid (NAA) in or on the raw agricultural commodity sweet cherries at 0.1 part per million (ppm).

The data submitted in the petition and other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerance is sought. The toxicological data considered in support of the proposed tolerance were a 90-day rat feeding studying with a no-observed-effect level (NOEL) of 150 mg/kg/day; a 3-generation mouse reproduction study with no effect on reproductive performance up to 86 ppm; and a 6-month oral (capsule) study in dogs with a NOEL of 50 mg/kg/day. A teratology study is currently lacking but in progress. Although most chronic studies are lacking, they are considered necessary to support this use since the Agency has concluded that the amount of NAA added to the diet from the proposed use will not significantly increase dietary exposure in humans. Thus the tolerance that will be established by this proposed rule is considered to pose a negligible increment in risk.

The provisional acceptable daily intake (PADI), based on the 6-month dog feeding study (NOEL of 50.0 mg/kg/day) and using a 1,000-fold safety factor, is calculated to be 0.050 mg/kg of body weight (bw)/day. The maximum permitted intake (MPI) for a 60-Kg human is calculated to be 3.00 mg/day. The theoretical maximum residue contribution (TMRC) from existing tolerances for a 1.5-kg daily diet is calculated to be 0.0458 mg/day; the current action will increase the TMRC by 0.00015 mg/day (0.4 percent). Published tolerances and this proposed action utilize 1.53 percent of the ADI.

The nature of the residues is adequately understood and adequate analytical method, gas-liquid chromatography-mass spectrometry, is available for enforcement purposes. Because no animal feed items are involved, no secondary residues in meat, milk, poultry, or eggs are expected. There are presently no actions pending against the continued registration of this chemical.

Based on the above information considered by the Agency, the tolerance established by amending 40 CFR 180.155 would protect the public health. It is proposed, therefore, that the tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this notice in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number [PP 2E2760/P283]. All written comments filed in response to this petition will be available in the Emergency Response Section, Registration Division, at the address given above from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346a(e)))

Inorganic Bromides; Resulting From Fumigation With Methyl Bromide; Proposed Toleranace

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that a tolerance be established for residues of inorganic bromides, resulting from post-harvest fumigation with the pesticide methyl bromide, in or on the raw agricultural commodity strawberries. The proposed regulation to establish a maximum permissible level for residues of inorganic bromides in or on the commodity was requested in a petition submitted by the Interregional Research Project No. 4 (IR–4).

DATE: Comments must be received on or before April 15, 1983.

ADDRESS: Written comments to: Emergency Response Section, Process Coordination Branch, Registration Division (TS–767C), Environmental Protection Agency, Rm. 716B, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: Donald Stubbs (703–557–1192) at the above address.

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petition 2E2654 to EPA on behalf of the IR–4 Technical Committee and the Agricultural Experiment Station of California.

This petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose: (1) Amending the existing tolerance in 40 CFR 180.123 for residues of inorganic bromides (resulting from fumigation with the pesticide methyl bromide) in or on the raw agricultural commodity

strawberries to reflect a post-harvest fumigation use as well as the current pre-harvest use, and (2) increasing the existing tolerance for inorganic bromides in or on strawberries (from use before harvest) from 30 parts per million (ppm) to 60 ppm.

The data submitted in the petition and other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerance is sought. The toxicological data considered in support of the proposed tolerance include three studies which have been classified as supplemental: a 20-month rat feeding study with a no-observed-effect level (NOEL) of 236 ppm; a 52-week rabbit feeding study with an NOEL of 90 ppm; and a 1-year dog feeding study with an NOEL of 2,900 ppm. Also considered were long-term clinical studies of inorganic bromides in man, deemed highly significant and of sufficient quality to support tolerances in raw agricultural commodities. Agricultural tolerances for residues of inorganic bromides resulting from post-harvest commodity fumigation with methyl bromide have previously been established on various commodities at levels ranging from 5 ppm to 240 ppm.

Tolerances already exist for residues of inorganic bromides in strawberries at 25 ppm resulting from soil fumigation with combinations of methyl bromide, chloropicrin, and propargyl bromide (40 CFR 180.199) and at 30 ppm resulting from fumigation with methyl bromide before harvest.

The acceptance daily intake (ADI), based on studies of systemic effects in humans and using a 10-fold safety factor, is calculated to be 60 mg/kg of body weight (bw)/day, calculated as the bromide ion. The maximum permitted intake (MPI) for a 60-kg human is calculated to be 600 mg/day. The theoretical maximum residue contribution (TMRC) from existing tolerances for a 1.5-kg daily diet is currently estimated to be 125 mg/day. This does not take into account inorganic bromides in milk, eggs, meat and poultry resulting from ingestion of "background" inorganic bromides which are ubiquitous in nature, especially in milk. The current action will increase the TMRC by 0.081 mg/day (0.07 percent); the incremental exposure to potential residues of inorganic bromides resulting from the proposed use is considered to be toxicologically insignificant. The calculated amount of methyl bromide *per se* resulting from the proposed use is extremely small, equivalent to 0.126 ppb in the diet, and not considered to be toxicologically significant. Therefore, a separate tolerance for residues of methyl bromide *per se* will be unnecessary.

The nature of the residues is adequately understood. Inorganic bromides comprise the major part of the residue on strawberries; methyl bromide is present as a residue at less than 0.1 ppm on strawberries under the proposed conditions of use. Adequate analytical methods, gas-liquid chromatography with an electron-capture detector, direct potentiometry using a solid-state bromide electrode, and oxidation/titration, are available for enforcement purposes. Because there are no animal feed items involved, there will be no problem of secondary residues in meat, milk, poultry, and eggs. There are presently no actions pending against the continued registration of this chemical.

Based on the above information considered by the Agency, the tolerance established by amending 40 CFR 180.123 would protect the public health. It is proposed, therefore, that the tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this notice in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number (PP 2E2654/P289). All written comments filed in response to this petition will be available in the Emergency Response Section, Registration Division, at the address given above from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-534, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346a(e)))

Dated: March 4, 1983.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

PART 180—[AMENDED]

Therefore, it is proposed that 40 CFR 180.123 be revised to read as follows:

§ 180.123 Inorganic bromides resulting from fumigation with methyl bromide; tolerances for residues.

Tolerances are established for residues of inorganic bromides (calculated as Br) in or on the following raw agricultural commodities which have been fumigated with the antimicrobial agent and insecticide methyl bromide after harvest (with the exception of strawberries):

Commodities	Parts per million
Alfalfa, hay (Post-H)	50.0
Almonds (Post-H)	400.0
Apples (Post-H)	5.0
Apricots (Post-H)	80.0
Artichokes, Jerusalem (Post-H)	30.0
Asparagus (Post-H)	100.0
Avocados (Post-H)	75.0
Barley (Post-H)	50.0
Beans (Post-H)	50.0
Beans, green (Post-H)	50.0
Beans, lima (Post-H)	50.0
Beans, snap (Post-H)	50.0
Beets, garden, roots (Post-H)	50.0
Beets, sugar, roots (Post-H)	30.0
Brazil nuts (Post-H)	200.0
Bush nuts (Post-H)	200.0
Butternuts (Post-H)	200.0
Cabbage (Post-H)	50.0
Cantaloupes (Post-H)	20.0
Carrots (Post-H)	30.0
Cashews (Post-H)	200.0
Cherries (Post-H)	20.0
Chestnuts (Post-H)	200.0
Cippolini, bulbs (Post-H)	80.0
Citrus citron (Post-H)	30.0
Cocoa beans (Post-H)	50.0
Coffee beans (Post-H)	75.0
Copra (Post-H)	100.0
Corn (Post-H)	50.0
Corn (pop) (Post-H)	240.0
Corn, sweet (K+CWHR) (Post-H)	50.0
Cottonseed (Post-H)	200.0
Cucumbers (Post-H)	80.0
Cumin, seed (Post-H)	100.0
Eggplants (Post-H)	20.0
Filberts (Hazelnuts) (Post-H)	200.0
Garlic (Post-H)	50.0
Ginger, roots (Post-H)	100.0
Grapefruit (Post-H)	30.0
Grapes (Post-H)	20.0
Hickory nuts (Post-H)	200.0
Honeydew melons (Post-H)	20.0
Horseradish (Post-H)	30.0

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 205

[Docket No. 205, Subpart C]

Disaster Assistance: Declaration Process

AGENCY: Federal Emergency Management Agency

ACTION: Notice of intent to modify rule.

SUMMARY: The regulations for the Declaration Process, 44 CFR Part 205, Subpart C, were published as an interim rule on December 13, 1982, (47 FR 55756) and became effective on January 12, 1983. It is anticipated that a final rule will be published later this year. Comments on the interim rule were solicited. A significant change is contemplated for the definition of *incident period* which is located at § 205.31(f). As stated in the interim rule the incident period limits eligible assistance under Pub. L. 93–288 to damages which occur during this time frame. Actually, the incident period is meant to reflect the time frame of the incident. Eligible assistance should be related to damage which resulted from the incident during the incident period. Thus, damages which occurred during the defined incident period as well as those damages which occurred afterwards but as a result of the incident during the time period would be eligible for assistance under Pub. L. 93–288. The Federal Emergency Management Agency intends to change the definition of *incident period* to reflect this. This change in definition should be taken into account by all interested parties during the comment period.

DATE: Comments by: March 31, 1983.

ADDRESS: Send comments to: Rules Docket Clerk, Office of the General Counsel, Federal Emergency Management Agency, Washington, D.C. 20472.

FOR FURTHER INFORMATION CONTACT: Sewall H. E. Johnson, Office of Disaster Assistance Programs (SLDA), Directorate of State and Local Programs and Support (SLPS), Federal Emergency Management Agency, Washington, D.C. 20472, telephone (202) 287–0501.

List of Subjects in 44 CFR Part 205

Community facilities, Disaster assistance, Grant programs, Housing and community development.

PART 205—[AMENDED]

● It is proposed to revise § 205.31(f) *Incident period* to read as follows:

§ 205.31 Definitions.

* * * * *

(f) *Incident Period.* As determined at the discretion of the Associate Director, the time interval stated in the FEMA-State Agreement during which the incident occurs. The incident period for emergencies starts at 12:01 a.m., on the date of the emergency declaration by the President unless otherwise specified in the declaration document. No Federal assistance under Pub. L. 93–288 shall be approved unless the damage or hardship to be alleviated resulted from the incident which took place during the incident period.

Dated: March 3, 1983.

Dave McLoughlin,

Deputy Associate Director State and Local Programs and Support, Federal Emergency Management Agency.

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1310

[Ex Parte No. MC 77; (Sub-3)]

Elimination of Certificates as the Measure of "Holding Out"

AGENCY: Interstate Commerce Commission.

ACTION: Termination of proposed rulemaking proceeding.

SUMMARY: At 46 FR 8604, January 27, 1981, as amended at 46 FR 13751, February 24, 1981, the Commission proposed to re-examine the duty imposed on motor common carriers of property to provide transportation co-extensive with all points and services contained in their certificates of public convenience and necessity. In view of recent court decisions under the Motor Carrier Act of 1980 that recognize limitations on a common carrier's service obligation, we conclude that there is no need to address this matter at any length. Accordingly, this proceeding is terminated and the proposed rules withdrawn.

DATE: Effective: March 16, 1983.

FOR FURTHER INFORMATION CONTACT:

Howell I. Sporn, (202) 275–7691

or

Suzanne Higgins, (202) 275–7161.

SUPPLEMENTARY INFORMATION: We instituted this proceeding on January 27, 1981, by the publication of a notice in the **Federal Register** stating our intention to re-examine the common carrier service obligation in the context of the new competitive environment and liberalized entry policies of the Motor Carrier Act of 1980, Pub. L. 96–296, 94 Stat. 793 ("1980 Act"). We noted that previously we had required common carriers or property to offer service "co-extensive with all points and services contained in their certificates of public convenience and necessity." We feared that under the policy of the 1980 Act favoring broad grants of authority, carriers might be deemed to violate their service obligation because of the breadth of points and services their certificates covered. We therefore proposed to permit carriers to define their service obligation more narrowly than the scope of their operating certificates.

In view of recent court decisions under the 1980 Act that recognize limitations on a common carriers' service obligation, we conclude that there is no need to address this matter in any length. These cases recognize that even in the context of liberal entry policies and broader operating certificates, a carrier only has the obligation to serve up to its capabilities and will not be deemed to violate its common carrier obligation if it does so non-discriminatorily.

Since the institution of this proceeding, the United States Court of Appeals has addressed this issue on two occasions. The court has stated that "[a] common carrier is free to carve out as large or as small a nitch as it feels apprpriate. ***[T]here is no requirement

[in the Motor Carrier Act] that the carrier be able, quantitatively, to perform all or any substantial part of the transportation in all covered areas [of the certificate]." *Steere Tank Lines, Inc.* v. *I.C.C.*, 675 F.2d 103, 105 (5th Cir. 1982) [citing *Michigan P.U.C.* v. *Duke*, 266 U.S. 570, 577 (1925)], and *J. H. Rose Truck Lines, Inc.* v. *I.C.C.*, 683 F.2d 943, 949 (5th Cir. 1982). We embrace this judicial pronouncement as as statement of Commission policy. A common carrier is not in violation of its obligations if it declines to provide servce within the scope of its operating authority because such service is economically or operationally impracticable in the circumstances at the time of the service request. To the extent that prior Commission decisions may have spoken of an absolute duty to provide service to the breadth of the operating certificate, those cases are overruled as inconsistent with law and policy.

It is ordered:

This proceeding is terminated and the rules proposed to be for Part 1310 are withdrawn.

This action is taken under the authority of the 49 U.S.C. 10101, 10321, 10762, 10922 and 11101, and 5 U.S.C. 553.

Decided: February 25, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre, Simmons, and Gradison. Chairman Taylor conurred with a separate expression. Commissioner Gradison dissented with a separate expression.

Agatha L. Mergenovich,

Secretary.

Chairman Taylor, concurring:

While I agree with the majority that this proceeding should be terminated, I do not fully agree with the rationale of the decision.

The Commission instituted this proceeding to reexamine the traditional view of the common carrier obligation in light of the Motor Carrier Act of 1980. A review of the changes made by the 1980 Act and its legislative history, however, reveals that the various means of self-determined obligations suggested in this proceeding are clearly improper and should not be adopted.

The common carrier obligation is a principle rooted in the common law and was codified, with respect to motor carriers, in various provisions of the Motor Carrier Act of 1935. *See* 49 U.S.C. 10102(12), 10701, 10702, 10741, 10762, 10922, and 11101. Since passage of the 1935 Act, the Commission and the courts have consistently interpreted these sections of the Act as requiring motor common carriers fully to perform, upon reasonable request, the operations authorized in their certificates. *See, e.g., North Central Truck Lines, Inc.* v. *I.C.C.*, 559 F. 2d 802 (D.C. Cir. 1977); *National Furniture Traffic Conf.* v. Assoc. Truck, 332 I.C.C. 802 (1968), *aff'd sub nom. Associated Truck Lines, Inc.* v. *United States*, 304 F. Supp. 1094 (W.D. Mich. 1969), *aff'd per curium* 397 U.S. 42 (1970); *T.I.M.E.—DC., Inc.—Investigation—Revocation of Certs.*, 113 M.C.C. 697 (1971).

At the time the 1980 Act was enacted by Congress, it was common knowledge in the transportation industry that motor common carriers had an obligation to provide service, upon reasonable request, that is coextensive with the authority contained in their certificates. Congress was presumably aware of this duty when the new legislation was drafted. Therefore, if Congress had intended that the scope of the obligation be changed, it would have indicated such an intention in the legislative history or, more appropriately, it would have amended the pertinent provisions of the Act.

The 1980 Act, however, did not change any of the pertinent provisions which embody the preexisting common carrier obligation. Nor is it possible to glean any intent on the part of Congress to change the scope of the obligation from any of the revisions actually made. In fact, the legislative history of the 1980 Act clearly demonstrates that Congress specifically intended not to change the obligation.[1] In addition to the legislative history, there are other indications of Congress' concern, not only that the obligation be retained, but that it be effectively enforced. Section 28 of the 1980 Act reflects Congress' concern that adequate motor carrier service to rural areas and small communities be available and at a reasonable cost. H. Rept. 96–1069, 96th Cong., 2d sess., 41 (1980). Also, Section 22 of the 1980 Act adds a new subsection (b) to 49 U.S.C. 10705, which, for the first time, authorizes this Commission to require motor common carriers of property to establish through routes and joint rates between themselves and with water carriers.

Moreover, the common carrier obligation, as traditionally defined, is not inconsistent with the overall policy objectives of the 1980 Act, namely, to promote competitive and efficient transportation services. Congress sought to achieve these goals mainly through Sections 5 and 6 of the Act, which make it easier for new trucking companies to enter the market and for existing companies to expand their operations. The purpose of these Sections is to encourage carriers to file for new or additional authority to provide needed service and, in turn, to serve as a constructive stimulus to existing carriers to improve services and meet the changing requirements of shippers and receivers. H. Rept. 96–1069, 96th Cong., 2d sess., 14 (1980). Congress did not ease the entry standards merely to enable carriers to acquire operating authority which they have no intention of using. Rather, Congress eased these standards to enable carriers, in the exercise of their sound business judgment, to actually enter markets needing service and to actively compete in such markets.

In the notice institution this proceeding, the Commission posited a "Catch 22" situation which need not really have existed. If the Commission had issued certificates broader than an applicant's immediate and specific operational capabilities or planning, *but* still within the applicant's willingness to serve upon reasonable request, then there would have been no "Catch 22" or potential conflict with the applicant's common carrier obligation as traditionally defined.[2]

However, in lieu of adopting a policy of issuing an applicant reasonably broad authority commensurate with its desires, the Commission issued mandatory directives requiring applicants to accept prescribed minimum service authorizations. These coercively applied minimum service standards have resulted in the issuance of countless certificates authorizing service substantially broader than the applicant's stated willingness or ability to perform. *See, e.g.*, No. MC–143776 (Sub–No. 34), *C.D.B. Incorporated, Extension—Texas* (not printed) decided February 25, 1983.

Realizing the common carrier obligation could not be administratively abolished, yet recognizing that a carrier cannot be required to perform services in the future for which the carrier never really sought authority in the first instance, the Commission was caught on the horns of a dilemma. In order to reconcile the dilemma, the Commission instituted this proceeding to redefine the scope of the common carrier obligation by proposing various methods whereby the carrier itself would designate the scope of its own obligation. However, all of the various alternative measures of holding-out suggested by the Commission and the parties to this proceeding would, as a practical matter, totally emasculate the obligation.

Under these various systems of self-determined obligations, carriers would be permitted to pick and choose those members

---

[1] In commenting on the eased entry provisions of the Act, Representative Howard noted that:

[n]one of these provisions *eliminate* or *weaken* the carriers' obligation to perform the service they are authorized to perform under their certificates. [Emphasis added.] 126 Cong. Rec. H5343 (1980).

In addressing a specific policy objective of the Act, Representative Shuster observed that:

[t]his bill does provide, and this is an extremely important point, this bill continues to provide for the common carrier obligation. If a common carrier today has a certificate requiring him to provide service to a particular area, be it rural or urban, he has that obligation under this legislation and that obligation continues. That is an extremely important aspect of the legislation before us.

* * * * *

I emphasize that this bill keeps the common carrier obligation to serve. It does not touch that. It keeps it, and that is fundamental. 126 Cong. Rec. H5351–52 (1980).

[2] The suggestion that, under these circumstances, there would be such a potential conflict rests on the erroneous notion that there is some relationship between a carrier's present size and its ability to comply with the common carrier obligation. In other words, the notion that if the Commission grants broad authority to a small carrier, the carrier's limited size will necessarily place it in violation of its common carrier obligation.

The common carrier obligation, however, does not impose an unreasonable burden on common carriers and has little, if anything, to do with a carrier's size or capacity. Rather, all the obligation requires is for a carrier to serve all customers it is authorized to serve on a non-discriminatory basis *to the extent of its ability*. It has never required a carrier to have the capacity to satisfy all of the potential demand that might conceivably arise for its services on any given day.

of the general public to whom they would provide service. A carrier would thereby be able to systematically discriminate against particular localities or classes of customers which are within its authority and ability to serve.[2] More importantly, any attempt at enforcement of the obligation would be absolutely pointless, since a carrier would be able to alter the scope of its obligation virtually at will. Under the various alternative proposals, the only time a carrier could possibly be in violation of its obligation would be when it is remiss in republishing its tariff or changing its declaration in some other manner. Even then, if an aggrieved shipper were to lodge a complaint, the carrier could simply modify the scope of its holding-out and render the proceeding moot long before the Commission reached the merits of the shipper's complaint.

In other words, having frustrated enforcement of the common carrier obligation as to those carriers awarded authority in excess of their willingness and ability to provide service, the Commission proposed alternative redefinitions of the scope of the obligation which would appear to maintain it intact, but which would actually accomplish its administrative demise indirectly by emasculating effective enforcement of the obligation as to *all* carriers.

Although the Motor Carrier Act of 1980 retained the traditional common carrier obligation concept, its importance has diminished significantly with the vastly increased transportation alternatives available to shippers. The substantially eased entry provision of the 1980 Act has led to an abundance of motor carrier service options available to the public in general. Similarly, this increased reliance on competition should improve both the level and quality of service to those most susceptible to traffic selectivity or discrimination, i.e., small shippers and small communities. To the extent changes in service to such shippers have been reported under the 1980 Act, they generally have involved improvement in terms of both quality and availability. *See* Office of Policy and Analysis, *Interim Report: Small Community Service* (1981), and Office of Policy and Analysis, *Small Community Service Study* 1982). In addition, the number of shipper complaints concerning the common carrier obligation has decreased significantly since passage of the 1980 Act. In fact, at the present time, the Commission is not receiving any such complaints which require formal enforcement action.

In summary, while the Motor Carrier Act of 1980 retained the traditional common carrier obligation, the Commission, through its coercively applied minimum service standards, created a dilemma which will frustrate future attempts at enforcing the obligation against a substantial number of carriers. However, the solutions proposed in this proceeding would only serve to compound the problem by so emasculating the obligation as to render it unenforceable against *all* carriers. In any event, the importance of the common carrier obligation has been so reduced in today's market-oriented regulatory environment that hereafter, only rare instances of long-term service failure or blatant discrimination will require our attention. When this happens, today's Commission decision to retain the traditional common carrier obligation, which Congress clearly mandated, will at least provide some assurance that an enforcement capability remains.

Commissioner Gradison, Dissenting:

I do not agree that recent court decisions have rendered this proceeding moot. Common carriers remain obligated to render reasonably responsive, non-discriminatory service up to the extent of their capabilities. At present, many carriers do not have the capability to provide common carrier service covering the full scope of their certificated authorities. This is consistent with the intent of the Motor Carrier Act of 1980, which encourages carriers to seek reasonably broad authority so that they can respond to changes in their own capabilities and in the marketplace without having to amend their certificates repeatedly. Given this situation, however, it no longer is reasonable to require carriers to file tariffs fully commensurate and in strict conformity with their certificated authorities. So long as the Commission clings to this outmoded regulatory requirement, as the majority has elected to do, carriers will continue to file tariffs that do not reflect the present extent of their capabilities or their present commercial inclinations, and neither shippers nor this Commission will have any efficient way of ascertaining the extent to which a carrier actually wishes to hold itself out to provide common carrier service. The Commission could have rectified this situation by permitting each carrier to define the scope of its common carrier service obligation on an ongoing basis by publishing tariffs covering only those services that it has the capability and commercial inclination to provide at any given time. In this way, the Commission could have relieved carriers of filing unneeded portions of their tariffs and given itself and the shipping public a useful tool for efficiently determining the scope of common carrier services actually offered by each carrier at any given time. This tool would be especially useful to parties working to improve the efficiency of the transportation marketplace by designing computerized systems to search tariffs and provide shippers with information concerning prices and available service.

[FR Doc. 83-6790 Filed 3-15-83; 8:45 am]
BILLING CODE 7035-01-M

[2] For example, a carrier would be permitted to refuse service to rural points in a county in which it serves urban points or refuse service to all small shippers in the same geographic area within which it serves large shippers.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 661

Ocean Salmon Fisheries Off the Coasts of Washington, Oregon, and California

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of Public Hearings.

SUMMARY: The Pacific Fishery Management Council and the National Marine Fisheries Service will hold joint hearings to receive public comments on a Framework Amendment and Draft Supplemental Environmental Impact Statement (DSEIS) of the Fishery Management Plan for the Commercial and Recreational Salmon Fisheries off the Coasts of Washington, Oregon, and California commencing in 1978. These hearings are being held in accordance with Section 302(h)(3) of the Magnuson Fishery Conservation and Management Act (Magnuson Act) and § 1506.6(c) of the Council on Environmental Quality's National Environmental Policy Act regulations.

DATE: Written comments on the Framework Amendment and the DSEIS are invited until May 2, 1983.

ADDRESS: Send comments to: Joseph C. Greenley, Executive Director, Pacific Fishery Management Council, 526 S.W. Mill Street, Portland, Oregon 97201, or H.A. Larkins, Director, Northwest Region, National Marine Fisheries Service (NMFS), 1600 Sand Point Way N.E., BIN C15700, Seattle, Washington 98115, or Alan Ford, Director, NMFS, 300 South Ferry Street, Terminal Island, California 90731.

FOR FURTHER INFORMATION CONTACT: Joseph C. Greenley, (503) 221–6352, or H. A. Larkins, (206) 527–6150 or Alan Ford (213) 548–2575.

SUPPLEMENTARY INFORMATION: Hearings will be held on the proposed Framework Amendment of the Washington, Oregon, and California ocean commercial and recreational salmon fishery management plan and the DSEIS. The major purposes of the Framework Amendment are to: (1) Reduce the time required to implement Council recommendations; (2) allow more time to develop a complete draft planning document; (3) reduce the

number and length of planning documents which are duplicative in nature; (4) reduce the costs of management; (5) provide the public with a better understanding of the criteria and procedures used to set management measures; and (6) achieve these purposes while maximizing the opportunity for public comment.

This amendment to the Pacific Council's 1978 salmon plan will institute a system for setting pre-season and inseason salmon fishery management measures without the need of amending the plan each year. Under this proposal, certain management measures and principles would be fixed to provide a long-term management system which could not be altered without a plan amendment. Other measures would be flexible and would be determined annually or during the season according to procedures specified in the amendment.

The fixed fishery management measures recommended in the framework amendment are the fishery management unit, the management objectives, the determination of optimum yield, the determination of domestic fishing capacity, the total allowable level of foreign fishing, the spawing escapement goals, the procedures that the Council would follow to make annual and inseason adjustments of the fishing regulations, and the schedules and process for making the adjustments.

The flexible measures are the determinations of the annual allowable levels of ocean harvests, the determinations of the annual allocations, the management boundaries, the minimum size limits, the recreational fishing daily bag limits, the gear restrictions, and the seasons and quotas.

Public Hearings

Individuals or organizations wishing to comment may do so at any of the six scheduled public hearings. See Supplementary Information for dates and locations of these hearings. All of the public hearings will start at 7:00 p.m. and adjourn at or about midnight or when all public testimony has been received. The hearings will be tape recorded and the tapes will be filed as an official transcript of the proceedings. A written summary of each hearing will be prepared.

The hearings will be held as follows:

March 30, 1983—Hyatt Seattle, Sea-Tac Airport, 17001 Pacific Highway South, Seattle, Washington 98188

March 30, 1983—Astoria Middle School, 1100 Klaskanine, Astoria, Oregon 97103

March 31, 1983—Eureka Inn, 7th and J Streets, Eureka, California 95501

March 31, 1983—Pony Village Inn, Virginia Avenue, North Bend, Oregon 97459

April 1, 1983—Airport Hilton, Terrace Room, US 101, Airport Entrance, San Francisco, California 94128

April 1, 1983—Idaho Department of Fish and Game, Auditorium, 600 South Walnut, Boise, Idaho 83707.

Dated: March 8, 1983.

Joseph P. Clem,

Acting Chief, Fishery Process Division, National Marine Fisheries Service.

Wednesday, March 16, 1983

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

Sierra National Forest Grazing Advisory Board; Meeting

The Sierra National Forest Grazing Advisory Board will meet on April 13, 1983 at 10:00 a.m. at the Federal Building, 1130 "O" Street Room 2002, Fresno, California 93721.

Agenda:

1. Recognize newly elected members.
2. Impacts of Forest Service budget reductions.
3. Updates on Hydro-development, Land Management Planning, and Administration of the San Joaquin Experimental Range.
4. Range Improvements scheduled for 1983 and planned for 1984.
5. KV assistance to the Range Resource.
6. Plans for a Field meeting.

The meeting will be open to the public. Persons who wish to attend should notify Ken Stithem, Federal Building, 1130 "O" Street, Room 3017, Fresno, California 93721. Telephone (209) 487–5143.

The committee has established the following rules for public participation: Matters identified by the public will be considered by the Board at the close of the planned agenda.

Dated: March 2, 1983.

Richard L. Stauber

Forest Supervisor.

Office of the Secretary

Forms Under Review by Office of Management and Budget

March 11, 1983.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) An indication of whether section 3504(h) of P.L. 96–511 applies; (9) Name and telephone number of the agency contact person.

Comments and questions about the items in the listing should be directed to the agency person named at the end of each entry. If you anticipate commenting on a form but find that preparation time will prevent you from submitting comments promptly, you should advise the agency person of your intent as early as possible.

Copies of the proposed forms and supporting documents may be obtained from: Marshall L. Dantzler, Acting Statistical Clearance Officer, (202) 447–6201.

Revised

• Agricultural Marketing Service

BILLING CODE 6320-01-M

DEPARTMENT OF COMMERCE

International Trade Administration

Extension of February 28, 1983, Scoping Meeting Comment Period/ Proposed 1992 Chicago World's Fair

March 11, 1983.

AGENCY: International Trade Administration, Commerce.

ACTION: Department of Commerce, International Trade Administration, International Expositions Staff extends proposed 1992 Chicago World's Fair Scoping Meeting comment period by 30 days—from March 28, 1983, to April 28, 1983.

SUMMARY: The International Trade Administration, U.S. Department of Commerce, held a scoping meeting on the proposed 1992 Chicago World's Fair on February 28, 1983, in accordance with National Environmental Policy Act (NEPA) procedures. This meeting was held to further determine the nature, extent, and scope of the issues and concerns that should be addressed in the environmental impact statement (EIS) which will be prepared on the proposed action. The information received at this meeting will supplement the preliminary findings contained in the earlier prepared Environmental Assessment.

At the meeting individuals, organizations, and government agencies were invited to submit views on issues to be included in the EIS and on the approach for analyzing and evaluating the identified issues. In addition to oral comments, written statements were also invited to be submitted by March 28, 1983. In view of numerous requests from the scoping meeting participants to extend this comment period, the Commerce Department announced at the meeting that comments would be received through April 28, 1983 an extension of 30 days from the original date.

FOR FURTHER INFORMATION CONTACT: Written statements and exhibits should be mailed to Mr. Ed Wilczynski at the following address by April 28, 1983. Ed Wilczynski, NEPA Compliance Officer, National Oceanic and Atmospheric Administration, Room 6800, U.S. Department of Commerce, Washington, D.C. 20230 (202/377-5181). For further information regarding EIS and associated NEPA activities pertaining to the proposed Fair, please contact Mr. Wilczynski at the above noted location.

SUPPLEMENTARY INFORMATION: To assist interested parties in familiarizing themselves with the proposal and its preliminary environmental assessment, copies of the Environmental Assessment will be made available for review at the following locations:

1. Chicago Municipal Reference Library, 121 North LaSalle Street, Room 1004, Chicago, Illinois, (312/744-4992).

2. Chicago Public Library, Government Publications Department, 425 North Michigan Avenue, 12th Floor, Chicago, Illinois, (312/269-3002).

3. Branches of the Chicago Public Library:

—Hild Regional Library, 4544 North Lincoln Avenue, (312/728-8652)
—East Side Library, 10542 South Ewing Avenue, (312/721-5500)
—Jefferson Park Library, 5363 West Lawrence Avenue, (312/763-9075)
—Beverly Library, 2121 West 95th Street, (312/445-7715)
—Rogers Park Library, 9525 South Halsted Street, (312/881-6900).
—South Shore Library, 2505 East 73rd Street, (312/734-4780).
—Austin Library, 5615 West Race Avenue, (312/287-0667).
—Garfield Ridge Library, 6322 Archer Avenue, (312/582-6094).
—Eckhart Park Library, 1371 West Chicago Avenue, (312/226-6069).

Individuals interested in obtaining a copy of the assessment for the cost of reproduction may do so by contacting: Bernadette S. Tramm, Executive Assistant, Chicago World's Fair—1992 Corporation, Suite 2590, One First National Plaza, Chicago, Illinois 60603 (312/444-1992).

The EIS referred to in this notice will describe the proposed project and the nature, range, degree, and extent of impacts which may be associated with it. The draft EIS is scheduled to be completed by November 30, 1983. Upon issuance of the draft statement, a public comment period and a public hearing (scheduled for January 2, 1984) are planned to obtain comments on the draft statement. The final environmental impact statement is scheduled to be published on or about May 9, 1984.

Jerome Morse,

Acting Director, International Expositions Staff.

BILLING CODE 3510-25-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjusting Import Restraint Levels for Certain Cotton and Man-Made Fiber Apparel Products From Taiwan

March 11, 1983.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Reducing the levels of restraint established for men's and boys' woven cotton shirts in Category 340 from 644,548 dozen to 598,092 dozen and man-made fiber coats in Category 633/634/635 from 1,508,746 dozen to 1,399,656 dozen to account for carryforward used during the twelve-month period which began on January 1, 1982. These adjustments apply to the levels of restraint established for Categories 340 and 633/634/635, produced or manufactured in Taiwan and exported during the current agreement year which began on January 1, 1983.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709).

SUMMARY: The Bilateral Agreement of November 18, 1982 concerning cotton, wool, and man-made fiber textile products, produced or manufactured in Taiwan, provides, among other things, for the borrowing of yardage from the following agreement year (carryforward) with the amount used being deducted from the level in the following year. In accordance with the terms of the agreement, the import restraint levels established for Categories 340 and 633/634/635 in 1983 are being adjusted for carryforward used during 1982.

EFFECTIVE DATE: March 17, 1983.

FOR FURTHER INFORMATION CONTACT: Ronald J. Sorini, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, D.C. 20230 (202/377-4212).

SUPPLEMENTARY INFORMATION: On December 22, 1982, there was published in the Federal Register (47 FR 57083) a letter dated December 16, 1982 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs which established import restraint levels for certain specified categories of cotton, wool, and man-made fiber textile products, including Categories 340 and 633/634/635, produced or manufactured in Taiwan and exported to the United States during the twelve-month period which began on January 1, 1983 and extends through December 31, 1983. In accordance with the terms of the

agreement, the Chairman of the Committee for the Implementation of Textile Agreements, in the letter published below, directs the Commissioner of Customs to prohibit entry into the United States for consumption and withdrawal from warehouse for consumption of textile products in Categories 340 and 633/634/635 in excess of the adjusted levels of restraint.

Paul T. O'Day,

Acting Chairman, Committee for the Implementation of Textile Agreements.

March 11, 1983.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C.

Dear Mr. Commissioner: On December 16, 1982, the Chairman, Committee for the Implementation of Textile Agreements, directed you to prohibit entry for consumption or withdrawal from warehouse for consumption, during the twelve-month period which began on January 1, 1983 and extends through December 31, 1983 of cotton, wool and man-made fiber textile products in certain specified categories, produced or manufactured in Taiwan, in excess of designated levels of restraint. The Chairman further advised you the levels of restraint are subject to adjustment.[1]

Effective on March 17, 1983, the levels of restraint established for Categories 340 and 633/634/635 in the directive of December 16, 1982 are adjusted to the following:

Category	Adjusted 12-month level of restraint [2]
340	586,682 dozen.
633/634/635	1,388,656 dozen.

[2] The levels of restraint have not been adjusted to reflect any imports after December 31, 1982.

The actions taken with respect to the authorities in Taiwan and with respect to imports of cotton and man-made fiber textile products from Taiwan have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the Federal Register.

Sincerely,

Paul T. O'Day,

Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 83-6818 Filed 3-15-83; 8:45 am]

BILLING CODE 3510-25-M

[1] The term "adjustment" refers to those provisions of the Bilateral Agreement of November 18, 1982 concerning cotton, wool, and man-made fiber textile products from Taiwan which provides, in part that: (1) specific limits or sublimits may be exceeded by certain designated percentages provided a corresponding reduction in equivalent square yards is made in one or more specific limits or sublimits during the same agreement year; (2) certain specific limits and sublimits may be increased for carryforward; (3) special shift may be applied to certain categories, provided an equivalent quantity in square yards equivalent is deducted from designated categories; and (4) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement.

Announcing Additional Import Controls on Certain Man-Made Fiber Apparel Products From Macau

March 11, 1983.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Controlling imports of man-made fiber trousers in Category 647/648, produced or manufactured in Macau and exported during the twelve-month period which began on January 1, 1983, at a level of 240,075 dozen.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709).

SUMMARY: Under the terms of the Bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement of November 29 and December 18, 1979, between the Governments of the United States and Macau, the United States Government has decided to control imports of man-made fiber apparel products in Category 647/648, produced or manufactured in Macau and exported to the United States during the twelve-month period which began on January 1, 1983, in addition to those categories previously designated.

EFFECTIVE DATE: March 17, 1983.

FOR FURTHER INFORMATION CONTACT: Ronald J. Sorini, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, D.C. 20230 (202/377-4212).

SUPPLEMENTARY INFORMATION: On December 23, 1982, there was published in the Federal Register (47 FR 57321) a letter dated December 17, 1982 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs, which established levels of restraint for certain specified categories of cotton, wool, and man-made fiber textile products, produced or manufactured in Macau, which may be entered into the United States for consumption, or withdrawn from warehouse for consumption, during the twelve-month period which began on January 1, 1983 and extends through December 31, 1983. In accordance with the terms of the bilateral agreement, the United States Government has decided also to control imports of man-made fiber apparel products in Category 647/648, produced or manufactured in Macau and exported to the United States during the twelve-month period which began on January 1, 1983. Accordingly, in the letter published below the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to prohibit entry for consumption, or withdrawal from warehouse for consumption, of man-made fiber apparel products in Category 647/648, produced or manufactured in Macau and exported during the twelve-month period which began on January 1, 1983, in excess of 240,075 dozen. The level has not been adjusted to reflect any imports in Category 647/648 after December 31, 1982. Charges for January 1983 amounted to 177 dozen and will be charged.

Paul T. O'Day,

Acting Chairman, Committee for the Implementation of Textile Agreements.

March 11, 1983.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C.

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive issued to you on December 17, 1982 by the Chairman of the Committee for the Implementation of Textile Agreements, concerning imports into the United States of certain cotton, wool, and man-made fiber textile products, produced or manufactured in Macau.

Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854) and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977 and December 22, 1981; pursuant to the Bilateral Cotton, Wool, and Man Made Fiber Textile Agreement of November 29, and December 18, 1979, between the Governments of the United States and Macau; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed to prohibit, effective on March 17, 1983, and for the twelve-month period which began on January 1, 1983 and extends through December 31, 1983, entry into the United States for consumption and withdrawal from warehouse for consumption of man-made fiber textile products in Category 647/648, produced or manufactured in Macau, in excess of 240,075 dozen.[1]

[1] The level of restraint has not been adjusted to reflect any imports after December 31, 1982. Imports during January 1983 amounted to 177 dozen of which 40 dozen should be charged to Category 647 and 137 dozen to Category 648.

Textile products in Category 674/848 which have been exported to the United States prior to January 1, 1983 shall not be subject to this directive.

Textile products in Category 647/648 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The action taken with respect to the Government of Macau and with respect to imports of man-made fiber textile products from Macau has been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the **Federal Register**.

Sincerely,

Paul T. O'Day,

Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 83-6819 Filed 3-15-83; 8:45 am]

BILLING CODE 3510-25-M

Announcing Levels of Restraint for Certain Cotton and Man-Made Fiber Textile Products From the Federative Republic of Brazil, Effective on April 1, 1983

March 11, 1983.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Establishing import restraint levels for certain cotton and man-made fiber textile products, produced or manufactured in Brazil and exported during the twelve-month period beginning on April 1, 1983 and extending through March 31, 1984.

SUMMARY: The Bilateral Cotton and Man-Made Fiber Textile Agreement of March 31, 1982 between the Governments of the United States and the Federative Republic of Brazil establishes an aggregate and group ceilings and within those ceilings a specific ceiling for Category 369pt., among others, during the agreement year which begins on April 1, 1983. It also provides consultation levels for certain other categories, such as Categories 300/301, 314, 350, 369pt. (floor coverings), and 614, which are not subject to specific ceilings and which may be adjusted during the agreement year. In the letter published below the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs, in accordance with the terms of the bilateral agreement, to prohibit entry into the United States for consumption and withdrawal from warehouse for consumption of cotton and man-made fiber textile products in Categories 300/301, 314, 350, 369, and 614, produced or manufactured in Brazil and exported during the twelve-month period which begins on April 1, 1983 and extends through March 31, 1984, in excess of the designated levels of restraint.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709).

EFFECTIVE DATE: April 1, 1983.

FOR FURTHER INFORMATION CONTACT: Ronald J. Sorini, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, D.C. 20230 (202/377-4212).

This letter and the action taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Paul T. O'Day,

Acting Chairman, Committee for the Implementation of Textile Agreements.

March 11, 1983.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C.

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977 and December 22, 1981; pursuant to the Bilateral Cotton and Man-Made Fiber Textile Agreement of March 31, 1982, between the Governments of the United States and the Federative Republic of Brazil; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed to prohibit, effective on April 1, 1983 and for the twelve-month period extending through March 31, 1984, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton and man-made fiber textile product in Categories 300/301, 314, 350, 369, and 614, in excess of the following levels of restraint:

Category	12-mo. level of restraint
300/301	7,173,913 pounds.
314	1,331,000 square yards.
350	30,518 dozen.
369pt.[1]	736,180 pounds.
369pt.[2]	1,268,183 pounds.
614	3,000,000 square yards.

[1] In Category 369, only T.S.U.S.A. numbers 360.2000, 360.2500, 360.3000, 360.7600, 360.8100, 361.0510, 361.1820, 361.5000, 361.5420, and 361.5630.

[2] In Category 369, all T.S.U.S.A. numbers except those listed in footnote 1.

In carrying out this directive, entries of textiles products in the foregoing categories, except Categories 350 and 369pt.[1], produced or manufactured in Brazil, which have been exported to the United States on and after April 1, 1982, shall to the extent of any unfilled balances, be charged against the levels of restraint established for such goods during the twelve-month period which began on April 1, 1982 and extends through March 31, 1983. In the event the levels of restraint established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this letter. Textile products in Categories 350 and 369pt.[1] which have been exported prior to April 1, 1983, shall not be subject to this directive.

The levels set forth above are subject to adjustment pursuant to the provisions of the bilateral agreement of March 31, 1982 between the Governments of the United States and the Federative Republic of Brazil which provide, in part, that: (1) within the aggregate and group limits, specific limits may be exceeded by designated percentages; (2) specific ceilings may be increased by carryover and carryforward up to 11 percent of the applicable category limit; and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement. Any appropriate future adjustments under the foregoing provisions of the bilateral agreement will be made to you by letter.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709).

The actions taken with respect to the Government of the Federative Republic of Brazil and with respect to imports of cotton and man-made fiber textile products from Brazil have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the **Federal Register**.

Sincerely,

Paul T. O'Day,

Acting Chairman, Committee for the Implementation of Textile Agreements.

DEPARTMENT OF DEFENSE

Department of the Air Force

Public Information Collection Requirement Submitted to OMB for Review

The Department of Defense has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Each entry contains the following: (1) Type of Submission; (2) Title of Information Collection and Form Number, if applicable; (3) Abstract statement of the need for and the uses to be made of the information collected; (4) Type of respondents; (5) An estimate of the number of responses; (6) An estimate of the total number of hours needed to provide the information; (7) To whom comments regarding the information collection are to be forwarded; (8) The point of contact from whom a copy of the information proposal may be obtained.

Reinstatement

Service Academies Precandidate Questionnaire (DD Form 1908)

This information is needed to allow service academy admission officials to make a preliminary assessment of a precandidate's prospects for admission to a service academy. It applies to approximately 50,000 youths making an initial application for admission to the Academy: 50,000 responses; 25,000 hours.

Forward comments to Edward Springer, OMB Desk Officer, Room 3235, NEOB, Washington, D.C. 20503, and John V. Wenderoth, DOD Clearance Officer, OASD, DIRMS, IRAD, Room 1A658, Pentagon, Washington, D.C. 20301, telephone (202) 697–1195.

(A copy of the information collection proposal may be obtained from Maj Daniel J. Flaherty, Jr., United States Air Force Academy, Colorado Springs, CO 80840, telephone (303) 472–3071.)

Dated: March 11, 1983.

M. S. Healy,

OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

Defense Mapping Agency

Defense Mapping Agency Advisory Committee on Mapping, Charting and Geodesy (MC&G); Closed Meeting

Pursuant to the provisions of Subsection (d) of section 10 of Pub. L. 92–463, as amended by section 5 of Pub. L. 94–409, notice is hereby given that a closed meeting of the DMA Advisory Committee on MC&G has been scheduled as follows:

Tuesday, 5 April 1983, DMA Aerospace Center, St. Louis Air Force Station, Missouri and Wednesday, 6 April 1983, DMA Special Program Office for Exploitation Modernization, McLean, Virginia. The entire meeting, commencing at 0900 hours each day is devoted to the discussion of classified information as defined in Section 552b(c)(1), Title 5 of the U.S. Code and therefore will be closed to the public. The Committee will receive briefings on and discuss several current critical MC&G issues and advise the Director, DMA on related scientific and technical matters.

Dated: March 11, 1983.

M. S. Healy,

OSD Federal Register Liaison Officer, Washington Headquarters Services, Department of Defense.

[FR Doc. 83-6736 Filed 3-15-83; 8:45 am]

BILLING CODE 3810-01-M

Office of the Secretary

Department of Defense Wage Committee; Closed Meetings

Pursuant to the provisions of section 10 of Pub. L. 92–463, the Federal Advisory Committee Act, notice is hereby given that a meeting of the Department of Defense Wage Committee will be held on Tuesday, April 5, 1983; Tuesday, April 12, 1983; Tuesday, April 19, 1983; and Tuesday, April 26, 1983 at 10:00 a.m. in Room 1E801, the Pentagon, Washington, D.C.

The Committee's primary responsibility is to consider and submit recommendations to the Assistant Secretary of Defense (Manpower, Reserve Affairs, and Logistics) concerning all matters involved in the development and authorization of wage schedules for federal prevailing rate employees pursuant to Public Law 92–392. At this meeting, the Committee will consider wage survey specifications, wage survey data, local wage survey committee reports and recommendations, and wage schedules derived therefrom.

Under the provisions of section 10(d) of Pub. L. 92–463, meetings may be closed to the public when they are "concerned with matters listed in 5 U.S.C. 552b." Two of the matters so listed are those "related solely to the internal personnel rules and practices of an agency," (5 U.S.C. 552b. (c)(2)), and those involving "trade secrets and commercial or financial information obtained from a person and privileged or confidential" (5 U.S.C. 552b. (c)(4)).

Accordingly, the Deputy Assistant Secretary of Defense (Civilian Personnel Policy & Requirements) hereby determines that all portions of the

meeting will be closed to the public because the matters considered are related to the internal rules and practices of the Department of Defense (5 U.S.C. 552b(c)(2)), and the detailed wage data considered by the Committee during its meetings have been obtained from officials of private establishments with a guarantee that the data will be held in confidence (5 U.S.C. 552b. (c)(4)).

However, members of the public who may wish to do so are invited to submit material in writing to the chairman concerning matters believed to be deserving of the Committee's attention. Additional information concerning this meeting may be obtained by writing the Chairman, Department of Defense Wage Committee, Room 3D264, the Pentagon, Washington, D.C. 20301.

M. S. Healy,

OSD Federal Register Liaison Officer, Department of Defense.

March, 11, 1983.

BILLING CODE 3810-01-M

DEPARTMENT OF EDUCATION

Intergovernmental Advisory Council on Education; Hearing

AGENCY: Intergovernmental Advisory Council on Education, Ed.

ACTION: Notice of hearing.

SUMMARY: This notice sets forth the schedule for a hearing of the Intergovernmental Advisory Council on Education. Notice of this hearing is required under section 10(a)(2) of the Federal Advisory Committee Act.

DATE: April 19, 1983.

ADDRESS: Department of Education, Federal Office Building, 1961 Stout Street, Room 239, Denver, Colorado 80294.

FOR FURTHER INFORMATION CONTACT: Laverne Johnson, Office of the Deputy Under Secretary for Intergovernmental and Interagency Affairs, Department of Education, 400 Maryland Avenue SW., Room 3047, Washington, D.C. 20202 (202) 472-6464.

SUPPLEMENTARY INFORMATION: The Intergovernmental Advisory Council on Education is established under Section 213 of the Department of Education Organization Act (20 U.S.C. 3423). The Council is established to provide assistance and make recommendations to the Secretary and the President concerning intergovernmental policies and relations pertaining to education.

The Intergovernmental Advisory Council on Education will conduct a Public Hearing on April 19, 1983. The hearing schedule is as follows:

9:00-11:00 a.m.—Federal Role in Education
11:15-12 noon—Press Conference
12 noon-1:00 p.m.—Lunch
1:00-3:00 p.m.—Impact of Block Grant Programs
3:00-4:30 p.m.—Tuition Tax Credits

Individuals, organizations, and associations need to preregister for the April 19 hearing. To preregister, due to limited space and time, write Dr. Theresa H. Marshall, Executive Director, Intergovernmental Advisory Council on Education, Department of Education, 400 Maryland Avenue SW., Room 3047, Washington, D.C. 20202 (telephone—(202) 472-6464) by April 1. (Commenters will be limited to five (5) minutes. Each commenter must provide written comments. Those wishing to submit comments only may do so by mailing them to Dr. Marshall.)

Records are kept of all Council proceedings and are available for public inspection at the office of the Intergovernmental Advisory Council on Education, 400 Maryland Avenue SW., Room 3047, Washington, D.C.

Signed at Washington, D.C. on Thursday, March 10, 1983.

Wendy Borcherdt,

Acting Deputy Under Secretary for Intergovernmental and Interagency Affairs.

BILLING CODE 4000-01-M

Indian Education Act; Part B; Educational Services for Indian Children

AGENCY: Department of Education.

ACTION: Application notice for new projects for fiscal year 1983.

SUMMARY: Applications are invited for new projects under the Educational Services for Indian Children program.

Authority for this program is contained in section 1005(c) of Part B of the Indian Education Act.

(20 U.S.C. 3385(c))

This program issues awards to State educational agencies (SEAs), local educational agencies (LEAs), Indian tribes, Indian organizations, and Indian institutions for educational services projects.

The purposes of these projects are: (a) To provide to Indian children educational services that are not available to those children in sufficient quality or quantity; and (b) to introduce innovative and exemplary approaches into the education of Indian children.

Closing Date for Transmittal of Applications: An application for a new award must be mailed or hand delivered by April 29, 1983.

Applications Delivered by Mail: An application sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention: 84.061, Washington, D.C. 20202.

An applicant must show proof of mailing consisting of one of the following:

(1) A legibly-dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping lable, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education. If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) A private metered postmark; or, (2) A mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered or first class mail. Each late applicant will be notified that its application will not be considered.

Applications Delivered by Hand: An application that is hand delivered must be taken to the U.S. Department of Education, Application Control Center, Room 5673, Regional Office Building 3, 7th and D Streets, S.W., Washington, D.C.

The Application Control Center will accept a hand-delivered application between 8:00 a.m. and 4:30 p.m. (Washington D.C. time) daily, except Saturday, Sunday, and Federal holidays.

An application that is hand delivered will not be accepted after 4:30 p.m. on the closing date.

Available Funds: There is authorized $2,560,000 for this program for fiscal year 1983. However, the President has proposed budget rescissions to the Congress that may eliminate funds for this program. The deadline in this notice will not be extended, and applicants should prepare and submit applications pending further notification.

New service project awards will be for a period of one year only. An applicant desiring assistance after the one year period will have to apply as a new applicant in the following year.

Application Forms: Application forms and program information packages are expected to be ready for distribution by March 15, 1983. They may be obtained by writing to Dr. Bryan Gray, Indian

Education Programs, U.S. Department of Education, Room 2177, 400 Maryland Avenue, SW., Washington, D.C. 20202.

Applications must be prepared and submitted in accordance with regulations, instructions, and forms included in the program information package. However, the program information is only intended to aid applicants in applying for assistance. Nothing in the program information package is intended to impose any paperwork, application content, reporting, or grantee performance requirement beyond those imposed under the statute and regulations.

The Secretary strongly urges that the narrative portion of the application not exceed 25 pages and that the applicant not submit information that is not requested.

Applicable Regulations: The regulations that apply to this program include the following:

(a) Regulations governing the Indian Education Act programs (34 CFR Parts 250 and 255);

(b) The Education Department General Administrative Regulations (EDGAR), (34 CFR Parts 74, 75, 77, and 78).

Further Information: For further information contact Dr. Bryan Gray, Indian Education Programs, Office of Elementary and Secondary Education, Room 2177, Department of Education, 400 Maryland Avenue, SW., Washington, D.C. 20202. Telephone (202) 245–8040.

(Catalog of Federal Domestic Assistance No. 84.061; Indian Education Special Programs and Projects—Part B—Educational Services for Indian Children)

(20 U.S.C. 3385(a)(c))

Dated: March 11, 1983.

Lawrence F. Davenport,

Assistant Secretary for Elementary and Secondary Education.

[FR Doc. 83-6969 Filed 3-15-83; 8:45 am]

BILLING CODE 4000-01-M

Indian Education Act; Indian Education Fellowships for Indian Students

AGENCY: Department of Education.

ACTION: Application Notice for New Indian Fellowships for Fiscal Year 1983.

SUMMARY: Applications are invited for new fellowships under the Indian Education Act Indian Fellowship program. This program authorizes the award of fellowships to Indian students.

Authority for this program is contained in Section 423 of the Indian Education Act, as amended.

(20 U.S.C. 3385b)

The purpose of these awards is to enable Indian students to pursue courses of study leading to: (a) Graduate level degrees in education, medicine, law, and related fields and (b) Graduate or undergraduate degrees in engineering, business administration, natural resources, and related fields.

Closing Date for Transmittal of Applications: An application for new awards must be mailed or hand delivered by May 2, 1983.

Applications Delivered By Mail: An application sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention: 84.087 Washington, D.C. 20202.

An applicant must show proof of mailing consisting of one of the following:

(1) A legibly-dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education. If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) A private metered postmark; or, (2) A mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered or first class mail. Each late applicant will be notified that its application will not be considered.

Applications Delivered By Hand: An application that is hand delivered must be taken to the U.S. Department of Education, Application Control Center, Room 5673, Regional Office Building 3, 7th and D Streets, S.W., Washington, D.C.

The Application Control Center will accept a hand-delivered application between 8:00 a.m. and 4:30 p.m. (Washington D.C. time) daily, except Saturday, Sunday, and Federal holidays.

An application that is hand delivered will not be accepted after 4:30 p.m. on the closing date.

Available Funds: There is authorized $1,440,000 for this program for fiscal year 1983; approximately $440,000 of which will be used for new fellowships. However, the President has proposed budget rescissions to the Congress that may eliminate funds for this program. The deadline in this notice will not be extended, and applicants should prepare and submit applications pending further notification.

The fellowships will be awarded for a period of one year only. An applicant desiring assistance after the one year fellowship will have to apply as a new applicant in the following year.

The Secretary is not establishing any priorities among the allowable fields of study; therefore the available funds will be divided equally among the six allowable fields described in 34 CFR 263.4 of the proposed regulations.

The estimated maximum stipend allowed for a graduate fellow will be $600 per month. The estimated maximum stipend allowed for an undergraduate fellow will be $375 per month. An estimated maximum allowance of $90 per month will be allowed for each dependent. Financial need and the applicant's resources will be taken into account in determining the amount of the fellowship award. The amount of the award will be determined by income of the student, the income of the student's spouse, family contributions, other financial aid including grant awards being received, the cost of living of the area of the institution being attended, and the amount of tuition and fees charged by the institution of higher education.

Application Forms: Application forms and program information packages are expected to be ready for distribution by March 18, 1983. They may be obtained by writing to Dr. Bryan Gray, Indian Education Programs, U.S. Department of Education, Room 2177, 400 Maryland Avenue, SW., Washington, D.C. 20202.

Applications must be prepared and submitted in accordance with regulations, instructions, and forms included in the program information package. However, the program information is only intended to aid applicants in applying for assistance. Nothing in the program information package is intended to impose any paperwork, application content, reporting, or grantee performance requirement beyond those imposed under the statute and regulations.

The Secretary strongly urges that applicants not submit information that is not requested.

Applicable Regulations: The regulations that apply to this program are the Indian Fellowship Program Regulations (34 CFR Part 263). New proposed regulations for the Indian Fellowship Program were published as a Notice of Proposed Rulemaking (NPRM) in the **Federal Register** on March 10, 1983 (48 FR 10360). Fellowship applicants should prepare the

application on the basis of the NPRM. If material changes are made in the final regulations, the Secretary may require modifications to the fellowship applications.

Further Information: For further information, contact Dr. Bryan Gray, Indian Education Programs, Office of Elementary and Secondary Education, Room 2177, Department of Education, 400 Maryland Avenue, S.W., Washington, D.C. 20202. Telephone (202) 245–8040.

(Catalog of Federal Domestic Assistance No. 84.087; Indian Education Fellowships for Indian Students)

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Procurement and Assistance Management Directorate; Study of the Direct Applications of Mathematics

AGENCY: Department of Energy (DOE).

ACTION: Notice of Solicitation for a Grant Application.

SUMMARY: DOE announces that it is conducting negotiations pursuant to 10 CFR 600.7(b) with the National Academy of Sciences (NAS) for a study of the direct applications of mathematics. These negotiations are expected to result in the award of a grant in which DOE will provide $25,000 or approximately 12% of the total estimated cost of the study.

Solicitation number: DE–OF 01–83ER13048.

Authority: DOE Organization Act. Pub. L. 95–91, 42 U.S.C. 7101; Federal Non-Nuclear Energy Research and Development Act of 1974, Pub. L. 93–577, 42 U.S.C. 5901 *et seq*; DOE Financial Assistance Rules, 10 CFR Part 600, 600.7(b), (47 FR 44066, October 5, 1982).

Scope of Study: The grant will be for a study of the range of direct applications of mathematics, including the research system which generates and develops the techniques involved, and to identify the significance of those mathematical concepts and methods for science and industry. The study will result in a report which will include a discussion of areas in applied mathematics requiring additional support and any potential impact on energy research and development.

FOR FURTHER INFORMATION CONTACT: U.S. Department of Energy, Office of Procurement Operations, attn: David Erdman, MA–464.1, 1000 Independence Avenue, SW., Washington, D.C., 20585, (202) 252–9518. Issued in Washington, D.C. on March 2, 1983.

Hilary J. Rauch,

Director, Procurement and Assistance Management Directorate.

BILLING CODE 6450-01-M

Economic Regulatory Administration

Chino Mines Co.; Certification of Eligible Use Natural Gas To Displace Fuel Oil

[ERA Docket No. 83–CERT–001]

On January 13, 1983, Chino Mines Company (CHINO), General Office, Hurley, New Mexico 88043, filed with the Administrator of the Economic Regulatory Administration (ERA) pursuant to 10 CFR Part 595 an application for certification of eligible use of approximately 10,000 Mcf of natural gas per day which is expected to displace the use of approximately 66,000 gallons (1,521 barrels) of No. 6 fuel oil (less than 2.0 percent sulfur) per day at its copper ore facilities located near the city of Hurley, New Mexico. The eligible seller of the natural gas is El Paso Hydrocarbons Company, P.O. Box 3986, Odessa, Texas 79760. The gas will be transported by El Paso Natural Gas Company, P.O. Box 1492, El Paso, Texas 79978. Notice of that application was published in the **Federal Register** (48 FR 7776, February 24, 1983) and an opportunity for public comment was provided for a period of ten (10) calendar days from the date of publication. No comments were received.

The ERA has carefully reviewed CHINO's application in accordance with 10 CFR Part 595 and the policy considerations expressed in the Final Rulemaking Regarding Procedures for Certification of the Use of Natural Gas to Displace Fuel Oil (44 FR 47920, August 16, 1979). The ERA has determined that CHINO's application satisfies the criteria enumerated in 10 CFR Part 595 and, therefore, has granted the certification and transmitted that certification to the Federal Energy Regulatory Commission. More detailed information, including a copy of the application, transmittal letter, and the actual certification, is available for public inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, D.C., March 9, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Strasburger Enterprises, Inc.; Proposed Remedial Order

Pursuant to 10 CFR 205.192(c), the Economic Regulatory Administration (ERA) of the Department of Energy hereby gives notice of a Proposed Remedial Order which was issued to Strasburger Enterprises, Incorporated, 4 North Third Street, Temple, Texas 76501. This Proposed Remedial Order charges Strasburger Enterprises, Incorporated, with pricing violations in the amount of $1,469,954.34 connected with the sales of motor gasoline during the period January 1, 1979 through September 30, 1979.

A copy of the Proposed Remedial Order with confidential information deleted, may be obtained from Mr. James N. Solit, Director, Division of Litigation Support, Office of the Special Counsel, Economic Regulatory Administration, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461, Telephone (202) 633–0500. Within 15 days of publication of this notice, any aggrieved person may file a Notice of Objection with the U.S. Department of Energy, Office of Hearings and Appeals, Federal Building, 12th and Pennsylvania Avenue, NW., Washington, D.C. 20461, in accordance with 10 CFR 205.193.

Issued in Washington, D.C., on the 4th day of March 1983.

Avrom Landesman,

Deputy Special Counsel.

[FR Doc. 83-6738 Filed 3-15-83; 8:45 am]

BILLING CODE 6540-01-M

Federal Energy Regulatory Commission

Determination To Reestablish Petroleum Pipeline Advisory Committee on Valuation

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463), I hereby certify that the reestablishment of the Petroleum Pipeline Advisory Committee on Valuation is in the public interest in connection with the duties imposed upon the Federal Energy Regulatory Commission, Department of Energy by the Department of Energy Organization Act of 1977, Section 624, and other applicable law. This determination follows consultation with the Committee Management Secretariat, General

Service Administration, pursuant to Section 9 (a)(2) of the Federal Advisory Committee Act and OMB Circular A–63 (Revised).

1. *Name of Advisory Committee:* Petroleum Pipeline Advisory Committee on Valuation.

2. *Purpose:* The Committee will provide the Office of Pipeline and Producer Regulation (OPPR), Federal Energy Regulatory Commission (FERC), with data and information needed by the FERC to determine annual price/cost indices for petroleum pipeline facilities and equipment. These indices are vital to the FERC in determining:

(a) Original (basic) valuations of all oil pipelines as required by Section 19a of the Interstate Commerce Act;

(b) Information which the FERC must compile to comply with the requirement of Section 19a that on completion of such original valuations it shall keep itself informed of all new construction, extensions, and improvements in each such pipeline and all changes in the investment and the valuation; and

(c) The inflation factor present in the valuations which must be determined in order to arrive at real rates of return.

The FERC in a recent decision in arriving at its approach to oil pipeline regulation decided that valuation of an oil pipeline company's facilities and properties will be used as a rate based upon which to measure allowable earnings. In addition, it decided that, in order to prevent double counting, the inflation allowance that the rate based gives must be deducted from a determined nominal rate of return to arrive at a real rate of return. These valuations are also used by state and local authorities in the regulation of pipeline rates and in the taxation of pipeline properties.

The Committee will serve in an advisory capacity only; completely independent calculation of data and information submitted by the Committee will be made by the OPPR's Valuation Branch.

3. *Effective Date of Establishment and Duration:* This Advisory Committee is established effective 15 days after publication of this notice and after filing of the charter with the standing committees of Congress having legislative jurisdiction over the Department of Energy and with the Library of Congress. The Committee will terminate one year from the date of its establishment.

4. *Membership:* The membership of the Advisory Committee shall be fairly balanced in terms of the points of view and functions of the industry and users affected. There will be no discrimination on the basis of race, color, national origin, religion, age, or sex.

5. *Operation:* The Petroleum Pipeline Advisory Committee on Valuation will operate in accordance with the provisions of the Federal Advisory Committee Act (Pub. L. 92–463), FERC policy and procedures, OMB Circular A–63 (Revised) and other directives and instructions issued in accordance with the implementation of the Act.

6. *Objectivity:* The advice and recommendations of the Advisory Committee will not be inappropriately influenced by the appointing authority or by any special interest, but will instead be the result of the Advisory Committee's independent judgment.

Issued at Washington, D.C. on February 7, 1983.

C. M. Butler III,

Chairman.

[FR Doc. 83-6804 Filed 3-15-83; 8:45 am]

BILLING CODE 6717-01-M

Southeastern Power Administration

Power Marketing Policy; Cumberland System of Projects

AGENCY: Southeastern Power Administration (SEPA), DOE.

ACTION: Notice of issuance of final power marketing policy, Cumberland System of Projects.

SUMMARY: The Administrator has adopted the attached Final Power Marketing Policy for SEPA's Cumberland System of Projects. It will be effective upon publication in the **Federal Register** and will be applicable to the sale of system power in given utility areas an then existing contracts, or necessary extensions, expire; in other selected areas as implementing contracts can be completed. The policy was developed in accordance with SEPA's Procedure for Public Participation in the Formulation of Marketing Policy published in the **Federal Register** on July 6, 1978, 43 FR 29186. The process was initiated by the Administrator with a decision that a new written marketing policy for the Cumberland System of Projects was needed. A Notice of Intent to Formulate Power Marketing Policy was subsequently published in the **Federal Register** on November 5, 1980, 45 FR 73537, requesting, among other things proposals and recommendations for consideration by SEPA. Seven responses were received as a result of the Notice of Intent.

On August 19, 1981, a Proposed Power Marketing Policy for the Cumberland System of Projects was published in the **Federal Register**, 46 FR 42186, and the availability of a draft Environmental Assessment was announced and comments on both documents were solicited. 128 comments were received relative to the proposed policy itself, during a Public Comment Forum held in Nashville, Tennessee, on November 5, 1981, or during the written comment period which ended December 7, 1981. No comments were received on the Environmental Assessment. 11 consultations were held with representatives of entities or groups of entities interested in the proposed policy. Additionally, a number of conferences were held with the Corps of Engineers and TVA to consider matters inherent in facilitating whatever policy might be finally adopted. All of the responses and comments from whatever source and within whatever time frame were considered.

Thereafter, a Staff Evaluation Committee was selected by the Administrator to prepare a Staff Evaluation of all oral and written comments and responses received by SEPA. The Staff Evaluation was completed January 20, 1983.

Following the Staff Evaluation, the Administrator decided to modify in certain particulars and to make specific in others the Proposed Power Marketing Policy published August 19, 1981, and to adopt the policy as modified and made specific.

SUPPLEMENTARY INFORMATION: The Final Power Marketing Policy sets forth the guidelines which SEPA will follow in the future disposition of power from the system. The policy covers power from the Barkley, Center Hill, Cheatham, Cordell Hull, Dale Hollow, Laurel, Old Hickory, J. Percy Priest, and Wolf Creek Projects. The policy establishes the marketing area for system power and deals with the allocation of power among or for the benefit of area customers. It also deals with utilization of area utility systems for essential purposes, wholesale rates, resale rates and conservation measures.

Based on the Environmental Assessment of the proposed marketing policy, SEPA and DOE concluded that the proposed policy would not have a significant effect upon the quality of the human environment. The Final Power Marketing Policy is not modified sufficiently to alter this finding. A recital or the primary objections to the proposed marketing policy, brief responses or explanations for rejecting those objections, and specific decisions and changes in the proposed marketing policy approved by the Administrator, precede the text of the final policy as

adopted. Issued at Elberton, Georgia, March 9, 1983.

Harry C. Geisinger,
Administrator.

Final Power Marketing Policy Cumberland System of Projects

Introduction. The efforts to develop a new written power marketing policy for SEPA's Cumberland System of Projects began on November 5, 1980. SEPA has followed the step by step requirements of its Procedure for Public Participation in Formulation of Marketing Policy published in the Federal Register on July 6, 1978, 43 FR 29186. Numerous public comments have been received and evaluated. This public input, offered in an orderly and timely fashion, has greatly helped the decision making process.

Purpose and Legal Authority. The purpose of the policy is to establish with public input written guidelines which SEPA will follow in the future to reasonably and equitably carry out the statutory requirements set forth in Section 5 of the Flood Control Act of 1944, 16 U.S.C. 825s. SEPA's authority to formulate the policy and perform these functions are derived from Section 302(a) of the Department of Energy Organization Act, 42 U.S.C. 7152, and delegations pursuant thereto.

Reasons for Marketing Policy. Since its establishment in 1950, until issuance of the written marketing policy for its Georgia-Alabama System in 1980, SEPA utilized ad hoc approaches to power marketing. Resulting policy has been reflected in negotiated contractual arrangements. With respect to the Cumberland, the Department of Interior, prior to the creation of SEPA, had established with TVA a mode of marketing, which while modified over time by SEPA, nevertheless, materially influenced policy for the system up until this time. The need for a revised written policy for the Cumberland has been recognized when current contracts expire, with particular emphasis on marketing area and allocations.

Furthermore, SEPA had advised that interests of various entities around the periphery of the TVA area would be examined.

Primary Objections and Responses. A number of objections, contentions or suggestions for change were filed to the Proposed Power Marketing Policy as published in the Federal Register on August 19, 1981, 46 FR 42186. SEPA responses to major summarized objections, contentions or suggestions follow:

1. *Objection.* Rather than maintaining four separate systems, SEPA power should be marketed on a single-system basis and, in the absence of special circumstances, all preference entities located in the ten-state SEPA area should have equal claim to a pro-rata share of all preference power.

Response. This same idea was raised in connection with the Georgia-Alabama System marketing policy and was dealt with at length in both the *Staff Evaluation* and *Final Power Marketing Policy* for that system. It purpose is to have SEPA integrate all of its projects located in Virginia, North Carolina, South Carolina, Florida, Georgia, Alabama, Tennessee and Kentucky into a single electrical operation and to dispose of the power throughout the ten-state area in which SEPA has been authorized to market power. That area, in addition to the above states, includes West Virginia and Mississippi. Its further purpose is to have SEPA market power available from the single-system pro-rata to preference entities located throughout the ten-state area without regard to the past or present SEPA policies or any other considerations save "special circumstances." This proposal would have SEPA establish a marketing area of approximately 450,000 square miles comprising the geographical area of the United States lying East of the Mississippi and South of the Ohio and Potomac Rivers. It is an area in which are located approximately 570 preference entities some being as far removed from others as the Ohio and Potomac Rivers are from Key West, Florida and the Mississippi River is from the South Atlantic Seaboard. SEPA presently has less than 3,000 megawatts of generation and the combined preference agency load in the area is now some 40,000 megawatts. Furthermore, SEPA has no transmission facilities and a Congressionally authorized staff of less than 40. It would be required to deal with all of the major public and private utilities throughout the area even though SEPA's resources comprise less than three percent of the capacity and less than one percent of the energy resources in the area. While SEPA has standing delegated authority to market power in the ten states, it does not have utility responsibility respecting any customer. Rather SEPA is in the business of disposing of a relatively small amount of surplus hydro power pursuant to the principles set forth in Section 5 of the Flood Control Act of 1944. Furthermore, all claims to the contrary notwithstanding, there are no statutory or other legal tools available to SEPA by which it can compel area utilities to cooperate in the accomplishment of any such proposal.

The proposal is highly theoretical and impractical. Furthermore, it cannot be justified. While there have been many changes in the electrical power industry during the thirty odd years of SEPA's existence, and while SEPA has taken advantage of the changes and its program has evolved and greatly expanded, the one-system proposal is beyond practicality. The further discussion on the idea contained in the *Final Power Marketing Policy* for the *Georgia-Alabama* System remains pertinent and is by reference incorporated herein and made a part hereof.

2. *Objection.* Marketing of power outside the ten-state SEPA area should be discontinued.

Response. Since 1966, SEPA has had contracts, by special delegation of the Secretary of the Interior, with Southern Illinois Power Cooperative and Indiana Statewide Rural Electric Cooperative, Inc., Hoosier Energy Division. These two G&T cooperatives, serving three and 17 member distribution cooperatives, respectively, along with Big Rivers Electric Corporation serving four member cooperatives in western Kentucky, constituted what was then known as the KII Pool. The three G&T's continue to carry on recognized pool activities. Southern Illinois has a transmission line into Barkley Project specifically to receive power from SEPA. Big Rivers is both connected to Barkley and to the TVA System remote from SEPA projects. Hoosier is one system removed from SEPA and TVA and receives its allocation through Big Rivers pursuant to its own arrangements. Southern Illinois and Big Rivers presently buy both peaking and standby power from SEPA while Hoosier buys only standby. Since SEPA has proposed to discontinue sales of standby power from the Cumberland projects upon the termination of existing contracts and because Hoosier is a system once removed from the projects, SEPA has decided to discontinue sale to Hoosier. However, because of the long-term business relationship between SEPA and the Illinois G&T, its willingness to invest in transmission facilities to Barkley Project and its proximity to the power, SEPA will continue sale of peaking power to the Cooperative. Furthermore, the Assistant Secretary for Conservation and Renewable Energy has authorized the continued sale of peaking power to Southern Illinois. It should be remembered that Section 5 of the Flood Control Act of 1944 is a national statute and the Secretary of Energy has has nationwide authority. The ten-state area in which SEPA is

authorized to market power from projects which are or may be located in those states is by delegation of the Secretary who is free to modify the delegation as he may deem appropriate.

3. *Objection.* SEPA should market Cumberland power either (a) entirely to TVA, or (b) entirely among TVA and the four G&T coops now receiving the entire system output, or (c) among all preference customers within a radius of 150 miles from the system projects.

Response. In 1948, prior to the establishment of SEPA, the Secretary of the Interior entered into a contract with TVA selling the Authority the outputs of the Wolf Creek, Center Hill and Dale Hollow Projects. The contract was terminable in 1988 or thereafter upon ten-years' advance notice. Payment to cover cost of the power investment was to be made annually based on inflow into the Wolf Creek Reservoir. Payments, accordingly, varied widely. Since these were the storage projects in the system, SEPA had little choice but to add Old Hickory and Cheatham, basically run-of-river projects, to the arrangement when they became operative in 1957 and 1959, respectively. However, when the sixth project in the basin, Barkley, was under construction, and since it had some peaking potential, SEPA moved in 1963, with TVA's cooperation to amend the basic arrangement to allow, with the addition of Barkley, the withdrawal from the system of 150 megawatts of peaking power and 100 megawatts of standby power for sale to SEPA customers outside the TVA area. It was arranged for three customers to purchase the use of the 100 megawatts of standby on an acceptable basis. Subsequently, in 1970 and 1973, respectively, J. Percy Priest and Cordell Hull were added to the arrangement and with the addition of Cordell Hull, the withdrawable amount of peaking power was increased to 175 megawatts. The power withdrawn was eventually sold by SEPA as follows: 40 megawatts peaking and 100 megawatts standby to Big Rivers; 35 megawatts peaking and 100 standby to Southern Illinois; 100 megawatts of standby to Hoosier; and 100 megawatts of peaking to a fourth G&T cooperative, East Kentucky Power Cooperative, Inc. The initial contract with Big Rivers was challenged immediately by Kentucky Utilities Company and Louisville Gas & Electric Company as violative of the TVA area limitation statute. The utilities also challenged a Certificate of Convenience and Necessity being sought by Big Rivers because initially two distribution cooperatives served by KU and one served by LG&E were members of Big Rivers and were seeking new sources of power supply. The Certificate of Convenience and Necessity was eventually granted and sustained by a state appellate court and the U.S. District Court in Kentucky finally ruled for SEPA and the sales of withdrawn power to the four G&T's were eventually perfected and deliveries have since continued. In late 1973, SEPA offered the Laurel Project output in equal shares to East Kentucky and to eight Kentucky municipals within 150 miles of the project served from the KU System. Some five years of unsuccessful negotiations with KU to obtain a satisfactory wheeling agreement followed. It was then determined to sell all of the Laurel output to East Kentucky with East Kentucky agreeing to relinquish 25 megawatts of Cumberland power for the benefit of the eight cities when SEPA could obtain an arrangement with KU to perfect deliveries. This effort also failed and SEPA then, pursuant to recently passed legislation authorizing FERC to order wheeling under certain conditions, filed an Application with FERC seeking an Order requiring KU to wheel the 25 mw to the eight cities. The Administrative Law Judge denied the Application and the matter is now before the Commission on exceptions to the ALJ's Initial Decision. Additionally, the Justice Department after investigation and review of SEPA's files, independently and without SEPA's advanced knowledge, filed an antitrust suit against KU alleging violation of the Sherman Act. Both the FERC and court actions are ongoing. This background information is important to placing this suggestion in context, since the suggestion in its entirety was made by KU and represents the Company's position as taken during its dealings with SEPA.

There is no possibility of selling all of the power to TVA in the future and in fact the possibility actually ended in 1963 with the execution of the Big Rivers contract. Likewise, the effort to get the power frozen to existing participants overlooks the fact that for the first time in SEPA history the agency has the opportunity and responsibility to determine what is the most appropriate marketing area and allocation for Cumberland power after considering all available information. Kentucky municipalities, including those in the KU area, have never realized any SEPA power despite their interest, their proximity to the projects and SEPA prior commitments. The final suggestion that all preference customers within a radius of 150 miles of any of the projects be allocated a proportionate share of the power has little relation to the interests of preference customers but was designed to scatter the power so as to minimize the loss of Company supplied load within its service area. It was put forth in the SEPA-KU negotiations and the FERC proceeding for specifically that purpose, not to aid SEPA in developing an appropriate plan to carry out its responsibilities. SEPA has nevertheless reevaluated these contentions and finds them all inconsistent with modern day realities and requirements.

4. *Objection.* The Cumberland River is a Kentucky and Tennessee resource and power produced therefrom should be marketed within the two States.

Response. While the entire Cumberland River Basin is located within Kentucky and Tennessee, Congress has not chosen to delineate the geographical area of the two States as the marketing area for power from the Cumberland Basin resource. Under its powers to regulate navigable waters, Congress could have done so but it did not. Rather, Congress chose to have a designated Power Marketing Administration select the geographical marketing area in accordance with guidelines established in Section 5 of the Flood Control Act of 1944, including the "most widespread use" provision. Under this provision, river basin and State boundaries are only two factors to be considered in the selection of an appropriate geographical marketing area. Other factors include reasonable distances from projects; utility service areas; number, location and demand of preference customers; type and amount of power available for marketing; and various other matters involved in scheduling, transmission, utilization and disposition of the power. There is also the matter of harmonizing the "most widespread use" provision with other statutory provisions.

Under present arrangements, Cumberland power is utilized in Kentucky and Tennessee and portions of seven other States. Under the new written power marketing policy, the SEPA selected geographical marketing area includes all of Kentucky and Tennessee and portions of six other States. Except for Illinois, the States includes in SEPA's selected marketing area are those served totally or partially by TVA, with SEPA's area including selected portions of Kentucky, North Carolina and Mississippi not served by TVA. Stated another way, SEPA's selected marketing area includes the TVA area, those utility areas in the Southeast immediately adjacent to the

TVA service area not now served or contemplated to be served from another SEPA system, (except the service areas of Kentucky Power Company and Nantahala Power & Light Company), and the service area of Southern Illinois Power Cooperative.

The service areas of Kentucky Power Company and Nantahala Power & Light Company, have very small preference loads and are impractical for inclusion at this time. The selected marketing area appears when all factors are considered to be the most reasonable area within which to market Cumberland power.

5. *Objection.* SEPA should recognize and treat TVA as an entity preferred, under the Flood Control Act, in the disposition by SEPA of the power output of the Cumberland System.

Response. This contention is made on behalf of parties seeking disposition of Cumberland power basically within the TVA service area. It is also a counter to the contention that TVA is without preference rights to the power under the statute. The counter was initially raised by those thinking that a determination that TVA was not a preference entity would result in power being withdrawn from TVA for sale outside the TVA area. The question of whether TVA is or is not a preference entity was raised in connection with the Georgia-Alabama policy and was deferred until consideration of the Cumberland policy.

As it turns out, SEPA's approach to development of policy for the Cumberland System does not require the question to be answered. Even those who contend that TVA is not a preference customer recognize that there are public bodies and cooperatives within the TVA service area who are eligible to receive SEPA power and even suggest that some capacity be allocated to TVA for their benefit.

The geographical area within which SEPA is authorized to (or may) market power includes the TVA service area. Within the 80,000 square mile TVA area are 160 public bodies and cooperatives for whom TVA has utility responsibility. They are preference customers under both the TVA Act and under the Flood Control Act. They are in a position to reasonably receive power from both RVA and SEPA's Cumberland System.

SEPA could alternatively market Cumberland power directly to the 160 TVA preference entities using TVA to wheel and facilitate or it could arrange to pass the power and benefits through TVA to the preference customers. From an efficiency standpoint, the latter is preferable. Furthermore, all of the preference entities within the TVA area desire SEPA to deal with TVA for their benefit. Under long-term TVA policy and arrangements, TVA and Cumberland hydro power and benefits flow through to the preference entities and will continue to do so in the future. The real question then is should the public bodies and cooperatives located in the TVA service area be allowed to receive both TVA and SEPA hydro power and, if so, to what extent?

Despite attempts to distinguish TVA and SEPA hydro power, the fact remains that all of such power is Federally-owned. And, all of it is to be marketed giving preference to public bodies and cooperatives. SEPA's policy will make available Cumberland power to preference entities in the TVA area. As to quantities, SEPA will add to the TVA supplied hydro such that preference customers inside the TVA area will have met from Federal hydro approximately the same percentage of their total demand as SEPA will provide its preference customers in the remaining Cumberland marketing area outside the TVA service area. SEPA has concluded that this discretionary resolution has merit and is reasonably fair and equitable to all concerned.

6. *Objection.* TVA is not a public body entitled to preference power within the meaning of Section 5 of the Flood Control Act of 1944, although it serves a number of public bodies and cooperatives which would be entitled to receive SEPA power. Accordingly, TVA should receive for the benefit of preference customers in its area 65 percent of the capacity (no energy) which the Authority now receives from SEPA. Kentucky preference entities should receive the equivalent of the hydro power which TVA System preference customers would receive from combined TVA–SEPA hydro resources, and all preference entities throughout the ten-state area not now served by SEPA (including Kentucky cities) should receive an equitable proportion of all remaining Cumberland capacity and energy.

Response. The non-issue of TVA's status under the preference provisions of Section 5 of the Flood Control Act of 1944 was adequately covered in the *Response* to *Objection 5.* The proposal contained in this *Objection 6* is sponsored by representatives of preference entities who are promoting a single system approach to SEPA marketing. The proposal would effectively leave approximately 400 megawatts of capacity inside the TVA System, removing therefrom a total of some 500 megawatts and all of the energy. Kentucky preference entities outside the TVA service area would receive treatment equal to that granted preference entities within the TVA service area from TVA–SEPA hydro power and the remaining Cumberland power would be spread throughout the remaining portions of the 10-state area. Devoid of justification, the proposal on its face is lacking in practicality and sound business principles as discussed in the *Response* to *Objection 1.*

7. *Objection.* Reallocation of Cumberland power is essential to carry out SEPA's mandate and to overcome historical inequities resulting from TVA service boundaries and area limitation statute.

Response. This objection recognizes that no systematic allocation of Cumberland power among potential customers has previously been made by SEPA. The original and subsequent piece meal and ad hoc approaches to Cumberland marketing reflect the need for reconsideration being made through this policy making procedure. This is in reality SEPA's first opportunity to really consider what area might be reasonably served from the Cumberland projects and to consider how the power might equitably be allocated among all preference customers located in the selected areas. SEPA believes, therefore, that a reasonable basis exists for reconsideration of the marketing area and careful reallocation of resources but that the basis exists independently of any inequities which may linger along the periphery of the TVA established service area. While SEPA efforts may serve to partially overcome the peripheral inequities, SEPA's driving force is to most effectively carry out its mandate as set forth in Section 5 of the Flood Control Act of 1944.

8. *Objection.* Proposed allocations to TVA area preference customers are inequitable and will result in withdrawal of substantial quantities of both power and monetary benefits from TVA's preference customers and their domestic and rural consumers.

Response. Preference customers of TVA which have long realized major benefits from the Cumberland hydro resource are understandably concerned about the proposed withdrawal of additional quantities of power from the TVA System. Benefits from both TVA and SEPA hydro, under TVA policy, are substantially passed through to TVA area preference customers and in turn to their domestic rural consumers. Therefore, the TVA area preference customers naturally prefer the status quo if not an improvement of their present condition. They contend that the proposed allocations will adversely impact them, both product and benefit wise, the extent depending upon the allocation of capacity and energy to

preference customers outside the TVA service area. They also express concern about extra costs and losses that will be involved in spreading the power over a larger geographical area and worry as to efficient use of resources when additional utility systems are involved.

It may be true, depending on how much capacity and energy is withdrawn, that monetary benefits could be withdrawn from TVA area preference customers. In the proposed policy, SEPA proposed ranges of allocations to proposed preference customers. The maximum allocation would withdraw a substantial amount of energy from the TVA System. In that case, TVA would be required to replace that energy at a higher cost then the cost of SEPA energy. However, under a minimum allocation, there would basically be no change in the amount of energy the TVA System would receive and utilize for its preference customers. As to capacity withdrawal, the monetary detriment may be much less than suspected, possibly even minimal, when it is considered that Cumberland capacity added to available TVA hydro likely provides more peaking capability than the TVA load can reasonably sustain. Futhermore, during the proposed policy period, because of excess capacity currently reported in the TVA System, minimal new capacity will need to be added by TVA.

The three to five percent increase in rates postulated by TVA is based upon certain assumed withdrawals and projected high costs of replacement power. SEPA believes the estimates to be clearly on the high side. Nevertheless, some financial detriment is a distinct possibility. This, however, does not make a carefully selected withdrawal inequitable. Quite the contrary, a carefully balanced overall policy carrying out in a reasonable manner SEPA's marketing responsibilities is the goal being sought. The allocations selected in the final policy effectively accomplish this goal.

9. *Objection.* SEPA should conditionally allocate power for future withdrawal and use in developing joint state-federal synthetic fuel plants in Kentucky.

Response. The basis for this suggestion is that originally four synthetic fuel plants were proposed for western Kentucky which would require upwards of 1300 mw of electric power. From a load factor and time duration standpoint the power need presents some special problems to the industry owners and power suppliers. Both Federal and State money has been or was proposed for investment in otherwise privately financed and operated industries. To what extent the plants will become reality remains to be seen.

SEPA has only a limited amount of peaking capability available for a large preference market and has not previously during its existence allocated power to any industry. The suggestion invites a break with this policy.

In the first place these plants need base load power whick SEPA does not have. Secondly, in addition to the fact that SEPA's resource does not match the product needed, SEPA's mandate to honor the preference clause is an overriding requirement. Under the proposed policy, SEPA would be able to supply only a portion of the peaking requirements of the preference entities in the marketing areas under consideration.

Furthermore, it would be difficult to justify asking electric power consumers to give up some of their benefits of hydro power in order for the users of synthetic fuel to get their product more cheaply.

10. *Objection.* Supply agencies for preference customer groups should receive an allocation of power in addition to allocations to their member distribution entities.

Response. This Objection is premised upon a mistaken belief that SEPA in the past has granted allocations of power and energy to G&T cooperatives in addition to allocations made to on-system distribution cooperation served directly by those G&T's. The confusion apparently arises from the fact that some off-system member cooperatives receive allocations and delivery through utilities other than the parent G&T. Their allocations, however, are based on their own loads segregated from the loads actually and directly served by the G&T itself. In other words, the loads served directly through the G&T's own transmission facilities are utilized in determining allocations to the G&T's while the loads of off-system member cooperatives served through other utilities transmission facilities are utilized in the determination of allocations to the off-system cooperatives. There are no resulting duplications of allocations and the proposed policy specifically denies that possibility.

A further point of confusion may have arisen from the fact that a given distribution cooperative system may have been geographically located partially in one ESPA system marketing area and partially in another. However, only the portion of load actually existing in a given SEPA system was utilized in the allocation process for that particular system. Again there was no duplication. No preference demand should expect to receive more than its appropriate allocation and that only from the SEPA system marketing area in which it is located.

11. *Objection.* SEPA should remove the adverse competitive impact and pressures caused by uneven allocations and treatment of preference entities.

Response. This contention is supportive of the single system concept and reallocation of all power available to SEPA proportionately among all preference entities throughout the ten-state area. The practicality of such an understanding was dealt with in the *Response* to *Objection 1.* It should also be noted that any legal compulsion to follow such a course does not exist. Futhermore, no legal or other usable tools exist to accomplish a single system concept. SEPA is aware that because of circumstances influencing the evolution of its marketing program, uneven distribution of power among preference entities has resulted. Nevertheless, within selected marketing areas, evenhanded treatment was always afforded participation preference entities as power became available. It goes without saying, however, that preference entity participation at any point in time was voluntary and beyond SEPA's control. Additionally, because geographical limits to marketing areas resulted from the decision process, preference entities immediately beyond the peripheries were affected. But as discussed in the *Response* to *Objection 7* in the Final Marketing Policy for the Georgia-Alabama System, the magnitude of the impact is debatable and is but one factor in the establishment of rate levels by preference entities.

SEPA's responsibility is to dispose of surplus hydro power from identifiable Corps of Engineers reservoir projects in accordance with specific statutory criteria and it has no utility responsibility respecting any customer within the ten-state area or other specified areas in which it is authorized to market power. The impact of SEPA power is something of which SEPA is conscious but the impacts are a natural consequence of its marketing program. The Congress has not required SEPA to specifically take this matter into consideration as it has required of certain other agencies of a regulatory nature.

12. *Objection.* The system dependable capacity utilized by SEPA in its marketing plan must be realistic and reflect parameters that will be used in operating Cumberland projects.

Response. Realism and pragmatism are, indeed, called for. In depth consideration must be and has been given to operating and marketing parameters associated with both the TVA System, within which a portion of the power will remain, and the peripheral systems into which portions of the power will be delivered. These considerations are made more difficult by the multi-purpose nature and particular characteristics of the projects, together with the interrelated aspects of the Cumberland and Tennessee Rivers created by the Barkley Canal. Accordingly, judgmental skills of a high degree are required in both hydraulic and operating areas. SEPA's much revised and reviewed system computer study for the period 1925 through 1981 has taken all known and relevant factors into consideration in the determination of system dependable capacity. This study establishes, in the judgment of SEPA's hydraulic and operating experts, and in the context of the proposed new written marketing policy, the dependable capacity of the Cumberland System at 960,000 kilowatts with accompanying firm energy of 1,280 kilowatt-hours per kilowatt per year.

The study effectively simulates output of the sytem based upon projected operations by the Corps of Engineers and SEPA with dependable capacity based upon conditions existing as of the end of January 1981. Extensive discussions were held with the Corps of Engineers (Nashville District and ORD) and TVA in order to validate the study. The Staff concludes that SEPA is justified in marketing 960,000 kilowatts of dependable capacity with accompanying firm energy of 1,230,000,000 kilowatt-hours.

13. *Objection.* The benefits of Cumberland hydro power under the proposed policy will be substantially diminished through inefficient use of facilities, added transmission losses, and additional facility utilization costs.

Response. The concerns here expressed are related to an extension of the marketing area and the involvement of additional utilities. Operationwise, the proposed policy may place some restrictions on the system's response to always provide least cost TVA energy, which TVA probably considers an inefficient use of facilities. However, the principle value of the system is the production of peaking power, and it is through an interrelated consideration of involved utility systems that SEPA seeks and expects to achieve a more beneficial use of available product. A better balance of capacity and energy realization is sought through carefully revised project operations including projected maintenance of higher project storage elevations during the summer and fall months. The end result will be a more efficient overall use of Cumberland resources. Transmission losses are indeed related to the marketing area selected and must be weighed in the selection of that area. The proposed policy has considered customers either within the TVA service area or those in immediately adjacent areas involving utilities having transmission lines to the Cumberland Projects or otherwise having direct connections to the TVA System. SEPA believes losses within the TVA System are no more than average system losses and additional external losses are well within the bounds of those necessarily resulting from SEPA properly carrying out its mission. However, SEPA has decided against trying to serve in the Kentucky Power and Nantahala areas because of very light preference customer load and other factors.

Some small additional facility use is required and will be compensated for. Also, the addition of some revenue metering by the Government may be desirable to more accurately measure the product going into the TVA System.

SEPA, in evaluating these contentions, can find no plausible basis for concluding that significant or material increase in costs, losses of efficiency, or unacceptable transmission losses will result from implementation of the proposed policy should it be made final.

14. *Objection.* SEPA is without legal authority to mandate conservation measures and programs as part of its marketing policies.

Response. There is no substantial objection to the Congressionally articulated national policy of energy conservation. At this point in its institutional life, SEPA seeks to be responsive to this national policy, mindful of the various factors that inhibit its ability to contribute except in limited ways. Careful use of SEPA's scarce hydro resource is something for which SEPA will continue to strive and toward that end SEPA proposes not to require its customers to provide financial assistance to their ultimate consumers, as some have contended, but rather to offer technical assistance where needed to encourage and assist its customers to develop and conduct conservation programs reasonably within their capabilities. SEPA believes its proposed promotional activities are well within its statutory mandate.

Changes or Revisions in Proposed Marketing Policy

The Introductory section (General) has been revised to specify that the length of implementing contracts would be approximately 10 years.

The *Marketing Area* section has been revised to eliminate the Kentucky Power Company and Nantahala Power & Light Company areas. The quantities of power going into these areas would be de minimis and would not at this time justify the marketing effort. Because the preference loads will grow over time, these areas will again be considered during future marketing policy reviews.

In the *Allocation of Power* section, the amounts of capacity and energy going to or for the benefit of preference entities in the marketing area have been selected and made specific. The amounts are believe to be realistic in the light of the product available, types of recipients and financial impact.

The *Utilization of Utility Systems* section has been revised to provide for the most feasible and desirable impact of Cumberland power upon using systems while maintaining essential operating control by SEPA and the Corps of Engineers.

Finally, the *Conservation Measures* section has been revised to clarify SEPA's role as promotional in nature.

Final Power Marketing Policy

Cumberland Projects

General. The projects and power subject to this policy are:

Projects	Capacity (kilowatts (nameplate))	Energy (megawatt-hours) (average annual)
Barkley	130,000	[1]560,000
Center Hill	135,000	386,000
Cheatham	36,000	186,000
Cordell Hull	100,000	260,000
Dale Hollow	54,000	125,000
Laurel	61,000	69,000
Old Hickory	100,000	475,000
J. Percy Priest	28,000	72,000
Wolf Creek	270,000	520,000

[1] Does not include increased output resulting from Barkley-Kentucky Canal.

The policy for the Cumberland System of Projects will be implemented as to existing customers as existing contracts, or necessary extensions thereof, expire; as to new customers, as implementing contracts can be completed. Existing contracts will expire June 30, 1983.

The policy will be implemented through negotiated contracts for terms of approximately 10 years.

SEPA will seek the use of transmission facilities owned by TVA

and other utilities within the marketing area for all necessary purposes including bulk transmission and transmitting to load centers where required. Power deliveries may be made at the projects, at utility interconnections with TVA or at customer substations, as determined by SEPA. The projects will be hydraulically, electrically and financially intergrated and will be operated to make approximate contribution to the TVA System and to permit deliveries to the other utility areas within the selected marketing area. Reference in the sale of power be given to public bodies and cooperatives.

Marketing Area. The marketing area will be the TVA service area and the service areas of the following utilities: Big Rivers Electric Corporation; Carolina Power & Light Company, Western Division; East Kentucky Power Cooperative; Kentucky Utilities Company; Mississippi Power and Light Company; and Southern Illinois Power Cooperative. The utilities other than TVA are either connected to the Cumberland projects, or to the TVA transmission System and are not now receiving or under consideration to receive power from other SEPA systems. The geographic marketing area will consist of approximately 148,000 square miles. Except where duplication of allocations would result, public bodies and cooperatives located outside the TVA service area and listed on Appendix A attached hereto are eligible to share in Cumberland power marketable under this policy; provided that Cumberland power shall not be made available to meet any portion of any preference entity demand within the selected Cumberland marketing area which is in part required to be met by power from any other SEPA system.

Allocation of Power. Power available under this policy for allocation from the Cumberland System will be peaking power only. The power will be divided into two categories: (1) Power available for sale outside the TVA service area and (2) power sold to TVA for use within the TVA area. SEPA will allocate available Cumberland capacity to or for the benefit of public bodies and cooperatives throughout the entire marketing area so that all such customers will be able to have met from total Federal hydro power available to them approximately the same percentage of their 1978 peak demand requirements. To accomplish this division and distribution, SEPA will allocate from system generation to public bodies and cooperatives outside the TVA area an estimated 19 to 20 percent of the 1978 peak load demands of eligible public bodies and cooperatives listed on Appendix A. The energy accompaniment of such capacity will be 1,500 kilowatt-hours per kilowatt per year (1,280 firm, the remainder usable secondary), except that if additional energy is required in given utility areas to make viable capacity allocations under acceptable arrangements such additional energy (secondary) will be made available from the Cumberland projects. All remaining capacity and energy will be allocated to TVA for the benefit of public bodies and cooperatives in its area.

Utilization of Utility Systems. In the absence of transmission facilities of its own, SEPA will acquire the use of area generation and transmission systems to integrate the Cumberland projects, provide firming, wheeling, exchange and other functions as may be necessary to dispose of system power under reasonable and acceptable marketing arrangements. Utility systems providing such services shall be entitled to adequate compensation. SEPA will make declarations of all energy available from the Cumberland System to TVA and cooperatively determine the magnitude of delivery from particular projects in accordance with acceptable procedures generally followed by SEPA and the Corps of Engineers with respect to its other systems. TVA will schedule all of the power to generally meet its own system requirements and will transmit portions of such power to its interconnections in response to allowable schedules submitted by neighboring utilities entitled to receive under appropriate arrangements designated quantities of system power. Specific terms and conditions of arrangements between SEPA and TVA and SEPA and the other utilities will be the subject of negotiations. Distribution preference agencies directly affected by negotiations with wheeling utilities shall stand in an advisory role to SEPA and shall be involved as determined by SEPA and otherwise kept currently advised as to the status and progress of negotiations.

Wholesale Rates. Rate schedules shall be drawn so as to recover all costs associated with producing and transmitting the power in accordance with then current repayment criteria. Production costs will be determined on a system basis and rate schedules will be related to the integrated output of the projects. Transmission costs may cause rate schedules to vary between utility areas. Rate schedules may be revised periodically.

Resale Rates. Resale rate provisions requiring the benefits of SEPA power to be passed on to the ultimate consumer will be included in each SEPA customer contract which provides for SEPA to supply more than 25 percent of the customer's total power requirements during the term of the contract.

Conservation Measures. Each customer purchasing SEPA power shall agree to take reasonable measures to encourage the conservation of energy by ultimate consumers.

Appendix A—Preference Agencies in the Cumberland System Area

Kentucky

Big Rivers Electric Corporation
Member Cooperatives:
- Green River EC
- Henderson-Union REC
- Meade County REC
- Jackson-Purchase EC

Associated Utilities:
- Henderson Municipal Power & Light

East Kentucky Power Cooperative, Inc.

ENVIRONMENTAL PROTECTION AGENCY

[PF-310; PH-FRL-2319-7]

Pesticide and Feed Additive Petitions; FMC Corp. et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received pesticide and feed additive petitions relating to the establishment and/or amendments of tolerances for residues of certain pesticide chemicals in or on certain commodities.

ADDRESS: Written comments to the product manager (PM) cited in each petition at the address below: Registration Division (TS-767C), Office of Pecticide Programs, Environmental Protection Agency, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Written comments may be submitted while the petitions are pending before the Agency. The comments are to be identified by the document control number [PF-310] and the petition number. All written comments filed in response to this notice will be available for public inspection in the product manager's office from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: The product manager cited in each petition at the telephone number provided.

SUPPLEMENTARY INFORMATION: EPA gives notice that the Agency has received the following pesticide and feed additive petitions relating to the establishment and/or amendment of tolerances for residues of certain pesticide chemicals in or on certain commodities in accordance with the Federal Food, Drug, and Cosmetic Act. The analytical method for determining residues, where required, is given in each petition.

A. Initial Filing

1. *PP 3F2817.* FMC Corporation, 2000 Market St., Philadelphia, PA 19103. Proposes amending 40 CFR Part 180 by establishing tolerances for the combined residues of the insecticide carbosulfan (2,3-dihydro-2,2-dimethyl-7-benzofuranyl-[(dibutylamino) thio] methylcarbamate) plus (2,3-dihydro-2,2-dimethyl-7-benzofuranyl-*N*-methylcarbamate, and its carbamate cholinesterase inhibiting metabolites 2,3-dihydro-2,2-dimethyl-3-hydroxy-7-benzofuranyl-*N*-methylcarbamate; 2,3-dihydro-2,2-dimethyl-3-keto-7-benzofuranyl-*N*-methylcarbamate); and its phenolic metabolites (2,3-dihydro-2,-dimethyl-7-benzofuranol; 2,3-dihydro-2,2-dimethyl-oxo-7-benzofuranol and 2,3-dihydro-2,2-dimethyl-3,7-benzofurandiol) and its metabolite (di-*n*-butylamine) in or on the following commodities at the levels stated as follows:

a. Eggs and poultry at 1.1 part per million (ppm) total of which no more than .05 ppm is carbosulfan and its cholinesterase inhibiting metabolites, and 0.05 ppm is the metabolite di-*n*-butylamine.

b. Kidney and liver of cattle, goats, hogs, horses, and sheep at 0.1 ppm total, of which no more than .08 ppm is carbosulfan and its cholinesterase inhibiting metabolites, and 0.0 ppm is the metabolite di-*n*-butylamine.

c. Meat, fat and meat by products (except liver and kidney) of cattle, goats, hogs, horses and sheep at 1.1 ppm total, of which no more than .02 ppm is carbosulfan and its cholinesterase inhibiting metabolites, and 0.1 ppm is the metabolite di-*n*-butylamine.

d. Milk at 1.6 ppm total, of which no more than 0.02 ppm is carbosulfan and its cholinesterase inhibiting metabolites, and 1.5 is the metabolite di-*n*-butylamine.

e. Sorghum fodder at 10.0 ppm total, of which no more than 1.5 ppm is carbosulfan, 1.5 ppm cholinesterase inhibiting metabolites, and 2.0 ppm is its di-*n*-butylamine metabolite.

f. Sorghum grain at 4.5 parts per million (ppm) total, of which no more than 0.03 ppm is carbosulfan, 0.7 ppm cholinesterase inhibiting metabolites, and 1.5 ppm is its di-*n*-butylamine metabolite. The proposed analytical method for determining residues is by gas chromatography using a nitrogen-phosphrous detector. (PM-12, Jay Ellenberger, 703-557-2386).

2. *PP 3F2818.* Ciba Geigy Corp., P.O. Box 18300, Greensboro, NC, 27419. Proposes amending 40 CFR 180.408 by establishing tolerances for the combined residues of the fungicide metalaxyl [*N*-(2,6-dimethylphenyl)-*N*-(methoxyacetyl) alanine methyl ester] and its metabolites containing the 2,6-dimethylaniline moiety, and *N*-[2-(hydroxymethyl)-6-methylphenyl]-*N*-(methoxyacetyl) alanine each expressed as metalaxyl in or on the commodities soybean fodder and forage at 7.0 ppm, and grain at 0.5 ppm. The proposed analytical method for determining residues is gas chromatography using an alkali flame ionization detector. (PM-21, Henry Jacoby, 703-557-1900).

3. *FAP 3H5362.* Ciba Geigy Corp. Proposes amending 21 CFR Part 561.273 by establishing a regulation permitting the combined residues of the fungicide metalaxyl and its metabolites in or on the commodities soybean hulls, meal, and soapstock at 1.0 ppm. (PM-21, Henry Jacoby, 703-557-1900).

4. *PP 3F2799.* Chevron Chemical Co., 940 Hensley St., Richmond, CA 94804-0036. Proposes amending 40 CFR 180.108 by establishing tolerances for the combined residues of the insecticide acephate (*O,S*-dimethyl acetylphosphoramidothioate) and its cholinesterase-inhibiting metabolite *O,S*-dimethyl phosphoramidothioate in or on the commodity potatoes at 1.0 ppm. The proposed analytical method for determining residues is gas chromatographic method using a thermionic detector. (PM-16, William Miller, 557-2600).

5. *FAP 3H5380.* Chevron Chemical Co. Proposes amending 21 CFR 561.20 by establishing a regulation permitting the combined residues of the insecticide acephate and its cholinesterase-inhibiting metabolite *O,S*-dimethyl phosphoramidothioate in or on dried potato waste at 4.0 ppm when present as a result of the application of acephate to the growing crop, potatoes. (PM-16, William Miller, 703-557-2600).

6. *PPm 1F2430.* Shell Oil Co., Suite 200, 1025 Connecticut Ave., NW., Washington DC 20036. Proposes to amend 40 CFR 180.379 by establishing tolerances for residue of the insecticide cyano (3-phenoxyphenyl)methyl-4-chloro-alpha-(1-methylethyl) benzeneacetate in or on the commodities pop corn, cobs and kernels at 0.01 ppm. The proposed analytical method for determining residues is by gas chromatography. (PM-17, Franklin D. R. Gee, 703-557-2690).

B. Amended Petitions

1. *PP 3F2815.* Diamond Shamrock Corp., 1100 Superior Ave., Cleveland, OH, 44114. EPA issued a notice published in the **Federal Register** of

September 29, 1982 (47 FR 42741) that announced that Diamond Shamrock Corp. had submitted pesticide petition 2F2802 to the Agency proposing to amend 40 CFR 180.275 by establishing tolerances for the combined residues of the fungicide chlorothalonil (tetrachloroisophthalonitrile) and its metabolite 4-hydroxy-2,5,6-trichloroisophthalonitrile in or on the commodity peaches at 0.5 ppm. Diamond Shamrock Corp. has amended the petition by increasing the tolerance level on peaches to 3.0 ppm. The proposed analytical method for determining residues is by gas chromatography. (PM–21, Henry Jacoby, 557–1900).

2. *PP 3F2773.* Union Carbide Corp., T.W. Alexander Drive, Research Triangle Park, NC 27709. EPA issued a notice published in the **Federal Register** of December 22, 1982 (47 FR 57129) that announced that Union Carbide Corp., has submitted pesticide petition 3F2773 to the Agency proposing to amend 40 CFR 180.407 by establishing tolerances for the combined residues of the insecticide thiodicarb (dimethyl *N,N'*-(thiobis[(methylimino)-carbonyloxy)) bis(ethanimidothioate)) and its metabolite methomyl, *N*-((methylcarbamoyl)oxy) thioacetimidate in or on the commodities field corn grain at 0.05 ppm, sweet corn kernels (plus cob) at 1.5 ppm, and field corn fodder and forage at 60.0 ppm.

Union Carbide has amended the petition by deleting the proposed tolerances for field corn fodder and forage and proposing tolerances for corn fodder and forage at 60.0 ppm. The proposed analytical method for determining residues is liquid chromatography. (PM–12, Jay Ellenberger, 703–557–2386).

3. *PP 1F1083.* Olin Corp., P.O. Box 30–275, 275 S. Winchester Ave., New Haven, CT 06511. EPA issued a notice published in the **Federal Register** of December 15, 1971 (36 FR 23836) that announced the Olin Corp., had submitted pesticide petition 1F1803 to the Agency proposing to amend 40 CFR 180.291 by establishing tolerances for the residues of the fungicide pentachloronitrobenzene in or on the various raw agricultural commodities.

Olin Corp. has amended the petition as follows:

a. Establish tolerances for combined residues of pentachloronitrobenzene and its metabolites pentachloronitroanaline and methyl pentachlorophenyl sulfide and impurities pentachloronitrobenzene and hexachlorobenzene at 0.1 ppm with no more than 0.02 ppm for residues of hexachlorobenzene (HCB) for bananas, broccoli, brussel sprouts, cabbage, cauliflower, garlic, peppers, potatoes, and tomatoes.

b. Increase tolerance levels of combined residues for: beans from 0.1 to 0.2 ppm with no more than 0.02 ppm for residues of HCB; peanuts from 1.0 to 2.0 ppm with no more than 0.4 ppm for residues of HCB.

c. Establish tolerances for combined residues in fat of cattle, goats, hogs, horses, poultry, and sheep at 0.15 ppm with no more than 0.05 ppm for residues of HCB; meat and meat byproducts of cattle, goats, hogs, horses, poultry, sheep, milk and eggs at 0.05 ppm with no more than 0.02 ppm residues of HCB; and peanut hulls at 5.0 ppm with no more than 0.3 ppm residues of HCB. The proposed analytical method for determining residues is gas chromatography with electron capture detection. (PM–21, Henry Jacoby, 703–557–1900).

(Sec. 408(d)(1), 68 Stat. 512, (7 U.S.C. 136); 409(b)(5), 72 Stat. 1786, (21 U.S.C. 348))

Dated: March 1, 1983.

Pesticide and Feed Additive Petitions; Monsanto Co., et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received pesticide and feed additive petitions relating to the establishment and/or amendment of tolerances for residues of certain pesticide chemicals in or on certain commodities.

ADDRESS: Written comments to the product manager (PM) cited in each petition at the address below: Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Written comments may be submitted while the petitions are pending before the Agency. The comments are to be identified by the document control number [PF–314] and the petition number. All written comments filed in response to this notice will be available for public inspection in the product manager's office from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: The product manager cited in each petition at the telephone number provided.

SUPPLEMENTARY INFORMATION: EPA gives notice that the Agency has received the following pesticide and feed additive petitions relating to the establishment and/or amendment of tolerances for residues of certain pesticide chemicals in or on certain commodities in accordance with the Federal Food, Drug, and Cosmetic Act. The analytical method for determining residues, where required, is given in each petition.

A. Initial Filing

1. *PP 3F2809.* Monsanto Co., 1101 17th, St., NW., Washington, D.C. 20036. Proposes amending 40 CFR 180.364 by establishing tolerances for the combined residues of the herbicide glyphosate (*N*-phosphenomethyl glycine) and its metabolite aminomethylphosphonic acid in or on the commodity wheat (grain) at 0.2 part per million. The analytical method for determining residues is high pressure liquid chromatography (HPLC). (PM–25, Robert Taylor, 703–557–1800).

2. *FAP 3H5388.* Uniroyal Chemical, Division of Uniroyal Inc., 74 Amnity Rd., Bethany CT, 06525. Proposes amending 21 CFR Part 561 by establishing a regulation permitting residues of the fungicide carboxin (5,6-dihydro-2-methyl-1,4-oxathiin-3-carboxanilide) and its metabolite 5,6-dihydro-3-carboxanilide-2-methyl-1,4,oxathiin-4-oxide and other aniline liberating metaboites (calculated as carboxin) in or on the commodity peanut meal at 6.0 ppm. (PM–21, Henry Jacoby, 703–557–1900).

3. *PP 3F2827.* Ciba-Geigy Corp., P.O. Box 18300, Greensboro, NC 27419. Proposes amending 40 CFR 180.408 by establishing tolerances for the combined residues of the fungicide metalaxyl [*N*-(2,6-dimethylphenyl)-*N*-(methoxyacetyl)-alanine methyl ester] and its metabolites containing the 2,6-dimethylaniline moiety, and *N*-(2-hydroxy methyl-6-methyl)-*N*-(methoxyacetyl)-alanine methylester, each expressed as metalaxyl, in or on the commodities brassica (cole) leafy vegetables, fruiting vegetables (cucurbits), fruiting vegetables (execpt cucurbits), leafy vegetables (except brassica), leaves of root and tuber vegetables, root and tuber vegetables, and sunflower at 0.1 ppm. The proposed analytical method for determining residues is radioactive counting and gas chromatography. (PM–21, Henry Jacoby, 703-557-1900).

B. Amended Petitions

PP 9F2187. Uniroyal Chemical. EPA issued a notice published in the Federal Register of April 13, 1979 (44 FR 22175) that announced that Uniroyal Chemical Corp., had submitted pesticide petition 9F2187 to the Agency proposing to amend 40 CFR 180.301 by establishing tolerances for the combined residues of the fungicide carboxin in or on the commodities peanuts, peanut seeds, and hulls at 5.0 ppm.

Uniroyal Chemical Corp. has amended the petition by decreasing the tolerance in peanuts from 5.0 to 3.0 ppm. The proposed analytical method for determining residues is by hydrolysis-to-aniline method and color test with *p*-dimethylaminobenzaldehyde (for plant tissue), and by hydrolysis and gas chromatography of the liberated aniline using a nitrogen-specific detector (for seed). (PM–21, Henry Jacoby 703–557–1900).

(Sec. 408(d)(1), 68 Stat. 512, (7 U.S.C. 136); 409(b)(5), 72 Stat. 1786, (21 U.S.C. 348))

Dated: February 25, 1983.

M and T Chemicals, Inc.; Approval of Application to Conditionally Register a Pesticide Product Involving A Changed Use Pattern

AGENCY: Environmental Protection Agency (EPAP).

ACTION: Notice.

SUMMARY: EPA has approved the application by M and T Chemicals, Inc. to register the antifoulant BioMet ™ 204 AF–14 Red Antifouling Paint. The registration involves a changed use pattern pursuant to the provisions of section 3(c)(4) of the Federal Inseticide, Fungicide, and Rodenticide Act (FIFRA), as amended.

FOR FURTHER INFORMATION CONTACT: Richard Mountfort, Product Manager (PM) 23, Registration Division (TS–767C), Office of Pesticide Programs, Environmental protection Agency, Rm. 237, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–1830).

SUPPLEMENTARY INFORMATION: EPA issued a notice published in the Federal Register of May 10, 1978 (43 FR 20052) which announced that M and T Chemicals, Inc., PO Box 1104, Rahway, NJ 07065, had submitted an application to register the antifoulant Biomet Antifouling Paint containing 15.0 percent of the active ingredient triphenyltin fluoride. The application proposed that the use pattern of the product be changed from technical for reformulating into antifouling paints to an active ingredient in antifouling formulation. The application also proposed that the product be classified for general use.

The application was approved on January 10, 1983 for general use as "BioMet ™" 204 AF–14 Red Antifouling Paint" with 10.9 percent of the same active ingredient. The product was assigned EPA Registration No. 5204–60.

A copy of the approved label and the list of data references used to support registation are available for public inspection in the office of the product manager. The data and other scientific information used to support registration, except for the material specifically protected by section 10 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (92 Stat. 819; 7 U.S.C. 136), will be available for public inspection in accordance with section 3(c)(2) of FIFRA within 30 days after registration date. Requests for data must be made in accordance with the provisions of the Freedom of Information Act and must be addressed to the Freedom of Information Office (A–101), EPA, 401 M St., SW., Washington, D.C. 20460. Such requests should: (1) identify the product name and registration number and (2) specify the data or information desired.

(Sec. 3(c)(2) FIFRA, as amended)

Dated: February 28, 1983.

Edwin L. Johnson,

Director, Office of Pesticide programs.

Enforcement Guidance

AGENCY: Environmental Protection Agency.

ACTION: Enforcement guidance.

SUMMARY: The Environmental Protection Agency is publishing a memorandum providing enforcement guidance regarding whether burning low energy hazardous wastes for ostensible energy recovery purposes can be considered to be legitimate recycling activity within the meaning of 40 CFR 261.6(a)(1). Application of the guidance will vary in individual cases according to specific circumstances.

FOR FURTHER INFORMATION CONTACT: Steven Silverman, Esq., Attorney, Office of General Counsel (202–382–7706).

Dated: March 8, 1983.

Robert M. Perry,

Associate Administrator and General Counsel.

(The memorandum containing the enforcement guidance is set out below)

January 18, 1983.

Memorandum

Subject: RCRA Enforcement Guidance: Burning Low Energy Hazardous Wastes Ostensibly for Energy Recovery Purposes

From: Rita Lavelle, Assistant Administrator for Solid Waste and Emergency Response

Robert M. Perry, Associate Administrator and General Counsel

To: Regional Administrators, Regional Counsels, Directors, Air and Hazardous Materials Divisions

I. Introduction

A. Purpose

This memorandum provides guidance to determine when burning hazardous waste or hazardous waste-derived fuels in boilers will be considered legitimate recycling under 40 CFR 261.6(a)(1), the regulations implementing Subtitle C of the Resource Conservation and Recovery Act (RCRA). This memorandum also provides guidance regarding the possible obligation of generators, fuel blenders, distributors and ultimate users of these materials to comply with regulations promulgated under Sections 3002–3005 of RCRA. While this guidance sets out general rules, they may vary in particular cases depending upon individual circumstances.

B. Regulatory Background

On May 19, 1980, as part of the final and interim final regulations implementing RCRA, EPA promulgated an exemption from regulation for certain hazardous wastes being beneficially used, reused, recycled, or reclaimed (referred to collectively throughout this memorandum as "recycled"). This exemption, contained in 40 CFR 261.6, applies to two categories. First, certain hazardous wastes are totally exempt from regulation if they are to be recycled. These are hazardous wastes that are not sludges, that exhibit a characteristic of hazardous waste, and that are not listed in 40 CFR 261.31 or 261.32. (See § 261.6(a).) Second, listed wastes and hazardous sludges are subject to regulation until they are recycled. (See § 261.6(b).) In either category, hazardous wastes are not subject to regulation during the actual process of recycling.

The preamble to the regulation explained that the exemption "is confined to bona fide 'legitimate' and 'beneficial' uses and recycling of hazardous wastes. Sham uses * * * are not within its scope and, if conducted in violation of Subtitle C requirements, will be subject to enforcement * * *." (45 FR at 33093, May 19, 1980.)

II. General Distinctions Between Burning as Legitimate or Sham Recycling

A. Energy Value of Wastes Being Burned

Burning of hazardous wastes [1] as fuels can be a type of recycling activity exempted from

regulation provided the blending and burning constitute legitimate, and not sham, recycling. A determination of what constitutes sham burning depends ultimately on weighing a number of factors presented by the circumstances of a particular case. The energy value of the hazardous wastes being blended or burned, however, is likely to be of primary significance in most cases.

The significance of a waste's energy value is evident: if the wastes being burned have only *de minimis* energy value, the burning cannot recover sufficient energy to characterize the practice as legitimate recycling. In other words, energy recovery is ancillary, and the wastes, for practical purposes, are being burned to be destroyed. As the Agency said on May 19, 1980, "burning organic wastes that have little or no heat value in industrial boilers under the guise of energy recovery" is not within the exemption for recycling (45 FR at 33093). Consequently, EPA ordinarily views the practice of direct burning of hazardous wastes with little or no heat value as "fuels" as not being legitimate recycling.

Burning mixtures of hazardous wastes as fuels, or burning mixtures of wastes and non-waste fuel, when one or more of the hazardous wastes in the fuel has little or no heat value may likewise not be legitimate recycling. Determinations as to whether the recycling is legitimate will be based on evaluation of particular circumstances. For example, the amount of low energy waste in a fuel and the circumstances of its addition to the fuel could be relevant, as could the nature of the boiler in which the waste is burned, *i.e.*, its type, size, operating conditions, etc. Practices where wastes with little or no heat value are knowingly added to a material intended to be burned as a fuel are likely to be considered sham recycling and not covered by the exemption contained in § 261.6(a), *e.g.*, mixing of low and high energy waste streams by a blender or waste burning facility.[2]

In determining which hazardous wastes have little or no heating value, EPA enforcement personnel should use as a benchmark wastes with a heating value less than low energy commercial fuels such as wood or low grade subbituminous coal.[3] Examples of hazardous waste having little or no heating value are discarded carbon tetrachloride, chloroform, methylene chloride, trichloroethylene, 1,1,1,- and 1,1,2-Trichloroethane, certain polychlorinated biphenyls, and such pesticides as toxaphene, chlordane and heptachlor. Attached as Appendix A is a partial list of the hazardous constituents in appendix VIII to Part 261 that have heating values well below those of commercial fuels.[4] Wastes with these characteristics are usually not being recycled legitimately because their energy value is so low when burned. This remains true whether or not these wastes are first blended with other materials before burning.

B. Other Criteria

Other considerations also are likely to be relevant in determining if particular burning operations are within the scope of the recycling exemption—even if low energy wastes are not involved. Factors such as whether usable heat is recovered from the unit, or whether recovered heat is used only to preheat combustion air, certainly are pertinent. The nature of the device in which wastes are burned also could be significant. For instance, if a combustion unit previously held out as an incinerator is subsequently described as a boiler, there is a strong suggestion that any energy recovery is ancillary to the central purpose of the unit. In addition, the degree to which wastes were consumed during the burning, the net cost or savings resulting from a burn allegedly for energy recovery purposes, and evidence, such as correspondence, or other records, which tends to show that a company's purpose in conducting a burn was to dispose of, rather than recycle, hazardous wastes, may also affect EPA's enforcement response to a particular incident.

III. Enforcement Priorities

In implementing this guidance, enforcement personnel should direct their enforcement efforts on hazardous waste-derived fuel blenders who supply non-industrial users. Fuel blenders are a logical focal point because they most frequently control the content and destination of waste-derived fuels. In addition, many of these blenders are subject to regulation as RCRA storage facilities because they are recycling listed hazardous wastes (see 40 CFR 261.6(b)), and are therefore readily identifiable.

Most of EPA's enforcement efforts will be directed toward fuels destined for use in non-industrial (*i.e.* residential, commercial and institutional) boilers. These boilers typically are of relatively small size, achieve relatively low fuel efficiency, temperature, and residence times, lack emission controls, and receive limited maintenance. Operators of these boilers rarely test their fuels for hazardous waste contaminants since they are often not informed they are receiving hazardous waste-derived fuels. These factors all contribute to a reduced likelihood that these boilers can derive useful heat from hard to burn hazardous wastes contained in a fuel. (They also increase the likelihood that these boilers will be damaged by corrosion from hydrochloric acid emissions resulting from chlorinated contaminants.)

Thus, the waste contaminants in the fuels going to these boilers are likely to be vented to the atmosphere as unburned or partially burned combustion products. In addition, these boilers are often located in densely populated areas where exposures to unburned contaminants are probable. The risk to human health and the environment could be considerable because many wastes added to fuels are acutely and chronically toxic. Burning chlorinated contaminants also can form other hazardous materials such as hydrochloric acid, phosgene, or chlorinated dioxins unless burning occurs at high temperatures and for long residence times, increasing the potential for harm.

It seems clear that fuels contaminated with low energy hazardous wastes do not present the same level of danger when burned in higher efficiency industrial boilers. These boilers typically are designed to maximize energy recovery, through high temperature combustion and long feed residence time. Operators generally are more sophisticated and technically knowledgeable than nonindustrial boiler operators.

Accordingly, EPA is directing its enforcement efforts to deal with what appears to be the greater environmental threat. This is not to say that particular industrial boilers burning hazardous waste-derived fuels necessarily are engaged in legitimate recycling. Rather, EPA is simply directing the primary focus of its enforcement activity at the more clear-cut violation.

IV. Implementation of This Guidance

A. How EPA Will Determine That Blended Fuels Contain Low Fuel Value Hazardous Wastes

EPA's authority under RCRA Subtitle C is limited to hazardous wastes. Thus, in determining if a waste-derived fuel is bing recycled legitimately or illegitimately it is first necessary to show that the fuel contains a hazardous waste.

Hazardous wastes burned without prior blending can be analyzed directly for energy value (and where appropriate, for the

---

[1] Under the regulations, all sludges, and most spent materials and by-products burned for energy recovery are "solid wastes", and so can be hazardous wastes. This is because sludges, and "other waste materials," are defined as solid wastes (40 CFR 261.2(a)). "Other waste materials," in turn, are defined as spent materials and byproducts that are "sometimes * * * discarded" (§ 261.2(b) (2) and (3)), that is, sometimes thrown away and not recycled (§ 261.2(c)). The "sometimes discarded" test applies to all persons handling a spent material or byproduct, so that if one of those materials is discarded by particular generators, it is a solid waste even when recycled by other generators (see 45 FR 33095–094).

[2] We consider wastes that are ot being burned legitimately to be burned for the primary purpose of destruction, within the meaning of 40 CFR 260.10(a) (definition of "incinerator"). The reference to "primary purpose" in that provision thus applies with regard to each individual feed input to a thermal combustion unit. If the particular input has little or no fuel value, it is being burned for the purpose of destruction. Consequently, the device in which these "fuels" are burned is an incinerator, and the burning is subject to regulation under Subpart D of Parts 264 and 265 of the RCRA regulations.

[3] Woods used as fuel have a range of heating values based on the type of wood, its physical form and its moisture content. These values range from approximately 5,000 to 8,000 Btu per pound. Subbituminous C coal has a heating value of approximately 8,300 Btu per pound. (In contrast, home heating oil has a heating value of roughly 19,900 Btu per pound, and bituminous coals have heating values ranging from 11,000–14,000 Btu per pound.) U.S. EPA, *APTI Course 427 Combustion Evaluation*, EPA 450/2–80–063 (February, 1980).

[4] It must be remembered that the heating value of each hazardous *waste* that is burned or is used to produce a fuel is relevant, not the heating value of a particular contaminant in each waste stream (unless the contaminant itself is a hazardous waste). Thus, if trichloroethylene still bottoms are burned for energy recovery or used as an ingredient in a fuel, the heating value of the still bottoms is the important figure, not the heating value of pure trichloroethylene.

circumstances of burning) to determine if the recycling is legitimate. Blended fuels, however, present a less clear-cut situation. In determining if these fuels contain low energy wastes, we intend to concentrate on the fuel's organic contaminant content. If fuels contain significant concentrations of low energy organic contaminants not ordinarily present in virgin or unadulterated secondary fuels, this should be sufficient to determine that these toxicants were added as wastes. Inspectors should also examine records and sample incoming waste shipments at blending facilities to ascertain the identity of the wastes included in the fuels.

Investigative activities should focus particularly on the chlorinated solvents listed in 40 CFR 261.31 and 261.33 (other than chlorofluorocarbons, which are ozone depleters and not otherwise toxic).[5] For these materials, the contaminant itself is the same waste that is listed. Chlorinated solvents also are not ordinarily present in virgin fuels;[6] nor are they typically present in waste oils, or other wastes normally used in waste-derived fuels, at significant concentrations unless they have been added to the waste oil as a separate waste stream.[7]

In addition, chlorinated solvents typically have very low heating value. Such widely-used solvents as carbon tetrachloride, chloroform, methylene chloride, trichloroethylene and 1,1,1- and 1,1,2-trichloroethane have heating values much lower than wood. Of the chlorinated solvents that are hazardous wastes when discarded (see 40 CFR 261.33), or are hazardous wastes when spent (EPA Hazardous Wastes F001 and F002, listed in 40 CFR 261.31), all except dichlorobenzene have heating values less than that of subbituminous coal.

Although fuel blenders (or other persons) may maintain, in defending a civil action, that the low energy fuel contaminants are not present as a result of adulterating the fuel with a hazardous waste, it is their burden to substantiate such a claim. The source of wastes in the fuel are particularly within the fuel blender's knowledge, and so it is appropriate that they have this burden.

B. Obligations of Generators, Fuel Blenders and Users to Determine if Their Waste-Derived Fuels Can Be Recycled Legitimately

Generators of listed wastes and sludges are presently subject to the requirements of Part 262 of the regulations when they send these wastes to fuel blenders or users (see § 261.6(b)). These requirements apply whether or not the wastes can be recycled legitimately.[8]

Generators who claim that their non-sludge, unlisted wastes are exempt from regulation because the wastes will be burned for energy recovery ordinarily must be able to substantiate that the wastes have value as fuels in order to protect themselves from liability. Consequently, generators need to know the heating value of these wastes. Btu values can be determined by a relatively simple laboratory test. In many cases, generators also will know from experience that their wastes have legitimate fuel value. Spent benzene and spent acetone, for example, have high fuel value, as do most other ignitable wastes.

Waste-derived fuel blenders are responsible for ensuring that low energy value hazardous wastes are not blended into fuels. In addition, blenders receiving listed hazardous wastes and sludges are presently subject to regulation as storage facilities. Consequently, they must comply with the administrative and technical standards for storage facilities contained in Parts 264 and 265. (These requirements apply, of course, even if the wastes are being recycled legitimately.)[9]

We note that this requirement does not impose significant burdens on fuel blenders. In most cases, they are RCRA facilities handling listed hazardous wastes (most often listed solvents). They must consequently receive these wastes in shipments accompanied by a manifest (see § 261.6(b) (4) and (5)), and are therefore on notice that they are blending these wastes into fuels. They likewise are subject to waste analysis requirements (see §§ 264.13 and 265.13). They also can analyze their incoming wastes and blended fuels for total halogen content—a simple procedure that can be performed on-site—to ensure that waste-derived fuels do not contain high levels of low energy chlorinated wastes.

Waste-derived fuels that cannot be legitimately recycled remain subject to regulation as hazardous wastes through the time they are burned. As a result, they must travel with a manifest (see 40 CFR 262.10(f), 264.71(c), and 265.71(c)), be transported by a Part 263 transporter, and be sent to a Subtitle C facility. The persons who ultimately burn the material are hazardous waste incinerator facilities because their fuels cannot be recycled legitimately in their boilers.

As stated above, EPA is directing its enforcement efforts to concentrate on low energy waste-derived fuels used in non-industrial boilers. EPA does not intend to require that these users immediately obtain incinerator permits. Rather, we will seek through negotiation that they end the practice. If the user continues burning these waste-derived fuels after initial warning EPA will then initiate appropriate enforcement action.

C. Examples of How This Guidance Could Operate

1. Company B generates a distillation bottom that is listed as a hazardous waste. B burns this waste in its on-site boiler. The waste has a heating value of 2000 Btu per pound.

B is subject to regulation as a generator, as a storage facility (if it stores the waste for more than 90 days prior to burning it), and as an incineration facility. The waste is not being burned for energy recovery, but to be incinerated, because its heating value is well below that of low-grade commercial fuel. It does not matter whether B burns other material in the boiler for legitimate energy recovery. B still is not engaged in legitimate recycling activity when it burns a material with little or no fuel value. (Incidentally, this result is the same if the hypothetical distillation bottom exhibited a characteristic of hazardous waste instead of being listed.)

2. A fuel oil dealer, Company C, obtains waste oil from a number of different generators. C obtains hazardous waste spent solvents carbon tetrachloride, methylene chloride, and trichloroethylene from other generators and mixes these wastes with the waste oil. These wastes contain very high concentrations of chlorinated solvents, and these solvents also are present in the blended fuels. C then sells the waste-derived fuel to apartment buildings and hospitals. These users burn the fuel in their boilers.

Generators of the spent solvents are subject to regulation under Part 262, and the solvents must be transported to C's facility by a Part 263 transporter. C is a storage facility, assuming it stores the solvents before blending them with the waste oil. The blending operation constitutes hazardous waste treatment.

The waste-derived fuel that C sells remains subject to regulation as a hazardous waste because it contains hazardous waste chlorinated solvents that have little fuel value. (The heating values of these solvents are even lower than wood.) Consequently, these waste-derived fuels must travel with a manifest, be transported by a Part 263 transporter, and be sent to Subtitle C facilities. Distributors handling these wastes are RCRA storage facilities, and are subject to manifesting requirements when they initiate shipments to ultimate users. The

---

[5] Burning a material listed in 40 CFR 261.33 in a manner that does not constitute legitimate recycling is a means of discarding them (see 40 CFR 261.2(c)(2) (definition of "discarded")). These materials consequently can be hazardous wastes when burned.

[6] The National Bureau of Standards has sampled No. 6 residual fuel oil—the lowest grade commercial fuel oil—and found the samples to contain only 31 ppm total chlorine. National Bureau of Standards, *Trace Elements in Fuel Oil* (February, 1982).

[7] Automotive oils do not typically come into contact with solvents when used. Industrial oils may, but usual practice is simply to collect used oils and spent solvents, mix them, and to ship the mixed wastes to waste management facilities. The solvents thus are present in this type of mixture as a separate hazardous waste stream.

[8] It should be noted that small quantity generators who send wastes that cannot be recycled legitimately to a recycler (such as a fuel blender) are not in compliance with the terms of the small quantity generator exemption unless the recycler is already a Subtitle C facility, or is authorized by a State to manage municipal or industrial solid waste. If a small quantity generator waste is sent to a non-conforming facility (*i.e.*, a facility that does not satisfy the requirements of § 261.5(g)), the waste remains subject to regulation.

[9] See § 261.6(b). It should be noted that not all of these facilities may be eligible for interim status, either because they were not in existence on November 19, 1980, or because they failed to notify the Agency of their activities or failed to submit a Part A permit application. Although the Agency cannot confer interim status on statutorily ineligible facilities, we have indicated that "we are prepared to exercise our enforcement discretion to allow such facilities to continue operating . . . where their continued operation would be in the public interest." (45 FR 76633 (November 25, 1980), interpreting statutory interim status requirements.) Means of exercising this discretion include our issuing an interim status compliance letter to the facility, or allowing the facility to operate pursuant to a Section 3008 compliance order (*id.*) pursuant to 40 CFR Part 122.22(a)(3).

persons who ultimately burn the fuel technically are hazardous waste incinerator facilities.

3. Company D generates waste oil and a variety of low energy spent chlorinated solvents that are listed hazardous wastes. D mixes the spent solvents with the waste oil and sends the mixture of a fuel blending facility, E, which processes the waste oil, and mixes it with virgin fuel oil. E then sells the blended mixture as a fuel.

D is a generator, operates a hazardous waste treatment facility, and also may be a storage facility it if accumulates the spent solvents for over 90 days.

Ordinarily the mixture of spent solvents and waste oil that D generates remains a hazardous waste, for the same reason as in the previous example. The fact that D is a generator rather than a fuel blender makes no difference. D is still blending hazardous wastes with *de minimis* fuel value into fuels. Any burning of such wastes is not legitimate recycling. The blended fuel consequently remains subject to regulation as a hazardous waste in the fuel blender's (E's) hands and in the hands of the ultimate users (as well as intervening distributors). The ultimate burning of the blended fuel constitutes incineration.

APPENDIX A.—LOW ENERGY HAZARDOUS CONSTITUENTS LISTED IN 40 CFR 261, APPENDIX VIII

Hazardous constituent	Higher heating value (Btus/lb.)
Tribromomethane	234
Tetrachloromethane	432
Hexachloroethane	827
Dibromomethane	869
Pentachloroethane	953
Hexachloropropene	1,259
Chloroform	1,349
Cyanogen bromide	1,457
Trichloromethanethiol	1,475
Hexachlorocyclopentadiene	2,015
Tetrachloroethene (Tetrachloroethylene)	2,141
Cyanogen chloride	2,320
Iodomethane	2,410
Tetrachloroethane, N.O.S.	2,500
1,1,1,2-Tetrachloroethane	2,500
1,1,2,2-Tetrachloroethane	2,500
1,2-Dibromomethane	2,572
1,2-Dibromo-3-chloropropane	2,662
Pentachlorobenzene	2,914
Bromomethane	3,058
Dichloromethane	3,058
Trichloroethene (Trichloroethylene)	3,130
Hexachlorobenzene	3,220
Bis (chloromethly) ether	3,544
1,1,1-Trichloroethane	3,560
1,1,2-Trichloroethane	3,560
Pentachlorobenzene	3,698
Pentachlorophenol	3,760
Hexachlorocyclopentadiene	3,778
Hexachlorocyclohexane	3,813
Kepone	3,867
2,3,4,6-Tetrachlorophenol	4,011
Dichlorophenylarsine	4,155
Endosulfan	4,191
1,2,4,5-Tetrachlorobenzene	4,695
Bromoacetone	4,786
Dichloroethylene, N.O.S.	4,857
1,1-Dichloroethylene	4,857
Vinylidene chloride	4,857
Chlordane	4,875
Heptachlor epoxide	4,875
Phenylmercury acetate	4,875
Acetyl chloride	4,969
Trichloropropane, N.O.S.	5,066
1,2,3-Trichloropropane	5,066
Dichloropropanol, N.O.S.	5,109
Dimethyl sulfate	5,146

[FR Doc. 83-6797 Filed 3-15-83; 8:45 am]
BILLING CODE 6560-50-M

[OPP 100003; PH-FRL 2219-5]

Export Notification; Disclosure of Confidential Business Information to Congress

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Subcommittee on Labor Standards of the Committee on Education and Labor of the House of Representatives has requested information from EPA concerning notification of the export of unregistered pesticides under section 17(a) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). To comply with this request, EPA will provide copies of purchaser acknowledgment statements submitted under section 17(a) of FIFRA. Some of the information contained in these documents has been claimed as confidential by the exporters.

DATE: These documents will be provided to the subcommittee no sooner than March 28, 1983.

FOR FURTHER INFORMATION CONTACT: Catleen McInerney, Office of International Activities (A–106), Environmental Protection Agency, Rm. W–811, 401 M St. SW., Washington, D.C. 20460 (202–382–4889), Outside the USA: (Operator–202–382–4889).

SUPPLEMENTARY INFORMATION: In a February 10, 1983 letter to EPA, the Chairman of the Subcommittee on Labor Standards of the House Committee on Education and Labor stated that there is underway an inquiry into the sale abroad of pesticides, devices, active ingredients or chemicals whose sale or use is prohibited within the United States. As part of the inquiry, the Chairman requested a copy of each notice filed with the EPA to comply with section 17(a) of FIFRA. All documents filed from the effective date of the 1978 FIFRA legislation to the present were requested.

Under section 17(a) of FIFRA, exporters of unregistered pesticides are required to obtain a statement by the foreign purchaser acknowledging that the pesticide in question is not registered for use in the United States and cannot be sold in the United States. Under EPA's policy statement implementing the requirements of section 17(a), the exporter is required to submit the acknowledgment statement to EPA together with a certification that shipment did not occur prior to receipt of the acknowledgment statement. EPA then provides a copy of the acknowledgment statement to the government of the importing country.

The documents which EPA will providing the Subcommittee may contain confidential business information. Exporters have been given the opportunity to claim information confidential in the notices submitted to EPA under section 17(a) of FIFRA and have made such claims. Pursuant to 40 CFR 2.209(b), which applies to information submitted under FIFRA by 40 CFR 2.307(h), EPA must provide confidential business information to a Congressional subcommittee in response to a written request by the Chairman. Before providing the information, EPA is required by 40 CFR 2.209(b) to notify the submitters of the information at least 10 days in advance of disclosure.

This is a notice under 40 CFR 2.209(b) to all exporters who have submitted notices under section 17(a) of FIFRA that EPA will provide the requested information to the Subcommittee no sooner than 10 days after publication of this notice. The Agency will identify any information that is subject to a confidentiality claim and will inform the Subcommittee of the provisions of section 10(f) of FIFRA which set criminal penalties for unlawful disclosure of confidential business information under FIFRA.

Dated: March 3, 1983.

John A. Todhunter,

Assistant Administrator for Pesticides and Toxic Substances.

BILLING CODE [illegible]

[PF-311, PH-FRL 2321-5]

Certain Companies; Pesticide, Food, and Feed Additive Petitions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received pesticide, food, and feed additive petitions relating to the establishment and/or amendments of tolerances for residues of certain pesticide chemicals in or on certain commodities.

ADDRESS: Written comments to the product manager (PM) cited in each petition at the address below: Registration Division TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Written comments may be submitted while the petitions are pending before the Agency. The comments are to be identified by the document control number [PF-311] and the petition number. All written comments filed in response to this notice will be available for public inspection in the product manager's office from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: The product manager cited in each petition at the telephone number provided.

SUPPLEMENTARY INFORMATION: EPA gives notice that the Agency has received the following pesticide, food, and feed additive petitions relating to the establishment and/or amendments of tolerances for residues of certain pesticide chemicals in or on certain commodities in accordance with the Federal Food, Drug, and Cosmetic Act. The analytical method for determining residues, where required, is given in each petition.

A. Initial Filing

1. *PP 3F2798.* Albany International Corp., 110 A St., Needham Heights, MA 02194. Proposes amending 40 CFR Part 180 by establishing an exemption from the requirements of a tolerance for residues of the insecticides plant volatiles: cyclic dexadiene, cyclic decene, cyclic pentadecatriene, and decatriene when used with grandlure: (1R-cis)-1-methyl-2-(1-methylethenyl) cyclobutaneethanol; (*Z*)-2-(3,3,-dimethylcyclohexylidene)ethanol, (*Z*)-(3,3-dimethylcyclohexylidene) acetaldehyde; and (*E*)-(3,3-dimethylcyclohexylidene)acetaldehyde as a barrier zone to control boll weevils in or on cotton. (PM-17, Franklin Gee, 703–557–2690).

2. *PP 9F2252.* Mobay Chemical Corp., PO Box 4913 Hawthorn Road., Kansas City, MO 64120. Proposes amending 40 CFR 180.349 by establishing tolerances for the combined residues of the nematocide ethyl 3-methyl-4-(methylthio)phenyl (1-methylethyl)-phosphoramidate and its cholinesterase-inhibiting metabolites ethyl 3-methyl-4-(methylsulfinyl)phenyl (1-methylethyl)phosphoramidate, ethyl 3-methyl-4-(methylsulfonyl)phenyl (1-methylethyl)-phosphoramidate, ethyl 3-methyl-4-(methylthio)phenyl phosphoramidate, ethyl-4-(methylsulfinyl)phenyl phosphoramidate, and ethyl 3-methyl-4-(methylsulfonyl)phenyl phosphoramidate in or on the commodities meat, fat, and meat by products of cattle, goats, hogs, horses, and sheep at 0.05 ppm and milk at 0.002 or 0.01 ppm. The proposed analytical method for determining residues is gas chromatography using a thermionic flame ionization detector. (PM–21, Henry Jacoby, 703–557–1900).

3. *FAP 9H5236.* Mobay Chemical Corp. Proposes amending 21 CFR 561.232 by establishing a regulation permitting the combined residues of the nematocide ethyl 3-methyl-4-(methylthio)phenyl (l-methylethyl) phosphoramidate and its cholinesterase-inhibiting metabolites ethyl 3-methyl-4-(methylsulfinyl)phenyl (1-methylethyl)phosphoramidate and ethyl 3-methyl-4-(methylsulfonyl)phenyl (1-methylethyl)phosphoramidate in or on the commodity dried apple pomace at 5.0 ppm. (PM–21, Henry Jacoby, 703–557–1900).

4. *FAP 3H5385.* ICI Americas, Inc., Wilmington, DE 19897. Proposes amending 21 CFR Part 193 by establishing a regulation permitting residues of the herbicide (±)-2-[4-[[5-(trifluoromethyl)-2-pyridinyl]oxy]phenoxy]propanioc acid (fluazifop), both free and conjugated, and of (±)-butyl 2[4-[[5-(trifluoromethyl)-2-pyridinyl]oxy]phenoxy]propanoate (fluazifop-butyl), all expressed as fluazifop, in or on the commodities soybean oil at 2 ppm and cottonseed oil at 0.2 ppm. (PM–23, Richard Mountfort, 703–557–1830).

4. *FAP 3H5385.* ICI America, Inc. Proposes amending 21 CFR Part 561 by establishing a regulation permitting residues of the herbicide (±)-2-[4-[[5-(trifluoromethyl)-2-pyridinyl]oxy]phenoxy]propanioc acid (fluazifop), both free and conjugated, and of (±)-butyl 2[4-[[5-(trifluoromethyl)-2-Pyridinyl]oxy]phenoxy]propanoate (fluazifop-butyl), all expressed as fluazifop, in or on the commodities soybean soapstock and soybean meal at 2 ppm and cotton seed soapstock at 0.2 ppm. (PM–23, Richard Mountfort, 703–557–1830).

6. *FAP 3H5383.* McLaughlin Gormley King Co., 8810 10th Ave., N. Minneapolis, MN 55427. Proposes amending 21 CFR Part 193 by establishing a regulation permitting residues of the insecticide cyano (3-phenoxyphenyl) methyl 4-chloro-alpha-(1-methylethyl) benzeneacetate as an indirect food additive when present in food items resulting from the use of the insecticide in food service, food manufacturing and/or food processing, and food warehousing establishments at 0.5 ppm (PM–17, Franklin Gee, 703–557–2690).

7. *PP 2F2761.* Sherex Chemical Co., Inc., 5777 Frantz Road., PO Box 646, Dublin, OH 43017. Proposes amending 40 CFR Part 180 by establishing an exemption from the requirements of a tolerance for residues of the insecticide poly(oxy-1,2-ethanediyl), alpha-isooctadecyl-omega-hydroxy in fish, shellfish, irrigated crops, meat, milk, poultry and eggs when used in accordance with good agricultural practice as a mosquito control agent in aquatic sites. (PM–16, William Miller, 703–557–2600).

B. Amended Petitions

1. *FAP 6H5149.* Mobay Chemical Corp., PO Box 4913, Hawthorn Road, Kansas City, MO 64120. EPA issued a notice published in the **Federal Register** of October 19, 1976 (41 FR 46020) that announced the Mobay Chemical Corp. had submitted feed additive petition 6H5149 to the Agency proposing to amend 21 CFR 561.232 by establishing a regulation permitting the use of the nematocide ethyl 3-methyl-4-

(methlythio)phenyl) (1-methylethly)phosphoramidate with a tolerance limitation of 1.0 part per million (ppm) for residues of the pesticide and its cholinesterase-inhibiting metabolites in pineapple bran and cannery waste resulting from the pesticide's application to the growing crop.

The Mobay Chemical Corporation has amended the petition as follows:

(1) Adding the metabolites ethyl 3-methyl-4-(methylsulfinyl)-phenyl (a-methylethyl) phosphoramidate and ethyl 3-methyl-4-(methylsulfonyl) phenyl (1-methylethyl) phosphoramidate.

(2) Deleting pineapple bran and cannery waste at 1.0 ppm and establishing a regulation for pineapple bran at 3.0 ppm. (PM–21, Henry Jacoby, 703–557–1900).

2. *PP 6F1864.* Mobay Chemical Corp. EPA issued a notice published in the **Federal Register** of October 19, 1976 (41 FR 46020) that announced that Mobay Chemical Corp. had submitted pesticide petition 6F1864 to the Agency proposing to amend 40 CFR 180.349 by establishing tolerances for the combined residues of the nematocide ethyl 3-methyl-4-(methylthio)phenyl) (1-methylethyl) phosphoramidate and its cholinesterase-inhibiting metabolities in or on the raw agricultural commodities pineapples at 0.04 ppm and pineapple foliage at 1.0 ppm.

The Mobay Chemical Corporation has amended the petition as follows:

(1) Adding the metabolites ethyl 3-methyl-4-(methylsulfinyl)-phynyl (1-methylethyl) phosphoramidate and ethyl 3-methyl-4-(methylsulfonyl) phenyl (1-methylethyl) phosphoramidate.

(2) Deleting pineapples at 0.04 ppm and pineapple foliage at 1.0 ppm and by establishing a tolerance for pineapple fruit (fresh) at 0.3 ppm. The proposed analytical method for determining residues is gas chromatography using a thermionic flame ionization detector. (PM–21, Henry Jacoby, 703–557–1900).

3. *PP 9F2252.* Mobay Chemical Corp, EPA issued a notice published in the **Federal Register** of October 2, 1979 (44 FR 56737) which announced that the Mobay Chemical Corp. had filed a pesticide petition (9F2252) with the Agency. The petition proposed that 40 CFR 180.349 be amended by establishing tolerances for the combined residues of the nematocide ethyl 3-methyl-4-(methylthio)phenyl. (1-methylethyl) phosphoramidate and its cholinesterase-inhibiting metabolites as mentioned in item 2. (1) above in or on the commodities apples, cherries, and peaches at 0.02 ppm. The petitioner subsequently amended the petition (47 FR 46756, Octoberr 20, 1982) by increasing tolerances for cherries and peaches from 0.02 ppm to .2 ppm.

The petitioner has submitted a second amendment proposing to increase tolerances on cherries and peaches from .2 ppm to 0.25 ppm and apples from .02 ppm to 0.25 ppm. The proposed analytical method for determining residues is gas chromatography using a thermionic flame ionization detector. PM–21, Henry Jacoby, 703–557–1900).

(Sec. 408(d)(1), 68 Stat. 512 (7 U.S.C. 136))
(Sec. 409(b)(5), 72 Stat. 1786 (21 U.S.C. 348))

Dated: March 14, 1983

BILLING CODE 6560-50-M

[[OPP-30223A] PHJ-FRL 2321-6)

FMC Corp.; Application to Conditionally Register a Pesticide Product Containing a New Active Ingredient; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice corrects the proposed classification/use of the application submitted by the FMC Corp., to conditionally register the pesticide product Ammo 2.5 EC Insecticide containing an active ingredient not included in any previously registered pesticide product pursuant to the provisions of section 3(c)(4) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended.

ADDRESS: Written comments, identified by the document control number [OPP–30223A] and the file symbol, should be submitted to: Franklin D. R. Gee, Product Manager (PM) 17, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 207, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: Franklin D. R. Gee (703–557–2690).

SUPPLEMENTARY INFORMATION: In FR Doc. 82–33734 of December 15, 1982 appearing at page 56175, EPA announced that FMC Corp 2000 Market St., Philadelphia, PA 19103, had submitted an application to conditionally register the pesticide product Ammo 2.5 EC Insecticide, File Symbol 279–GNET an insecticide containing 30.6 percent of the active ingredient (—) cyano (3-phenoxphenyl)methyl (—) *cis trans* 3-(2,2-dichloroethenyl)-2,2 dimethylcyclopropane, an active ingredient not included in any previously registered product.

Under item 8, page 56176, first column, the proposed classification/use starting on the seventh line, is corrected to read from "general use for formulating use only" to "restricted for use on cotton".

Notice of approval or denial of an application to register a pesticide product will be announced in the **Federal Register.** Except for such material protected by section 10 of FIFRA, the test data and other scientific information deemed relevant to the registration decision may be made available after approval under the provisions of the Freedom of Information Act. the procedure for requesting such data will be given in the **Federal Register** if an application is approved.

Comments received within the specified time period will be considered before a final decision is made; comments received after the time specified will be considered only to the extent possible without delaying processing of the application.

Written comments filed pursuant to this notice, will be available in the product manager's office from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays. It is suggested that persons interested in reviewing the application file is available on the date of intended visit.

(Sec. 3(c)(4) of FIFRA, as amended)

Dated: March 4, 1983.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560-50-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

[Docket FEMA-REP-1-MA-3]

Massachusetts Radiological Emergency Response Plan for Vermont Yankee

AGENCY: Federal Emergency Management Agency.

ACTION: Notice of receipt of plan.

SUMMARY: For continued operation of nuclear power plants, the Nuclear Regulatory Commission requires approved licensee and State and local governments' radiological emergency response plans. Since FEMA has a responsibility for reviewing the State and local government off-site plans, the Commonwealth of Massachusetts, by letter of transmittal dated February 18,

1983, has formally submitted radiological emergency plans to the FEMA Region I Office. These plans support Vermont Yankee Nuclear Power Station located in Vernon, VT.

DATE: Plans received June 16, 1981 through February 2, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. David M. Sparks, Regional Director, FEMA, Region I, Room 442, John W. McCormack Post Office and Courthouse Building, Boston, MA 02109, 617–223–4741.

SUPPLEMENTARY INFORMATION: In support of the Federal requirement for emergency response plans, FEMA has proposed a Rule describing its procedures for review and approval of State and local governments' radiological emergency response plans. Pursuant to this proposed FEMA rule (44 CFR 350.8), "Review and Approval of State Radiological Emergency Plans and Preparedness," 45 FR 42341, the State Radiological Emergency Plan for the Commonwealth of Massachusetts was received by the Federal Emergency Management Agency Region I Office.

Included are plans for local governments which are wholly or partially within the plume exposure pathway emergency planning zone for the Vermont Yankee Nuclear Power Station: Bernardston, Colrain, Gill, Greenfield, Leyden, Northfield, and Warwick.

Copies of the plan are available for review at the FEMA Region I Technological Hazards Office, Room 462, John W. McCormack Post Office and Courhouse Bldg., Boston, MA 02109. Copies will be made available upon request in accordance with the fee schedule for FEMA Freedom of Information Act requests, as set out in Subpart C of 44 CFR Part 5.

Copies of the plan are also available from the Commonwealth of Massachusetts Civil Defense Agency and Office of Emergency Preparedness, 400 Worcester Road, Framingham, Massachusetts 01701.

Comments on the plan may be submitted in writing to Mr. David M. Sparks, Regional Director, at the above address within 30 days of this Federal Register Notice.

A public meeting was held in connection with the plant in accordance with FEMA proposed Rule 44 CFR 350.10. On May 20, 1982 the public meeting in connection with Vermont Yankee was held in Vernon, Vermont.

David M. Sparks,

Regional Director.

March 4, 1983.

[Docket FEMA-REP-1-MA-2]

Massachusetts Radiological Emergency Response Plan for Yankee at Rowe

AGENCY: Federal Emergency Management Agency.

ACTION: Notice of Receipt of Plan.

SUMMARY: For continued operation of nuclear power plants, the Nuclear Regulatory Commission (NRC) requires approved licensee and State and local governments' radiological emergency response plans. Since FEMA has a responsibility for reviewing the State and local government off-site plans, the Commonwealth of Massachusetts, by letter of transmittal dated February 18, 1983 has formally submitted radiological emergency plans to the FEMA Region I Office. These plans support the Yankee Nuclear Power Station located in Rowe, MA.

DATE: Plans received: June 16, 1981 through February 2, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. David M. Sparks, Regional Director, FEMA, Region I, Room 442, John W. McCormack Post Office and Courthouse Building, Boston, MA 02109, 617–223–4741.

SUPPLEMENTARY INFORMATION: In support of the Federal requirement for emergency response plans, FEMA has proposed a Rule describing its procedures for review and approval of State and local governments' radiological emergency response plans. Pursuant to this proposed FEMA rule (44 CFR 350.8), "Review and Approval of State Radiological Emergency Plans and Preparedness," 45 FR 42341, the State Radiological Emergency Plan for the Commonwealth of Massachusetts was received by the Federal Emergency Management Agency Region I Office.

Included are plans for local governments which are wholly or partially within the plume exposure pathway emergency planning zone of the nuclear power station: Buckland, Charlemont, Clarksburg, Colrain, Florida, Hawley, Heath, Monroe, North Adams, Savoy, Rowe.

Copies of the plan are available for review at the FEMA Region I, Technological Hazards Office, Room 462, John W. McCormack Post Office and Courthouse Bldg., Boston, MA 02109. Copies will be made available upon request in accordance with the fee schedule for FEMA Freedom of Information Act requests, as set out in Subpart C of 44 CFR Part 5.

Copies of the plan are also available from the Commonwealth of Massachusetts Civil Defense Agency and Office of Emergency Preparedness, 400 Worchester Road, Framingham, Massachusetts 01701.

Comments on the plan may be submitted in writing to Mr. David M. Sparks, Regional Director, at the above address within 30 days of this Federal Register Notice.

A public meeting was held in connection with the plant in accordance with FEMA proposed Rule 44 CFR 350.10. On June 23, 1982, the public meeting in connection with the Yankee Nuclear Power Station was held in Rowe, MA.

David M. Sparks,

Regional Director.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Bank Holding Companies; Proposed de Novo Nonbank Activities; Old Stone Corp.

The organizations identified in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 255.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to these applications, interested persons may express their views on the question whether consummation of the proposal can "reasonably expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." Any comment that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated. Comments and requests for hearing should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than the date indicated.

A. **Federal Reserve Bank of Boston** (Richard E. Randall, Vice President) 600 Atlantic Avenue, Boston, Massachusetts 02106:

1. *Old Stone Corporation*, Providence, Rhode Island (mortgage banking and insurance agency activities; Georgia): To engage through a new office of its subsidiary, DAC Corporation of Georgia, in the origination, sale and servicing of first and second mortgage loans, the sale of credit life and credit health and accident insurance offered in connection with extensions of credit, which insurance would be reinsured by an affiliate, Motor Life Insurance Company, Jacksonville, Florida; and the sale of casualty insurance in connection with extensions of credit by DAC Corporation of Georgia through American Standard Insurance Agency. The sale of casualty insurance in connection with the extensions of credit by DAC Corporation of Georgia is grandfathered under Section 601(D) of the Garn-St. Germain Depository Institutions Act and was approved on February 13, 1981. These activities would be conducted from a new office in Decatur, Georgia, serving the city of Decatur and the greater metropolitan area of Atlanta, Georgia. Comments on this application must be received not later than April 11, 1983.

B. **Federal Reserve Bank of Minneapolis** (Bruce J. Hedblom, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Northwest Bancorporation*, Minneapolis, Minnesota (financing and insurance activities; California): To engage, through its subsidiary Dial Finance Company of California, in the activities of consumer and commercial finance, and the sale of credit life, credit accident and health, and property and casualty insurance, directly related to extensions of credit by said subsidiary. Northwest Bancorporation secured approval to engage in insurance activities by Board Order of July 21, 1959. Financing activities were approved by Board Order dated July 27, 1982, pursuant to applications of Northwest Bancorporation pending before the Board as of May 1, 1982, thereby rendering same permissible activities in conformance with Section 601(D) of the Garn-St. Germain Depository Institutions Act of 1982. These activities would be conducted from an office located in Brea, California, serving Brea and other nearby suburbs of Los Angeles, California, to Brea, California. Comments on this application must be received not later than April 6, 1983.

c. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *United Banks of Colorado, Inc.*, ("UBC"), Denver, Colorado (credit-related insurance activities; Colorado): To engage, through its subsidiary, Lincoln Agency, Inc., in offering credit life and credit health and accident insurance directly related to extensions of credit by UBC's subsidiary, United Financial Centers, Inc., in conformance with Section 225.4(a)(g) of Regulation Y, and as strictly limited by Title VI of the

Garn-St. Germain Depository Institutions Act of 1982. UBC and its subsidiary Lincoln Agency were authorized to engage in such activities by Board Order of February 1, 1988. These activities would be conducted from an office located in Aurora, Colorado, serving the southeastern portion of Arapahoe County, Colorado, the City of Aurora, and the contiguous northeastern portion of Douglas County, Colorado, and an office located in Northglenn, Colorado, serving Adams County and contiguous portions of Denver and Boulder Counties, Colorado. Comments on this application must be received not later than April 8, 1983.

Board of Governors of the Federal Reserve System, March 11, 1983.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 83-6799 Filed 3-15-83; 8:45 am]

BILLING CODE 6210-01-M

Formation of Bank Holding Company; Larchmont Bancorp.

The company listed in this notice has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring voting shares or assets of a bank. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated. With respect to the application, interested persons may express their views in writing to the address indicated. Any comment on the application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. Federal Reserve Bank of San Francisco (Harry W. Green, Vice President), 400 Sansome Street, San Francisco, California 94120:

1. *Larchmont Bancorp*, Los Angeles, California; to become a bank holding company by acquiring 100 percent of the voting shares of Larchmont National Bank, Los Angeles, California, a *de novo* bank. Comments on this application must be received not later than April 11, 1983.

Board of Governors of the Federal Reserve System, March 10, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

Medicaid Program; Hearing; Reconsideration of Disapproval of Wisconsin State Plan Amendment

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Notice of hearing.

SUMMARY: This notice announces an administrative hearing on May 3, 1983 in Chicago, Illinois to reconsider our decision to disapprove Wisconsin State Plan Amendment 82-0108.

Closing date: Request to participate in the hearing as a party must be received by 15 days after publication.

FOR FURTHER INFORMATION CONTACT: Docket Clerk, Bureau of Eligibility, Reimbursement and Coverage, G-20 East High Rise, 6325 Security Boulevard, Baltimore, Maryland 21207, Telephone: (301) 594-8261.

SUPPLEMENTARY INFORMATION: This notice announces an administrative hearing to reconsider our decision to disapprove a Wisconsin State Plan Amendment.

Section 1116 of the Social Security Act and 45 CFR Parts 201 and 213 establish Department procedures that provide an administrative hearing for reconsideration of a denial of a State plan or plan amendment. HCFA is required to publish a copy of the notice to a State Medicaid agency that informs the agency of the time and place of the hearing and the issues to be considered. (If we subsequently notify the agency of additional issues which will be considered at the hearing, we will also publish that notice.)

Any individual or group that wants to participate in the hearing as a party must petition the Hearing Officer within 15 days after publication of this notice, in accordance with additional requirements contained in 45 CFR 213.15(b)(2). Any interested person or organization that wants to participate as amicus curiae must petition the Hearing Officer before the hearing begins, in accordance with additional requirements contained in 45 CFR 213.15(c)(1).

If the hearing is later rescheduled, the Hearing Officer will notify all participants.

The issues in this matter relate to Wisconsin's proposal to exempt from Medicaid copayment requirements the following groups: inpatients of skilled nursing facilities and intermediate care facilities, children in foster care or subsidized adoption arrangements and members of health maintenance organizations. The Health Care Financing Administation disapproved this amendment because it did not include all of the groups required by law to be exempted from copayments. In addition, the copayment exemption on services furnished to children in foster care or subsidized adoptions would violate comparability provisions of section 1902(a)(10) of the Social Security Act and implementing regulations at 42 CFR 440.240, in that some but not all children under 18 would be exempt from the copayment requirements.

The notice to Wisconsin announcing an administrative hearing to reconsider our disapproval of its state plan amendment reads as follows:

Ms. Linda Reivitz
Secretary, Department of Health and Social Services, 1 West Wilson Street, Madison, Wisconsin 53701

Dear Ms. Reivitz: This is in reference to your request for reconsideration of the decision to disapprove Wisconsin State Plan Amendment 82-0108. You have requested a reconsideration of whether the proposal to exempt from copayment requirements inpatients of skilled nursing facilities and intermediate care facilities, children in foster care or subsidized adoption arrangements and members of health maintenance organizations, conforms to the requirements for approval under the Social Security Act and pertinent Federal requirements.

I am scheduling a hearing on your request to be held on May 3, 1983, at 10:00 a.m. in the 8th Floor Conference Room, 175 West Jackson Boulevard, Chicago, Illinois. If this date is not acceptable, we would be glad to set another date that is mutually agreeable to the parties.

I am designating Mr. Albert Miller as the presiding official. If these arrangements present any problems, please contact the Docket Clerk. In order to facilitate any communication which may be necessary between the parties to the hearing, please notify the Docket Clerk of the names of the individuals who will represent the State at the hearing. The Docket Clerk can be reached on (301) 594-8261.

Sincerely yours,

Carolyne K. Davis, *Ph. D.*

(Sec. 1116 of the Social Security Act (42 U.S.C. 1316))

(Catalog or Federal Domestic Assistance Program No. 13.714, Medical Assistance Program)

Dated: March 9, 1983.

Carolyne K. Davis,

Administrator, Health Care Financing Administration.

BILLING CODE 4120-03-M

Health Resources and Services Administration

Application Announcement for Grants for the Training of Allied Health Personnel in Health Promotion and Disease Prevention

The Bureau of Health Professions, Health Resources and Services Administration, announces that applications for Fiscal Year 1983, Grants for the Training of Allied Health Personnel in Health Promotion and Disease Prevention are being accepted under the authority of Section 788(b) of the Public Health Service Act, as amended.

Grants will be awarded to develop new courses and training experiences within selected allied health professional education programs to prepare allied health personnel for appropriate expanded roles in health promotion and disease prevention.

These grants are intended to further the professional preparation of personnel in those allied health occupations that have a significant opportunity to apply relevant principles of health promotion and disease prevention with reference to the 15 priority areas identified in the Surgeon General's Report: *Promoting Health/ Preventing Disease: Objectives for the Nation,* Fall 1980. (The report, stock number 017-001-00435-9, may be obtained from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, price $5.00). The 15 priority areas are: high blood pressure control; family planning; pregnancy and infant health; immunization; sexually transmitted diseases; toxic agent control; occupational safety and health; accident prevention and injury control; fluoridation and dental health; surveillance and control of infectious diseases; smoking and health; misuse of alcohol and drugs; nutrition; physical fitness and exercise; and control of stress and violent behavior.

These grants will provide support to educational institutions that are prepared to incorporate health promotion and disease prevention training components into their professional or technical curricula.[1] Such training centers would receive support to:

a. Develop faculty for teaching health promotion and disease prevention;

b. Develop curriculum modules, where they are currently unavailable, for use in basic professional education of allied health professions students;

c. Develop training materials for the continuing education of practicing allied health professionals; and

d. Conduct awareness training for other faculty and outside personnel to foster the principles of health promotion and disease prevention.

Any health profession, allied health profession, or nurse training institution or any other public or private nonprofit entity is eligible to apply for grants under the broad authority of Section 788(b) of the PHS Act. However, applications for this grant program will be accepted only from those public or private nonprofit entities that meet the definition of "training center for allied health professions," stated below and are located in the United States, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, or the Trust Territory of the Pacific Islands.

"Training center for allied health professions" or "center" means a junior college, college, or university which:

a. Provides educational programs leading to an associate, baccalaureate, or higher degree needed to practice as one of the following:

Doctoral Degree:
- Clinical Phychologist

Master's Degree:
- Speech Pathologist/Audiologist

Bachelor's Degree:
- Dental Hygienist
- Dietitian (coordinated under graduate program)
- Community Health Educator
- Health Services Administrator
- Medical Records Administrator
- Medical Technologist
- Occupational Therapist
- Physical Therapist
- Primary Care Physician Assistant
- Sanitarian (Environmental Health)

Associate Degree:
- Clinical Dietetic Technician
- Cytotechnologist
- Dental Assistant
- Dental Hygienist
- Dental Laboratory Technician
- Medical Assistant
- Medical Laboratory Technician
- Medical Records Technician
- Occupational Therapy Assistant
- Ophthalmic Medical Assistant
- Optometric Technician
- Physical Therapy Assistant
- Radiologic Technologist
- Respiratory Therapist
- Sanitarian Technician

b. Provides training for no fewer than 20 persons in the substantive health portion, including clinical experience as required for employment, in three or more of the disciplines listed in paragraph (a) of this definition, and has a minimum of six full-time students in that portion of each curriculum by October 15 of the fiscal year of application.

c. Has a teaching hospital as part of the grantee institution or is affiliated with a teaching hospital by means of a formal written agreement as defined in the program guide. The term "teaching hospital" includes other settings which provide clinical or other health services if they fulfill the requirements for clinical experience specified in an allied health curriculum.

d. Is accredited institutionally and programmatically (if programmatic accreditation is required for graduates to be licensed or certified) by a recognized body or bodies approved for this purpose by the Secretary of Education or provides assurance satisfactory to the Secretary from the appropriate accrediting body that reasonable progress is being made toward accreditation; and

e. Has a single administrative unit with an identified budget and faculty which is responible for:

(1) All allied health education programs offered by the center;

(2) Allied health curriculum development;

(3) Allied health student recruitment and counseling;

(4) Development of appropriate clinical affiliations;

(5) Placement of students for the clinical portion of the program; and

(6) Standards of student performance in technical portions of the program.

f. In meeting the requirements specified in parts (a) and (b) above, counts only students enrolled in the professional or technical portion at the academic level specified in the designated professions and occupations.

In determining the order of funding of competitive applications which have been recommended for approval, funding preference will be given to applications which specifically address and meet either or both of the program priorities listed below, thus, improving their competitive advantage. Meeting both program priorities will further improve this advantage. Applications which do not address one or the other of these program priorities will be

[1] Note: Support should not be sought to develop or supplement training in professions predominately focused on applying principles of Health Promotion and Disease Prevention (e.g. Environmental Sanitation or Community Health Education).

reviewed and given consideration for funding.

a. Preference will be given to applications which propose multidisciplinary training [2] in three or more allied health occupations for which the applicant can clearly demonstate that the providers in their practices will have significant opportunities to influence treatment options and/or patient behavior through direct personal intervention to meet individual patient/client needs.

b. Preference will be given to those applications which provide for a combination of at least three of the educational functions described above under functions to be supported. In all such combinations, however, one of the functions selected must be faculty development.

Request for application materials and questions regarding grants policy should be directed to: Mrs. Mary Allen, Grants Management Branch, Bureau of Health Professions, Health Resources and Services Administration, 3700 East-West Highway, Room 4–27, Hyattsville, Maryland 20782; Telephone (301) 436–7360. If this number is not in service, call (301) 443–6857.

Should additional programmatic information be required, please contact: Mr. Theodore Carp, Associated Health Professions Branch, Division of Associated and Dental Health Professions, Bureau of Health Professions, Health Resources and Services Administration, 3700 East-West Highway, Room 5–27, Hyattsville, Maryland 20782; Telephone (301) 436–6800. If this number is not in service, call (301) 443–6857.

Applications must be received no later than May 2, 1983. Approximately $800,000 is expected to be available in Fiscal Year 1983 for competitive awards.

This is a new program and is not listed in the *Catalog of Federal Domestic Assistance*. Applications submitted in response to this announcement are not subject to review by State and areawide clearinghouses under the procedures in the Office of Management and Budget Circular No. A–95.

Dated: March 10, 1983.

Robert Graham,

Administrator, Assistant Surgeon General.

BILLING CODE 4160–15–M

[2] For purposes of this program, "multidisciplinary training" means education or training directed to three or more allied health professions.

Application Announcement for Grants for Geriatric Education Centers

The Bureau of Health Professions, Health Resources and Services Administration, announces that applications for Fiscal Year 1983 Grants for Geriatric Education Centers are being accepted under the authority of Section 788(b) of the Public Health Service Act, as amended.

Grants will be awarded to support the development of a small number of prototypical regional resources centers focused on strengthening multidisciplinary training of health professionals in geriatric health care. These centers, to be known as Geriatric Education Centers, will be established to facilitate training of medical, osteopathic, dental, optometric, pharmacy, podiatric, nursing and appropriate allied health and public health students and practitioners in the diagnosis, treatment and prevention of the diseases and other health problems of the aged.

Functioning within a defined geographic area, a Geriatric Education Center will provide the health professions educational community within that area such comprehensive services as:

- Conducting faculty training programs to prepare key resource persons in the various health professions schools;
- Providing technical assistance in the design and conduct of appropriate in-service and continuing education programs for practicing health professionals;
- Serving as a clearinghouse of information on multidisciplinary geriatric education programs and instructional resources;
- Providing educational services in support of geriatric training to academic centers, professional associations and State and local health agencies; and
- Assisting health professions schools in the selection, installation, implementation and evaluation of appropriate geriatric course materials and curriculum improvements.

"Multidisciplinary education or training" means a planned and coordinated program of education or training directed to two or more health professions for the purpose of improving their several contributions to a major health care objective.

Any health profession, allied health profession, or nurse training institution, or any public or private nonprofit entity is eligible to apply for a grant. All applicants must be located in the United States, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, or the Trust Territory of the Pacific Islands.

In determining the order of funding of competing applications which have been recommended for approval, a funding preference will be given to applications which address the program priorities listed below. Projects which meet *all* of the elements of the priority statement will receive a funding preference; however, applications which do not address any or all of the program priorities will be reviewed and given consideration for funding.

(1) Projects which are directed to at least three health professions, of which allopathic or osteopathic medicine must, in all instances, be one. The additional two or more professions proposed shall be designated from among the following:

- Dentistry;
- Optometry;
- Pharmacy;
- Podiatry;
- Nursing;
- Appropriate allied health professions;
- Appropriate public or community health specialties.

(2) Projects which provide for a combination of at least two geriatric education activities from among the following:

- Faculty training
- Consultative and other technical assistance in support of undergraduate training (didactic and/or clinical)
- Consultative and other technical assistance in support of in-service and/or continuing education
- Clearinghouse, promotional, and demonstration services.

(3) Projects which provide for a high degree of areawide multidisciplinary collaboration as evidenced by:

(a) Significant current multidisciplinary health care educational activities

(b) Letters of agreement, assurance, or substantial intent between professional schools (or by an academic health science center on their behalf), teaching hospitals, professional associations, and State and local health agencies

(c) Appropriate liaison with contributing disciplines in the social and behavioral sciences; and

(4) Projects which will begin faculty training for six or more persons in the first year of the grant award. Requests for application materials and questions regarding grants policy should be directed to: Mrs. Wilma Johnson (D31), Grants Management Branch, Bureau of Health Professions, Health Resources and Services Administration, 3700 East-

West Highway, Room 4–27, Hyattsville, Maryland 20782; Telephone (301) 436–6098. If this number if not in service, call (301) 443–6960.

Should additional programmatic information be required, please contact: Carol Gleich, Ph.D, Associated Health Professions Branch, Division of Associated and Dental Health Professions, Bureau of Health Professions, Health Resources and Services Administration, 3700 East-West Highway, Room 5–27, Hyattsville, Maryland 20782; Telephone (301) 436–6800. If this number is not in service, call (301) 443–6887.

Applications must be received no later than May 2, 1983. Approximately $900,000 is expected to be available in Fiscal Year 1983 for competing awards.

This is a new program and is not currently listed in the *Catalog of Federal Domestic Assistance*. Applications submitted in response to this announcement are not subject to review by State and areawide clearinghouses under the procedures in the Office of Management and Budget Circular No. A–95.

Dated March 10, 1983.

Robert Graham,

Administrator, Assistant Surgeon General.

BILLING CODE 4160-15-M

National Institutes of Health

Biotechnology Resources Review Committee; Meeting

Pursuant too Pub. L. 92–463, notice is hereby given of the meeting of the Biotechnology Resources Review Committee, Division of Research Resources, April 6, 1983, Conference Room 10, National Institutes of Health, Bethesda, MS 20205.

This meeting will be open to the public April 6, from 8:30 a.m. to approximately 3:00 p.m. for analysis and discussion of current and future needs for support of technologies by the Biotechnology Resources Program and for discussions of the guidelines for Biotechnology Resources Program applications and new areas for grants, particularly to small businesses. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in Sections 552(d) (4) and 552(c) (6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public from approximately 3:00 p.m. to approximately 5:00 p.m. on April 6 for the review, discussion, and evaluation of individual research prospectuses submitted by organizations seeking access to PROPHET System services. These prospectuses and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the prospectuses, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mr. James Augustine, Information Officer, Division of Research Resources, Bldg. 31, Rm. 5B–10, National Institutes of Health, Bethesda, MD 20205, telephone area code 301–496–5545, will provide summaries of meetings and rosters of committee members.

Dr. Charles L. Coulter, Executive Secretary, Biotechnology Resources Review Committee, Division of Research Resources, Bldg. 31, Rm. 5B–41, National Institutes of Health, Bethesda, MD 20205, telephone area code 301–496–5411, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program No. 13.371, Biotechnology Research, National Institutes of Health)

Dated: March 7, 1983.

Betty J. Beveridge,

NIH Committee Management Officer.

BILLING CODE 4140-01-M

Blood Diseases and Resources Advisory Committee; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Blood Diseases and Resources Advisory Committee, National Heart, Lung, and Blood Institute, April 28–29, 1983, National Institutes of Health, Building 31, Conference Room 9, Bethesda, Maryland 20205.

The entire meeting will be open to the public from 9:00 a.m.–5:00 p.m., April 28, 1983, and from 8:30 a.m.–4:30 p.m., April 29, 1983, to discuss the status of the Blood Diseases and Resources program needs and opportunities. Attendance by the public will be limited to space available.

Ms. Terry Bellicha, Chief, Public Inquiries and Reports Branch, National Heart, Lung, and Blood Institute, Building 31, Room 4A31A, National Institutes of Health, Bethesda, Maryland 20205, phone (301) 496–4236, will provide summaries of the meeting and rosters of the committee members.

Dr. Fann Harding, Special Assistant to the Director, Division of Blood Diseases and Resources, National Heart, Lung, and Blood Institute, Federal Building, Room 5A–08, National Institutes of Health, Bethesda, Maryland 20205, phone (301) 496–1817, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program No. 13.839, Blood Diseases and Resources Research, National Institutes of Health)

Dated: March 9, 1983.

BILLING CODE 4140-01-M

Interagency Technical Committee; Meeting

Notice is hereby given of the Meeting of the Interagency Technical Committee (IATC) on Heart, Blood Vessel, Lung, and Blood Diseases and Blood Resources, sponsored by the National Heart, Lung, and Blood Institute on May 4, 1983, from 9:00 a.m. to 12:30 p.m., Building 31, C Wing, Conference Room 10, at the National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20205.

The entire meeting will be open to the public. The Interagency Technical Committee (IATC) is meeting to examine and cordinate Federal research activities that concern heart, blood vessel, lung, and blood diseases and blood resources. This meeting will focus on studies conducted by the Department of Defense on the Coronary Artery Risk Evaluation (CARE) Program, and presentations by physicians from the NIH Clinical Center, National Cancer Institute (NCI), National Institute of Allergy and Infectious Diseases (NIAID), Food and Drug Administration (FDA), Centers for Disease Control (CDC), the National Heart, Lung, and Blood Institute (NHLBI), the Division of Research Resources (DRR), and American Red Cross (ARC), on Acquired Immune Deficiency Syndrome (AIDS). Attendance by the public will be limited to space available.

For detailed program information, a list of meeting participants, and a meeting summary contact: Ms. Janyce Notopoulos, Office of Program Planning and Evaluation, National Heart, Lung, and Blood Institute, Building 31, Room 5A03, 9000 Rockville, Bethesda, Maryland 20205, 301–496–5031.

Dated: March 9, 1983.

National Institute of Neurological and Communicative Disorders and Stroke; Meeting of Ad Hoc Subcommittee on Anticonvulsant Drugs Epilepsy Advisory Committee

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the *ad hoc* Subcommittee on Anticonvulsant Drugs of the Epilepsy Advisory Committee, National Institute of Neurological and Communicative Disorders and Stroke, April 5–6, 1983, Room B119, Federal Building, National Institutes of Health, Bethesda, Maryland 20205.

The meeting will be open to the public on April 5, 1983, from 9:00 a.m. to 12 noon to discuss Branch planning and accomplishments. Attendance by the public will be limited to space available.

In accordance with provisions set forth in Section 552b(c)(4), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on April 5 from 12 noon to adjournment on April 6 for review of preclinical and clinical ADD compounds. This review and discussions could reveal confidential trade secrets or commercial property such as patentable material.

Dr. Roger J. Porter, Chief, Epilepsy Branch, Convulsive, Developmental, and Neuromuscular Disorders Program, NINCDS (Federal Building, Room 114) National Institutes of Health, Bethesda, Maryland 20205; telephone (301) 496–6691, will provide summaries of the meeting, rosters of the committee members and substantive program information.

(Catalog of Federal Domestic Assistance Program No. 13.852, Convulsive, Developmental, and Neuromuscular Disorders Program, National Institutes of Health)

BILLING CODE 4140-01-M

National Cancer Advisory Board Ad Hoc Subcommittee on Program Project Grants; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the National Cancer Advisory Board ad hoc Subcommittee on Program Project Grants, National Cancer Institute, March 29–30, 1983, Brown Palace Hotel, Denver Colorado. The entire meeting will be open to the public on March 29, from 8:00 p.m. to recess; and on March 30, from 9:00 a.m. to adjournment, to discuss the peer review system of program project grant applications.

Mrs. Winifred Lumsden, the Committee Management Officer, National Cancer Institute, Building 31, Room 10A06, National Institutes of Health, Bethesda, Maryland 20205 (301/496–5708) will provide summaries of the meeting and rosters of committee members, upon request.

Dr. William Walter, Executive Secretary, ad hoc Subcommittee on Program Project Grants, National Cancer Institute, Building 31, Room 10A03, National Institutes of Health, Bethesda, Maryland 20205 (301/496–4218) will furnish substantive program information.

This notice is being published less than 15 days prior to the meeting because originally the meeting was to be held at a later date; however, now it will be more cost effective to the government to hold the meeting at this time as several members will already be in the Denver area.

Dated: March 11, 1983.

BILLING CODE 4140-01-M

Public Health Service

National Toxicology Program; Availability of Carcinogenesis Report on Propyl Gallate

The HHS' National Toxicology Program today announces the availability of a Technical Report on a carcinogenesis study of propyl gallate, an anti-oxidant used to stabilize cosmetics, food packaging materials, and foods containing fats.

Propyl Gallate was given in the diets of F344/N rats and B6C3F$_1$ mice (0, 6,000, or 12,000 ppm) for 103 weeks. Under these conditions, propyl gallate was not considered to be carcinogenic for F344/N rats, although there was evidence of an increased proportion of low-dose male rats with preputial gland tumors, islet-cell tumors of the pancreas, and pheochromocytomas of the adrenal glands; rare tumors of the brain occurred in two low-dose females. Propyl gallate was not considered to be carcinogenic for B6C3F$_1$ mice of either sex, although the increased incidence of malignant lymphoma in male mice may have been related to the dietary administration of propyl gallate.

Copies of this report—*Carcinogensis Bioassay of Propyl Gallate in F344/N Rats and B6C3F$_1$ Mice (Feed Study)* (T.R. 240)—are available without charge by writing to: NTP Public Information Office, M.D. B2–04, P.O. Box 12233, Research Triangle Park, NC 27709. Telephone: (919) 541–3991. FTS: 629–3991.

Dated: March 9, 1983.

David P. Rall,

Director, National Toxicology Program.

BILLING CODE 4140-01-M

Health Resources and Services Administration

Availability of Funds for Community Health Centers (CHCs)

AGENCY: Health Resources and Services Administration, Public Health Service, HHS.

ACTION: Notice.

SUMMARY: Under the present Continuing Resolution, Pub. L. 97–377, providing funding for the Department of Health

and Human Services, approximately $14 million are available for funding new CHCs and expanding existing CHCs. This notice contains information of interest to prospective applicants for such funding.

DATE: To receive consideration, applications must be received in the appropriate regional office prior to May 15, 1983.

FOR FURTHER INFORMATION CONTACT: Information may be obtained from, and applications should be mailed to, the appropriate Regional Health Administrator (see Appendix).

SUPPLEMENTARY INFORMATION: Due to limited resources during the last 2 fiscal years and in an effort to expedite administrative action in preparation for implementation of the Primary Care Block Grant program, Federal support for over 200 CHCs was not renewed. At the same time, a policy was established which precluded funding of new CHCs. The Continuing Resolution makes approximately $14 million available for funding new CHCs and for funding new or expanded activities at existing CHCs located in high priority medical service areas, including the restoration of supplemental ambulatory service delivery capacity where restoration of such services could not be made during Fiscal Year 1982, and the continued expansion of prevention activities. Applications for operational funding for new CHCs, meeting the requirements of section 330 of the Public Health Service (PHS) Act (42 U.S.C. 254c) and implementing regulations (42 CFR Part 51c), as well as applications for the expansion of activities of current CHCs, including the establishments of satellite clinics, are now being accepted. Funding support will be provided for primary health services and needed supplemental ambulatory health services except for inpatient care services as defined in the Department's policy issuance published on December 29, 1981 (see 46 FR 62956). Applications will be evaluated in accordance with criteria set forth in the regulations (42 CFR 51c.305).

Only applications to serve high priority need areas will be considered. Relative need of the population to be served will be determined primarily on the basis of the percentage of the population to be served who live in the areas that are designated as medically underserved areas and on the extent of unemployment in such areas.

The need/demand assessment required under section 330(e)(2) of the PHS Act, including an analysis of the impact of unemployment in the area on the access to health care of the proposed service population, will be an important consideration.

In addition, as provided in the regulations at 42 CFR 51c.305(e), the demonstrated administrative, financial and general management capability of the applicant will be evaluated

Section 51c.104(b)(5) of the CHC regulation requires applicants to include letters and other forms of evidence showing efforts to secure financial and professional assistance and support for the project and to secure continuing community involvement. Proposed applicants are advised to seek such evidence of support, from, among others, local officials and medical societies. Evidence that such support was sought will be considered in determining which applicants will be awarded grants under this announcement.

Evidence must be provided to indicate that requirements of Part I of Office of Management and Budget Circular No. A-95 have been satisfied, and that the local Health Systems Agency (HSA) has been afforded the opportunity to review and comment on the application.

Note.—Even though OMB Circular A-95 has been rescinded by Executive Order 12372, the A-95 review process remains in effect through April 30, 1983. Also, since many HSAs have discontinued review of applications for the proposed uses of Federal funds, applicants should check with the HSA or PHS regional office in their area to determine the need for HAS Review.

Under the terms of the new Primary Care Block Grant legislation (section 1923 of the PHS Act), the Department is required to solicit comments from the Governor of the State and appropriate local officials prior to awarding CHC grants (see the **Federal Register** notice at 47 FR 56557, December 17, 1982, soliciting such comments). Since these comments are an essential part of a grant application's review, applicants are advised to request that such comments, if possible, be sent to the appropriate regional office prior to due date of their application.

The CHC program is listed as No. 13.224 in the OMB *Catalog of Federal Domestic Assistance.*

Dated: March 8, 1983.

Robert Graham,

Administrator, Assistant Surgeon General.

BILLING CODE 4310-84-M

Camping Stay Limit Established; Caliente Resource Area, Bakersfield District California

AGENCY: Bureau of Land Management, Interior.

ACTION: Establishment of camping stay limit for campgrounds and undeveloped public lands in the Caliente Resource Area, Bakersfield District, California.

SUMMARY: Persons may camp within designated campgrounds or on public lands not closed to camping within the Caliente Resource Area for a total period of not more than fourteen days during any calendar month. The fourteen day limit may be reached either through a number of separate visits or through a period of continuous occupation of the public lands. Under special circumstances and upon request, the authorized officer may give written permission for extension to the fourteen day limit.

Additionally, no person may leave personal property unattended in designated campgrounds or recreation developments for a period of more than 24 hours, or elsewhere on public lands within the Caliente Resource Area for a period of more than 5 days without written permission from the authorized officer.

DATE: This camping stay limit will be effective March 16, 1983.

FOR MORE INFORMATION CONTACT: Don H. Heinze, Acting Caliente Resource Area Manager, Caliente Resource Area Office, 520 Butte Street, Bakersfield, California 93305, Telephone: (805) 861–4236.

SUPPLEMENTARY INFORMATION: This camping stay limit is being established in order to assist the Bureau in reducing the incidence of long-term occupancy trespass being conducted under the guise of camping, both within campgrounds and on undeveloped public lands in the Caliente Resource Area.

Authority for this stay limit is contained in CFR Title 43, Chapter II, Part 8363, Subparts 8361.1–3(b) and 8363.3.

Donald H. Heinze,

Acting Area Manager.

BILLING CODE 4310-84-M

Colorado; Craig District Advisory Council Meeting

In accordance with Pub. L. 94–579, notice is hereby given that there will be a meeting of the Craig District Advisory Council on April 15, 1983.

The meeting will begin at 10:00 a.m. in the conference room of the Craig District Office of the Bureau of Land Management, 455 Emerson Street, Craig, Colorado.

The agenda of the meeting will include:

1. Introductions
2. Orientation to BLM
3. Election of Officers
4. Discussion of Range Stewardship Program
5. Council Recommendation on issues and problems to be addressed by the Advisory Council
6. Discussion of BLM–MMS Merger; and
7. Statements from the public.

The meeting will be open to the public and interested persons may make oral statements to the Council beginning at 1:30 p.m. The District Manager may establish a time limit for oral statements, depending on the number of people wishing to speak. Anyone wishing to address the Council or file a written statement should notify the District Manager, Bureau of Land Management, P.O. Box 248, 455 Emerson Street, Craig, Colorado 81626, by April 12, 1983.

Summary minutes of the Council Meeting will be maintained in the Craig District Office and will be available for public inspection and reproduction during regular business hours.

Dated: March 7, 1983.

Lee Carle,

District Manager.

BILLING CODE 4310-84-M

[I-20125]

Idaho; Realty Action; Sale of Public Lands in Jefferson County

The following described land has been examined and identified as suitable for disposal by sale under Section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat.

2750, 43 U.S.C. 1713), at no less than the appraised fair market value:

Boise Meredian

T. 7 N., R. 37 E.,
Sec. 3: NE¼SE¼, S½SE¼,
Sec. 10: N½NE¼.
200 acres.

The land will be sold at public auction by competitive bidding. The lands are being offered for sale in order to enhance land-use compatibility with adjoining private lands and to settle an occupancy trespass. The land has not been used for and is not required for any Federal purpose. The lands are isolated and uneconomical to manage as public lands. The sale is consistent with the Bureau's planning for the lands involved and has been discussed with the County Commissioners, Idaho Department of Fish and Game and the Idaho Department of Lands. Disposal would not have any significant effect on resource values and would best serve the public interest.

The terms and conditions applicable to the sale are:

1. The sale of these lands will be subject to all applicable Jefferson County regulations.

2. All minerals will be reserved to the United States.

3. The sale of this land will be subject to all existing rights.

4. The subject lands are encumbered by removable, valuable improvements (house, barn, corrals, etc.). These improvements are owned by Ferguson Farms. If Ferguson Farms does not purchase the subject lands during this sale, they will be allowed 180 days to remove the improvements. If they choose not to remove the improvements, they will be allowed an opportunity to negotiate a sale of these improvements with the purchaser.

The Federal Land Policy and Management Act requires that bidders must be citizens of the United States, 18 years of age or over, or, in the case of a corporation, be subject to the laws of any state or the United States. Bids may be made by a principal (the one desiring to purchase the land) or his duly qualified agent.

The sale will be held at the Idaho Falls District Office, Bureau of land Management, 940 Lincoln Road, Idaho Falls, Idaho 83401, on May 24, 1983, at 1:00 p.m. No bid will be accepted for less than the apprised fair market value of $30,000. Bids must be for all the land.

Bids may be made either by mail or personally at the sale. Bids sent by mail will only be considered if received at the Idaho Falls District office, 940 Lincoln Road, Idaho Falls, Idaho 83401, prior to 1:00 p.m. on the day of the sale. Bids sent in by mail must be in sealed envelopes accompained by a certified check, postal money order, bank draft, or cashier's check made payable to the Bureau of Land Management for no less than one-fifth of the amount of the bid. The sealed bid envelopes must be marked in the lower left-hand corner, "Sealed Bid, Public Land Sale I–20125, Sale to be May 24, 1983," If two or more valid sealed bids in the same amount are received and they are the high bid, the determination of which bid is to be considered the highest bid shall be by a drawing. The highest qualifying sealed bid shall then be announced.

Oral bids will be received immediately after all sealed bids have been opened and the highest sealed bid is announced. The highest sealed bid will be the basis for oral bids. All oral bids must be made in increments of not less than $50. Sealed bidders present at the sale may also make oral bids. The highest bid price, either sealed or oral, will establish the sale price. If the highest bid is an oral bid, the successful bidder will be required to pay immediately one-fifth of the high bid price by cash, personal check, money order, bank draft, or any combination of these.

The successful high bidder, whether it is by sealed or oral bid, will be required to submit full payment for the balance of the bid within 30 days from the date of the sale. Failure to submit such payment within the 30 day period shall result in cancellation of the sale and the bid deposit shall be foreited. All bids will be either returned, accepted, or rejected within 30 days of the sale date. If no bids for the land, either sealed or oral, are received on the sale date, the sale will be adjourned until the next Tuesday at the same hour and place and continued on each succeeding Tuesday, until the lands are sold as specified in this notice or the sale is otherwise terminated.

Further information concerning this sale, including the planning documents and Environmental Assessment, is available for review in the Idaho Falls District Office at the address indicated above. For a period of 45 days from the date of this Notice, Interested parties may submit comments to the Idaho Falls District Manager. Any adverse comments will be evaluated by the State Director, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this realty action will become the final determination of the Department of the Interior. In addition, this notice will be considered an amendment to the Management Framework Plan for this Resource Area.

Dated: March 8, 1983

James Gabettas,
Acting District Manager

[FR Doc. 83-6753 Filed 3-15-83; 8:45 am]
BILLING CODE 4310-84-M

Jacks Creek Wilderness EIS; Intent To Prepare an Environmental Impact Statement and Notification of Scoping Meetings

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent to prepare the Jacks Creek Wilderness environmental impact statement and notification of scoping meetings.

SUMMARY: The Bureau of Land Management is beginning the preparation of an EIS to consider suitability or nonsuitability recommendations for seven wilderness study areas (WSAs). The WSAs are located in Southwestern Idaho's Owyhee County. They are 60 to 100 miles south of Boise, Idaho. The specific WSAs are identified as follows:

WSA No.	Name	Acres
111-06	Little Jacks Creek	58,040
111-7b	Duncan Creek	10,805
111-7c	Big Jacks Creek	54,833
111-16	Pole Creek	24,509
111-36A	Sheep Creek West	11,680
111-36B	Sheep Creek East	5,050
111-44B	Upper Deep Creek	11,510
		175,627

SUPPLEMENTARY INFORMATION: The EIS is being done in conjunction with the Bruneau Resource Area land use planning efforts in the Boise BLM district. Planning documents are available for review at the district office.

The EIS will include alternatives for each WSA ranging from total wilderness to no wilderness. Various alternative combinations of suitable and nonsuitable recommendations as well as boundary adjustments for individual WSAs will be considered.

Major environmental issues anticipated include the following:

1. Impacts of wilderness on the Jacks Creek livestock water pipeline proposal.

2. Impacts of increased livestock grazing on good condition Sagebrush Steppe areas.

3. Impacts of wilderness designation on livestock grazing.

4. Impact of wilderness designation/nondesignation on sensitive California bighorn sheep populations.

The scoping process will consist of a mail-out to interested individuals, organizations, and agencies who have expressed interest in the wilderness review process for the affected study areas. The mail-out will include a description of the tentative alternatives that will be considered in the EIS as well as a tentative list of issues to be addressed. Individuals and agencies contacted will be encouraged to comment on the issues and alternatives presented, and to identify additional issues and alternatives.

Two public scoping meetings have also been scheduled to discuss the wilderness EIS and to receive input on alternatives and issues. These meetings will be held at the following times and locations:

April 20, 1983 7:00 p.m.—American Legion Hall, Bruneau, Idaho

April 21, 1983 7:00 p.m.—Boise District BLM Office, 3948 Development Avenue, Boise, Idaho

Suggestions on issues and alternatives may be presented at the public meetings or they may be sent to the Boise District, BLM, 3948 Development Avenue, Boise, Idaho 83705. Suggestions should be submitted by May 13, 1983.

FOR FURTHER INFORMATION CONTACT:
Ted Milesnick, EIS Team Leader, Boise District Office, 3948 Development Avenue, Boise, Idaho 83705, (208) 334–1582.

Martin J. Zimmer,
District Manager.

BILLING CODE 4310-84-M

Northeast Resource Area, Colorado; Resource Management Plan; Public Workshops and Public Hearings on Denver Basin Coal Lease Applications

Three plan alternatives for managing the lands and resources of the Northeast Resource area have been developed. Each plan addresses the issues raised at earlier public scoping meetings as well as those required by law and regulation. The most significant issues addressed are: land tenure adjustments, water quality, wildlife habitat, access to public land, recreational opportunities, forest management particularly fuelwood cutting, and mineral exploration and development.

The draft alternatives are available for public review and comment. Public participation at this point is essential to assure: (1) The alternatives are complete and reasonable, (2) that all alternatives are considered, and (3) that public preferences are known prior to completion of the Draft Environmental Impact Statement in October, 1983.

Six open house workshops are scheduled to allow public viewing of maps and management plans displaying the alternatives. Planning/EIS team members will be available to answer questions and comments will be accepted. The locations below will be open for extended hours as shown for the convenience of the public. Additional written comments on the Resource Management Plan will be accepted until May 20, 1983 at the Northeast Resource Area Office.

Location	Date	Time	Place
Idaho Springs	4	2-4 and 6-8	Elks Lodge, Colorado Blvd.
Central City	5	2-4 and 6-8	Gilpin County Courthouse.
Fort Morgan	7	2-4 and 6-8	Morgan County Courthouse.
Fort Collins	11	2-4 and 6-8	Larimer County Courthouse, 200 W. Oak St.
Denver*	12	2-4 and 6-8	BLM Office, 10200 West 44th Ave. Wheatridge.
Limon*	18	2-4 and 6-8	City Hall, 200 F St.

The meetings at Denver and Limon will include public hearings specific to the adequacy of the environmental assessments for Coal lease proposals in the Denver Basin (Adams, Arahahoe, and Elbert Counties). These environmental assessments are available at the Northeast Resource Area Office, Canon City District Office, Colorado State Office in Denver and the Elbert County Library in Kiowa. Oral Statements will be heard beginning at 8 PM at these two locations. If you are interested in making an oral statement please notify by April 1, 1983 the: Northeast Resource Area Office, 10200 West 44th Avenue, Wheatridge, CO 80033, (303) 294–4988.

Written statements on the adequacy of the coal environmental assessments will be accepted at any of the six open houses or at the above address prior to May 2, 1983.

Stewart A. Wheeler,
Acting District Manager.

BILLING CODE 4310-84-M

[A–17948]

Public Lands Exchange; La Paz County, Arizona

March 4, 1983.

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of Realty Action-Exchange, public lands in La Paz County, Arizona.

SUMMARY: The following described public lands have been determined to be suitable for disposal by exchange under Section 206 of the Federal Land Policy and Management Act of October 21, 1976, 43 U.S.C. 1716:

Gila and Salt River Meridian, Arizona
T. 4 N., R. 14 W.,
Sec. 20: Those public lands lying West of the Central Arizona Project;
Sec. 21: Those public lands lying West of the Central Arizona Project;
Sec. 28: Those public lands lying West of the Central Arizona Project;
Sec. 32: NE¼SW¼.
T. 4 N., R. 15 W.,
Sec. 14: SE¼.

Comprising approximately 800 acres of public land.

In exchange for these lands, the Federal Government will acquire non-Federal land from the Crowder-Weisser Cattle Company described as follows:

Gila and Salt River Meridian, Arizona
T. 3 N., R. 14 W.,
Sec. 32: N½; (First priority).
T. 5 N., R. 16 W.,
Sec. 9: W½.

Comprising approximately 640 acres of private land.

The exchange proposal involves the surface and mineral estates of both public and private offered lands, including the oil and gas.

The purpose of the exchange is to dispose of public lands that are unmanageable because of location and the ownership of adjacent lands. In return, the Bureau will acquire private lands that will aid in making a more manageable area. The public interest will be served by making this exchange.

The value of the lands and interests to be exchanged is approximately equal. Upon the completion of a final appraisal, acreages may be adjusted or a cash payment made, where the value of the public estates exceed that of the private, to equalize the value difference. Should the value of the private offered exceed the value of the selected public estates, those private lands identified as the first priority will be acquired first, thereby utilizing a reduction in private acres in lieu of a Federal money payment.

Lands to be transferred from the United States will be subject to the following reservations, terms and conditions:

1. A reservation for ditches and canals constructed by the authority of the

United States. Act of August 30, 1890, 26 Stat. 391, 43 U.S.C. 945.

2. A reservation to the Bureau of Reclamation for a flood easement on the public lands in T. 4 N., R. 14 W., Secs. 20, 21, and 28.

The private lands to be acquired by the United States will have the following reservations, or terms and conditions.

1. A reservation to the State of Arizona for 1/16 of all oil, gas, coal and other minerals on the lands located at T. 3 N., R. 14 W., Section 32, N½.

2. A reservation to Arizona Public Service Company for a public utilities easement as shown on instrument recorded August 29, 1979 in Docket 1118, Page 286, for the lands located at T. 5 N., R. 16 W., Sec. 9, SW¼ (South 8 feet of North 33 feet).

The publication of this notice in the **Federal Register** will segregate the public lands located at T. 4 N., R. 14 W., Section 32, NE¼SW¼; and T. 4 N., R. 15 W., Section 14, SE¼.

On the date of the relinquishment of withdrawal application AR-031307 by the Bureau of Reclamation, this notice will also segregate the public lands West of the CAP. The segregated public lands will not be subject to appropriation under the public land laws, including the mining laws. This segregative effect shall terminate upon issuance of patent to the subject lands, upon publication in the **Federal Register** of a termination, or two years from the date of this publication, which ever occurs first.

SUPPLEMENTARY INFORMATION: Detailed information concerning the exchange, including the Environmental Assessment and Record of Decision, is available for review at the Lower Gila Resource Area Office, 2935 W. Clarendon Avenue, Phoenix, Arizona 85017.

For a period of 45 days, interested parties may submit comments to the District Manager, Phoenix District Office at 2929 W. Clarendon Avenue, Phoenix, Arizona 85017. Any adverse comments may be evaluated by the Arizona State Director, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this realty action will become the final determination of the Department of the Interior.

Dated: March 8, 1983.

William K. Barker,

District Manager, Phoenix.

Endangered Species Permit; Receipt of Applications

The following applicants have applied for permits to conduct certain activities with endangered species. This notice is provided pursuant to Section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*):

Applicant: Arizona Zoological Society, Phoenix, AZ; PRT 2-10122

The applicant requests a permit to purchase in interstate commerce one male captive-bred ocelot (*Felis pardalis*) from the Tulsa Zoo, Tulsa, Oklahoma, for enhancement of propagation:

Applicant: W. Grainger Hunt, Soquel, CA; PRT 2-7294

The applicant requests a permit to take 24 bald eagles (*Haliaeetus leucocephalus*) for radio-tagging and banding; harass by photographing eaglets in 6 nests and by conducting helicopter surveys of bald eagles in northern California for scientific research:

Applicant: Zoological Society of Cincinnati, Cincinnati, OH; PRT 2-10141

The applicant requests a permit to import 30-50 captive-bred hatchlings and 10-20 captive-bred second or third year larvae of Japanese giant salamander (*Andrias davidianus japonicus*) from the Asa Zoological Park, Hiroshima, Japan, for enhancement of propagation.

Documents and other information submitted with these applications are available to the public during normal business hours in Room 601, 1000 N. Glebe Rd., Arlington, Virginia, or by writing to the U.S. Fish and Wildlife Service, WPO, P.O. Box 3654, Arlington, VA 22203.

Interested persons may comment on these applications within 30 days of the date of this publication by submitting written data, views, or arguments to the above address. Please refer to the file number when submitting comments.

Dated: March 11, 1983.

BILLING CODE 4310-55-M

Receipt of Application for Permit

Notice is hereby given that an applicant has applied in due form for a permit to take sea otters as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), and the regulations governing the taking and importing of Marine Mammals (50 CFR Part 18).

1. Applicant: Sea World, Inc., 1720 So. Shores Road, San Diego, CA 92109.
2. Type of permit: Take (capture).
3. Name and number of animals: 5 California sea otters *(Enhydra lutris nereis).*
4. Type of activity: Capture for captive propagation and public display.
5. Location of activity: Monterey, California.
6. Period of activity: February 1, 1983-December 31, 1987.

The purpose of this application is to obtain a permit under the Marine Mammal Protection Act to take five California sea otters for captive propagation.

Concurrent with the publication of this notice in the **Federal Register**, the Federal Wildlife Permit Office is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

The application has been assigned file number PRT 2-10022. Written data or views, requests for copies of the complete application, or requests for a public hearing on this application should be submitted to the Director, U.S. Fish and Wildlife Service (WPO), P.O. Box 3654, Arlington, VA 22203, within 30 days of the publication of this notice. Those invididuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Director.

All statements contained in this notice are summaries of those of the applicant and do not necessarily reflect the views of the United States Fish and Wildlife Service.

Documents submitted in connection with the above application are available for review during normal business hours in Room 605, 1000 North Glebe Road, Arlington, Virginia.

Dated: March 11, 1983.

Monthly Meeting of the Advisory Committee on Minerals Accountability

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Notice of monthly meeting.

SUMMARY: The purpose of the Advisory Committee on Minerals Accountability is to develop over a 1-year period an expanded policy of cooperation with States and Indian tribes in the royalty management area and to develop a detailed plan for carrying out Federal/State/Indian cooperation on a comprehensive basis. The purpose of the Advisory Committee meeting will be to hold a panel discussion on the results to date of the eight joint cooperative Federal/State audit efforts on royalty payments to the States.

The meeting will be open to the public. However, facilities and space to accommodate attendees are limited and persons will be accommodated on a first-come, first-serve basis. Any member of the public may file with the Advisory Committee a written statement concerning the matters to be discussed.

Notice of the next monthly meeting will be published 15 days before the meeting is to take place.

DATE: Wednesday, March 30, 9:00 a.m.

ADDRESS: Stouffer's Denver Inn, 3203 Quebec Street, Denver, Colorado.

FOR FURTHER INFORMATION CONTACT: John Sullivan, Department of the Interior, 18th & C Streets, NW., Room 4210, Washington, D.C. 20240, telephone: (202) 343–3520.

SUPPLEMENTARY INFORMATION: The Advisory Committee was created by the Secretary of the Interior on November 15, 1982 (Order No. 3071).

Dated: March 11, 1983.

BILLING CODE 4310-MR-M

Establishment of Procedures for a Voluntary Winnings Limit for Outer Continental Shelf Oil and Gas Leasing

AGENCY: Minerals Management Service, Interior.

ACTION: Request for comments.

SUMMARY: The Department of the Interior (Department) is studying the possible use of procedures for receiving sealed bids in Outer Continental Shelf (OCS) oil and gas lease sales that would allow each bidder to establish a dollar limit on the total of the high bids it wishes to have considered for acceptance. The objective of such a procedure would be to reduce unnecessary restraint in bidding by reducing the risk that bidders may overspend or underspend their budgets. This solicitation is intended to obtain comments and recommendations of Federal, State, and local governmental agencies, industry, and the public to assist in the determination of policy regarding whether there is a need for procedures to voluntarily limit winnings for OCS oil and gas leasing and, if so, what procedures should be employed.

DATE: Comments must be received on or postmarked by April 15, 1983.

ADDRESS: Comments on OCS Winnings Limit to: Director, Minerals Management Service, U.S. Department of the Interior, 18th and C Streets NW., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Ms. Mary Vavrina or Ms. Malka Pattison, Minerals Management Service, MS 643, 12203 Sunrise Valley Drive, Reston, Virginia 22091, telephone (703) 860–7567, or Marshall Rose, Office of Policy Analysis, U.S. Department of the Interior, 18th and C Streets NW., Washington, D.C. 20240, telephone (202) 343–6693.

SUPPLEMENTARY INFORMATION:

Current OCS Bidding Process Regulations

The existing OCS bidding process regulations require that all bids must be submitted by sealed bid accompanied by a certified or cashier's check, bank draft, money order, or cash for one-fifth of the cash bonus amount by the deadline specified in the Final Notice of Sale. The bids are opened, publicly announced, and recorded, but no high bids are accepted or rejected and no leases are awarded at that time. All other bids, except high bids, are returned at this time. Within 90 days of the opening of the bids, the Department determines whether to accept a bid from the highest qualified responsible bidder for each tract receiving bids. If the highest bid for a lease is not accepted by the Department within the 90-day period following the opening of bids, all bids for that lease shall be considered rejected. Written notice of the decision to accept or reject is transmitted to all the bidders whose deposits have been

held. Cash bonus deposits on all rejected high bids are returned.

Background and General Objectives

Beginning in April 1983, OCS oil and gas lease sales under the 5-Year OCS Leasing Program, approved by Secretary James Watt on July 21, 1982, will offer substantially greater acreage to be bid upon. The sealed bid process creates uncertainty concerning the number of tracts which will be acquired and the resultant capital requirements. This may strain some bidders' financial resources. It requires bidders, when cash bonus bidding is used, to commit all of their cash bonus funds simultaneously, and thereby may limit both the number and size of bids that many bidders can afford to submit. In contrast, an oral auction of many items allows each participant to stop bidding when its winnings exhaust the funds it is willing to spend.

It is possible that some firms who participate in sealed bid lease sales might limit their bidding to avoid having to pay out more in bonuses than provided for in their budgets. Restraint in bidding may reduce the chance that such firms would turn out to be the highest bidders on a greater than expected portion of the tracts they bid upon. On the other hand, such firms may turn out more often to be the highest bidders on a smaller than expected portion of the tracts they bid upon, spending less than they were willing to invest in acquiring leases. In addition, this capital constraint may cause some bidders to focus primarily on tracts that would not command much attention from bidders with greater financial resources. As a result, fewer tracts might be leased, exploratory drilling might proceed on a smaller inventory of tracts, and Federal lease revenues might be reduced.

The simultaneous offering of all tracts earmarked for a particular OCS lease sale makes prediction of how many leases a sale participant will obtain virtually impossible. If a bidder ends up with more tracts than it can afford to develop, then OCS oil and gas development and production might be delayed. While this inefficiency may be alleviated by the sale, assignment, exchange, or other transfer of leases by a winning bidder after the OCS lease sale (authorized, subject to Department approval, by 43 CFR Subpart 3319), the availability of the "assignments market" may not guarantee that such a transaction can be effected.

The Department seeks guidance on whether procedures (such as a winnings limit) that would incorporate the advantage of oral auctions into the sealed bidding process are needed and, if so, what form should they take. A procedure that would allow (but not require) bidders to establish a dollar limit on the total of the high bids they wish to have considered for acceptance is but one example. The objective of such a procedure would be to allow each bidder to acquire leases for bonus bids, the sum of which is closer to the amount it has budgeted to spend at each sale.

Public Comments and Questions

We request comments on any aspect of whether a winnings limit procedure or an alternative should be employed in OCS oil and gas lease sales. Comments should be accompanied by as much supporting data as possible. Data submitted pursuant to this Notice that are deemed proprietary should be so labeled. Respondents may wish to expand on or recommend options other than a winnings limit. In describing or recommending options, respondents are requested to provide sufficient details so that distinctions can be made between the options and so that all options can be fully evaluated. Respondents are requested to address the following general questions with regard to each proposed or suggested option.

1. Is there a need for a procedure which would allow bidders to voluntarily establish a dollar limit on the total of the high bids they wish to have considered for acceptance on a portion or all of the tracts they bid upon?

2. What type of procedure should be considered, and how would it be implemented?

3. Are preventative sale procedures better than the postsale OCS lease assignments market in eliminating restraints in bidding associated with bidders' fears of exceeding their bidding budgets? Explain.

4. What effect would adoption of a preventative sale procedure have on:

(a) The OCS lease assignment market,
(b) Bidding strategies or patterns,
(c) Bid amounts,
(d) Competition,
(e) Government revenues,
(f) The total number of leases awarded,
(g) Administrative burdens,
(h) Level of small firm participation,
(i) The timing and amount of exploratory drilling, development, and production, and
(j) Joint bidding.

5. What, if any, difficulties would such a preventative sale procedure create in the process of formulating and submitting bids accompanied by the required 20 percent deposit?

6. Should such a procedure be implemented for any sale? If so which sale or sales?

7. If you are a potential bidder:

(a) Would you make use of such a procedure if it were available? Frequently or occasionally? Would you expect other bidders to make use of the procedure? Would you feel at a disadvantage if others used the procedure but you did not? Why?

(b) After submitting your bid amounts, are there some tracts that you would prefer to win over others? If so, are these preferred tracts usually the ones that received your highest bids? For a given expenditure of cash bonus payments, would you prefer to acquire a few tracts upon which you submitted your highest bids in the sale, or many tracts upon which you submitted your lowest bids in the sale? Why?

8. Would a certain type of procedure enable companies to obtain financing more readily? Would financial institutions be willing to make loans available when a company cannot state which tracts it actually hopes to be awarded leases on?

9. Would such a procedure help the smaller oil companies or would it give an advantage to the major oil companies?

10. Would potential benefits be worth the administrative burdens associated with such a procedure?

Dated: March 7, 1983.

Harold E. Doley, Jr.,

Director.

BILLING CODE 4310-MR-M

Office of the Secretary

Coastal Barrier Resources Act

AGENCY: Office of the Secretary, Interior.

ACTION: Notice.

SUMMARY: Consistent with the provisions of Section 4(c)(2) of the Coastal Barrier Resources Act (Pub. L. 97-348), and with the guidelines published in the **Federal Register** on November 19, 1982 (47 FR 52388-52393), the Department has, as required, submitted written notice of those minor and technical boundary modifications it proposes to make under the authority of Section 4(c)(1) of CBRA to the Committee on Merchant Marine and Fisheries in the House of Representatives and to the Committee on the Environment and Public Works in the Senate. This information has also been provided to the chief executive officer of each State, county or

equivalent jurisdiction in which a system is located; each State coastal zone management agency in those States which have a coastal zone management plan approved pursuant to section 306 of the Coastal Zone Management Act of 1972 (16 U.S.C. 1455) and in which a system is located; and each appropriate Federal agency, as required by CBRA.

CBRA requires the Secretary to make minor and technical boundary modifications to the boundaries of the System within 180 days from the date of enactment and to provide written notice to the Committees and others previously listed, of those proposed minor and technical modifications at least thirty (30) days prior to the date when authority to modify the maps will lapse. Accordingly, this information must be provided to the aforementioned individuals no later than March 18, 1983.

Following review of comments received during this thirty (30) day period, final modifications will be made prior to the close of the 180-day period, which ends on April 18, 1983. Copies of the proposed modifications are available to the public, free of charge. Interested individuals may contact the Coastal Barriers Task Force, U.S. Department of the Interior, Washington, D.C. 20240. Public review and comment is encouraged.

DATES: Comments will be accepted through the close-of-business on April 13, 1983.

Final decisions on modifications will be completed by close-of-business on April 18, 1983, as required by CBRA.

ADDRESSES: Mr. Ric Davidge, Chairman, Coastal Barriers Task Force, U.S. Department of the Interior, Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Ms. Deborah Lanzone, Manager, Coastal Barriers Task Force, 202–343–4905.

J. Craig Potter,

Acting Assistant Secretary for Fish and Wildlife and Parks.

BILLING CODE 4310-70-M

INTERSTATE COMMERCE COMMISSION

Motor Carriers; Finance Applications; Decision-Notice

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 (formerly section 5) of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulator action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsiderations; any interesterd person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1132.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will indicate that consummation of the transfer will be presumed to occur on the 20th day following service of the notice, unless either applicant has advised the Commission that the transfer will not be consummated or that an extension of time for consummation is needed. The notice will also recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 30 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is Ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

By the Commission, Review Board No. 3, Members Krock, Joyce, and Dowell.

MC–FC–80051 March 2, 1983, by decision of March 1983 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181, Review Board Number 3 approved the transfer to KNOXVILLE TRANSPORT, INC., of Knoxville, IL of Certificate No. MC–13123 (Sub-Nos. 52, 56, 87 and 103), issued May 8, 1969, April 11, 1969, April 20, 1978, and November 24, 1982, respectively, to WILSON FREIGHT COMPANY, of Cincinnati, OH authorizing the transportation as summarized: (1) over regular routes, *general commodities* (with exceptions) (a) between Oklahoma City, OK, and Chicago, IL; (b) between Oklahoma City, OK and Springfield, IL; (c) between Kingdom City, MO and St. Louis, MO; (d) between junction U.S. highways 24 and 40 at Kansas City, MO, and Junction U.S. highways 24 and 40 near Lawrence, KS, and Topeka, KS, serving specified intermediate and off-route points and (2) over irregular routes, *general commodities* and *specified commodities*, including, but not limited to, meat, meat products and meat by-products, farm implements, machinery and parts, clothing, canned goods and groceries, within specified points in AR, IL, IN, KS, MO, OK, and TX. Transferee holds no authority. TA filed. Applicants' representative: Mark Andrews, 1660 L Street, NW., Washington, DC 20036.

Agatha L. Mergenovich,

Secretary.

MC-KC-81111. By decision of March 9, 1983 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1181, Review Board Number 3 approved the transfer to TRUCK AIR OF THE CAROLINAS, INC., Greenville, SC, of a portion of the operating rights contained in Certificate No. MC-145610 Sub 8, issued January 30, 1981, to TRUCK AIR, INC., Birmingham, AL, authorizing the transportation of general commodities (except classes A and B explosives and household goods as defined by the Commission), (1) between points in NC and SC, and (2) between Atlanta, GA, on the one hand, and, on the other, points in NC and SC. Applicants representative: Robert E. Born, 1447 Peachtree Street, NE, Suite 508, Atlanta, GA 30309.

MC-FC-81226. By decision of March 9, 1983 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1181, Review Board Number 3, approved the transfer to CAREFUL MOVING COMPANY, INC., Brockton, MA, of Certificate No. MC-48641, issued March 27, 1963, to ANGUS R. BEATON, d.b.a. CAREFUL MOVING CO., Abington, MA, authorizing the transportation of household goods, between Brockton, MA, and points in MA within 20 miles of Brockton, on the one hand, and, on the other, points in NH, NJ, ME, CT, NY, RI, and VT. Applicants representative: Frank J. Weiner, 15 Court Square, Boston, MA 02108.

Volume No. OP1-FC-84

By the Commission, Review Board No. 2, Members Carleton, Williams, and Ewing.

MC-FC-81106. By decision March 8, 1983 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181, Review Board Number 2 approved the transfer to CHRISTIE TRANSFER, INC., North Abington, MA, of Certificate Nos. MC-63871 and (Sub-Nos. 4, 5, 7, 9, 10) issued April 15, 1964, April 4, 1978, October 26, 1981, November 7, 1980, March 31, 1981, and February 9, 1981, respectively, to ANDREWS & PIERCE, INC., North Abington, MA, authorizing the transportation (A) over regular routes, of *general commodities* with exceptions, between specified points in MA and RI, and (B) over irregular routes, of (1) *malt beverages, and materials, equipment and supplies,* from and to South Volney, NY, and points in MA and RI, (2) *insulation and materials, equipment, and supplies,* between the facilities of Bay State Gas Company in Lawrence, MA, on the one hand, and, on the other, points in ME, NH, VT, CT, RI, and NY, (3) *liquefied natural gas, liquefied petroleum gas,* between points in CT, VT, ME, NH, MA, RI, and NY, (4) *such commodities* as are dealt in by grocery and food business houses, and *materials, equipment and supplies,* between points in MA, NH, and ME, (5) *general commodities* with exceptions, between points in MA, and (6) *groceries* from Somerville, MA to points in RI. Transferee is a carrier holding authority in No. MC-144313. An application for temporary authority has been filed. Representative: Joseph M. Klements, 89 State St., Boston, MA 02109.

MC-FC-81140. By decision of March 8, 1983, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR 1181, Review Board Number 2 approved the transfer to R. O. WETZ TRANSPORTATION CO., Marietta, OH, of Certificate Nos. MC-31438 and (Sub-Nos. 4, 5, 7, 10, 11, 12, 13, 14, 16, 17X, 18 and E-1), issued November 15, 1972, September 2, 1954, February 23, 1955, July 1, 1958, December 10, 1958, March 10, 1960, August 6, 1959, January 2, 1975, January 12, 1977, April 25, 1980, September 3, 1981, October 28, 1981, and September 6, 1974, respectively, to ROY O. WETZ d.b.a. R.O. WETZ TRANSPORTATION, Marietta, OH; MC-124059 (Sub-Nos. 1, 2X, 3, and 4) issued October 2, 1962, July 6, 1981, November 25, 1981, and November 2, 1981, respectively, to REJER TRANSPORT, INC., Marietta, OH; MC-136728 and (Sub-Nos. 1, 2, 4, and 5X) issued May 31, 1973, June 2, 1978, October 15, 1979, June 28, 1979, and July 2, 1981, respectively, to HUB FREIGHT SYSTEMS, INC., Marietta, OH, authorizing the transportation of *general and specified commodities,* from, to, and between specified points in the United States. Transferee is not a carrier. Representative: A. Charles Tell, 100 E. Broad St., Columbus, OH 43215.

Note.—A directly related application has been filed, docketed MC-165410, published in this same **Federal Register** issue.

MC-FC-81196. By decision of March 8, 1983, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181, Review Board Number 2 approved the transfer to Boone's Moving & Storage, Inc., Altoona, PA, of Certificates No. MC-102971 Sub-Nos. 1, 4, and 5X, issued July 25, 1968, November 22, 1972, and July 1, 1982, respectively, to Lytle's Transfer & Storage, Inc., Altoona, PA, authorizing the transportation over irregular routes of (1) *household goods,* (a) from and to Altoona, PA (and points 20 or 50 miles radially thereof), and MD, NJ, NY, OH and DC, (b) between five PA Counties and NJ, NY, CT, MA, DE, MD, VA, NC, SC, WV, OH, IN, IL, MI and DC, and (c) between Philadelphia, PA, and PA, MD, DE, NJ, NY and DC, (2) *used household goods,* between 24 PA Counties, restricted to the transportation of shipments having a prior or subsequent movement, in containers, beyond the points authorized, and further restricted to the performance of pickup and delivery service in connection with packing, crating, and containerization or unpacking, uncrating, and decontainerization of such traffic, and (3) *household goods and furniture and fixtures,* between (a) six PA Counties and MD, NJ, NY, OH and DC, (b) MD, NJ, NY, OH and DC and 20 PA Counties, (c) five PA Counties and NJ, NY, CT, MA, DE, MD, VA, NC, SC, WV, OH, IN, IL, MI and DC and (d) Philadelphia, PA, and PA, MD, DE, NJ, NY and DC. NOTE: The authority described in (1)(b) and (c) (3)(a)-(d) is radial. Representative: William J. Lavelle, 2310 Grant Bldg., Pittsburgh, PA 15222. (412) 471-1800.

[Volume No. OP 5-106]

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Decided: March 9, 1983.

80-Day Intrastate Motor Common Carriers of Passengers. The following applications, filed on or after November 19, 1982, are governed by Part 1168 of the Commission's Rules of Practice. See 49 CFR Part 1166, published in the Federal Register on November 24, 1982, at 47 FR 53275. For compliance procedures, see 49 CFR 1166.6 and 49 U.S.C. 10922(c)(2)(E).

Persons wishing to oppose an application must follow the rules under 49 CFR Part 1168. In addition to fitness grounds, applications may be opposed on the grounds that the transportation to be authorized would directly compete with a commuter bus operation and would have a significant adverse effect on all commuter bus service in the area in which the competing service will be performed. Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 25 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued

Within 30 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

By the Commission, Review Board Number 2, Members Carleton, Williams and Ewing.

Agatha L. Mergenovich,
Secretary.

Note.—All applications are filed under 49 U.S.C. 10922(c)(2)(A) for authority to operate as a motor common carrier of passengers in intrastate commerce on a route over which applicant has interstate, regular-route authority on November 19, 1982.

Please direct status inquiries to Team 5, (202) 275-7289.

MC 161679 (Sub-3), filed February 3, 1983 (Republication). Previously published in Federal Register issue March 3, 1983. Applicant: CAPE TRANSIT CORP., 5501 Ocean Ave., Wildwood Crest, NJ 08260. Representative: Elliott Bunce, 1600 Wilson Blvd., suite 1301, Arlington, VA 22209, (703) 522-0900. Applicant seeks authority in intrastate commerce to conduct service at all intermediate points on the route in No. MC 161678 (Sub-No. 1), in part, as follows: To operate over the route between Ocean City, MD and Atlantic City, NJ to provide intrastate service at all intermediate points between North Cape May, NJ and Atlantic City, NJ.

Note.—Applicant seeks to provide regular-route service in intrastate commerce under 49 U.S.C. 10922(c)(2)(B).

This Republication reflects proper decision-notice.

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property-that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier-that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker-that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly.

Please direct status inquiries to Team One at (202) 275-7992.

Volume No. OP1-87

Decided: March 8, 1983.

By the Commission, Review Board No. 2. Members Carleton, Williams, and Ewing.

MC 165410, filed December 27, 1982. Applicant: R. O. WETZ TRANSPORTATION CO., P.O. Box 566, Marietta, OH 45750. Representative: A. Charles Tell, 100 E. Broad St., Columbus, OH 43215, (614) 228-1541. Transporting *general commodities* (except classes A and B explosives), between points in the U.S.

Note.—The purpose of this application is to eliminate the gateways of Washington County, OH, and Wood County, WV. This application is directly related to No. MC-FC-81140 published in this same **Federal Register** issue.

For the following, please direct status calls to Team 4 at 202-275-7669.

Volume. No OP4-146

Decided: March 9, 1983.

By the Commission, Review Board No. 2. Members Carleton, Williams, and Ewing.

MC 146407(Sub-2,), filed February 9, 1983. Applicant: KING CARRIAGE CO., 2200 Victory Parkway, Cincinnati, OH 45206. Representative: Gilbert D. Kaffeman, 124 Madison Ave., Covington, KY 41011, (606) 491-3133. Transporting *general commodities* (except classes A and B explosives, between Cincinnati, OH, on the one hand, and, on the other, points in the U.S. (except AK and HI).

Volume. No OP4-145

Decided: March 9, 1983.

By the Commission, Review Board No. 3. Members Krock, Joyce, and Dowell.

MC-164967(Sub-1), filed January 14, 1983, previously noticed in the **Federal Register** Of February 15, 1983. Applicant: POCONO MOUNTAIN TRAILS, INC., Box 488 Blairstown, NJ 07825. Representative: Ronald I. Shapss, 450 Deventh Ave., New York, NY 10123, (212) 239-4610. Over regular routes, transporting *Passengers*, between Port Jervis, NY and Atlantic City, NJ, (a) from junction East Main St. and Jersey Ave., in Port Jervis, NY, to junction NJ Hwy 23, then over NJ Hwy 23 to Sussex, NJ, then over unnumbered Hwy to junction U.S. Rte. 206, at Montague, NJ, then over U.S. Rte. 206 to junction Interstate Hwy 295, then over Interstate Hwy 295 to junction access road, then over access road to Interstate Hwy 195, then over Interstate Hwy 195 to NJ route 539, then over NJ route 539 to junction access road, then over access road to Garden State Pkwy., then over Garden State Pkwy. to junction Atlantic City Expwy. then over Atlantic City Expy. to Atlantic City, NJ, and return over the same route, serving all intermediate points, and (b) from junction East Main St. and Jersey

Ave., in Port Jervis, NY over Jersey Ave. to junction Front St., then over Front St. to junction U.S. Rte. 209, then over U.S. Rte. 209 to junction PA Hwy. 611, then over PA Hwy 611 to junction 7th St., then over 7th St., to junction access roads, then over access roads to junction Interstate Hwy. 80, then over Interstate Hwy 80 to junction access roads then over access roads to junction U.S. Rte 46, then over U.S. Rte. 46 to junction NJ Rte. 31, then over NJ Rte. 31 to Junction Interstate Hwy 295, then over Interstate Hwy 295 to junction access roads, then over access roads to junction Interstate Hwy 195 then over Interstate Hwy 195 to NJ Rte. 539, then over NJ Rte. 539 to junction access roads, then over access roads to junction Garden State Pkwy., then over Garden State Pkwy. to junction Atlantic City Expwy., then over Atlantic City Expwy. to Atlantic City, and return over the same route, serving all intermediate points.

Note.—Applicant intends to provide regular-Route service in interstate or foreign commerce, and in intrastate commerce under 49 U.S.C. 10922(c)(2)(B) over the same route. The purpose of this republication is to modify the authority sought to show that applicant intends to provide regular-route service in intrastate commerce.

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods). The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified

statements filed on or before 45 days from the date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an application may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Restriction Removals; Decision-Notice

The following restriction removal applications, are governed by 49 CFR 1165. Part 1165 was published in the **Federal Register** of December 31, 1980, at 45 FR 86747 and redesignated at 47 FR 49590, November 1, 1982.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1165.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the restriction removal applications are not allowed.

Some of the applications may have been modified prior to publication to conform to the special provisions applicable to restriction removal.

Findings

We find, preliminarily, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent witht the criteria set forth in 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal statutory and regulatory requirements for common and contract carriers.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

Motor Carrier; Temporary Authority Applications

The following are notices of filing of applications for temporary authority under Section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3. These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the **Federal Register**

publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register**. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the ICC Regional Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

Notice No. F–245

The following applications were filed in Region 4. Send protests to: ICC, Complaint and Authority Branch, P.O. Box 2980, Chicago, IL 60604.

MC 100404 (Sub-4–1TA), filed March 1, 1983. Applicant: DAVID L. WALLACE d.b.a. DAVID L. WALLACE TRUCKING, 1629 7th Ave., Belle Fourche, SD 57717. Representative: David L. Wallace (same). *Contract carrier.* Irregular route: *Coconut shell activated carbon,* from Lead, SD to Helena, MT, under continuing contract with Homestake Mining Co., of Lead, SD. Supporting shipper: Homestake Mining Co., Lead, SD.

MC 138415 (Sub-4–2TA), filed March 2, 1983. Applicant: TRAILER EXPRESS, INC., Box 327, Topeka, IN 46571. Representative: Paul D. Borghesani, Katz & Borghesani, Suite 300, Communicana Bldg., 421 South Second St., Elkhart, Indiana 46516. *Contract* irregular: *Motor vehicles,* in truckaway service, from points in Elkhart County, Indiana, to points in the United States (except AK and HI), under continuing contracts with Utilimaster Corp. of Wakarusa, IN. Supporting shipper: Utilimaster Corporation, 65266 State Road 19, P.O. Box 461, Wakarusa, IN 46573.

MC 152256 (Sub-4–3TA), filed March 2, 1983. Applicant: GRAMMER INDUSTRIES, INC., Box 51, Grammer, IN 47236. Representative: Robert B. Hebert, Miller, Faires, Hebert & Woddell, P.C., Attorneys at Law, One Indiana Square, Suite 1600, Indianapolis, IN 46204 (317) 632–6262. *Fertilizer,* from Terre Haute, IN to points in OH, KY, MI and IL; from Danville and East St. Louis, IL to points in IN; from Mt Vernon, IN to points in IL and KY; from Huntington, IN to points in OH, and MI; from Aurora, IN to points in OH and KY; from Wilder, KY to points in OH and IN; and from Henderson, KY to points in IL. Supporting shippers: There are five supporting shippers. Their statements may be examined at the Regional Office listed.

MC 159203 (Sub-4–2TA) filed February 25, 1983. Applicant: ARGOSY TRUCKING, LTD., 260 Inglenook, Winnipeg, Manitoba, Canada. Representative: Robert S. Lee, 1600 TCF Tower, 121 So. 8th Street, Minneapolis, MN 55402. *Contract* irregular: *Lumber, wood products, paper and paper products* between ports of entry on the United States-Canada Boundary Line in ND and MN, on the one hand, and, on the other, points in the Upper Peninsula of MI, MN, ND and WI under continuing contracts with Boise Cascade Corporation and Boise Cascade Canada, Ltd. Supporting shippers: Boise Cascade Corporation of Boise, ID and Boise Cascade Canada, Ltd. of Kenora, Ontario, Canada.

MC 166424 (Sub-4–1TA) filed February 25, 1983. Applicant: HARMONY GROVE TRUCKING, INC., Route 3, Lodi, WI 53555. Representative: Richard A. Westley, Attorney, 4506 Regent Street, Suite 100, P.O. BILLING CODE 7020-02-M

[Investigation No. 337-TA-141]

Certain Copper-Clad Stainless Steel Cookware; Investigation

AGENCY: International Trade Commission.

ACTION: Institution of investigation pursuant to 19 U.S.C. 1337.

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on February 4, 1983, under section 337 of the Tariff Act of 1930, as amended, (19 U.S.C. 1337), on behalf of Revere Copper and Brass, Inc., 605 Third Avenue, New York, New York 10158. The complaint alleges unfair methods of competition and unfair acts in the importation into the United States of certain copper-clad stainless steel cookware, or in its sale, by reason of alleged (1) false representation of product; (2) false and deceptive advertising; (3) common law trademark infringement; (4) false designation of manufacturer and/or false designation of geographic origin; and (5) passing off. The complaint further alleges that the effect or tendency of the unfair methods of competition and unfair acts is to destroy or substantially injure an industry, efficiently and economically operated, in the United States.

The complainant requests the Commission to institute an investigation and, after a full investigation, to issue both a permanent exclusion order and a permanent cease and desist order.

Authority: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930 and in § 210.12 of the Commission's Rules of Practice and Procedure (19 CFR 210.12).

Scope of investigation: Having considered the complaint, the U.S. International Trade Commission, on March 3, 1983, ordered that—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, an investigation be instituted to determine whether there is a violation of subsection (a) of section 337 in the unauthorized importation into the United States of certain copper-clad stainless steel cookware, or in its sale, by reason of alleged (1) false representation of product; (2) false and deceptive advertising; (3) common law trademark infringement; (4) false designation of manufacturer and/or false designation of geographic origin; and (5) passing off, the effect or tendency of which is to destroy or substantially injure an industry, efficiently and economically operated, in the United States;

(2) For the purpose of the investigatior so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainant is Revere Copper and Brass Inc., 605 Third Ave., New York, New York 10158.

(b) The respondents are the following companies, alleged to be in violation of section 337, and are the parties upon which the complaint is to be served:

(c) Juan S. Cockburn, Esq., Unfair Import Investigations Division, U.S. International Trade Commission, 701 E Street NW., Room 128, Washington, D.C. 20436, shall be the Commission investigation attorney, a party to this investigation; and

(3) For the investigation so instituted, Donald K. Duvall, Chief Administrative Law Judge, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, shall designate the presiding officer.

Responses must be submitted by the named respondents in accordance with § 210.21 of the Commission's Rules of Practice and Procedure (19 CFR 210.21). Pursuant to §§ 201.16(d) and 210.21(a) of the rules, such responses will be considered by the Commission if received not later than 20 days after the date of service of the complaint. Extensions of time for submitting a response will not be granted unless good cause therefor is shown..

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a wavier of the right to appear and contest the allegations of the complaint and this notice, and to authorize the presiding officer and the Commission, without further notice to respondent, to find the facts to be as alleged in the complaint and this notice and to enter both an initial determination and a final determination containing such findings.

The complaint, except for any confidential information contained therein, is available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Room 156, Washington, D.C. 20436, Phone: 202-523-0471.

FOR FURTHER INFORMATION CONTACT: Juan S. Cockburn, Esq., Unfair Import Investigations Division, Room 120, U.S. International Trade Commission, telephone 202-523-1272.

By order of the Commission.

Issued: March 10, 1983.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-132]

Certain Hand-Operated, Gas-Operated Welding, Cutting and Heating Equipment and Component Parts Thereof; Prehearing Conference and Hearing

Notice is hereby given that a prehearing conference will be held in this case at 9:00 a.m. on April 18, 1983 in Room 201, Waterfront Center, 1010 Wisconsin Avenue, NW., Washington, D.C., and the hearing will commence immediately thereafter.

The purpose of the prehearing conference is to review the trial memoranda submitted by the parties, to stipulate exhibits into the record, and to discuss any questions raised by the parties relating to the hearing.

The Secretary shall publish this notice in the **Federal Register**.

Issued: March 8, 1983.

Janet D. Saxon,

Administrative Law Judge.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-132]

Certain Hand-Operated, Gas-Operated Welding, Cutting and Heating Equipment and Component Parts Thereof; Commission Decision To Review Initial Determination and Schedule for Filing Briefs

AGENCY: International Trade Commission.

ACTION: Notice is hereby given that the Commission has determined to review the presiding officer's initial determination denying temporary relief in the above-captioned investigation.

AUTHORITY: The authority for the Commission's disposition of this matter is contained in section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and in §§ 210.53 and 210.54 of the Commission's Rules of Practice and Procedure (47 FR 25134, June 10, 1982; to be codified at 19 CFR 210.53 and 210.54)

SUPPLEMENTARY INFORMATION: On February 7, 1983, the presiding officer issued an initial determination denying complainant's request for temporary relief. Complainant Victor Equipment Co. and the Commission investigative attorney have petitioned for review of the initial determination pursuant to § 210.54(a) of the Commission's rules.

After examining the petitions for review and a response thereto, the Commission concludes that there are issues warranting review. Specifically, the Commission will review the following questions: (1) Whether the temporary relief hearing conducted by the presiding officer violated due process of law as guaranteed by the 5th Amendment; (2) whether the temporary relief hearing violated the Administrative Procedure Act, 5 U.S.C. 551 *et seq.*; (3) whether the overall design of complainant Victor's welding equipment is functional (the parties are specifically requested to brief the issue of whether the Commission should apply the doctrine of "aesthetic functionality"); (4) whether the overall design of Victor's welding equipment has acquired "secondary meaning" (the parties are specifically requested to brief the issue of whether close and deliberate intentional copying raises a rebuttable presumption of secondary meaning under the Commission's decision in *Certain Novelty Glasses*, Inv. No. 337-TA-55, USITC Pub. No. 991 (July 1979), and, if so, whether respondents have rebutted the presumption); (5) whether there is a likelihood that complainant will succeed in establishing "passing off"; and (6) whether the domestic industry will incur "immediate and substantial harm" in the absence of temporary relief. The Commission's review will be limited to the issues listed above. No other issues will be considered. The record on review will be limited to evidence submitted at the temporary relief hearing. Persons submitting briefs are reminded that any arguments must be based on the evidentiary record before the presiding officer.

Commission hearing on violation: The Commission concludes that review of the initial determination as to violation of section 337(e) does not require oral argument in this instance. Accordingly, the Commission will not schedule a hearing on the issue of whether there is reason to believe that there has been a violation of section 337 at this time. Pursuant to § 210.56 of the rules, a party may submit a request for oral argument, which the Commission in its discretion may grant or deny. Any request should state with specificity the reasons that oral argument is appropriate.

Commission hearing on remedy, bonding and the public interest: If the Commission reverses the presiding officer's determination as to whether there is reason to believe there is a violation of section 337, the Commission will schedule and hold a hearing on the issues of remedy, bonding, and the public interest.

Written submissions: The parties to the investigation and interested Government agencies are encouraged to file briefs on the issue of whether there is reason to believe that there has been a violation of section 337. Such briefs must be filed not later than the close of business on March 24, 1983.

Additional information: Persons submitting briefs must file the original document and 14 true copies thereof with the Office of the Secretary on or before the deadlines stated above. Any person desiring to submit a document (or a portion thereof) to the Commission in confidence must request confidential treatment unless the information has already been granted such treatment by the presiding officer. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. Documents containing confidential information approved by the Commission for confidential treatment will be treated accordingly. All nonconfidential written submissions will be available for public inspection at the Secretary's Office.

Notice of this investigation was published in the **Federal Register** of October 6, 1982, 47 FR 44172.

Copies of the nonconfidential version of the presiding officer's initial determination and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202-523-0161.

FOR FURTHER INFORMATION CONTACT: Warren H. Maruyama, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202-523-0375.

Issued: March 9, 1983.

By order of the Commission.

Kenneth R. Mason,

Secretary.

[Investigation No. 337-TA-118]

Certain Sneakers With Fabric Uppers and Rubber Soles; Issuance of Exclusion Order

AGENCY: International Trade Commission.

ACTION: Issuance of exclusion order.

SUPPLEMENTARY INFORMATION: On February 28, 1983, the Commission unanimously determined with respect to the above-captioned investigation that there is a violation of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) in the importation of certain sneakers with fabric uppers and rubber soles into the United States, and in their sale, the effect or tendency of which is to substantially injure an industry, efficiently and economically operated, in the United States. In addition, the Commission determined that a general exclusion order pursuant to subsection (d) of section 337 is the most appropriate remedy for the violation found to exist, that the public-interest factors enumerated in subsection (d) do not preclude the issuance of such an order, and that the amount of the bond under subsection (g) of section 337 should be 266 percent of the entered value of the articles concerned. The Commission Action and Order and the Commission Opinion in support thereof were issued on March 9, 1983.

The notice instituting the investigation and defining its scope was published in the **Federal Register** on March 9, 1982 (47 FR 10103).

The Commission Action and Order, the Commission Opinion, and all other nonconfidential documents on the record of the investigation are available for public inspection Monday through Friday during official working hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Room 156, Washington, D.C. 20436, telephone 202-523-0471.

FOR FURTHER INFORMATION CONTACT: Catherine R. Field, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202-523-0143.

Issued: March 9, 1983.

BILLING CODE 7020-02-M

[Investigation No. 701-TA-87 (Final)]

Hot-Rolled Carbon Steel Plate From Brazil

Determination

On the basis of the record [1] developed in the subject investigation, the Commission determines, pursuant to section 705(b)(1) of the Tariff Act of 1930 (19 U.S.C. 1671d(b)(1)), that an industry in the United States is materially injured by reason of imports of hot-rolled carbon steel plate [2] which have been found by the Department of Commerce to be subsidized by the Government of Brazil.

Background

The Commission instituted this investigation effective June 14, 1982, following a preliminary determination by the Department of Commerce that there was a reasonable basis to believe or suspect that subsidies were being provided to manufacturers, producers, or exporters of hot-rolled carbon steel plate in Brazil.

Notice of the institution of the Commission's investigation and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, D.C., and by publishing the notice in the **Federal Register** on July 1, 1982 (47 FR 28847). The hearing was held in Washington, D.C., on September 1-3, 1982, and all persons who requested the opportunity were permitted to appear in person or by counsel.

On September 7, 1982, however, the Department of Commerce suspended its countervailing duty investigation concerning hot-rolled carbon steel plate from Brazil because of an agreement by the Government of Brazil to offset all benefits which Commerce found to constitute subsidies with an export tax on all exports of the subject merchandise to the United States (47 FR 39394, Sept. 7, 1982). Accordingly, pursuant to section 704(f)(1)(B) of the Tariff Act (19 U.S.C. 1671c(f)(1)(B)), the Commission also suspended its investigation (47 FR 41884, Sept. 22, 1982).

On September 22, 1982, a request to continue the investigation was filed with Commerce and the Commission pursuant to section 704(g)(2) of the Tariff Act (19 U.S.C. 1671c(g)(2)) by counsel for Republic Steel Corp., Inland Steel Co., Jones & Laughlin Steel, Inc., National Steel Corp. and Cyclops Corp. Similar requests were received from United States Steel Corp. on September 24, 1982, and from counsel for Bethlehem Steel Corp. on September 27, 1982. Accordingly, effective September 22, 1982, the Commission continued its investigation (47 FR 47707, Oct. 27, 1982).

The final determination by the Department of Commerce that subsidies are being provided in Brazil to manufacturers, producers, or exporters of hot-rolled carbon steel plate was published in the **Federal Register** on January 20, 1983 (48 FR 2568). As noted by the Department of Commerce in its final determination, "If the final determination by the ITC is negative, the suspension agreement shall have no force or effect. If the final determination by the ITC is affirmative, the suspension agreement shall remain in effect."

The Commission transmitted its report on the investigation to the Secretary of Commerce on March 7, 1983. A public version of the Commission's report, Hot-Rolled Carbon Steel Plate from Brazil (investigation No. 701-TA-87 (Final), USITC Publication 1356, March 1983), contains the views of the Commissioners and information developed during the investigation. Copies may be obtained by contacting the Office of the Secretary, 701 E Street NW., Washington, D.C. 20436, telephone (202) 523-5178.

By order of the Commission:

---

[1] The record is defined in § 207.2(i) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(i), 47 FR 6190, Feb. 10, 1982).

[2] For purposes of this investigation, the term "hot-rolled carbon steel plate" refers to plate provided for in items 607.8615, 607.9400, 608.0710, and 608.1100 of the Tariff Schedules of the United States Annotated (1983).

Issued: March 7, 1983.

BILLING CODE 7020-02-M

[332-155]

A Study on the Conditions of Competition Between Imported and Domestically Produced Pianos

AGENCY: International Trade Commission.

ACTION: Following receipt, on February 15, 1983, of a letter from the Subcommittee on Trade, Committee on Ways and Means, U.S. House of Representatives, the Commission instituted investigation No. 332-159 under section 332(b) of the Tariff Act of 1930 (19 U.S.C. 1332(b)), for the purpose of gathering and presenting information on the conditions of competition between imported and domestically produced pianos. The Commission will be seeking, in particular, information on price competition between Japanese and American made pianos and information on conditions within the domestic industry generally, including data on shipments, production, employment, productivity, and other relevant indicators.

EFFECTIVE DATE: March 3, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Ralph Watkins or Mr. Richardo Witherspoon, General Manufactures Division, U.S. International Trade Commission, Washington, D.C. 20436, telephone 202-724-0976 or 202-724-0978, respectively.

PUBLIC HEARING: A public hearing in connection with the investigation will be held in the Commission Hearing Room, 701 E Street NW., Washington, D.C. 20436, beginning at 10:00 a.m., e.d.t., on June 23, 1983, to be continued on June 24, 1983, if required. All persons shall have the right to appear by counsel or in person, to present information, and to be heard. Requests to appear at the public hearing should be filed with the Secretary, United States International Trade Commission, 701 E Street NW., Washington, D.C. 20436, not later than noon, June 16, 1983.

WRITTEN SUBMISSIONS: In lieu of or in addition to appearance at the public hearing, interested persons are invited to submit written statements concerning the investigation. Commercial or financial information which a submitter desires the Commission to treat as confidential must be submitted on separate sheets of paper, each clearly marked "Confidential Business Information" at the top. All submissions requesting confidential treatment must conform with the requirements of section 201.6 of the Commission's *Rules of Practice and Procedure* (19 CFR 201.6). All written submissions, except for confidential business information, will be made available for inspection by interested persons. To be assured of consideration by the Commission, written statements must be received no later than July 1, 1983. All submissions should be addressed to the Secretary at the Commission's Office in Washington, D.C.

Issued; March 7, 1983.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 731-TA-91; Final]

Sodium Nitrate [1] From Chile

Determination

On the basis of the record [2] developed in the subject investigation, the Commission determines, pursuant to section 735(b)(1) of the Tariff Act of 1930 (19 U.S.C. 1673d(b)(1)), that an industry in the United States is materially injured by reason of imports from Chile of industrial grade sodium nitrate which have been found by the Department of Commerce to be sold in the United States at less than fair value; and that an industry in the United States is not materially injured or threatened with material injury, and the establishment of an industry in the United States is not materially retarded, by reason of imports from Chile of agricultural grade sodium nitrate which have been found by the Department of Commerce to be sold in the United States at less than fair value.

Background

The Commission instituted this investigation effective November 15, 1982, following a preliminary determination by the Department of Commerce that there was a reasonable basis to believe or suspect that imports of sodium nitrate from Chile were being sold in the United States at less than fair value.

Notice of the institution of the Commission's investigation and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, D.C., and by publishing the notice in the **Federal Register** on December 1, 1982 (47 FR 54179). The hearing was held in Washington, D.C., on February 1, 1983, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its report on the investigation to the Secretary of Commerce on March 10, 1983. A public version of the Commission's Sodium Nitrate from Chile (investigation No. 731-TA-91 (Final), report, USITC Publication 1357, March 1983), contains the views of the Commissioners and information developed during the investigation. Copies may be obtained by contacting the Office of the Secretary, 701 E Street NW., Washington, D.C. 20436, telephone (202) 523-5178.

By Order of the Commission.

Issued: March 10, 1983.

Kenneth R. Mason,

Secretary.

[1] Sodium nitrate is provided for in item 480.2500 of the Tariff Schedules of the United States Annotated (1983). Agricultural grade sodium nitrate contains less than 98 percent, by weight, of sodium nitrate and industrial grade sodium nitrate contains 98 percent or more, by weight, of sodium nitrate.

[2] The record is defined in sec. 207.2(i) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(i), 47 FR 6190, Feb. 10, 1982).

DEPARTMENT OF JUSTICE

Office of the Attorney General

Consent Judgment in Resource Conservation and Recovery Act Enforcement Action; Ronald S. West et al.

In accordance with Departmental policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that a proposed consent judgment in *United States* v. *Ronald S. West, et al.*, Civil Action No. C 80-1342M, has been lodged with the United States District Court for the Western District of Washington. The consent judgment requires Chemical Processors, Inc. to maintain compliance with Federal statutes and regulations dealing with hazardous wastes at its Lucile Street facility in Seattle, Washington.

The consent judgment may be examined at (1) the office of the United States Attorney, Western District of Washington, 3600 Seafirst 5th Avenue Plaza, 800 Fifth Avenue, Seattle, Washington 98104, (2) the office of the Environmental Protection Agency, Region X, Office of Regional Counsel, 1200 6th Avenue, Seattle, Washington 98101, and (3) the Environmental

Enforcement Section, Land and Natural Resources Division, of the Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue, NW., Washington, D.C. 20530. A copy of the proposed consent judgment may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division, of the Department of Justice. The Department of Justice will receive comments relating to the consent judgment for a period of thirty (30) days from the date of this notice. Comments should be directed to the Assistant Attorney General for the Land and Natural Resources Division of the Department of Justice, Ninth Street and Pennsylvania Avenue, NW., Washington, D.C. 20530 and should refer to *United States* v. *Ronald S. West, et al.*, DOJ Reference #90–7–1–166.

Carol E. Dinkins,

Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

Drug Enforcement Administration

Oscar J. Jackson, M.D.; Denial of Application

On November 24, 1982, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration directed an Order to Show Cause to Oscar J. Jackson, M.D., 1628 Broadway, Vallejo, California 94590 (Respondent) seeking to deny the application Respondent executed December 5, 1981, for registration as a practitioner under 21 U.S.C. 823 in Schedules IIN, III, IIIN, IV, and V. The statutory ground for the Order under 21 U.S.C. 824(a)(2) was Respondent's conviction in the United States District Court for the Northern District of California on December 3, 1981, of one count of distribution of a controlled substance in violation of 21 U.S.C. 841(a)(1), a felony conviction relating to controlled substances. Respondent submitted a letter stating his position on the matters of fact and law involved and waiving his right to a hearing pursuant to 21 CFR 1301.54(c). The Acting Administrator has considered the file in this matter, including Respondent's submission, and enters this final order pursuant to 21 CFR 1301.54(e) and 1301.57.

The Acting Administrator finds that Dr. Jackson pled *nolo contendere* to one count of a 14-count indictment. The indictment and Respondent's plea stem from undercover purchases of prescriptions for controlled substances made by employees of the California Bureau of Investigation and Narcotic Enforcement. From May 20, 1980 to August 7, 1980, these employees purchased prescriptions for methaqualone, Empirin with codeine #4, Dexamyl and Ionamin from Respondent at his former office at 1352 Haight Street, San Francisco, California. Each of these prescriptions was issued in violation of the law and none of the prescriptions were medically justified. In each case Respondent conducted a cursory medical examination or no medical examination at all. On separate occasions a female employee of the Bureau of Investigation and Narcotic Enforcement obtained prescriptions from Respondent for Empirin #4, Dexamyl, methaqualone and Ionamin. On two occasions a male employee posing as her boyfriend obtained prescriptions for Empirin #4, Dexamyl and methaqualone. On one occasion Respondent sold precriptions for Empirin #4 and methaqualone to the female employee in the name of her "boyfriend." Two other female employees obtained prescriptions for methaqualone, Dexamyl and Empirin #4 with codeine from Dr. Jackson.

In his letter, Respondent states that he practiced naive and sloppy medicine. He describes his prescribing habits as lax and naive, and states that he did not intentionally commit the crimes to which he pled *nolo contendere*. He states that he practiced medicine in the Haight Ashbury section of San Francisco, a neighborhood with a large population of "poor, social misfits, addicts and mental patients." He states further that his actions were due at least in part to a lack of training regarding prescriptions. He is currently involved in educating other physicians in proper prescribing practices. Dr. Jackson concludes his letter by stating that he has suffered great mental anguish, financial loss and a loss of status in the medical community.

The Acting Administrator concludes that the denial of Respondent's application is the proper course of action in this matter after due consideration of all the facts in this matter, including Respondent's letter. Respondent's naivete or lack of training in proper handling of controlled substances simply does not excuse his actions in selling this quantity of drugs illegally. The Acting Administrator is not satisfied that Dr. Jackson will not continue to handle controlled substances improperly. While Dr. Jackson's desire to educate his fellow physicians is laudable, the Acting Administrator cannot conclude that Dr. Jackson is not capable of responsibility handling controlled substances.

A plea of *nolo contendere* to a controlled substance related felony results in a conviction under 21 U.S.C. 824(a)(2), and therefore can provide the ground for a denial of application. *Sokoloff* v. *Saxbe*, 501 F.2d 571 (2nd Cir. 1974). It is the decision of the Acting Administrator to deny the application for registration executed by Dr. Jackson on December 5, 1981. Accordingly, under the authority vested in the Attorney General by 21 U.S.C. 824 and redelegated to the Administrator of the Drug Enforcement Administration, the Acting Administrator hereby denies the Respondent's application for DEA registration effective April 15, 1983.

Dated: March 11, 1983.

Francis M. Mullen, Jr.,

Acting Administrator.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 19586; File No. ODD-83-1]

American Stock Exchange, Inc., et al.; Listed Options on Stock Indices

March 10, 1983.

On January 11, 1983, the American Stock Exchange, Inc. ("Amex"), 86 Trinity Place, New York, N.Y. 10006, the Chicago Board Options Exchange, Incorporated ("CBOE"), 141 West Jackson Boulevard, Chicago, IL 60604, and the New York Stock Exchange, Inc. ("NYSE"), 11 Wall Street, New York, NY 10005, pursuant to Rule 9b–1 under the Securities Exchange Act of 1934 (the "Act"), supplied to the Commission preliminary copies of an options

disclosure document with respect to standardized options on stock indices. On February 28, 1983, the exchanges filed a revised Stock Indices Options Disclosure Document with the Commission. The Stock Indices Options Disclosure Document is a supplement to the basic options disclosure document which was prepared by the Amex, CBOE, the Pacific Stock Exchange, Incorporated and the Philadelphia Stock Exchange, Inc. On October 18, 1982, the Commission issued an order allowing distribution of the basic options disclosure document to investors.[1]

Rule 9b–1 provides that an options market must file five preliminary copies of an options disclosure document with the Commission at least 60 days prior to the date definitive copies are furnished to customers unless the Commission determines otherwise having due regard to the adequacy of the information disclosed and the protection of investors. This provision is intended to permit the Commission either to accelerate or extend the time period before definitive copies of a disclosure document may be distributed to the public.

The Commission staff has reviewed the Stock Indices Options Disclosure Document and finds that it is consistent with the protection of investors and in the public interest to allow the distribution of the disclosure document as of the date of this order.[2]

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[1] *See* Securities Exchange Act Release No. 19153.

[2] Rule 9b–1 provides that the use of an options disclosure document shall not be permitted unless the options class to which the document relates is the subject of an effective registration statement on Form S–20 under the Securities Act of 1933. In this regard, on March 9, 1983, the Commission, pursuant to delegated authority, declared effective Options Clearing Corporation's Form S–20 registration statement with respect to the options described in the Stock Indices Options Disclosure Document. *See* File No. 2-82333.

[Release No. 19587; File No. SR–CBOE–22–20]

Chicago Board Options Exchange, Inc.; Order Approving Proposed Rule Change

March 10, 1983.

I. Introduction

In October 1982, the Chicago Board Options Exchange, Incorporated ("CBOE") LaSalle at Jackson, Chicago, Illinois 60604 filed with the Commission proposed rule changes to accommodate the listing and trading of options on stock indices generally, and proposed to commence trading initially the CBOE–100 Index option. The Commission approved both the proposed general enabling rule changes and the specifically proposed option contract based on the CBOE–100 Index, a newly-created broad market index.[1]

Following approval of these proposed rules, the CBOE filed with the Commisison, pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1) (the "Act"), and Rule 19b–4 thereunder, proposed rule changes providing minimum customer margin requirements applicable to customers holding "uncovered" short positions in stock index options. In addition, the exchange proposed a definition of a "covered" short position in a stock index option. Finally, the exchange proposed to adjust the value of the CBOE–100 Index by resetting the value of the index as of its starting date and to decrease the index multiplier from $500.00 as originally proposed, to $100.00. Subsequently, the exchange submitted an amendment providing for an adjustment of the minumum margin if and to the extent the index option is "out-of-the-money."[2]

II. Terms of the Proposed Rule Changes

The proposed rule changes providing for margins on stock index option positions establish a premium-based margin similar to the margins applicable to options on debt instruments.[3] In order respects, the proposed amendments are relatively minor adaptations to existing rules applicable to all options.

With respect to long positions in CBOE–100 stock index options, current exchange rules applicable to options on equity securities are unaltered. Specifically, no put or call option carried in a customer account is permitted to have loan value for the purpose of calculating margin, thereby requiring that the purchase price of an options contract be paid in full.

The CBOE proposes that, for options on the CBOE–100 Index that are issued, guaranteed or carried short in a customer's account, the minimum margin shall be 100 percent of the current market value of the option contract (*i.e.*, the current option premium) plus 10 percent of the current index value times the index multiplier.[4] However, that margin amount shall be decreased to the extent that the index option is "out-of-the-money."[5]

An exemption from the foregoing margin requirements would be provided for short positions that are fully covered. In the case of a call, a short options position would be considered covered if the customer held in the same account as the short position a long position in the same index option with the same index multiplier, where the expiration date of the long call is the same as or subsequent to the expiration date of the short call and the exercise price of the long call is equal to or less than the exercise price of the short call.[6] In the case of a put, a short options position would be considered covered if the customer held in the same account a long position in the same index option with the same index multiplier where the expiration date of the long put is the same as or subsequent to the expiration date of the short put and the exercise price of the long put is equal to or greater than the exercise price of the short put.[7]

The exchange has also proposed reduced margin requirements for partially covered positions. First, when the exercise price of the long call index

---

[1] The CBOE stock index option proposed rule changes were initially filed on October 14, 1982. Amendment No. 1 was filed on November 1, 1982. Notice of the proposed rule change and the amendment was given by Securities Exchange Act Release Nos. 19172 (October 25, 1982) and 19219 (November 8, 1982), and by publication in the Federal Register (47 FR 49512 (November 1, 1982) and 47 FR 51251 (November 12, 1982)). Approval of the proposed rule change, as amended, was given by Securities Exchange Act Release No. 19284, (November 22, 1982), 47 FR 53981 (November 30, 1982). *See* File No. SR–CBOE–82–11.

[2] The CBOE proposed rule filing providing minimum customer margin requirements relating to stock index options was filed on January 10, 1983. Amendment No. 1 was filed on February 8, 1983. *See* Securities Exchange Act Release Nos. 19419 (January 11, 1983) and 19500 (February 10, 1983), 48 FR 2615 (January 20, 1983) and 48 FR 7685 (February 23, 1983). *See* File No. SR–CBOE–82–20.

[3] *See, e.g.*, Securities Exchange Act Release No. 19128 (October 14, 1982), 47 FR 46029 (October 21, 1982) in which the Commission approved proposed rule changes with respect to margin for options on securities issued by the United States Department of the Treasury ("Treasury options"). *See* File Nos. SR–Amex–81–1, SR–CBOE–81–27 and SR–NYSE–81–16.

[4] CBOE Rule 24.11. For example, if the CBOE–100 Index had a closing value of 155.52, as on March 7, 1983, the minimum margin would be the current option premium plus $1550.52 (155.52 times $100 (the index multiplier) times .10 = $1550.52).

[5] An index call option contract is "out-of-the-money" to the extent that the aggregate exercise price of the option (*i.e.*, the stated index value times the index multiplier) exceeds the current value of the index times the index multiplier. A put option is "out-of-the-money" to extent that the current value of the index times the index multiplier exceeds the aggregate exercise price of the option.

[6] CBOE Rule 24.1(h).

[7] *Id.*

option (or short put index option) is greater than the exercise price of the offsetting short call index option (or long put index option) margin is required equal to the difference in aggregate exercise prices. Second, when a customer carries a short position in an index put option which is offset by a short position in an index call option, in which both the index call and put are subject to the same index multiplier, the margin required for the combined short positions shall be the greater of the margin required for the short put option or the short call option, plus the amount of any unrealized loss on the other option contract.[8]

The proposed rule change would redesignate the value of the CBOE–100 Index by resetting the value of the index at 100 (rather than 50) as of its starting date, and adjust the subsequent values accordingly. The rule change would also decrease the value of the multiplier from $500.00 to $100.00. The exchange has proposed these two changes with respect to the value of the index in order to improve the depth and liquidity of the market and so that the size of the contract would approximate the size of most equity options contracts.[9]

III. Discussion

Pursuant to Section 7 of the Act, 15 U.S.C. 78g, the Board of Governors of the Federal Reserve System (the "FRB") prescribes the rules and regulations with respect to the amount of credit that may be initially extended and subsequently maintained on any security, including options on securities. Subject to these minimum standards, exchanges may establish additional margin requirements.

Regulation T currently prescribes margin of 30 percent, subject to certain adjustments, for options on equity securities.[10] The staff of the Federal Reserve Board ("FRB") has noted that, while the CBOE's proposed margin for the CBOE–100 Index options contract is considerably lower than this margin level, it is roughly comparable to the margins set by the major futures exchanges on stock index futures contracts and on options on stock index futures.[11] The FRB staff indicated that it currently is working with the SEC and the Commodity Futures Trading Commission staffs on a comprehensive margin study, and is in the process of completing revising Regulation T. It has represented that modifications of Regulation T made necessary by these various new instruments will be incorporated in this revision. Until that time, the FRB staff has indicated that it would be consistent with prior FRB action involving options if initial margin for uncovered options on the CBOE–100 Index was established equal to the maintenance margin contained in CBOE rules approved by the Commission.[12]

Under Section 19(b)(2) of the Act, the Commission must approve a proposed rule change if it determines that it is consistent with the requirements of the Act and the rules thereunder applicable to national securities exchanges. Among other things, the Commission must find that a proposed rule is designed to protect investors and the public interest and does not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The Commission has examined carefully the margin rules submitted by the CBOE. The extension to options on stock indices, and, in particular, the CBOE–100, of the prohibition against long options positions having loan value in a margin account is fully consistent with the original application of the prohibition to options on equity securities. In particular, because an option represents a contractual right of a limited duration, an options contract is a wasting asset whose value diminishes as the expiration date approaches. In addition, because of the leverage involved, option premiums are subject to significant volatility. These features, which have been deemed to warrant a proscription against the purchase of equity options on margin as well as rendering such options unsuitable as collateral for the purchase of other securities, are equally applicable to options on stock indices.

For margin on uncovered short positions the exchange has developed a formula which it believes will yield margin deposits that will provide adequate credit protection for member firms. The exchange has developed these margin formulas by studying the historic volatility of the underlying CBOE 100 Index over seven business day periods.[13] The proposed margin formula yields an amount that covers a substantial percentage of seven day price movements. The Commission and the exchange believe that a formula designed to produce margin levels sufficient to cover nearly all but less than 100 percent of historic price movements is appropriate. In periods of significant price volatility, member firms can, and it is likely that they in fact would, require that margin deficiencies be eliminated in periods of less than seven days, and in response to a customer's failure to do so, can liquidate the customer's options position. Moreover, existing margin rules enable the CBOE at any time to impose higher margin requirements than are prescribed by its rules when it deems that such higher margin requirements are appropriate.[14]

In light of these considerations, the Commission believes that the proposed margin formula for uncovered short positions is appropriate.[15] Given the degree of financial leverage made possible by the proposed margin formula, however, the Commission remains concerned that unsophisticated and undercapitalized investors not be subjected to unreasonable risks of loss through transactions in stock index options. In this regard, the Commission wishes to emphasize to both the exchange and its member firms the need for rigorous application of exchange rules governing opening of accounts and suitability to ensure that market participants understand and are financially able to bear the risks of stock index options trading.[16]

---

[8] CBOE Rule 24.11(c) (1) and (2).

[9] The index would continue to be calculated in the same manner. For example, the closing value of the contract on March 7, 1983 was $15,552 (155.52 x $100.00).

[10] *See* 12 CFR 220.8(j)(1).

[11] *See* letter to Richard Ketchum, Associate Director, Division of Market Regulation, SEC, from Laura Homer, Securities Credit Officer, FRB, dated March 9, 1983 (the "FRB letter").

[12] In that regard, the FRB previously has amended Regulation T to provide that the appropriate margin for options on exempted debt securities shall be the amount specified by the rules of the national securities exchange on which the options are traded, provided those rules have been approved by the SEC. *See* 12 CFR 220.8(j)(2).

[13] Seven days is the maximum period of time permitted a customer under Regulation T to satisfy a deficiency in a margin account. 12 CFR 220.3(e). Member firms and exchanges, of course, are free to prescribe a shorter period of time.

[14] CBOE Rule 12.3(d).

[15] For this reason, and consistent with the position taken by the FRB staff in the FRB letter, the Division of Market Regulation would not recommend that the Commission take action under Regulation T provided the margin requirements of the instant CBOE rule change, and the other terms and conditions set forth in the FRB letter, are complied with, even if that results in margin less than that set forth in Regulation T for equity security options.

[16] The Commission notes, however, because of the unique cash settlement nature of stock indices, a market participant with a covered position such as a long and short position in an index option with the same exercise price (a "calendar spread"), may nevertheless be partially at risk. This would occur if the participant was assigned an exercise notice on its short position and was unable to close out or exercise its long position at a price equal to the price at which it was exercised on its short position. The Commission intends to monitor the experience of market participants in this area to determine if modification of the margin rules is required.

The Commission also finds that the proposed changes to the value of the index and composition of the index are appropriate.

IV. Findings and Conclusion

On the basis of the foregoing, the Commission finds that the proposed rule changes are consistent with the requirements of the Act and the rules and regulations thereunder and, in particular, the requirements of Section 6 and the rules and regulations thereunder.[17]

Further, the Commission finds good cause for approving the proposed amendment providing for an adjustment of margin when an index option is "out-of-the-money" prior to the thirtieth day after the date of publication of notice of filing thereof for a number of reasons. First, the amendment providing for reduced margin for out-of-the-money options would conform, in this respect, the requirements for proposed stock index option margin to the requirements in place for all other exchange-traded options. This amendment therefore would eliminate a financial obligation not deemed necessary for other options contracts and may thereby enhance the depth and liquidity of the new market. Second, since the CBOE plans to commence trading in the CBOE–100 stock index options on March 11, 1983, absent the accelerated approval of this filing, as amended, broker-dealers would be required to develop computer programs for stock index option margin accounts or manually process accounts with transactions in index options on a temporary basis until the out-of-the-money adjustment was approved. Either procedure would impose substantial administrative burdens and operational costs. Thus, although the amendment providing for "out-of-the-money" adjustments is not absolutely essential to the initiation of stock index options trading, the accelerated approval of this amendment will eliminate confusion and significantly reduce regulatory and administrative burdens on broker-dealers preparing to trade the CBOE–100 stock index option.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and hereby is, approved.

[17] The margin rules that the Commission is approving today are those applicable to options on broad market indices such as the CBOE–100 Index. Different margin rules may be appropriate for more narrow based, or sector indices.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 19588; SR-CBOE-83-2]

Chicago Board Options Exchange, Inc.; Filing and Order Granting Accelerated Approval of Proposed Rule Change and Amendment To Proposed Rule Change

March 10, 1983.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on February 18, 1983, and March 8, 1983, the Chicago Board Options Exchange, Incorporated ("CBOE") LaSalle at Jackson, Chicago, Illinois 60604, filed with the Securities and Exchange Commission, respectively, the proposed rule change and the proposed amendment to the proposed rule change as described herein. The Commission is publishing this notice to solicit comments on the proposed rule change as amended from interested persons.

The CBOE proposes to amend Rule 24.1(g) to provide that the "closing index value" means the last index value reported on a business day. The purpose of this amendment is to eliminate confusion as to the effect of a value of an index corrected after 3:30 p.m. Central Standard Time ("CST"). Instead the CBOE will report a definitive closing index value approximately one hour after the close of trading, which will be used to determine the amount of cash that must be delivered to settle on exercise and to determine margin requirements.

Secondly, the CBOE proposes Rule 24.1(h) to provide that the term "reporting authority" with respect to a particular index means the institution or reporting service designated by the Exchange as the official source for calculating and disseminating the current value of the index. Although the CBOE will be the reporting authority for the CBOE–100 Index, in the future, the CBOE may wish to designate another entity as the reporting authority for the CBOE–100 stock index or some other index that will be the basis for options trading.

Finally, the proposed Rule 24.12 proposes to limit the liability of the exchange as a result of errors, omissions or delays in calculating of disseminating the current index value resulting from an act, condition or cause beyond the reasonable control of the Exchange, or any error, omission or delay in the reports of the current index value by the Exchange. The purpose of proposed Rule 24.12 is to clarify that CBOE liability resulting from an error, omission or delay in calculating or disseminating the current index value must be based on a failure of the exchange to exercise reasonable care.

Interested persons are invited to submit written data, views and arguments concerning the submission within 21 days from the date of publication in the **Federal Register.** Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, Washington, DC 20549. Reference should be made to File No. SR–CBOE–83–2.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room. Copies of the filing and of any subsequent amendments also will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization.

The Commission finds that the proposed rule change and the proposed amendment to the proposed rule change are consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of Section 6 and the rules and regulations thereunder.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof, in that the commencment of CBOE stock index options trading is imminent and the Commission believes that the proposed rule changes are appropriate and desirable. First, the Commission believes it is desirable to determine a definitive index closing value in order to eliminate confusion in settlement procedures relative to stock index options. Secondly, the Commission believes it is appropriate to approve the CBOE rules relating to its liability so that these rules are effective prior to the commencement of trading.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule change referenced above, be, and it hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 19585; (SR-CBOE-83-3)]

Chicago Board Options Exchange, Inc.; Filing and Order Granting Accelerated Approval of Proposed Rule Change

March 10, 1983.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on March 4, 1983, the Chicago Board Options Exchange, Incorporated ("CBOE") LaSalle at Jackson, Chicago, Illinois 60604, filed with the Securities and Exchange Commission the proposed rule change as described herein. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.[1]

The CBOE is proposing two rule changes relating to the trading, exercise and clearance of stock index options. First, proposed rule 24.13 provides that the opening rotation for stock index options shall be held as soon as practicable after the openings of securities representing 50 percent of the aggregate market value of the index have occurred on the principal exchange where the securities are traded. At that time, the Order Book Official shall open first those series of a class which have the nearest expiration. Thereafter, the Order Book Official shall open the remaining series in a manner he deems appropriate. After one and one-half hours following the opening rotation, trading in the stock index option shall become subject to Rule 24.7, which provides that trading in the index option shall be halted whenever trading in underlying stocks, whose weighted value represents more than 20 percent of the aggregate market value of the index, is halted or suspended. Pursuant to proposed rule 24.13, however, he may also suspend trading in the index option prior to the one and one-half hour period set forth in rule 24.7, if the CBOE determines such a suspension would be in the public interest.

Second, the CBOE proposes to amend CBOE Rule 11.1, titled "Exercise of Option Contracts," to provide supplemental procedures for the exercise of stock index options.[2] Specifically, member organizations must accept from all customers and market makers exercise instructions for stock index options up until, but no later than 3:10 p.m., Central Standard Time ("CST"). The notice of exercise must be time-stamped at the time it is received or prepared. Second, a memorandum to exercise a stock index option contract issued or to be issued in a firm account must be prepared no later than 3:10 p.m. The above provisions, however, would not be applicable to expiring series on the business day preceding expiration.

The proposed rule change concerning the opening rotation is intended to provide for the prompt opening of stock index options on a daily basis based on the current market value of a significant portion of the index. The exchange believes the 50 percent standard balances the concerns of opening trading in a derivatively-priced index option without complete opening price information on all stocks comprising the index against the need for generally prompt opening rotations necessary to establish a fair and orderly market and enhance market liquidity.

The CBOE's proposed rule change with respect to the exercise of index options will enable persons holding long positions to tender exercise notices on a given day knowing the value of the index at the close of trading. Conversely, in order to protect holders of short positions in index options from unanticipated events occurring after the close of the market, no exercise notice may be issued in a firm account after 3:10 p.m. CST, the close of trading of the options on the CBOE. The exchange believes that these supplemental procedures relating to the exercise stock index options are necessary and appropriate. First, by the extension of the exercise cut-off time to 3:10 p.m. CST, the holder of a long position is able to properly value the index option, since settlement is based on the value of the index at the time of the closing of the market. Secondly, however, because a writer of a stock index option, as a result of cash settlement, is unable to cover his position in the same manner as the writer of an equity option, the prohibition against exercise after 3:10 p.m. CST provides the appropriate protection for persons holding short positions at the end of the day against changes that occur subsequent to the close of the market.

Interested persons are invited to submit written data, views and arguments concerning the submission within 21 days from the date of publication in the Federal Register. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, Washington, D.C. 20549. Reference should be made to File No. SR-CBOE-83-3.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room. Copies of the filing and of any subsequent amendments also will be available for inspection and copying at the principal office of the above mentioned self-regulatory organization.

The Commission finds, for the reasons noted above, that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of section 6 and the rules and regulations thereunder.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof, in that the commencement of CBOE stock index options trading is imminent and the Commission believes that the proposed rule change is critical to a fair and efficient commencement of index options trading for the reasons suggested above. The Commission had requested previously that the exchange consider the proposed rule change which the exchange subsequently submitted. Accordingly, the Commission finds that it is in the public interest to approve the proposed rule change prior to the thirtieth day after the date of publication of notice of filing because the Commission believes these rules provide fair and orderly opening rotations and exercise procedures.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule change referenced above, be, and it hereby is, approved.

---

[1] CBOE had filed an earlier rule change SR-CBOE-83-3 which it has withdrawn.

[2] CBOE Rule 11.1, to be amended by adding proposed section .04 to "Interpretations and Policies" of Rule 11.1.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-6859 Filed 3-15-83; 8:45 am]
BILLING CODE 8010-01-M

[Release No. 19590; File No. SR-CBOE-83-6]

Chicago Board Options Exchange, Inc.; Filing and Order Granting Accelerated Approval of Proposed Rule Change

March 10, 1983.

The Chicago Board Options Exchange, Incorporated ("CBOE") LaSalle at Jackson, Chicago, Illinois 60604, submitted on March 9, 1983, copies of a proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act") and Rule 19b-4 thereunder, to amend its Rule 4.16 with respect to restrictions on exercise of index options. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The proposed rule change would except index options from the general rule barring the CBOE Board of Directors from imposing or continuing restrictions on exercise of an option during the ten business days prior to the option's expiration date. Instead, for index options, this period would be reduced so that restrictions could be in effect until the opening of business on the last trading day before the expiration date.

Interested persons are invited to submit written data, views and arguments concerning the submission within 21 days from the date of publication in the **Federal Register**. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, Washington, DC 20549. Reference should be made to File No. SR-CBOE-83-6.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room. Copies of the filing and of any subsequent amendments also will be available at the principal office of the above-mentioned self-regulatory organization.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities exchanges and, in particular, the requirements of Section 6 and the rules and regulations thereunder.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof, in that the commencement of CBOE stock index options trading is imminent and the Commission believes that the proposed rule change is desirable since it will allow the CBOE Board of Directors to reduce the advantage arising for those in long positions over those in short positions during trading halts in the last ten business days prior to expiration. The advantage arises from the ability of longs to exercise during the trading halt, receiving in settlement the cash difference between the exercise price and the last index value, while shorts are locked into their positions by virtue of the trading halt. The proposed rule change gives CBOE the flexibility needed to minimize this advantage and to meet extraordinary circumstances as they arise. Unless the Commission approved the proposed rule change before the commencement of trading, all series of CBOE-100 index options opened at the commencement of trading would be subject to the 10-day limitation until those series expired, and only with respect to options series opened after the approval of the proposed rule change could the CBOE impose exercise restrictions until the final day of trading. Accordingly, the Commission finds that it is in the public interest to approve the proposed rule change prior to the thirtieth day after the date of publication of notice of filing.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule change referenced above, be, and it hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13067; (812-6094)]

E.F. Hutton & Company, Inc.; E.F. Hutton Life Insurance Co.; and the Variable Accumulation Separate Account of E.F. Hutton Life Insurance Co.; Applicaton for an Order of Exemption

March 9, 1983.

Notice is hereby given that E.F. Hutton & Company, Inc. ("E.F. Hutton"), One Battery Park Plaza, New York, New York 10004, E.F. Hutton Life Insurance Company ("Hutton Life") and the Variable Accumulation Separate Account of E.F. Hutton Life Insurance Company ("Account") 11011 North Torrey Pines Road, P.O. Box 2700, La Jolla, California 92038, (collectively the "Applicants") filed an application on January 27, 1982 and amendments thereto on October 14, 1982, January 7, 1983, and March 2, 1983, for an order pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act"), for exemptions from the provisions of Sections 2(a)(32), 2(a)(35), 17(f), 22(c), 27(c)(1), 27(c)(2), and 27(d) of the Act and Rules 17f-2 and 22c-1 thereunder, to the extent necessary to permit the transactions described in the application. All interested persons are referred to the application and amendments on file with the Commission for a statement of the representations contained therein, which are summarized below, and are referred to the Act and Rules thereunder for a statement of the relevant provisions.

Hutton Life established the Account, which is registered under the Act as a diversified open-end management investment company, to fund variable accumulation contracts ("Contracts"). E.F. Hutton, which is under common control with Hutton Life, is the principal underwriter of the Contracts, the Account's investment adviser, and also may perform brokerage services for the Account. Purchase payments under the Contracts will be allocated to one or more of three series of the Account (money market, equity, and bond and income), and all assets of the Account will be deposited in the safekeeping of Croker National Bank ("Bank"), whose functions and facilities are supervised by federal banking authorities.

Hutton Life will deduct an asset charge equal to 1.19% of the average daily net assets of the Account. This charge is comprised of a mortality risk charge and an expense risk charge which on an annual basis will equal .84% and .35%, respectively. Applicants assert that this asset charge is reasonable and compares favorably

with charges of other comparable separate accounts, and the basis for this assertion is reflected in documents on file with the Applicants.

Hutton Life will deduct a $30 contract maintenance charge on December 31 of each year. This charge is also imposed when a Contract is initially purchased, but is prorated based upon the number of days remaining in the calendar year. There is no refund of any portion of this charge if a Contract is surrendered on a date other than December 31, and Hutton Life reserves the right to change the amount of the charge, with Commission approval. Applicants assert that this charge is designed to cover the costs of administrative services related to the maintenance of each Contract (not including expenses of administering the Account), and that it does not include a profit element.

Purchase payments which have been deposited under a Contract for six years or more may be withdrawn without charge, and one withdrawal per contract-year will be exempt from any charge on amounts up to 10% of the value of the Contract. A contingent deferred sales charge will be imposed upon additional withdrawals at the rate of 5% for a payment on deposit one year or less, declining by 1% for each additional year the payment has been on deposit. Withdrawals are handled on a first-in, first-out basis, and no charge will be imposed on withdrawn amounts in excess of aggregate purchase payments.

Any premium taxes with respect to a Contract will be paid by Hutton Life when due and deducted from the contract value upon annuitization. However, when state law does not permit postponement of the deduction of premium taxes until annuitization, premium taxes will be deducted from premiums when received.

The Account pays an investment advisory fee to E.F. Hutton, the Account's adviser, at an annual rate of .40% of the average daily net assets of the money market and bond and income series and .50% of the average daily net assets of the equity series. In arranging the purchase and sale of portfolio securities E.F. Hutton may deal with such members of securities exchanges, brokers or dealers, including itself, as may in its best judgment provide prompt and reliable execution of the transaction at favorable security prices and reasonable commission rates. In selecting broker-dealers for a particular portfolio transaction, E.F. Hutton will consider all relevant factors, including the execution capabilities required by the transaction, the importance of speed, efficiency or confidentiality, and a broker-dealer's apparent familiarity with sources from whom or to whom particular securities might be purchased or sold.

Applicants state that when E.F. Hutton receives compensation for effecting portfolio transactions on behalf of the Account the requirements of Section 17(e)(2)(A) of the Act and Rule 17e–1 thereunder will be met. These provisions generally require that commissions paid to E.F. Hutton not exceed amounts which are reasonable and fair compared to the commissions received by other brokers in connection with comparable transactions involving similar securities being purchased or sold on a securities exchange during a comparable period of time. Additionally, the board of driectors of the Account, including a majority of the directors who are not "interested persons" of the Account, must adopt and review annually procedures designed to provide that commissions paid to an affiliated broker adhere to the standards set forth in the Rule. The Account's procedures necessitate a review and comparison of commission rates of brokers able to provide comparable services and best execution, as well as a review of the discounts allowed by the affiliated broker to its most favored customers involving comparable securities at a similar period of time, to ensure that when the affiliated broker is utilized the Account receives commission rates at least as favorable as the rates charged the affiliated broker's most favored customers.

The Account proposes to maintain custody of its own investments in accordance with Rule 17f–2. However, with regard to Rule 17f–2(d), Applicants propose that the designees of the Account's board resolution relating to access to the investments be officers or responsible employees of Hutton Life, rather than of the Account, and that representatives of the California Department of Insurance be provided access in the same manner as representatives of the Account's independent public accountant. In this regard, Applicants state that Hutton Life is subject to extensive regulation by the California Department of Insurance which conducts periodic examinations of Hutton Life's functions and physical facilities, and that such supervision and the safekeeping arrangements described in the application protect the Account's assets sufficiently to satisfy the pruposes of relevant statutory provisions.

Applicants state that to the extent the Bank does not take physical delivery of certain securities or assets purchased by the Account, the requirements of Section 17(f) of the Act and the rules thereunder will be met.

Relief Requested

Applicants request the following exemptions: from Sections 2(a)(32), 2(a)(35), 22(c), 27(c)(1), 27(c)(2), and 27(d) of the Act and Rule 22c–1 thereunder to the extent deemed necessary or appropriate to impose the contingent deferred sales charge; from Section 27(c)(2) to the extent deemed necessary or appropriate to impose the contract maintenance charge and asset risk charge, and to deduct the investment advisory fee and premium taxes; and from Section 17(f), Rule 17f–2 thereunder, and Section 27(c)(2) to the extent deemed necessary or appropriate to allow the custodial arrangements described above.

Section 6(c) of the Act authorizes the Commission to exempt any person, security, or transaction from the provisions of the Act and rules promulgated thereunder if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than March 31, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicants at the addresses stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 19581; File No. SR-CBOE-82-18]

Filing and Immediate Effectiveness of Proposed Rule Change; Chicago Board Options Exchange, Inc.

March 10, 1983.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on November 9, 1982, the Chicago Board Options Exchange, Incorporated filed with the Securities and Exchange Commission the proposed rule change as described herein. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The rule change as proposed establishes fines of $100 (for the first offense in a calendar quarter) and $500 (for subsequent offenses in the same quarter) against members whose clerks are observed accessing any analytical data terminal on the Board of Trade Building's eighth floor. The rule change's purpose is to control access to the terminal by limiting use to members and thus provide for orderly administration of the Exchange pursuant to Section 6(b)(5) of the Act.

The foregoing change has become effective, pursuant to Section 19(b)(3)(A) of the Act and subparagraph (e) of Rule 19b-4 under the Act.

Interested persons are invited to submit written data, views and arguments concerning the submission within 21 days after the date of publication in the **Federal Register**. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, DC 20549. Reference should be made to File No. SR-CBOE-82-18.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room. Copies of the filing and of any subsequent amendments also will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-6855 Filed 3-15-83; 8:45 am]

BILLING CODE 8010-01-M

Midwest Stock Exchange, Inc.; Applications for Unlisted Trading Privileges and of Opportunity for Hearing

March 10, 1983.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to Section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the following stocks:

Verbatim Corporation
Common Stock, No Par Value (File No. 7-6543)
Newhall Investment Properties
Depositary Receipts for Units of Interest (File No. 7-6544)
Newhall Resources
Depositary Receipts for Units of Interest (File No. 7-6545)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before March 31, 1983 written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[File No. 22-12349]

Union Tank Car Co.; Application and Opportunity for Hearing

March 11, 1983.

Notice is hereby given that Union Tank Car Company (the "Applicant") has filed an application under clause (ii) of Section 310(b)(1) of the Trust Indenture Act of 1939 (the "Act") for a finding that the trusteeship of The First National Bank of Chicago under two existing indentures which were not qualified under the Act, and under another existing indenture which was qualified under the Act, is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify The First National Bank of Chicago from acting as successor trustee under such qualified indenture.

Section 310(b) of the Act provides in part that if a trustee under an indenture qualified under the Act has or shall acquire any conflicting interest it shall within ninety days after ascertaining that it has such conflicting interest, either eliminate such conflicting interest or resign. Subsection (1) of such Section provides, in effect, with certain exceptions, that a trustee under a qualified indenture shall be deemed to have a conflicting interest if such trustee is trustee under another indenture under which any other securities of the same issuer are outstanding. However, under clause (ii) of Subsection (1), there may be excluded from the operation of this provision another indenture under which other securities of the issuer are outstanding, if the issuer shall have sustained the burden of proving, on application to the Commission and after opportunity for hearing thereon, that trusteeship under such qualified indenture and such other indenture is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify such trustee from acting as trustee under either of such indentures.

The Applicant alleges that:

(1) The First National Bank of Chicago is presently acting as Trustee under the Company's Series C-1 Deed of Trust and Mortgage dated as of September 15, 1974, and Series P-1 Equipment Trust Agreement dated as of April 1, 1974. The aggregate principal amount of Series C-1 First Mortgage Sinking Fund Equipment Notes outstanding as of February 28, 1983 was $16,770,000 and the aggregate principal amount of Series P-1 Equipment Trust Certificates outstanding as of February 28, 1983 was $56,470,000.

(2) Wells Fargo Bank, N.A., which presently serves as Trustee for the Applicants Series 16 Equipment Trust Agreement dated as of June 1, 1979, has indicated its intention to resign as Trustee on an appropriate date subsequent to April 5, 1983. The aggregate principal amount of Series 16 Equipment Trust Certificates outstanding as of February 28, 1983 was $80,000,000.

(3) The Applicant desires to appoint The First National Bank of Chicago as Successor Trustee for the Series 16 Equipment Trust and The First National Bank of Chicago has indicated its agreement to so act.

(4) The Equipment Trust Certificates (or, in the case of Series C–1, the First Mortgage Sinking Fund Equipment Notes) issued under the Series 16, Series C–1 and Series P–1 Trust Agreements are each secured by a separate lot of identified railroad cars so that, should The First National Bank of Chicago, as the successor Trustee for the Series 16 Equipment Trust or as the Trustee for the Series C–1 or Series P–1 Equipment Trusts, have the occasion to proceed against the security of any one of these Equipment Trusts, such action would not affect the security, or the use of any security, under the other Equipment Trusts. Thus, the existence of the other trusteeships should in no way inhibit or discourage the Trustee's action.

(5) The Applicant is not in default under any of its Equipment Trust obligations.

The Applicant has waived notice of hearing, and any and all rights to specify procedures under the Rules of Practice of the Commission with respect to the application.

For a more detailed statement of the matters of fact and law asserted, all persons are referred to said application, which is a public document on file in the offices of the Commission at 450 5th Street, NW., Judiciary Plaza, Washington, D.C. 20549.

Notice is further given that any interested person may, not later than April 5, 1983, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application which he desires to controvert, or he may request that he be notified if the Commission should order a hearing thereon.

Any such request should be addressed: Secretary, Securities and Exchange Commission, 450 5th Street, N.W., Judiciary Plaza, Washington, D.C. 20549. At any time after said date, the Commission may issue an order granting the application upon such terms and conditions as the Commission may deem necessary or appropriate in the public interest and in the interest of investors, unless a hearing is ordered by the Commission.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34–19571; File No. SR–MCC–83–1]

Self-Regulatory Organizations; Proposed Rule Change; Midwest Clearing Corp.; Relating To MCC's Policy Regarding Bookentry Movements

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on February 4, 1983 the Midwest Clearing Corporation filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Rule 6, Section 5 of the Rules of the Midwest Clearing Corporation is hereby amended as follows:

Additions Italicized—[Deletions Bracketed]

Rule 6

Delivery and Withdrawal of Securities and Cash Settlement Activity Reports; Cash Settlement

Sec. 5. No change in text.

[The following should be added as new paragraph to Sec. 5.]

Notwithstanding any provision in these Rules to the contrary, any action taken by the Corporation pursuant to an instruction received by the Corporation for a Participant (the "deliverer") to deliver securities from the deliverer's account to the account of another Participant at MSTC (the "receiver") by bookentry on a business day for which, pursuant to such instruction, payment is to be made by the receiver through the facilities of the Corporation shall, notwithstanding the nature of such action, not constitute an entry on the books of the Corporation reducing the account of the deliverer and increasing the account of the receiver by the amount of the obligation or the number of shares or rights subject to the instruction until the earlier of (the "effective time") (a) the time it is finally determined by the Corporation that the receiver has a "collect" cash settlement or (b) the time the receiver pays any balance due the Corporation ("pay" cash settlement), as finally determined by the Corporation for such business day, to the Corporation in the manner specified in these Rules. In the event the Corporation, prior to the effective time, ceases to act for the Participant with respect to transactions generally pursuant to Rule 15 or ceases to act for the Participant pursuant to Rule 16, the Corporation shall have the right either:

(i) to retain in the deliverer's account the securities which are subject to the instruction and

(a) if the deliverer's money account with the Corporation shall have been credited with the amount of money to be paid in respect of such instruction and the deliverer shall not have effected its money settlement with the Corporation for such business day, to charge the deliverer's money account for such business day by such amount, or

(b) if the deliverer's money account with the Corporation shall have been credited with the amount of money to be paid in respect of such instruction and the deliverer shall have effected its money settlement with the Corporation for such business day to charge the deliverer's money account for such business day by such amount, which amount shall be settled by the deliverer in its money settlement with the Corporation on the next business day.

or

(ii) to complete the transaction contemplated by the instruction, sell out the securities subject to the instruction, and credit the proceeds of such sale to the receiver's money account with the Corporation;

provided, however, that the securities subject to such an instruction have not been

(i) transferred out of the receiver's account by book entry for value, or

(ii) physically withdrawn by the receiver and physically delivered by the receiver to a third party for value.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at

the places specified in Item IV below. The self-regulatory orgainzation has prepared summaries, set forth in sections (A), (B) and (C) below of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the proposed rule change is to clarify MCC's rights with respect to bookentry movements (Depository Delivery Instructions—DDI's) between participants for value. Under the rule, if MCC receives a DDI versus payment from a participant, the receiving participant defaults on payment, and MCC ceases to act for the receiving participant prior to payment, MCC has the right to either reverse the instruction and return the securities to the delivering participant's position or credit such participant's account for payment and sell out the securities. The proposed rule change merely sets forth MCC's rights under the existing legal relationship between MCC and its participants regarding bookentry movements. MCC merely acts as agent for its participants and makes the bookentry movements upon instructions from its participants. The rule explicitly sets forth that MCC Rules do not guarantee payment against bookentry transfers or third party deliveries, and that MCC is performing delivery services solely on behalf of, and for the account of, its participants and is only obligated to deliver to its participants those funds which it actually receives from the parties to whom securities are delivered.

The interpretation is consistent with Section 17(A)(b)(3) fo the Securities Exchange Act of 1934, in that it helps assure the safeguarding of securities and funds which are in the custody or control of MCC or for which it is responsible.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Midwest Clearing Corporation does not believe that any burdens will be placed on competition as a result of the proposed rule change.

(C) Self-Regulatoy Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

Comments were solicited, but none were received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3) of the Securities Exchange Act of 1934 and subparagraph (e) of Securities Exchange Act Rule 19b–4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the proposes of the Securities Exchange Act of 1934.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, D.C. Copies of the filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted within 21 days after the date of this publication.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-6665 Filed 3-15-83; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-19578; Amdt. No. 1 to File No. SR-Amex-82-20]

Self-Regulatory Organizations; Proposed Rule Change; American Stock Exchange, Inc.; Amendment of Exchange Rule 462

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on February 28, 1983, the American Stock Exchange, Inc. filed with the Securities and Exchange Commission Amendment No. 1 to the above filing to reflect changes in the Statement and Terms of Substance in Item I and the Statement of Purpose in Item II below. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The American Stock Exchange, Inc. ("Amex" or the "Exchange") is amending SR–Amex–82–20 to provide that margin for a short put or short call may be reduced by the amount that the option is out-of-the-money, subject to a minimum margin of the amount of the option premium plus 2% of the product of the current index group value and the index multiplier applicable to the option contract.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(1) *Purpose.* In File No. SR–Amex–82–20, the Exchange proposed that the minimum margin requirements for stock index options be an amount equal to the option premium plus 10% of the product of the current index group value and the index multiplier applicable to the option contract. No reduction in margin requirements was provided for out-of-the-money options. The determination of margin levels was based on an economic study of margin systems conducted by the Amex and on comments by the SEC. (The study was attached to the original submission.)

The study had demonstrated that adequate coverage for stock index options was provided when the amount of margin held for a customer uncovered short position was equal to the option

premium plus 5% of the product of the current index group value times the index multiplier. Pursuant to SEC request, the Amex increased the "add-on" percentage to 10%.

The proposed margin system was based on the assumption that, if the margin held for a customer uncovered short option position was equal to the amount of the option premium after an unfavorable price change occurred in the underlying security, the broker-dealer was protected since he could liquidate the option without loss if the customer failed to provide additional margin. The Exchange designed the system based on anticipated price changes in deep-in-the-money options since the premium changes of such options are approximately equal to the changes in underlying security prices (the hedge ratio is approximately one).

As our study notes, even at the 5% add-on level the proposed margins are higher than necessary for at- or out-of-the-money options since the system requirements are based on hedge rations of one, whereas the hedge ratios for at- or out-of-the-money options are normally much lower. With a 10% "add-on" percentage, out-of-the-money options could be greatly overcovered and therefore the amount of margin required can be safely reduced as the option moves out-of-the-money. As an example, even with the proposed out-of-the-money reduction, the margin would be premium plus 5% when the option was 5% out-of-the-money.

Accordingly, the Exchange has amended Rule 462(d)(2)(D) to provide that the margin for a short put or short call may be reduced by the amount that the option is out-of-the-money, subject to a minimum margin of the amount of the option premium plus 2% of the product of the current index group value and the index multiplier.

The Exchange considers that, from a good faith standpoint, more than adequate coverage is being provided by the proposed change. Overmargining of out-of-the-money options would inhibit the use of the proposed options without providing any compensating benefits.

(2) *Basis.* The proposed rule changes are consistent with the requirements of the Securities Exchange Act of 1934 (the "1934 Act") and the rules and regulations thereunder applicable to the Exchange, and, in particular, Section 6(b)(5) of the 1934 Act, in that they would promote just and equitable principles of trade and protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change will have no impact on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within thirty-five days of the date of publication of this notice in the **Federal Register** or within such longer period: (i) As the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding; or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 5th Street, NW., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 5th Street, NW., Washington, D.C. 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should be submitted within 21 days after the date of this publication.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: March 9, 1983.

George A. Fitzsimmons,

Secretary.

Exhibit A—American Stock Exchange, Inc.

It is proposed that Rule 462 be amended as follows. (Brackets [ ] indicate words to be deleted; italics indicate changes previously filed with the Commission and arrows ►◄ indicate proposed new changes.)

Rule 462. Minimum Margins

(a) through (d)(2)(B)—no change.

(C) For purposes of this paragraph (d)(2), obligations issued by the United States Government shall be referred to as United States Government obligations. Mortgage pass-through obligations guaranteed as to timely payment of principal and interest by the Government National Mortgage Association shall be referred to as GNMA obligations.

The terms "stock index group", "stock index option", "current index group value", "exercise price", and "index multiplier", when used with reference to a stock index option, shall have the meanings set forth in Rule 900C.

The terms "current market value" *and "current market price"* [of], *when used with reference to an option contract,* shall mean the total cost or net proceeds of the option [transaction] *contract* on the day [the option] *it* was purchased or sold and at any other time shall [be] *mean* the preceding business day's closing price of that option *contract* [as shown by] *indicated by* any regularly published reporting or quotation service.

(D) Subject to the exceptions set forth in subparagraphs (F) through (K) of this paragraph (d)(2) the minimum margin on any put or call issued, guaranteed or carried "short" in a customer's account shall be:

(i)—no change.

(ii)—no change.

(iii) In the case of puts and calls *listed or traded on a registered national securities exchange and representing options on stock index groups, 100% of the current market value of the option contract plus 10% of the product of the current index group value and the index multiplier applicable to the option contract.* ►In each case, the amount shall be decreased by any excess of the aggregate exercise price of the option over the product of the current index group value and the applicable index multiplier in the case of a call, or any excess of the product of the current index group value and the applicable index multiplier over the aggregate exercise price of the option in the case of a put; provided, however, that the

minimum margin required on each such option contract shall not be less than 100% of the current market value of the option contract plus 2% of the product of the current index group value and the applicable index multiplier.◄

BILLING CODE 8010-01-M

[Release No. 13068; (812-5403)]

Bank of Boston Canada; Filing of an Application

March 10, 1983.

Notice is hereby given that Bank of Boston Canada ("Applicant"), Suite 300, 1550 Maisonneuve Blvd. West, Montreal, Quebec, Canada, filed an application on December 17, 1982, for an order of the Commission pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act") exempting Applicant from all provisions of the Act. All interested persons are referred to the applicaton on file with the Commission for a statement of the representations contained therein, which are summarized below.

According to the application, Applicant is a wholly-owned subsidiary of The First National Bank of Boston ("FNBB"), a national banking association incorporated under the National Bank Act which in turn is a wholly-owned subsidiary, except for directors' qualifying shares, of First National Boston Corporation ("FNBC"), a Massachusetts corporation and a bank holding company registered under the Bank Holding Company Act of 1956. Applicant states that FNBB is and has been for many years the largest commercial bank in New England and, on June 30, 1982, ranked as the seventeenth largest commercial bank in the United States in terms of deposits. FNBC, according to Applicant, is the largest bank holding company in the Commonwealth of Massachusetts and on June 30, 1982, ranked as the eighteenth largest bank holding company in the United States in terms of assets. Applicant represents that it was incorporated as a bank under the provisions of the Canadian Banks and Banking Law Revision Act, 1980 ("Canadian Bank Act") and its charter was approved on May 27, 1982. For the year ended October 31, 1982, Applicant had consolidated assets of $34,537,000 (Canadian), deposits of $14,029,000 (Canadian) and stockholders' equity of $6,887,000 (Canadian).

Applicant represents that its principal business consists of receiving deposits and engaging in lending activities of the type normally undertaken by commercial banks. Applicant states that it provides a wide range of commercial banking services to its clients, including making loans to individuals and entities such as commercial, corporate, multinational, and energy enterprises, government units and other banks. Additionally, Applicant, through its wholly-owned factoring subsidiary, Boston Factors of Canada, Inc., engages in the business of factoring, as permitted under Canadian law. At October 31, 1982, loans of various types represented approximately 51% of Applicant's assets, and, as of the same date, income from such loans are stated to have represented 28% of Applicant's total gross revenues, gross income from interest on time deposits placed with other banks constituted approximately 13% of Applicant's total gross revenues and gross fee income from Applicant's factoring activities represented approximately 60% of Applicant's total gross revenues.

Applicant represents that it is subject to regulation pursuant to the Canadian Bank Act by the Canadian federal government, which exercises exclusive jurisdiction over the Canadian banking industry. In addition to general supervision and annual examination by the Inspector General of Banks to assure compliance with Canadian banking laws which, according to Applicant, imposes various restrictions and limitations on its activities, Applicant represents that it is required to file various weekly, monthly, quarterly, and annual reports with the Inspector General of Banks and/or the Bank of Canada. These reports include information pertaining to Applicant's deposits, directors, assets and liabilities, revenues, expenses and changes in capital and reserves, and interest rates on loans. Applicant also states that it is subject to established primary reserve requirements and must maintain secondary reseves in amounts prescribed by the Bank of Canada. As a national bank, FNBB is subject to regulation by the Comptroller of the Currency, the Federal Deposit Insurance Corporation, and the Board of Governors of the Federal Reserve System.

Applicant proposes to issue and sell promissory notes in the United States, which notes will be unconditionally guaranteed as to principal and interest by FNBB (the "Promissory Notes"), pursuant to Section 3(a)(2) of the Securities Act of 1933 ("1933 Act"), which specificially exempts from registration the sale of notes guaranteed by a bank. Other possible alternatives are the issuance and sale of debt securities to qualified investors in private placements pursuant to the exemption from registration provided by Section 4(2) of the 1933 Act ("Private Placement Notes"), the issuance of commercial paper pursuant to the exemption from registration provided by Section 3(a)(3) of the 1933 Act ("Commercial Paper Notes"), other offerings of debt securities that would be exempt from the registration requirements of the 1933 Act and registered public offerings of debt securities (collectively with the Promissory Notes, the Private Placement Notes and the Commercial Paper Notes, "Debt Securities"). Applicant states that Debt Securities issued pursuant to an offering in the United States will rank *pari passu* among themselves, equally with all other unsecured, unsubordinated indebtedness of Applicant, including Applicant's deposit liabilities, and ahead of its equity securities.

Regardless of the alternative or alternatives utilized, Applicant represents that it will appoint an agent for service of process in any suit, action or proceeding on the Promissory Notes and with respect to the offer and sale of any other Debt Securities it may offer in the United States in the future. Applicant further represents that it will expressly submit to the jurisdiction of any state or federal court located in the City of Boston, Massachusetts in any such suit, action or proceeding instituted by any holder of a Debt Security, except to the extent that it contests the manner of service on its agent. Applicant represents that it will also be subject to suit in any other court in the United States which would have jurisdiction because of the manner of the offering of the Debt Securities or otherwise and that the appointment of its agent to accept service of process and the consent to jurisdiction will be irrevocable until all amounts due and to become due in respect of the Debt Securities have been paid or set aside.

The Applicant represents that any Commercial Paper Notes issued pursuant to Section 3(a)(3) of the 1933 Act will be prime quality and sold in minimum denominations of $100,000 to the types of institutional and other sophisticated investors who normally purchase commercial paper in the United States commercial paper market and Applicant undertakes to ensure that such Commercial Paper Notes will not be advertised or offered for sale to the general public. In addition, the Commercial Paper Notes will arise out of and/or generate funds for "current transactions", be of a type eligible for discounting by Federal Reserve Banks and have a maturity of nine months or less, exclusive of days of grace.

Applicant further represents that Commercial Paper Notes issued pursuant to Section 3(a)(3) of the Act will have received prior to issuance one of the three highest investment grades from at least one nationally recognized statistical rating organization and Applicant's General Counsel or Assistant General Counsel in the United States shall have certified that such rating has been received.

Applicant undertakes to ensure that each dealer in the Commercial Paper Notes (or Applicant itself or its affiliate if a dealer is not used) will provide to each offeree who has indicated an interest in such Commercial Paper Notes, prior to any purchase thereof, a memorandum describing the business of Applicant, FNBB and FNBC and containing the most recently published audited financial statements of FNBC and Applicant. Such memorandum will describe any material differences between Canadian accounting principles applicable to Applicant and generally accepted accounting principles employed by United States banks. Such memorandum will be at least as comprehensive as those customarily used in offering commercial paper in the United States and will be updated periodically to reflect material changes in FNBC's and Applicant's business or financial status. In the case of any other offerings of Debt Securities in the United States, such offerings will be made only pursuant to a registration statement under the 1933 Act or pursuant to an applicable exemption from registration under such Act, and any such offering will be made on the basis of disclosure documents appropriate and customary for such registered or exempted offering and in any event at least as comprehensive as those used in offerings of similar debt securities in the United States by United States issuers. Applicant undertakes to ensure that such disclosure documents will be provided to each offeree who has indicated an interest in such securities prior to any sale of such securities to such offeree, except that in the case of an offering made pursuant to a registration statement under the 1933 Act, such disclosure documents will be provided to such persons and in such manner as may be required by the 1933 Act and the pertinent rules and regulations thereunder. Applicant consents to having any order granting the relief requested under Section 6(c) expressly conditioned upon its compliance with the foregoing undertakings regarding disclosure documents.

Applicant represents that it will not issue and sell any Debt Securities pursuant to Section 3(a)(2), 3(a)(3)and/or 4(2) of the 1933 Act or pursuant to other available exemptions under the 1933 Act until it has received an opinion of its General Counsel or Assistant General Counsel in the United States to the effect that, under the circumstances of the proposed offering, the Debt Securities will be entitled to an exemption from registration provided by the appropriate section of the 1933 Act. The Applicant states that it will not request Commission review or approval of such counsel's opinion letter regarding the availability of an exemption under the 1933 Act, and the Commission expresses no opinion as to the availability of any such exemption.

Section 6(c) of the Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security or transaction, or any class or classes of persons, securities or transactions from any provision or provisions of the Act or any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant asserts that this type of exemption would serve the public interest by making available to institutional and other sophisticated investors in the United States the debt securities of foreign banks. Applicant contends that without exemptive orders, such investors would be unable to purchase debt securities issued by foreign banks such as Applicant which are representing an increasingly important segment of the short-term, prime quality securities available for purchase in the United States. Applicant submits that an exemption would be consistent with the protection of investors because of the existing regulatory structures to which Applicant, FNBB and FNBC are subject which afford protection to investors. In addition, Applicant asserts that the anti-fraud provisions of the federal securities laws would also be available for the protection of investors. Applicant contends that Congress specifically exempted United States banks from the Act and that the business of banking in Canada and the United States is similar.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than April 4, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13089; (811-3551)]

CCI Cash Trust; Filing of Application

March 10, 1983.

Notice is hereby given that CCI Cash Trust ("Applicant"), 8900 Keystone Crossing, Suite 685, Indianapolis, Indiana 46240, registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified, management investment company, filed an application on January 31, 1983, for an order of the Commission, pursuant to section 8(f) of the Act and Rule 8f-1 thereunder, declaring that Applicant has ceased to be an investment company as defined by the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant states that it is a business trust validly existing and in good standing under the laws of Indiana. Applicant states further that it registered under the Act on August 19, 1982, when its Notification of Registration on Form N-8A and Registration Statement of Form N-1 ("Registration Statement") were filed pursuant to the Act. Applicant states that its original filings were under the name "Compound Cash Trust." Applicant maintains that the primary reason that it determined to file the application and windup its business affairs is that, during the registration process under the Act, banks and other financial institutions were authorized to

offer deposit accounts which are competitive with money market mutual funds. Applicant's business objective was to sell its shares to customers of banks as part of "sweep" programs. Applicant further maintains that, as a result of Congressional and regulatory actions, it is now unlikely that any banks will offer new sweep programs and will instead offer their own deregulated deposit accounts. Applicant is not now engaged and does not propose to engage, in any business activities other than those necessary for the winding-up of its affairs.

Applicant represents that there have been two sales made of securities of which it is the issuer. Applicant represents further that the first sale took place on August 6, 1982, of 1,000 shares for $1,000 in cash in connection with Applicant's organization. Applicant states further that the second sale took place on December 6, 1982, of 99,000 shares for $99,000 in cash in connection with the filing of Amendent No. 1 to Applicant's Registration Statement. Applicant maintains that both sales were made pursuant to private offering exemptions under Federal and Indiana law. Applicant further maintains that no offers or sales pursuant to the prospectus contained in Applicant's Registration Statement have been made.

Applicant states that, at January 26, 1983, its assets were $100,650.25. Applicant states further that all of its assets are invested in a money market account at First National Bank of Columbus. Applicant states that it had one securityholder at the time of the filing of the application and that no distribution to Applicant's securityholder has been made to date in connection with the winding-up of Applicant's affairs.

Applicant states that the only debts or other liabilities that Applicant will be responsible for are the normal operating and deferred expenses that accrue until the time the assets are distributed to the sole shareholder. Applicant states that accrued expenses through January 26, 1983, were $106.60. Applicant's adviser, Compound Capital, Inc., has agreed to assume all debts and liabilities of Applicant, including non-accrued expenses incurred in registering under the Act.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than April 4, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his/her interest, the reasons for his/her request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. after said date, an order disposing of the application will be issued unless the commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 19585; (SR-NYSE-83-4)]

New York Stock Exchange, Inc.; Order Approving Proposed Rule Change

March 10, 1983.

The New York Stock Exchange, Inc. ("NYSE"), 11 Wall Street, New York, New York 10005, submitted on January 20, 1983, copies of a proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act") and Rule 19b-4 thereunder, to alter the qualification examination requirements for supervisory analysts. NYSE Rule 344, as amended, will require a supervisory analyst candidate to either: (1) Pass an Exchange Supervisory Analysts Examination or (2) successfully complete Level I of the Chartered Financial Analyst (CFA) Examination, (in lieu of the existing requirement of completion of Level I, II and III of the CFA Examination) and pass the part of the Exchange Supervisory Analysts Examination dealing with Exchange rules on research standards and related matters.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by the issuance of a Commission Release (Securities Exchange Act Release No. 19454, January 27, 1983) and by publication in the **Federal Register** (48 FR 4944, February 3, 1983). No comments were received with respect to the proposed rule filing.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of Section 6 and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

DEPARTMENT OF STATE

[CM-8/510]

Advisory Committee on International Investment, Technology, and Development; Meeting

The Department of State will hold a meeting of the Working Group on Multilateral Investment Standards for MNES and U.N. Activities of the Advisory Committee International Investment, Technology, and Development on Wednesday, April 13, 1983, from 10:00 a.m. to 1:00 in Room 1040 Foreign Service Institute, 1400 Key Boulevard, Arlington, Va. 22209. The meeting will be open to the public.

The purpose of the meeting will be to discuss U.S. preparations for the UNCTAD VI meeting to be held in June in Belgrade, Yugoslavia and to review the results of the March 7–18 special session of the UN Commission on Transnational Corporations on the UN Code of Conduct on Transnational Corporations.

Requests for further information on the meeting should be directed to Philip T. Lincoln, Jr., Department of State, Office of Investment Affairs, Bureau of Economic and Business Affairs, Washington, D.C. 20520. He may be reached by telephone on (area code 202) 632–2711.

Members of the public wishing to attend the meeting must contact Mr. Lincoln's office in order to arrange entrance to the Foreign Service Institute building.

The Chairman of the Working Group will, as time permits, entertain oral comments from members of the public attending the meeting.

Dated: March 8, 1983.

3

FEDERAL RESERVE SYSTEM

Time and date: 10 a.m., Monday, March 21, 1983.

PLACE: 20th Street and Constitution Avenue, NW., Washington, D.C.20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Proposed acquisition of check sorters within the Federal Reserve System.
2. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.
3. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board (202) 452–3204.

Dated: March 11, 1983.

James McAfee,

Associate Secretary of the Board.

4

HARRY S. TRUMAN SCHOLARSHIP FOUNDATION

TIME AND DATE: 10 a.m., Friday, April 8, 1983.

PLACE: Board room, 712 Jackson Place, NW., Washington, D.C. 20006.

STATUS: The meeting will be open to the public.

MATTERS TO BE CONSIDERED: Portions open to the public:

1. Call meeting to order. Check quorum.
2. Adoption of proposed agenda.
3. Approval of minutes of September 13, 1982 meeting.
4. Report of Chairman.
5. Report of President.
6. Report of Executive Secretary.
7. Report of General Counsel.
8. Discussion of Awards Ceremony.
9. New Business.
10. Set date for next meeting in September, 1983.

Portions closed to the public:

1. Selection of Truman Scholars for 1983–84.

CONTACT PERSON FOR MORE INFORMATION: Malcolm C. McCormack, Executive Secretary, telephone, 202–395–4831.

March 11, 1983.

Malcolm C. McCormack,

Executive Secretary.

Part II

Department of Health and Human Services

Public Health Service

Indian Health; Persons to Whom Service Will Be Provided

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

42 CFR Part 36

Indian Health; Persons To Whom Service Will be Provided

AGENCY: Department of Health and Human Services.

ACTION: Final rule.

SUMMARY: This final rule will restrict the conditions under which IHS can provide services to non-Indians as beneficiaries to situations involving a pregnancy, acute infectious diseases or public health hazards. This will conform the regulations to Pub. L. 97–394.

EFFECTIVE DATE: December 30, 1982.

FOR FURTHER INFORMATION CONTACT: Mr. Richard J. McCloskey, Indian Health Service, Room 6A–14, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone 301–443–1116.

SUPPLEMENTARY INFORMATION: The fiscal year 1983 Appropriation Act for the Department of the Interior and Related Agencies, Pub. L. 97–394, which includes the appropriation for the Indian Health Service, was signed into law by the President on December 30, 1982. The law contains the following provision restricting eligibility of non-Indians for IHS services:

> Provided further, That notwithstanding current regulations, eligibility for Indian Health Services shall be extended to non-Indians in only two situations: (1) A non-Indian woman pregnant with an eligible Indian's child for the duration of her pregnancy through post-partum, and (2) non-Indian members of an eligible Indian's household if the medical officer in charge determines that this is necessary to control acute infectious disease or a public health hazard.

Current regulations at 42 CFR 36.12(a)(1) grant eligibility to the non-Indian wife of an eligible Indian on the basis that her health is integral to the health of the Indian family. In response to criticism that the regulation discriminates on the basis of sex, we published a notice of proposed rulemaking on December 16, 1980 (45 FR 82839) which proposed amending the regulation to extend eligibility to (1) The non-Indian spouse (husband or wife) of an eligible Indian, and (2) certain other non-Indian members of an Indian's immediate family considered eligible under current IHS policy and practice. In order to avoid discrimination based upon sex during the rulemaking proceedings, we announced in the preamble to the proposed rule that the IHS will serve the non-Indian husband of an eligible Indian residing with the Indian pending issuance of the final rule.

Enactment of the above provision by Congress supersedes the previous rulemaking proceeding. Consequently, we are issuing a final rule to conform regulations to the new law. Under the final rule issued here, non-Indians may be regarded as IHS beneficiaries only in the two exceptional situations stated in the new law.

The first exception is serving a non-Indian woman pregnant with an eligible Indian's child. IHS care would be limited to the period of the woman's pregnancy through postpartum (generally about six weeks after delivery). In cases where the woman is not married to the Indian under applicable state or tribal law, paternity must be acknowledged in writing by the Indian or determined by order of a court of competent jurisdiction.

The second exception is serving non-Indian members of an eligible Indian's household if the medical officer in charge determines that this is necessary to control acute infectious disease or a public health hazard. The determination will be a professional judgment based upon the particular circumstances.

We note that the first exception is not sex discrimination. The Supreme Court has ruled that an eligibility classification based upon pregnancy is not, in itself, sex discrimination. Rather, pregnancy is viewed as a physical condition which distinguishes two groups of persons—pregnant women and nonpregnant persons of both sexes. Based upon this reasoning the court has upheld the exclusion of pregnancy from coverage under disability benefit plans, where benefits were otherwise afforded on the same basis to both sexes. *Geduldig* v. *Aiello*, 417 U.S. 484 (1974); *General Electric Co.* v. *Gilbert*, 429 U.S. 125 (1976). In *Geduldig* the Court observed:

> Absent a showing that distinctions involving pregnancy are mere pretexts designed to effect an invidious discrimination against the members of one sex or the other, lawmakers are constitutionally free to include or exclude pregnancy from coverage of legislation such as this on any reasonable basis, just as with respect to any other physical condition. 417 U.S. at 496–7, n. 20.

Care of the non-Indian mother during pregnancy has a direct effect on the health of her Indian child which is unique and immediate due to her condition. As such, pregnancy may be rationally singled out from otherwise serving non-Indians.

This final rule makes no substantive change with respect to the eligibility of *Indians* for IHS services. It also does not preclude treatment of non-beneficiaries on a fee basis where otherwise authorized by law. Examples are treatment of non-beneficiaries in cases of emergency authorized by section 322(b) of the Public Health Service Act, 42 U.S.C. 249(b), and regulations at 42 CFR 36.14; treatment of non-indigent non-beneficiaries in Alaska under 48 U.S.C. 49; and treatment of beneficiaries of other Federal programs under Economy Act arrangements, 31 U.S.C. 686(a).

Publication of a Final Rule

Rulemaking procedures under the Administrative Procedure Act (5 U.S.C. 553) generally involve publication of a notice of proposed rulemaking, affording interested persons the opportunity to comment, and publication of the final rule after consideration of the comments received. However, the statute allows the agency to dispense with notice and comment procedures:

> (B) When the agency for good cause finds (and incorporates the finding and a brief statement of reasons therefore in the rules issued) that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest.

In this case notice and comment procedures are unnecessary because, as explained above, this rule is issued to conform regulations to congressional action.

We also note that the APA requires publication of a substantive rule not less than 30 days before its effective date (5 U.S.C. 553(d)) except—

> (3) As otherwise provided by the agency for good cause found and published with the rule.

Because this rule is issued to conform regulations to congressional action, we think there is good cause for making the rule effective on the date that Pub. L. 97–394 was signed into law, namely December 30, 1982.

Determination Concerning Impact of the Rule

The Secretary certifies, pursuant to section 605(b) of the Regulatory Flexibility Act, that this regulation will not have a significant economic impact on a substantial number of small entities because it concerns the eligibility of a small group of beneficiaries for care delivered primarily at IHS facilities. The Secretary has also determined, in accordance with Executive Order 12291, that this rule does not constitute a "major rule" because it will not have an annual effect on the economy of $100 million or more, result in a major increase in costs or prices for consumers, any industries, any

governmental agencies or geographic regions, or have significant and adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

List of Subjects in 42 CFR Part 36

Alaska Natives, American Indians, Eskimos, Health Care, Indians.

Dated: February 3, 1983.

Edward N. Brandt, Jr.,

Assistant Secretary for Health.

Approved: March 2, 1983.

Thomas R. Donnelly, Jr.,

Acting Secretary.

PART 36—[AMENDED]

Title 42, Part 36, § 36.12(a)(1) is revised to read as follows:

§ 36.12 Persons to whom services will be provided.

(a) *In general.* (1) Services will be made available, as medically indicated, to persons of Indian descent belonging to the Indian community served by the local facilities and program. Services will also be made available, as medically indicated, to a non-Indian woman pregnant with an eligible Indian's child but only during the period of her pregnancy through postpartum (generally about 6 weeks after delivery). In cases where the woman is not married to the eligible Indian under applicable state or tribal law, paternity must be acknowledged in writing by the Indian or determined by order of a court of competent jurisdiction. The Service will also provide medically indicated services to non-Indian members of an eligible Indian's household if the medical officer in charge determines that this is necessary to control acute infectious disease or a public health hazard.

Department of the Interior

Minerals Management Service

Gulf of Alaska/Cook Inlet Leasing Offering; Call for Information

4310-MR

UNITED STATES
DEPARTMENT OF THE INTERIOR
MINERALS MANAGEMENT SERVICE
Gulf of Alaska/Cook Inlet
Lease Offering (October 1984)
Call for Information

Purpose of Call

The purpose of the Call is to assist the Secretary of the Interior in carrying out his responsibilities under the Outer Continental Shelf Lands Act (43 U.S.C. 1331-1343), as amended (92 Stat. 629), and regulations appearing at 30 CFR 256.23. Potential bidders are requested to outline areas where they believe hydrocarbons may occur or where they have an interest in leasing in the Gulf of Alaska and Cook Inlet. The Secretary is also requesting comments from all interested parties--Federal, State, and local governments, environmental groups, the general public, and potential bidders--on possible environmental effects and use conflicts in the Call area, and on the appropriateness of initial lease terms longer than 5 years and lease areas larger than 5,760 acres (2,331 hectares).

Use of Information from Call

Information submitted in response to this Call will be considered in the area identification which selects the areas of hydrocarbon potential to be proposed for leasing and analyzed in the environmental impact statement as the proposed Federal action. This information will also be used in identifying alternatives to the proposed action. Comments received on possible environmental effects and use conflicts may be used in the analysis of local environmental conditions within the Call area so that the potential effects of oil and gas exploration and development, other than the benefits accruing to the Nation as a result of inventorying and producing oil and gas, can be assessed. These comments may also be useful in developing special lease terms and conditions designed to assure safe offshore operations. Comments submitted regarding length of lease term and size of lease areas may be used in the assessment of the appropriate initial lease term and appropriate lease size, pursuant to section 8 of the OCS Lands Act, as amended (43 U.S.C. 1337).

Description of Area

The general location is offshore the State of Alaska in the Gulf of Alaska and Cook Inlet. The Gulf of Alaska area of this Call is bounded on the east and north by the Federal/State three geographic mile line and by 133° 30' W. longitude from the International boundary to the Kennedy Entrance of Cook Inlet. It is bounded approximately on the west by a line originating at 151° 45' W. longitude, proceeding along 59° N. latitude east to 148° W. longitude, thence south to 58° N. latitude, thence east along 58° N. latitude to 147° W. longitude, thence south to 53° N. latitude, thence east to 141° W. longitude, thence east along the U.S./Canada jurisdiction line to approximately 133° 30' W. longitude.

The Cook Inlet area of this Call is generally bounded by the Federal/State three geographic mile line on the west; by the three geographic mile line off Kalgin Island on the north; by the Barren Islands at the Kennedy and Stevenson Entrances to Cook Inlet on the east; and on the south in the Shelikof Strait by approximately 57° N. latitude.

Indications of interest and comments may be considered for all Federal acreage within the boundaries of the Call. Boundaries of the Call area are represented on Maps A, B, and C appearing at the end of this Call. Boundaries of the Call area are depicted in detail on the standard Call for Information Maps, available free from the Regional Manager, Alaska OCS Region, P.O. Box 1159, 620 East 10th Ave., Anchorage, Alaska 99510.

The following list identifies the Official Protraction Diagrams in this Call. All Federal blocks are included in the Call area, unless otherwise specified. The Diagrams may be purchased for $2.00 each from the Regional Manager, Alaska OCS Region.

NO 5-4,	Afognak	(Approved July 3, 1975): Only Federal blocks: 1-7, 45-51, 89-95, 133-139, 177-183, 221-227, 265-270, 309-313, 353-356, 397-399, 441-443, 485, 486, 529, and 573.

Instructions on Call

Indications of interest from potential bidders should be limited to the Federal acreage included in the Call area described above. Respondents should indicate interest in those portions of the Call area which they have identified as having potential for the discovery of oil and gas. Those indicating interest are requested to do so on standard Call for Information Maps, available free from the Regional Manager, Alaska OCS Region, at the address stated in the second paragraph under "Description of Area," telephone (907) 276-2955.

These three standard Call Maps show the Call area, which coincides with the area identified by the Minerals Management Service (MMS) as having potential for the discovery of oil and gas. Each of these standard Call Maps covers a portion of the Call area corresponding to each of the three maps appearing at the end of this notice. Although individual indications of interest are considered to be privileged and confidential information, the names of persons or entities indicating interest or submitting comments will be of public record.

Respondents are encouraged to broadly rank areas according to priority of interest (e.g., priority 1 (high), 2, or 3). Priority information submitted by companies will be held confidential and may be used as a criterion in determining the area to be analyzed in the environmental impact statement.

In addition to indications of interest, we are seeking comments from all interested parties about particular geological, environmental, biological, archaeological, or socioeconomic conditions or problems, or other information which might bear upon potential leasing and development of particular areas. Comments should preferably address broad areas but may be restricted to designated blocks of particular concern.

Comments are also being sought from all interested parties on the appropriateness of initial lease periods longer than 5 years and on the need, if any, for lease areas larger than 5,760 acres (2,331 hectares). Such comments should describe why such modifications would be appropriate and identify where such modifications should be applied. Those making comments are requested to mark the area commented upon on the standard Call for Information Maps discussed above.

Indications of interest and comments must be submitted no later than 30 days following publication of this document in the Federal Register, in envelopes labeled "Indications of Interest for Leasing in the Outer Continental Shelf, Gulf of Alaska/Cook Inlet," or "Comments on Leasing in the Outer Continental Shelf, Gulf of Alaska/Cook Inlet," as appropriate. Maps (originals) and comments must be submitted to the Regional Manager, Alaska OCS Region, at the address stated in the second paragraph under "Description of Area." Copies of all maps and comments are also to be sent to the Chief, Offshore Resource Evaluation Division, Minerals Management Service, 12203 Sunrise Valley Drive, Mail Stop 643, Reston, Virginia 22091.

Final delineation of the area for competitive bidding will be made only at a later date after compliance with established departmental procedures, all requirements of the National Environmental Policy Act of 1969, and the OCS Lands Act, as amended. A final Notice of Sale, detailing areas to be offered for competitive bidding, will be published in the Federal Register stating the conditions and terms for leasing and the place, date, and hour at which bids will be received and opened.

Director, Minerals Management Service
Harold Doley

Office of Management and Budget

Cumulative Report on Rescissions and Deferrals

OFFICE OF MANAGEMENT AND BUDGET

Cumulative Report on Rescissions and Deferrals

March 1, 1983.

This report is submitted in fulfillment of the requirements of Section 1014(e) of the Impoundment Control Act of 1974 (Pub. L. 93-344). Section 1014(e) provides for a monthly report listing all budget authority for this fiscal year with respect to which, as of the first day of the month, a special message has been transmitted to the Congress.

This report gives the status as of February 1, 1983 of 20 rescission proposals and 69 deferrals contained in the first five special messages of FY 1983. These messages were transmitted to the Congress on October 1, and December 7, and 16, 1982, and January 5, and February 1, 1983.

Rescissions (Table A and Attachment A)

Twenty rescission proposals totaling $1,554 million are currently pending before the Congress. Table A summarizes the status of rescissions proposed by the President as of March 1, 1983, while Attachment A shows the history and status of each rescission proposed during FY 1983.

Deferrals (Table B and Attachment B)

As of March 1, 1983, $9,489.5 million in 1983 budget authority was being deferred from obligation and another $4.9 million in 1983 obligations was being deferred from expenditure. Attachment B shows the history and status of each deferral reported during FY 1983.

Information From Special Messages

The special messages containing information on the rescissions and the deferrals covered by the cumulative report are printed in the **Federal Registers** listed below:

Vol. 47, No. 194, FR p. 44524, Thursday, October 7, 1982
Vol. 47, No. 238, FR p. 55002, Friday, December 10, 1982
Vol. 47, No. 246, FR p. 57230, Wednesday, December 22, 1982
Vol. 48, No. 7, FR p. 1266, Tuesday, January 11, 1983

Budget Deferral Report

OFFICE OF MANAGEMENT AND BUDGET

Budget Deferral Report

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report one new deferral of budget authority totaling $50,000,000 and one revision to a previously reported deferral, increasing the amount deferred by $1,498,389.

The deferrals affect the Department of Energy and the Department of the Treasury.

The details of each deferral are contained in the attached reports.

Ronald Reagan

THE WHITE HOUSE, March 9, 1983.

BILLING CODE 3110-01-M

Deferral No: 83-70

DEFERRAL OF BUDGET AUTHORITY

SUMMARY OF SPECIAL MESSAGES
FOR FY 1983
(in thousands of dollars)

	Rescissions	Deferrals
Sixth special message		
New items	---	50,000
Change to amounts previously submitted	---	1,498
Effects of Sixth special message	---	51,498
Amounts previously submitted that were changed by this message	---	14,446
Total, rescissions and deferrals	---	65,944
Amounts previously submitted that were not changed by this message	1,554,015 1/	13,350,790
Total amount proposed to date in all special messages	1,554,015 1/	13,416,734

1/ This amount includes $23,400,000 in current budget authority for the rural telephone bank that is offset by a corresponding increase in permanent budget authority (R83-20).
2/ All amounts listed represent budget authority except for $15,944,000 in one general revenue sharing deferral of outlays only (D83-16B).

Deferral No: D83-70

DEFERRAL OF BUDGET AUTHORITY
Report Pursuant to Section 1013 of P.L. 93-344

Agency: Department of Energy
Bureau: Atomic Energy Defense Activities
Appropriation title & symbol: Atomic Energy Defense Activities: (Plant and Capital Equipment, 89X0221)
OMB identification code: 89-0220-0-1-053
Grant program: ☐ Yes ☒ No
Type of account or fund: ☐ Annual ☐ Multiple-year _____ (expiration date) ☒ No-year

New budget authority (P.L. 97-377): $1,328,000,000
Other budgetary resources: 25,832,388
Total budgetary resources: 1,353,832,388
Amount to be deferred: Part of year: _____ Entire year: 50,000,000
Legal authority (in addition to sec. 1013): ☒ Antideficiency Act ☐ Other _____
Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other _____

Justification: This appropriation funds the research and development and production of nuclear weapons including the management of nuclear wastes resulting from these activities for the Department of Defense.

This deferral action is being taken due to delays in construction of permanent facilities for the Waste Isolation Pilot Plant. It is now anticipated that construction will not begin until late 1983. The reservation of these funds is taken pursuant to the Antideficiency Act (31 U.S.C. 1512).

Estimated Effects: This deferral has no programmatic effect as it is consistent with an anticipated delay in obtaining the authority to withdraw land, a prerequisite to initiating construction.

Outlay Effect: This deferral will have no effect on FY 1983 outlays.

D83-15S

SUPPLEMENTARY REPORT

Report Pursuant to Section 1014(c) of Public Law 93-344

This report revises the previous Deferral Number D83-15A, transmitted to Congress on December 7, 1982.

This revised deferral report for the State and Local Government Fiscal Assistance Trust Fund in the Office of the Secretary of the Treasury increases the previously reported deferral from $14,445,599 to $15,943,988. The increase of $1,490,389 results from withholding payments from various governments for reasons of non-compliance with the requirements of the State and Local Fiscal Assistance Act, as amended.

Deferral No: D83-15S

DEFERRAL OF BUDGET AUTHORITY

Report Pursuant to Section 1013 of P.L. 93-344

Agency: Department of the Treasury	New budget authority (P.L. 97-272): $4,566,700,000
Bureau: Office of Revenue Sharing	Other budgetary resources: 104,871,826 3/
Appropriation title & symbol: State and Local Government Fiscal Assistance Trust Fund 20X8111 1/ 2/	Total budgetary resources: 4,671,571,826
	Amount to be deferred: Part of year: 15,943,988 4/*
	Entire year:
MB identification code: 20-8111-0-7-851	Legal authority (in addition to sec. 1013): ☒ Antideficiency Act P.L. 92-512 Sections 121 & 123 ☒ Other P.L. 94-488, P.L. 96-604
Grant program: ☒ Yes ☐ No	
Type of account or fund: ☐ Annual ☐ Multiple-year _____ (expiration date) ☒ No-year	Type of budget authority: ☒ Appropriation ☐ Contract authority ☐ Other _____

Justification: * The State and Local Government Fiscal Assistance Trust Fund is the vehicle for disbursement of general revenue sharing funds. This deferral represents payments withheld from various governments involved in annexations or disincorporations and for reasons of non-compliance with the requirements of the State and Local Fiscal Assistance Act, as amended. This deferral action is taken pursuant to the provisions of the Antideficiency Act (31 U.S.C. 1512).

Estimated Effects: The release of these funds is contingent upon adherence by the various governments to the compliance regulations, and determinations as to which higher level of government is eligible to receive those funds withheld because of annexations and disincorporations.

Outlay Effect: There is no outlay effect from this deferral because the funds are expected to be disbursed during FY 1983.

1/ This account is subject to another deferral (D83-15).
2/ This account was the subject of similar deferrals during FY 1982 and FY 1981.
3/ Carryover into FY 1983 - unobligated reserve.
4/ Deferral of outlays only.
* Revised from previous submission.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Title 3—

The President

Proclamation 5032 of March 15, 1983

Loyalty Day, 1983

By the President of the United States of America

A Proclamation

It was once written that America is great because it is good, and if America ever ceases to be good, America will cease to be great. So long as Americans remain faithful—in deeds as well as thought—to the ideals embodied in our Constitution and furthered in our free institutions, our Nation's greatness will flourish.

Americans have fought, and many have died, to preserve the blessings of liberty in this fair land. Each of us has the opportunity to honor these sacrifices and to renew our commitment to American ideals as we go about our daily lives. When we participate in a free election, extend a helping hand to a neighbor, live responsible and productive lives, or teach a child through our own actions that all people are equal under the law, we manifest our allegiance to this great country.

We must never take our precious freedoms for granted. Rather, from time to time we must rededicate ourselves to the magnificent ideals of our great democracy—liberty, justice, and dignity for all mankind.

For this purpose, the Congress, by joint resolution approved July 18, 1958 (72 Stat. 369; 36 U.S.C. 162), has designated May 1 of each year as Loyalty Day, a day for reflection upon our national institutions, our heritage of freedom, and what it means to be an American.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim Sunday, May 1, 1983, as Loyalty Day and call upon all Americans and patriotic, civic, and educational organizations to observe that day with appropriate ceremonies.

I call upon all government officials to display the flag of the United States on all Government buildings and grounds on that day.

IN WITNESS WHEREOF, I have hereunto set my hand this 15th day of March, in the year of our Lord nineteen hundred and eighty-three, and of the Independence of the United States of America the two hundred and seventh.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 48, No. 53
Thursday, March 17, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 907

[Navel Orange Reg. 570; Navel Orange Reg. 569, Amdt. 1]

Navel Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona navel oranges that may be shipped to market during the period March 18–24, 1983, and increases, the quantity of such oranges that may be so shipped during the period March 11–17, 1983. Such action is needed to provide for orderly marketing of fresh navel oranges for the period specified due to the marketing situation confronting the orange industry.

DATES: This regulation becomes effective March 18, 1983, and the amendment is effective for the period March 11–17, 1983.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, 202–447–5975.

SUPPLEMENTARY INFORMATION:

Findings.

This rule has been reviewed under USDA procedures and Executive Order 12291 and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. This action is designed to promote orderly marketing of the California-Arizona navel orange crop for the benefit of producers and will not substantially affect costs for the directly regulated handlers.

This regulation and amendment are issued under the marketing agreement, as amended, and Order No. 907, as amended (7 CFR Part 907), regulating the handling of navel oranges grown in Arizona and designated part of California. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendation and information submitted by the Navel Orange Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the Act.

This action is consistent with the marketing policy for 1982–83. The marketing policy was recommended by the committee following discussion at a public meeting on September 21, 1982. The committee met again publicly on March 15, 1983 at Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of navel oranges deemed advisable to be handled during the specified weeks. The committee reports the demand for navel oranges is improved.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation and amendment are based and the effective date necessary to effectuate the declared policy of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting, and the amendment relieves restrictions on the handling of navel oranges. It is necessary to effectuate the declared purposes of the Act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

Marketing agreements and orders, California, Arizona, Oranges (navel).

PART 907—[AMENDED]

1. Section 907.670 is added as follows:

§ 907.670 Navel orange regulation 570.

The quantities of navel oranges grown in California and Arizona which may be handled during the period March 18, 1983 through March 24, 1983, are established as follows:

(1) District 1: 1,750,000 cartons;
(2) District 2: Unlimited cartons;
(3) District 3: Unlimited cartons;
(4) District 4: Unlimited cartons.

2. Section 907.669 Navel Orange Regulation 569 (48 FR 10037), is hereby revised to read:

§ 907.669 Navel orange regulation 569.

7 CFR Part 981

Handling of Almonds Grown in California; Administrative Rules and Regulations Governing Almond Butter and Crediting for Marketing Promotion

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule changes the almond butter and creditable marketing promotion provisions of the administrative rules and regulations established under the Federal marketing order for California almonds to: (1) Liberalize the definition of "almond butter" as it applies to the disposition of reserve almonds and (2) require handlers who wish to receive credit against their assessment obligations for the distribution of sample packages of almonds to obtain approval from the Almond Board of California prior to such distribution. These changes are made in response to changing industry needs and to improve order operation.

EFFECTIVE DATE: March 17, 1983.

FOR FURTHER INFORMATION CONTACT: J. S. Miller, Chief, Specialty Crops Branch, Fruit and Vegetable Division, AMS, USDA, Washington, D.C. 20250 (202) 447–5697.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under USDA guidelines implementing Executive Order 12291 and Secretary's Memorandum 1512–1 and has been classified a "non-major" rule under criteria contained therein.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities because it will result in only minimal costs being incurred by the regulated 33 handlers.

It is found that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register**. The change in the definition of "almond butter" will relax restrictions on handlers, and handlers should have the opportunity to utilize that increased flexibility as soon as possible.

The change in the creditable marketing promotion provisions is designed as a notice to handlers that distribution of sample packages to certain market segments is not eligible for credit against assessment obligations. The Almond Board of California should have the opportunity to implement this safeguard as soon as possible.

Notice of this action was published in the February 7, 1983, issue of the **Federal Register** (48 FR 5569), and interested persons were afforded an opportunity to submit written comments. No comments were received.

This final rule revises §§ 981.466 and 981.441(d)(1)(i)(D) of Subpart—Administrative Rules and Regulations (7 CFR Part 981.401–981.474; 47 FR 25001; 40783). This subpart is issued under the marketing agreement and Order No. 981 (7 CFR 981), both as amended, regulating the handling of almonds grown in California. The marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). This action is based on two unanimous recommendations of the Almond Board of California, hereinafter referred to as the "Board," which works with USDA in administering the order.

Section 981.466 stipulates the specifications for almond butter as used in § 981.66(c) as an outlet for the disposition of reserve almonds. Section 981.466 currently defines "almond butter" as a "comminuted food product prepared by grinding shelled almonds into a homogeneous plastic or semiplastic mass or liquid having very few particles larger than 1/16 inch in any dimension."

Recently, the Board launched a new program to use reserve almonds to expand the almond butter market. The Board hopes to expand almond butter consumption to absorb a large quantity of almonds in the face of anticipated larger crops. To meet this goal, new almond butter products must be developed which can compete with peanut butter. Thus, the following two changes in the current definition of "almond butter" should be made to encourage the development of such new products.

First, the words "or blanched" should be added after the word "shelled" to allow for an almond butter made from blanched almonds. Recent research has shown that unflavored, blanched, roasted almond butter is preferred over almond butter made from other almond forms. While "blanched almonds" may be construed to be a type of "shelled almonds," the industry defines "blanched almonds" and "shelled almonds" as two distinct products. Thus, the additional language is added for clarification.

The second change provides for a chunky style almond butter containing almond chunks or pieces up to a maximum of 25 percent by weight of the finished product. The size of the individual almond pieces used to make this chunky style almond butter could not exceed 7/16 inch in any dimension. While the current definition allows for a chunky style almond butter "having very few particles larger than 1/16 inch in any dimension," the Board believes that this definition is too strict in light of current standards for chunky style peanut butter. The change will encourage the development of chunky style almond butter products which can compete with chunky style peanut butter.

Section 981.441(d)(1)(i) stipulates the conditions under which handlers may receive credit against their pro rata expense assessment obligations for the distribution of sample packages containing one-half ounce or less of almonds to charitable or educational outlets. Section 981.441(d)(1)(i)(D) specifies that credit shall not be granted for sample packages distributed to market segments where almonds are already being sold, and that "handlers should obtain approval from the Board prior to distribution to ensure that this condition is met."

This final rule also revises § 981.441(d)(1)(i)(D) by changing "should" to "shall", thereby making Board approval a mandatory requirement. This change is to put handlers on notice that they cannot receive credit against their assessment obligations for the distribution of sample packages to market segments where almonds are already being sold.

After consideration of all relevant matter presented, including that in the notice, the Board's recommendation, and other available information, it is further found that to revise §§ 981.466 and 981.441(d)(1)(i)(D) will tend to effectuate the declared policy of the act.

List of Subjects in 7 CFR Part 981

Marketing agreements and orders, Almonds, and California.

PART 981—[AMENDED]

Therefore, §§ 981.466 and 981.441(d)(1)(i)(D) of Subpart—Administrative Rules and Regulations are revised as follows:

1. Section 981.466 is revised to read as follows:

§ 981.466 Almond butter.

Almond butter as used in § 981.66(c) is hereby defined as a comminuted food product prepared by grinding shelled or blanched almonds into a homogeneous plastic or semiplastic mass or liquid having very few particles larger than 1/16 inch in any dimension. To produce chunky style almond butter, almond chunks or pieces may be added up to a maximum of 25 percent by weight of the finished product. The size of the almond pieces used to make chunky style almond butter may not exceed 7/16 inch in any dimension.

2. Section 981.441(d)(1)(i)(D) is revised to read as follows:

§ 981.441 Crediting for marketing promotion including paid advertising.

* * * * *

(d) * * *

(1) * * *

(i) * * *

(D) No credit shall be granted for sample packages distributed to market segments where almonds are already being sold. Handlers shall obtain approval from the Board prior to distribution to ensure that this condition is met.

BILLING CODE 3410-02-M

7 CFR Part 1032

[Milk Order No. 32]

Milk in the Southern Illinois Marketing Area; Order Suspending Certain Provisions

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rules.

SUMMARY: This action suspends certain provisions relating to how much milk not needed for fluid (bottling) use may be moved directly from farms to nonpool plants and still be priced under the order. The suspension removes the limits on such movements of milk during the months of March through August 1983. The action was requested by a cooperative association to assure the efficient disposition of milk not needed for fluid use and still maintain producer status under the order for dairy farmers regularly associated with the market. A seasonal increase in milk production and a reduction in the fluid milk requirements of pool distributing plants supplied by the cooperative association prompted the request.

EFFECTIVE DATE: March 17, 1983.

FOR FURTHER INFORMATION CONTACT: Robert F. Groene, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447–4824.

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding: Notice of Proposed Suspension: issued February 18, 1983; published February 24, 1983 (48 FR 7745).

This action has been reviewed under USDA procedures established to implement Executive Order 12291 and has been classified as a "non-major" action.

It has been determined that the need for suspending certain provisions of the order on an emergency basis precludes following certain review procedures set forth in Executive Order 12291. Such procedures would require that this document be submitted for review to the Office of Management and Budget at least 10 days prior to its publication in the **Federal Register**. However, this would not permit the completion of the required suspension procedures and the inclusion of March 1983 in the suspension period. The initial request for this action was received on February 14, 1983. A notice of proposed suspension was issued on February 18, 1983, inviting interested parties to submit comments on the proposed action on or before March 3, 1983.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this proposed action would not have a significant economic impact on a substantial number of small entities. Such action would lessen the regulatory impact of the order on certain milk handlers and would tend to insure that dairy farmers would continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

This order of suspension is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and of the order regulating the handling of milk in the Southern Illinois marketing area.

Notice of proposed rulemaking was published in the **Federal Register** (48 FR 7745) concerning a proposed suspension of certain provisions of the order. Interested persons were afforded opportunity to file written data, views, and arguments thereon.

After consideration of all relevant material, including the proposal set forth in the aforesaid notice, data, views, and arguments filed thereon, and other available information, it is hereby found and determined that for the months of March through August 1983, the following provisions of the order do not tend to effectuate the declared policy of the Act:

1. In § 1032.13(b)(2), the language "during the months of May, June, and July, during the months of August and December for not more than 12 days of production of producer milk by such producer, and in any other month for not more than 8 days of production of producer milk by such producer".

2. In § 1032.13(b)(3), the language "for not more days of production of producer milk, by such producer than is received at a pool plant(s) pursuant to paragraph (a) of this section".

Statement of Consideration

This action removes the limits on the amount of milk that may be diverted from pool plants to nonpool plants during the months of March through August 1983. The order now provides that during the months of January through April and September through November not more than 8 days' production of a producer may be diverted to nonpool plants that are not other order plants. Such diversions are limited to not more than 12 days' production of a producer during August and December. Diversions to nonpool plants that are also other order plants are limited each month of the year to not more than the number of days of production of a producer that is received at pool plants.

The suspension was requested by a cooperative association that supplies milk to handlers regulated under the order. The cooperative association has received notification that pool distributing plants it supplies will need less fluid milk during March through August 1983 due to a decrease in Class I sales in the Southern Illinois market. In addition, milk production is increasing seasonally in this market. As a result, some milk of the cooperative's members will be temporarily in excess of fluid milk needs and will have to be moved to nonpool plants for surplus disposal during March through August.

Outlets for the excess milk include manufacturing plants located in the production area and distributing plants in the St. Louis area that are regulated under the adjacent St. Louis-Ozarks order. Without the suspension, some of the excess milk would become pooled under the St. Louis-Ozarks order, thereby lowering returns to producers supplying that market, while other costly and inefficient movements of milk would be made to continue to pool the milk of dairy farmers under the Southern Illinois order. Suspension of the diversion limitations will permit the excess milk to be moved to available outlets for surplus use in the most efficient manner and will assure its continued pooling in the market with which it has regularly been associated.

Interested parties were given an opportunity to submit written data, views, or arguments concerning the suspension. No views in opposition to the suspension were received.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) This suspension is necessary to reflect current marketing conditions and to maintain orderly marketing conditions in the marketing area in that it will permit the most efficient movements of milk not needed for fluid use to available outlets for surplus use and assure the continued pooling of such milk in the market with which it has been regularly associated;

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of proposed rulemaking was given interested parties and they were afforded opportunity to file written data, views or arguments concerning this suspension.

Therefore, good cause exists for making this order effective upon publication in the **Federal Register**.

List of Subjects in 7 CFR Part 1032

Milk marketing orders, Milk, Dairy products.

It is therefore ordered, That the aforesaid provisions of the order are hereby suspended for the months of March through August 1983.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Effective date: March 17, 1983.

Signed at Washington, D.C., on March 14, 1983.

C. W. McMillan,

Assistant Secretary, Marketing and Inspection Services.

7 CFR Part 1040

Milk in the Southern Michigan Marketing Area; Order Suspending Certain Provisions of the Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rule.

SUMMARY: This action suspends for the months of March through September 1983 the requirement in the Southern Michigan Federal milk order that a cooperative association deliver to pool distributing plants at least 50 percent of its members' producer milk in order to qualify its supply plants as pool plants under the order. The suspension was requested by a cooperative association that represents producers supplying milk to the fluid market. The action is needed to ensure that dairy farmers who historically have been associated with the Southern Michigan market will continue to share in the market's fluid milk sales.

EFFECTIVE DATE: March 17, 1983.

FOR FURTHER INFORMATION CONTACT: Martin J. Dunn, Marketing Specialist, Dairy Division, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447–7311.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding: Notice of proposed suspension: Issued February 23, 1983; published February 28, 1983 (48 FR 8288).

It has been determined that this action is not a major rule under the criteria set forth in Executive Order 12291.

It also has been determined that any need for suspending certain provisions of the order on an emergency basis precludes following certain review procedures set forth in Executive Order 12291. Such procedures would require that this document be submitted for review to the Office of Management and Budget at least 10 days prior to its publication in the **Federal Register**. However, this would not permit the issuance of the suspension in time to include March 1983 in the suspension period. The initial request for the action was received on February 15, 1983. A notice of proposed suspension was issued February 23, 1983, inviting interested parties to comment on the proposed action by March 7, 1983.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this proposed action would not have a significant economic impact on a substantial number of small entities. This action lessens the regulatory impact of the order on certain milk handlers and tends to ensure that dairy farmers will continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

This order of suspension is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and of the order regulating the handling of milk in the Southern Michigan marketing area.

Notice of proposed rulemaking was published in the **Federal Register** (48 FR 8288) concerning a proposed suspension of certain provisions of the order. Interested persons were afforded an opportunity to file written data, views, and arguments thereon. Two comments were received. A favorable comment from the proponent cooperative was filed and a comment in opposition to the suspension was received from a dairy farmer.

After consideration of all relevant information, including the proposal in the notice, the comments received, and other available information, it is hereby found and determined that for the months of March through September 1983 the following provisions of the order do not tend to effectuate the declared policy of the Act:

1. In § 1040.7(b)(2) the words "if transfers from such supply plant to plants described in paragraph (b)(5) of this section and by direct delivery from the farm to plants qualified under paragraph (a) of this section are:"

2. In § 1040.7(b)(2), subdivisions (i) and (ii).

Statement of Consideration

This action makes inoperative for the months of March through September 1983 the provisions requiring a cooperative association to deliver at least 50 percent of its members' producer milk to pool distributing plants, either through its supply plants or directly from farms, in order to qualify the supply plants as pool plants. The suspension was requested by Michigan Milk Producers Association which represents a majority of the producers supplying the market.

This action is needed because deliveries of producer milk have increased in the Southern Michigan market at a time when Class I use is declining. January 1983, the most recent month for which data are available, was the 45th consecutive month of increased milk production in the market and also was the 27th consecutive month of declining Class I sales. During 1982, producer receipts for the market increased 2.45 percent over the previous year while Class I sales decreased 5.44 percent. The increase in milk production has resulted from larger cow numbers and increased production per cow. Lower fluid milk sales are attributable to the depressed economy in Michigan.

The suspension is needed to accommodate the petitioner's recent loss of sales to a major distributor in the market.

If the provisions are not suspended for the months of March through September 1983, Michigan Milk Producers Association would encounter considerable difficulty in pooling certain supply plants and the milk of producers who historically have been associated with the Southern Michigan fluid market. This would disrupt the orderly marketing of milk in the Southern Michigan marketing area.

In view of the circumstances, the aforesaid provisions should be suspended to ensure the orderly marketing of milk supplies. This action will eliminate the possibility that producers of milk for the fluid market would lose their producer status because of the present pooling provisions and thus not have their milk priced under the order.

An individual producer opposed the proposed suspension. His comments were directed against the operations of the proponent cooperative rather than to an elevation of the current marketing conditions for the Southern Michigan market. The comments do not provide an adequate basis for denying the proposed suspension.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) This suspension is necessary to reflect current marketing conditions in the marketing area in that substantial quantities of milk from producers who regularly supply the market otherwise would be excluded from the marketwide

pool, thereby causing a disruption in the orderly marketing of milk;

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of proposed rulemaking was given interested parties and they were afforded an opportunity to file written data, views or arguments concerning this suspension.

Therefore, good cause exists for making this order effective upon publication in the **Federal Register.**

List of Subjects in 7 CFR Part 1040

Milk marketing orders, Milk, Dairy products.

It is therefore ordered, That the aforesaid provisions in § 1040.7(b)(2) of the order are hereby suspended for March through September 1983.

(Secs. 1–19, 48 Stat. 31 as amended; 7 U.S.C. 601–674).

Effective date: March 17, 1983.

Signed at Washington, D.C., on: March 14, 1983.

C. W. McMillan,

Assistant Secretary, Marketing and Inspection Services.

BILLING CODE 3410-02-M

Commodity Credit Corporation

7 CFR Part 1430

1982–83 Milk Price Support Program

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Notice of determination for 1982–83 Milk Price Support Program.

SUMMARY: The Commodity Credit Corporation (CCC) hereby determines that as part of the milk price support program, 50 cents per hundredweight shall be deducted from the proceeds of sale of all milk marketed commercially by producers during the period April 16 1983, through September 30, 1983. This deduction is authorized by the Agricultural Act of 1949 ("1949 Act"), as amended by section 101 of the Omnibus Budget Reconciliation Act of 1982 ("Reconciliation Act") (Pub. L. 97–253, 96 Stat. 763, approved September 8, 1982).

EFFECTIVE DATE: April 16, 1983.

FOR FURTHER INFORMATION CONTACT: Charles N. Shaw, Dairy/Sweeteners Group, Analysis Division, ASCS–USDA, 3741 South Building, P.O. Box 2415, Washington, D.C. 20013; (202) 447–7601. The Final Regulatory Impact Analysis and Final Regulatory Flexibility Analysis describing the actions taken in this notice of determination and their impact are available from Charles N. Shaw.

SUPPLEMENTARY INFORMATION: This notice of determination has been reviewed in accordance with Executive Order 12291 and Secretary's Memorandum No. 1512–1 and has been classified as a "major" action since the determination will result in an annual effect on the economy in excess of $100 million.

The title and number of the Federal assistance program to which this notice applies are: Title—Community Loans and Purchases; Number—10.051 as found in the Catalog of Federal Domestic Assistance.

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) is not applicable to this notice of determination since CCC is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this notice. While the Secretary of Agriculture has determined that CCC will voluntarily comply with the provisions of 5 U.S.C. 553 (b) and (c), the Regulatory Flexibility Act does not apply in the case of voluntary agency compliance with proposed rulemaking procedures. Nevertheless, since this notice of determination may have a significant economic impact on a substantial number of small entities, a Final Regulatory Flexibility Analysis has been prepared.

An Environmental Evaluation of the effect of this notice of determination has been completed. The notice of determination is not expected to have any significant impact on the quality of the human environment. In addition, this action will not adversely affect environmental factors such as water quality or air quality. Accordingly, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

Statutory Authority

Section 201(c) of the 1949 Act provides that the price of milk shall be supported at a level not in excess of 90 percent nor less than 75 percent of parity as the Secretary determines necessary in order to assure an adequate supply of pure and wholesome milk to meet current needs, reflect changes in the cost of production, and assure a level of farm income adquate to maintain productive capacity sufficient to meet anticipated future needs. Section 201(d) of the 1949 Act, as added by the Reconciliation Act, also provides that, notwithstanding any other provision of law, for the period beginning October 1, 1982, and ending September 30, 1984, the price of milk shall be supported at not less than $13.10 per hundredweight for milk containing 3.67 percent milkfat.

Section 201(d) of the 1949 Act authorizes the Secretary of Agriculture, during the period October 1, 1982, through September 30, 1985, to provide for a deduction of 50 cents per hundredweight from the proceeds of the sale of all milk marketed commercially by producers. These deductions are to be remitted to CCC to offset a portion of the cost of the dairy price support program. This authority does not apply for any fiscal year for which the Secretary estimates that the net price support purchases will be less than 5 billion pounds milk equivalent. If at any time during a fiscal year the Secretary estimates that the net price support purchases during that year will be less than 5 billion pounds, the authority for making deductions shall not apply for the balance of the year.

Section 201(d) of the 1949 Act further authorizes the Secretary of Agriculture, during the period April 1, 1983, through September 30, 1985, to provide for an additional deduction of 50 cents per hundredweight from the proceeds of sale of all milk marketed commercially by producers if a program is established whereby the second 50-cent deduction is refunded to producers who reduce their milk marketings by a specified amount. This authority does not apply to any fiscal year for which the Secretary estimates that the net price support purchases of dairy products will be less than 7.5 billion pounds milk equivalent during the fiscal year.

Background

For the period October 1, 1982, through September 30, 1983 the level of price support for manufacturing grade milk of national average milkfat content, 3.67 percent, was established at $13.10 per hundredweight by a notice promulgated on September 24, 1982 (47 FR 42128).

The notice of September 24 also provided for a deduction of 50 cents per hundredweight from the proceeds of sale of all milk marketed commercially by producers, beginning December 1, 1982. Proposed regulations establishing procedures for collecting the 50-cent deduction were published on September 24, 1982 (47 FR 42112) and the regulations were published in final form on November 30, 1982 (47 FR 53831). The collection of the 50-cent deduction on the basis of the September 24 notice has been barred by a preliminary injunction issued in litigation challenging the deduction on the ground that certain rulemaking procedures were not

correctly followed in promulgating the notice. That litigation continues.

Proposed regulations revising the collection procedures to permit the collection of an additional deduction of 50 cents per hundredweight from the proceeds of sale of milk and to establish a program under which the additional 50 cents deduction would be refunded to producers who reduced their marketings were published on December 17, 1982 (47 FR 56600). A notice proposing to implement a $1.00 per hundredweight deduction from commercial milk marketings and analyzing alternatives to that proposal was published on January 27, 1983 (48 FR 3764).

Price Support Program

The price of milk is supported by CCC through purchases of butter, cheese and nonfat dry milk at prices calculated to enable plant operators to pay dairy farmers, on average, a price equal to the support level. The effectiveness of the program depends on competition by manufacturers for available supplies of milk so that the average price received by farmers will equal the announced support price. At times of significant price support purchases, the purchase prices for these products tend to become the floor for the market prices of such products. Since most of the fluid milk prices are based on prices paid for manufacturing milk, the price support program undergirds all milk and dairy product prices.

Response to Public Comments

In making this determination, all comments bearing on the determination have been considered. This includes comments received in response to the January 27, 1983 notice of proposed determination, the September 24, 1982, notice of determination, and the September 24 and December 17, 1982, notices of proposed rulemaking.

The Department received approximately 5,000 comments in response to the proposals of December 17, 1982, and January 27, 1983. Of this total, approximately 4,600 were from producers, 75 from consumers, 35 from dairy cooperatives, 30 from proprietary dairy businesses, 30 from farm organizations, 45 from various agencies of State and local governments, 25 from other farm businesses, 10 from banks and other financial institutions, and 45 from producer handlers. In addition, there were petitions containing in excess of 500 signatures.

The Department received approximately 25,000 comments bearing on the subject matter of this determination in response to the September 24, 1982, notice of determination and proposed rulemaking. In addition, a number of petitions containing nearly 23,000 signatures were received.

Nearly all of the comments opposed the deduction and approximately a third also submitted suggested alternative proposals for reducing the dairy surplus and the cost of the milk price support program.

Some respondents suggested increased donations of dairy products. This is being accomplished under current programs of the Department. Projections of increased donations are included in the final impact analysis for this determination. Other comments suggested a reduction in dairy imports, or increased dairy exports. Imports are already controlled through a quota system and annually average less than 2 percent of domestic milk production. Exports of U.S. dairy products are limited because the domestic support price has resulted in a price for U.S. dairy products well above the world market.

Respondents also suggested numerous modifications to the proposed deduction, or alternatives to it. Many of the alternatives would require additional legislation or are otherwise beyond the capacity of the Secretary to implement. For example, respondents suggested termination or major modification of the price support program, a reduction in the support price, a payment program to encourage producers to reduce milk production, and an increase in the minimum amount of solids in fluid milk sold to consumers.

Some respondents suggested that the deduction proposal be modified to exempt from the deduction small producers, producers in specific regions of the country, or all producer-handlers. Others suggested that specific classes of milk be exempted. In this connection, the regulatory impact analysis was criticized for its failure to address the differential effect of the proposed deduction on various groups of producers. The modifications suggested by these respondents have not been adopted. The milk price support program is a national program which benefits milk producers of all categories in all regions of the country. Milk and milk products flow freely in interstate commerce without regard to either geographic or political boundaries. There is no basis for concluding that any group of producers do not benefit from the program and therefore should be exempt from a deduction which is intended to help offset the cost of the program. Some individual producers will be more seriously affected by the deduction than others. The price support program, however, does not guarantee a profit to every dairy farmer.

Although virtually all comments received by the Department opposed any deduction, no practical alternative is available at this time for addressing the problem of excessive milk production and milk price support program costs. Failure to implement any deduction would result in a continuation of the present situation in which milk production and price support program costs are unacceptably high.

Even with a $1.00 deduction, it is estimated that net price support purchases by CCC of milk and milk products during fiscal year 1983 would be 13.9 billion pounds milk equivalent. Thus, the first of the two statutory conditions that must be met before a deduction of $1.00 per hundredweight on commercial milk marketing is imposed has been satisfied. However, the statute also requires that there be a program for refunding 50 cents of that $1.00 to producers who reduce commercial marketing by a prescribed amount. The Department published, on January 27, 1983, a proposal for the implementation of a $1.00 per hundredweight deduction and a refund program, but no final regulation establishing a refund program has been published. Therefore, only a 50-cent, not the proposed $1.00, per hundredweight deduction may be imposed at this time. This deduction will be collected in accordance with the regulations published on November 30, 1982 (47 FR 53631).

Summary of Final Regulatory Impact Analysis

In response to comments received by the department and on the basis of more recent data, some modifications have been made in the Preliminary Regulatory Impact Analysis prepared in connection with the publication of the proposed determination on January 27. The Final Regulatory Impact Analysis reflecting these revisions is available to the public and is summarized below.

For fiscal year 1983, the level of milk price support has been established at the statutory minimum of $13.10 per hundredweight for manufacturing grade milk of national average milkfat content, 3.67 percent. (47 FR 42128, September 24, 1982).

With price support at $13.10 per hundredweight, production is projected to be 138.6 billion pounds for fiscal year 1983 if there is no deduction program, up 3.6 billion pounds from fiscal year 1982. Relatively low feed prices, resulting from record crop production, will keep milk-feed price relationships favorable for increased production. Commercial

consumption is projected to increase 1.9 billion pounds to 124.0 billion pounds, milk equivalent, because of relatively stable retail prices and increased population. It is estimated that CCC removals in fiscal year 1983 will be 14.7 billion pounds, up about 0.9 billion pounds or about 6.5 percent more than a year earlier. Despite the upward trend in consumption, purchases would continue to exceed dispositions, and CCC stocks would continue to build—a condition that has existed since October 1979.

Even with implementation of a 50 cents per hundredweight deduction on April 16, 1983, milk production in fiscal year 1983 is likely to increase from the fiscal year 1982 level by 3.2 billion pounds. Implementation of a $1.00 per hundredweight deduction would result in production increasing by 2.8 billion pounds. Neither of the two deduction programs would have a great downward effect upon milk production this fiscal year because they would not become effective until the season of highest milk production has begun.

Net price support purchases during fiscal year 1983 are projected to be 14.3 billion pounds, at a cost of $2,375 million if a 50-cent per hundredweight deduction is imposed on April 16, 1983, and 13.9 billion pounds, at a cost of $2,314 million if the deduction is $1.00 per hundredweight. Net outlays, before deductions, are projected to be $2,433 million with a 50-cent per hundredweight deduction and $2,372 million with a $1.00 per hundredweight deduction. During the period April 16, 1983, through September 30, 1983, a 50-cent per hundredweight deduction will likely total $324 million and a $1.00 per hundredweight deduction will total $646 million. Therefore, net CCC outlays for the fiscal year, after deductions, are projected to be $2,109 million assuming a 50-cent deduction and $1,726 million assuming a $1.00 deduction. These figures compare with an estimated purchase cost of $2,282 million and a net outlay of $2,498 million for fiscal year 1982, and an estimated purchase cost of $2,438 million and a net outlay of $2,496 million for fiscal year 1983 if there is no deduction.

Implementation of a deduction would principally affect farm income in the areas of greatest production. More than 60 percent of the Nation's milk production is concentrated in eight States: Wisconsin, California, New York, Minnesota, Pennsylvania, Michigan, Ohio and Iowa. However, every milk producer in the United States who markets milk commercially will be affected by the program. A 50-cent deduction represents less than 4 percent of producer gross income from milk and a $1.00 deduction represents less than 8 percent of producer gross income from milk. Since this determination is effective only for the period April 16, 1983, through September 30, 1983, this effect will be approximately halved for producers' income during fiscal year 1983.

List of Subjects in 7 CFR Part 1430

Milk, Agriculture, Price support programs, Dairy products.

Final Determination

A deduction of 50-cents per hundredweight shall be made from the proceeds of the sale of all milk marketed commercially by producers during the period April 16, 1983, through September 30, 1983.

It is estimated that, even with the 50 cent deduction applicable during this period, net price support purchases by CCC of milk and milk products will exceed 7.5 billion pounds of milk equivalent during fiscal year 1983.

In reaching this determination, consideration has been given not only to the statutory standards in section 201(c) of the 1949 Act but also to the Congressional policy statement with respect to dairy production in section 204 of the Agricultural Act of 1954. The general non-binding policy of section 204 is, of course, subject to the specific statutory standards of section 201(c). The determination will not affect the promotion of increased use of dairy products and will encourage efficient production units consisting of high-grade, disease-free cattle and modern sanitary equipment. It also will assure dairy farmers as a whole of a fair return for their labor and investment while assuring an adequate supply of pure and wholesome milk to meet current needs. Furthermore, the determination will assure a level of farm income adequate to maintain productive capacity sufficient to meet anticipated future needs.

(Sec. 201 (c) and (d) of the Agricultural Act of 1949, as amended (7 U.S.C. 1446); and secs. 4 and 5 of the Commodity Credit Corporation Charter Act, as amended (15 U.S.C. 714b and 714c))

Signed at Washington on March 15, 1983.

John R. Block,

Secretary of Agriculture.

BILLING CODE 3410-05-M

FEDERAL RESERVE SYSTEM

12 CFR Part 217

[Docket No. R-0460]

Regulation Q; Interest on Deposits, Temporary Suspension of Early Withdrawal Penalty

AGENCY: Federal Reserve System.

ACTION: Temporary suspension of the Regulation Q early withdrawal penalty.

SUMMARY: The Board of Governors, acting through its Secretary, pursuant to delegated authority, has suspended temporarily the Regulation Q penalty for the withdrawal of time deposits prior to maturity from member banks for depositors affected by severe storms, flooding, and mud slides in the designated counties of California.

EFFECTIVE DATE: February 9, 1983.

FOR FURTHER INFORMATION CONTACT: Elaine M. Boutilier, Attorney (202/452-2418), Legal Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

SUPPLEMENTARY INFORMATION: On February 9, 1983, pursuant to section 301 of the Disaster Relief Act of 1974 (42 U.S.C. 5141) and Executive Order 12148 of July 15, 1979, the President, acting through the Director of the Federal Emergency Management Agency, designated the California counties of Alameda, Colusa, Contra Costa, Lake, Los Angeles, Marin, Mendocino, Orange, San Benito, San Diego, San Luis Obispo, San Mateo, Santa Barbara, Santa Clara, Santa Cruz, Sonoma, and Ventura major disaster areas. The declaration was subsequently amended on February 14, 1983, to add the county of Monterey; and was amended again on March 4, 1983, to add the counties of Butte, Glenn, Kern, Kings, Sutter, Tehama, and San Bernardino. The Board regards the President's action as recognition by the Federal government that a disaster of major proportions had occurred. The President's designation enables victims of the disaster to qualify for special emergency financial assistance. The Board believes it appropriate to provide an additional measure of assistance to victims by temporarily suspending the Regulation Q early withdrawal penalty (12 CFR 217.4(d)). The Board's action permits a member bank, wherever located, to pay a time deposit before maturity without imposing this penalty upon a showing that the depositor has suffered property or other financial loss in the disaster areas as a result of the severe storms, flooding, and mud slides beginning on or about January 21, 1983.

A member bank should obtain from a depositor seeking to withdraw a time deposit pursuant to this action a signed statement describing fully the disaster-related loss. This statement should be approved and certified by an officer of the bank. This action will be retroactive to February 9, 1983, and will remain in effect until 12 midnight, August 12, 1983.

List of Subjects in 12 CFR Part 217

Advertising, Banks, banking, Federal Reserve System, Foreign banking.

In view of the urgent need to provide immediate assistance to relieve the financial hardship being suffered by persons in the disaster directly affected by the severe storms, flooding, and mud slides, good cause exists for dispensing with the notice and public participation provisions in section 553(b) of title 5 of the United States Code with respect to this action. Because of the need to provide assistance as soon as possible and because the Board's action relieves a restriction, there is good cause to make this action effective immediately.

By order of the Board of Governors, acting through its Secretary, pursuant to delegated authority, March 11, 1983.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[T.D. 7876]

Income Tax; Taxable Years Beginning After December 31, 1953; Bad Debt Deduction for Thrift Institutions That Join in Filing Consolidated Returns

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations relating to the percentage bad debt deduction for certain thrift institutions. The regulations affect thrift institutions that are members of affiliated groups filing consolidated returns.

DATE: The regulations are effective for taxable years for which the due date (without extensions) for filing returns is after March 14, 1983.

FOR FURTHER INFORMATION CONTACT: Yerachmiel E. Weinstein of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224. Attention: CC:LR:T (202-566-3458, not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

On January 30, 1981, the **Federal Register** published proposed amendments to the Income Tax Regulations (26 CFR Part 1) under section 1502 of the Internal Revenue Code of 1954 (46 FR 9965) ("1981 notice"). The proposed amendments related to the determination of the percentage bad debt deduction of thrift institutions that join in filing consolidated returns. A public hearing was held on September 9, 1982. After consideration of all comments regarding the proposed amendments, those amendments are adopted as revised by this Treasury decision.

The regulation dealing with the determination of the consolidated percentage bad debt deduction currently in effect ("pre-1979 regulation") was supplanted by final regulations published on August 9, 1979, as T.D. 7637 in 44 FR 46838 ("1979 regulation"). These final 1979 regulations were originally promulgated to be effective for taxable years beginning after December 31, 1980. The effective date of the 1979 regulations was subsequently postponed to taxable years for which the due date (without extensions) for filing returns is after March 14, 1983, by T.D. 7815, filed on March 12, 1982.

Prior Regulations

A thrift institution is generally entitled, under the "percentage of taxable income method" of section 593(b)(2), to take as a deduction for an addition to its reserve for bad debts on qualifying loans an amount not greater than 40 percent of its taxable income (as modified under section 593(b)(2)(E)). Alternatively, a thrift institution is allowed to take as a deduction for an addition to its reserve for bad debts on qualifying loans an amount calculated under the experience method or the commercial bank percentage of eligible loans method. The deduction, in any taxable year, is the largest amount determined under any of these three alternative methods. The Code, however, does not address the question of whether losses generated by a thrift institution should affect the computation of the taxable income which is the base for computing the bad debt deduction under the percentage of taxable income method ("taxable income base"). In a separate return context, a thrift institution is required to reduce the taxable income base by loss carryovers and, for losses arising in taxable years beginning after 1977, by loss carrybacks as well. Section 1.593-6A(b)(5)(vii).

For a thrift institution that is a member ("thrift member") of an affiliated group filing a consolidated return ("consolidated group"), the additional question arises of how to treat losses of other members of the consolidated group for purposes of computing the taxable income base. The pre-1979 regulations resolved this question by providing that there would be no offset of a thrift member's taxable income base by a loss of another member, although these regulations did not follow the separate return rule for offsetting a thrift member's own losses.

A report of The General Accounting Office entitled "Savings and Loan Associations: Changes Needed in the Regulation of their Service Corporations," dated July 14, 1978, noted that many thrift institutions that were members of consolidated groups were segregating their loss activities in a separate corporation in order to maximize their taxable income base. By segregating these loss activities in a separate corporation, the thrift institution's taxable income base would not be reduced by these losses, even though the losses would continue to reduce consolidated taxable income (as determined after the bad debt deduction) for purposes of determining the tax liability of the consolidated group.

The 1979 regulations provided that the losses of each member of the consolidated group would be assigned on a pro rata basis to each thrift member for purposes of calculating each thrift member's taxable income base. The 1979 regulations thus did not differentiate between losses generated by thrift members and nonthrift members, nor did they treat any differently losses generated by nonthrift members into which the loss activities of a thrift member were segregated ("functionally related losses").

The 1981 notice, on the other hand, represents a more sophisticated response to the question of dealing with other members' losses for purposes of the taxable income base under the percentage of taxable income method. The central theme of the response is to differentiate between losses generated by thrift members and nonthrift members, and to treat the section 593 bad debt deduction as an attribute of each individual thrift member, without regard to whether the thrift member uses the percentage of taxable income method and without regard to the method used by any other thrift member. Losses generated by thrift members

(regardless of the method used to calculate their bad debt deduction) are first offset ratably against each thrift member's taxable income base before those losses are offset against nonthrift income. Losses of nonthrift members are offset against each thrift member's taxable income base only to the extent of the residual loss (if any) remaining after offsetting income and losses of all nonthrift members. The different treatment accorded thrift and nonthrift losses reflects the fact that generally the loss of a thrift member will eventually reduce the taxable income base, either by reducing the taxable income base in other taxable years of the thrift member generating the loss (which would be the case if separate returns were filed) or by reducing the taxable income base of other thrift members currently. In contrast, a nonthrift member's loss would not affect a thrift's taxable income base at all if separate returns were filed.

The 1981 notice also differentiates between nonthrift members' losses and functionally related losses, treating the latter as if they were generated by a thrift member, whether or not the separate corporation into which the activities were segregated had an overall loss.

Another important feature of the 1981 notice was the introduction of a system of restoration. Under this system, if a thrift member's taxable income base is offset by a loss of a nonthrift member in one taxable year, the taxable income base of the thrift would, in effect, be "restored" in a subsequent taxable year in which the nonthrift has taxable income. The increase to the thrift's taxable income base cannot exceed the amount of the loss which previously offset the thrift's taxable income base. This system represents a new concept in the consolidated return treatment of members entitled to special deductions computed with reference to their taxable income. This concept involves preventing the offset of other members' losses, which is an inevitable consequence of consolidation, from permanently reducing the special deduction. The only effect of that offset on the special deduction becomes one of timing. By reducing the special deduction for losses of other members, only to restore it when those other members have income, the special deduction is preserved, while maintaining the essence of consolidation, which is the treatment of the consolidated group as a single economic unit, offsetting income and losses of members currently.

Comments on the Proposed Regulations

While the 1981 notice was an improvement in the scheme of taxation of thrift members of a consolidated group, certain features of that notice were subject to criticism. In particular, offsetting a thrift member's taxable income base by nonthrift losses, even with a system of restoration, was criticized as unnecessarily more harsh than the treatment of those nonthrift losses were separate returns filed. In addition, the treatment of functionally related losses of nonthrift members was criticized. Although it was recognized that functionally related losses should indeed reduce a thrift members' taxable income base, the use of those losses when the nonthrift member as a whole generates net taxable income was criticized as an unnecessary disrespect of the separate existence of that member. Further, the system of restoration was criticized as primitive, in that only income generated in subsequent years could restore a loss. It was noted that the system did not allow a thrift to prevent or lessen a decrease (by reason of loss offset) to its taxable income base by netting prior years' income of that activity against current years' losses.

Changes Adopted in These Final Regulations

In response to these criticisms, these final regulations adopt a number of changes to the 1981 notice. They require a reduction of a thrift member's taxable income base only for losses of other thrift members and for certain functionally related losses. Based upon the treatment of losses on a separate return, losses of other thrift members that offset the taxable income base, however, include a bad debt deduction under either the experience method or the commercial bank percentage of eligible loans method. Also, in the case of losses of other thrift members, no restoration is allowed. Restoration of the other thrift member's income in other years would only have the effect of reducing that other thrift member's taxable income base in those other years. Thus, where a thrift member incurs losses, restoration ceases to be a matter of preserving the special deduction for thrift members. It becomes instead merely a matter of determining which thrift member gets the deduction, generally producing no net benefit for the consolidated group as a whole.

In the case of nonthrift members with functionally related losses, these final regulations reduce a thrift member's taxable income base only after offsetting it by losses (both current and from other years) of other thrift members. The reduction to a thrift member's taxable income base due to a functionally related loss is limited to the amount of the overall loss of the functionally related member, *i.e.*, to the extent that the nonthrift member which has the functionally related loss suffers an overall loss which is available on a consolidated return to offset other members' income. Furthermore, the definition of "functionally related loss" has been narrowed to take into account the expanded powers of thrift institutions under the Garn-St. Germain Depository Institutions Act of 1982, Pub. L. No. 97-320, 96 Stat. 1469. A functionally related loss of a nonthrift is defined with regard to all activities of the nonthrift which are functionally related to a thrift institution's activities.

In addition to offsetting current functionally related losses, these final regulations also offset a thrift member's taxable income base by consolidated net operating loss carrybacks and carryforwards attributable to functionally related losses of nonthrift members. This offset represents a complete netting of different years' losses and income. The final regulations similarly adopt a complete netting approach for the increase to a thrift member's taxable income base by reason of functionally related income. Not only is functionally related income generated in years subsequent to the year in which a nonthrift incurs a functionally related loss taken into account, but functionally related income generated in prior year is also taken into account.

There are three important limitations on this offsetting of a thrift member's taxable income base by other years' losses, however. First, those other years' losses are taken into account only to the extent they contribute to a consolidated net operating loss carryover or carryback arising in the loss year. Second, those other years' losses are generally only taken into account to the extent of the amount attributable to thrift members or functionally related activities of nonthrift members. Third, those other years' losses are generally only taken into account in a particular year to the extent they are absorbed in that year by consolidated taxable income.

These final regulations also provide a mechanism for the group to not only restore a thrift member's taxable income base by reason of the previous reduction to that thrift member's taxable income base, but also to avoid or reduce the reduction to a thrift member's taxable income base by netting prior income

against a current loss. Thus, only the remaining amount of the loss not offset by the prior years' income will need to be restored in subsequent taxable years.

Regulatory Flexibility Act and Executive Order 12291

The Commissioner of Internal Revenue has determined that this final rule is not a major rule as defined in Executive Order 12291 and that a Regulatory Impact Analysis is therefore not required. Pursuant to 5 U.S.C. 605(b) the Secretary of the Treasury has certified that the requirements of the Regulatory Flexibility Act do not apply to this Treasury decision as it will not have a significant economic impact on a substantial number of small entities. Accordingly, a Regulatory Flexibility Analysis is not required.

Drafting Information

The principal author of these regulations is Yerachmiel E. Weinstein of the Legislation and Regulation Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, on matters of both substance and style.

List of Subjects in 26 CFR 1.1501–1 through 1.1564–1

Income taxes, Controlled group of corporations, Consolidated returns.

Amendments to the Regulations

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Accordingly, 26 CFR Part 1 is amended as follows:

Paragraph 1. Section 1.1502–12 is amended by adding at the end thereof a new paragraph (q) to read as set forth below:

§ 1.1502–12 Separate taxable income.

* * * * *

(q) A thrift institution's deduction under section 593(b)(2) (relating to the addition to the reserve for bad debts of a thrift institution under the percentage of taxable income method) shall be determined under § 1.1502–42.

Par. 2. Section 1.1502–42 is amended by revising paragraph (d) and by adding new paragraphs (e) through (j).

These revised and added provisions read as follows:

§ 1.1502–42 Mutual savings banks, etc.

* * * * *

(d) *Taxable income; taxable years for which the due date (without extensions) for filing returns is after March 14, 1983.*—(1) *In general.* For a taxable year for which the due date (without extensions) for filing returns is after March 14, 1983, a thrift's taxable income for purposes of section 593(b)(2) is its tentative taxable income (as defined in paragraph (e)(1) of this section).

(2) *Definitions.* For purposes of this section—

(i) A "thrift" is a member described in section 593(a).

(ii) A "nonthrift" is a member that is not a thrift.

(e) *Tentative taxable income (or loss).*—(1) *Thrift.* For purposes of this section, a thrift's tentative taxable income (or loss) is its separate taxable income (determined under § 1.1502–12 with paragraph (q) thereof and without any deduction under section 593(b)), subject to the following adjustments in the following order:

(i) The adjustments described in paragraph (e)(3) of this section;

(ii) The adjustments described in section 593(b)(2)(E) for those thrifts with separate taxable income greater than zero (determined after the adjustments under paragraph (e)(3) of this section); and

(iii) The adjustments described in paragraph (f) of this section.

(2) *Nonthrift.* For purposes of this section, a nonthrift's tentative taxable income (or loss) is its separate taxable income (determined under § 1.1502–12), adjusted for the portion of the consolidated net operating loss deduction attributable to the member, the portion of the consolidated net capital loss carryover or carryback attributable to the member, and further adjusted as described in paragraph (e)(3) of this section.

(3) *Adjustments for all members.* For each member, the following adjustments taken into account in the computation of consolidated taxable income are included in determining its tentative taxable income (or loss) in order to adjust separate taxable income of the member to take into account certain consolidated items:

(i) The portions of the consolidated charitable contributions deduction and the consolidated dividends received deduction attributable to the member.

(ii) The member's capital gain net income, determined without any net capital loss carryover or carryback attributable to the member.

(iii) The member's net capital loss and section 1231 net loss, reduced by the portion of the consolidated net capital loss attributable to the member.

(f) *Adjustments for thrifts.*—(1) *Reductions.* A thrift's separate taxable income (as adjusted under paragraph (e)(3) of this section) is reduced (but not below zero) by losses of thrifts and to the extent attributable to functionally related activities, losses of a nonthrift. Certain operating rules for determining the amount of the reductions are provided in paragraph (f)(4) of this section. The reductions are made in the following amounts in the following order:

(i) The thrift's allocable share (as determined under paragraph (h)(2) of this section) of another thrift's tentative taxable loss. That tentative taxable loss is determined by including a deduction under section 593(b) (other than paragraph (2) thereof) for the year in which the loss arises.

(ii) The thrift's allocable share (as determined under paragraph (h)(3) of this section) of the portion of the consolidated net operating loss deduction attributable to it or another thrift. That consolidated net operating loss deduction is determined by including a deduction under section 593(b) (other than paragraph (2) thereof) for the year in which the loss arose. The portion of a consolidated net operating loss deduction attributable to another thrift is computed by excluding losses arising in taxable years for which the due date (without extensions) for filing returns is before March 15, 1983.

(iii) The thrift's allocable share (as determined under paragraph (h)(4) of this section) of the loss attributable to functionally related activities of a nonthrift (as determined under paragraph (g) of this section). For a rule netting that share against certain income attributable to functionally related activities of that nonthrift, see paragraph (f)(4)(iv) of this section.

(iv) The thrift's allocable share (as determined under paragraph (h)(3) of this section) of the portion of the consolidated net operating loss deduction attributable to functionally related activities of a nonthrift (as determined under paragraph (h)(5) of this section). That consolidated net operating loss deduction is determined by excluding losses arising in taxable years for which the due date (without extensions) for filing returns is before March 15, 1983. For a rule netting that share against certain income attributable to functionally related activities of that nonthrift, see paragraph (f)(4)(iv) of this section.

(2) *Increases.* (i) A thrift's separate taxable income (as adjusted under paragraphs (e)(3) and (f)(1) of this section) is increased in a subsequent consolidated return year to restore reductions made in a prior consolidated return year to a thrift's separate taxable

income by reason of losses of a nonthrift. This increase is the amount of the thrift's allocable share (as determined under paragraph (h)(6) of this section) of the income attributable to functionally related activities of a nonthrift in a consolidated return year and is made only in that year. This increase is made only if both the thrift and the nonthrift were members of the group in the consolidated return years in which both the reduction and increase are made.

(ii) This subdivision (ii) limits the increases to a thrift's separate taxable income to assure that income of a particular nonthrift is used to restore reductions of a thrift only to the extent that such nonthrift's losses reduced the thrift's income. Therefore, as of the end of a consolidated return year, the cumulative increases to a thrift's tentative taxable income (by reason of income attributable to functionally related activities of a nonthrift) may not exceed the cumulative reductions to the thrift's separate taxable income made (by reason of the nonthrift's functionally related activities) under paragraph (f)(1)(iii) and (iv) of this section in the current and all prior consolidated return years during which both the thrift institution and the nonthrift institution were members of the group.

(iii) For a netting rule, see paragraph (f)(4)(iv) of this section.

(3) *Special Rule.* (i) If a carryback to a thrift's separate taxable income diminishes the reduction to a thrift's separate taxable income for a prior consolidated return year otherwise required by paragraph (f)(1)(iii) or (iv) of this section, then any increases to a thrift's separate taxable income under paragraph (f)(2) of this section for an intervening consolidated return year must be recomputed to take into account the effect of such carryback. Thus, if a net operating loss attributable to a thrift is carried back and completely offsets the thrift's separate taxable income (before the reductions under paragraph (f)(1)(iii) or (iv) or this section), any increase to the thrift's separate taxable income under paragraph (f)(2) of this section (attributable to a reduction in the year to which the loss is carried) for an intervening consolidated return year will be eliminated. The recomputation required by this subparagraph (3) must be reflected on an amended return for the intervening consolidated return year for which the increase was previously reported. See example (2) in paragraph (j) of this section.

(ii) If a deficiency for an intervening consolidated return year results from the application of paragraph (f)(3)(i) of this section with respect to an item to which section 6501(h) applies, the deficiency may be assessed at any time within the period described in section 6501(h).

(iii) For purposes of chapter 67 of the Code (relating to interest), the last date prescribed for payment of any tax owed as a result of the application of paragraph (f)(3)(i) of this section is deemed to be the last day of the taxable year for which the item carried back arose.

(4) *Operating rules.* For purposes of paragraphs (d) through (j) of this section—

(i) The portion of a consolidated net operating loss deduction attributable to a member is determined as follows:

(A) First, determine under § 1.1502-79(a)(3) the portion of each consolidated net operating loss attributable to the member for the particular year in which the loss arose.

(B) Second, apply the anti-double-counting rule in paragraph (h)(3)(iii) of this section so as not to take the same loss into account twice.

(C) Finally, apply the loss absorption limit in paragraph (f)(4)(iii) of this section to the total amount of the consolidated net operating loss deduction from a particular loss year.

(ii) Capital loss carryovers and carrybacks shall be taken into account in a manner consistent with the principles of paragraphs (d) through (j) of this section.

(iii) This subdivision (iii) prescribes a loss absorption limit. The total amount of the consolidated net operating loss deduction from a given year (loss year) taken into account as reductions under paragraph (f)(1) of this section for another year (absorption year) shall not exceed the amount of the consolidated net operating loss deduction attributable to the loss year absorbed in computing consolidated taxable income for the absorption year. For this purpose, consolidated taxable income for the absorption year shall include a deduction under section 593(b) (other than paragraph (2) thereof) for each thrift member.

(iv) This subdivision (iv) prescribes a rule for netting in certain cases income attributable to functionally related activities of a nonthrift in a consolidated return year ("income year") against losses attributable to functionally related activities of that nonthrift which arise in a consolidated return year ("loss year"). That nonthrift's income is netted against the portion of that nonthrift's loss which would otherwise be applied in a consolidated return year ("reduction year") under paragraph (f)(1)(iii) or (iv) of this section to reduce a thrift's tentative taxable income, but—

(A) Only if the income year is not later than the loss year and the reduction year, and

(B) Only to the extent the income had not previously been taken into account under paragraph (f)(2) of this section or this subdivision (iv) as of the close of the later of the loss year and the reduction year.

(g) *Income (or loss) attributable to functionally related activities of a nonthrift.*—(1) *In general.* For purposes of this section, the income (or loss) attributable to functionally related activities of a nonthrift is the income (or loss) of the nonthrift.

(i) Attributable to the provision of assets or the rendition of services to a thrift (such as the leasing of office space or providing computer or financial services), or

(ii) Derived from the assets described in section 7701(a)(19)(C)(iii) through (x), but only if such assets comprise 5 percent or more of the gross assets of the nonthrift.

(2) *Amount of income (or loss).* The amount of income (or loss) from such activities is the excess of (i) gross income from such activities over (ii) the deductions of the nonthrift allocable and apportionable to that gross income under the principles of § 1.861-8. The loss attributable to functionally related activities of a nonthrift is the excess (if any) of such deductions over such gross income. That loss, however, may not exceed the amount of the tentative taxable loss of that nonthrift (determined by excluding losses arising in taxable years for which the due date (without extensions) for filing returns is before March 15, 1983).

(h) *Allocation of income and losses.*—(1) *In general.* Paragraph (h)(2)–(5) of this section provides rules for allocating different losses among thrifts that have tentative taxable income greater than zero. Generally, these allocations are made in the order listed in paragraph (f)(1) of this section and are based upon the relative tentative taxable income of the thrifts to which the particular loss is allocated. For purposes of each allocation under a subdivision of such paragraph (f)(1), the tentative taxable income of the thrifts used in making this allocation is reduced by the thrift's allocable share of losses allocated to the thrift under a prior subdivision of such paragraph (f)(1). Accordingly, for purposes of this paragraph (h), tentative taxable income is determined without regard to paragraph (f) of this section, except as otherwise provided. Paragraph (h)(6) of this section provides rules for allocating income attributable to functionally related activities of a

nonthrift based upon the relative reductions to thrift income made on account of that nonthrift.

(2) *Allocation of tentative taxable loss of other thrifts.* For purposes of paragraph (f)(1)(i) of this section, a thrift's allocable share of another thrift's tentative taxable loss is the loss multiplied by a fraction. The numerator of the fraction is the tentative taxable income (if greater than zero) of the thrift, and the denominator is the aggregate of such tentative taxable income of each thrift.

(3) *Allocation of portions of a consolidated net operating loss deduction.* (i) For purposes of paragraph (f)(1)(ii) of this section, a first thrift's allocable share of the portion of the consolidated net operating loss deduction attributable to another thrift is determined under paragraph (h)(2) of this section as if that portion were a tentative taxable loss of that other thrift and by computing tentative taxable income under such paragraph (h)(2) by taking into account paragraph (f)(1)(i) of this section. A thrift's allocable share of the portion of the consolidated net operating loss deduction attributable to that thrift is equal to that entire portion.

(ii) For purposes of paragraph (f)(1)(iv) of this section, a thrift's allocable share of the portion of a consolidated net operating loss deduction attributable to functionally related activities of a nonthrift (determined under paragraph (h)(5) of this section) is determined under paragraph (h)(4) of this section as if that portion were a loss attributable to functionally related activities of the nonthrift and by computing tentative taxable income under such paragraph (h)(4) by taking into account paragraph (f)(1) (i), (ii), and (iii) of this section.

(iii) This subdivision (iii) prevents the "double-counting" of losses. The reduction to the tentative taxable income of a thrift is diminished to the extent the loss that gave rise to the reduction has previously been taken into account in reducing a thrift's tentative taxable income. Thus, any loss taken into account as a reduction to a thrift's separate taxable income under any subdivision of paragraph (f)(1) of this section shall be reduced (but not below zero) to the extent taken into account—

(A) In a prior consolidated return year under any subdivision of such paragraph (f)(1) or

(B) In the current consolidated return year under a previous subdivision of such paragraph (f)(1).

(4) *Allocation of loss attributable to functionally related activities of a nonthrift.* For purposes of paragraph (f)(1)(iii) of this section, a thrift's allocable share of a loss attributable to functionally related activities of a nonthrift is determined by multiplying the loss by a fraction. The numerator of the fraction is the tentative taxable income (if greater than zero) of the thrift (taking into account paragraph (f)(1) (i) and (ii) of this section) and the denominator is the aggregate of such tentative taxable income (so determined) of each thrift.

(5) *Portion of the consolidated net operating loss deduction attributable to functionally related activities of a particular nonthrift.* The portion of the consolidated net operating loss deduction attributable to functionally related activities of a particular nonthrift is the lesser of the following two amounts:

(i) The portion of the consolidated net operating loss deduction attributable to that nonthrift.

(ii) The aggregate of the losses attributable to functionally related activities of that nonthrift for the taxable years in which the consolidated net operating loss deduction arose.

(6) *Allocation of income attributable to functionally related activities of a nonthrift.* For purposes of paragraph (f)(2) of this section, a thrift institution's allocable share of the income attributable to functionally related activities of a nonthrift is determined by multiplying that income by a fraction. The numerator of the fraction is the amount of the cumulative reductions referred to in paragraph (f)(2)(ii) of this section (minus the cumulative increases under paragraph (f)(2) of this section) made on account of that nonthrift for the thrift and the denominator is the sum of such cumulative reductions (minus such cumulative increases) made on account of that nonthrift for all thrifts.

(7) *Proper accounting* The provisions of section 482 apply in determining a thrift institution's tentative taxable income, and in determining the gross income and deductions attributable to functionally related activities. For example, an expense such as the salary of an individual who performs services for both a thrift and a nonthrift must be allocated in a manner that fairly reflects the value of the services rendered to each.

(i) [Reserved]

(j) *Examples.* The provisions of this section may be illustrated by the following examples. In each example the letter "T" for a member denotes a thrift and the letters "NT" denote a nonthrift. Also, in each example, a thrift loss includes a bad debt deduction under section 593(b) (other than paragraph (2) thereof) for such year and a thrift with income would have such a bad debt deduction of zero.

Example (1). (a) In 1983, corporations T1, T2, NT1, and NT2 are formed. These corporations constitute an affiliated group that files a consolidated return on the basis of a calendar year. For 1983, 1984, and 1985, the tentative taxable income (or loss) of each member (before the application of paragraph (f) of this section) is as follows:

	[illegible]	1984	[illegible]
NT1	$(60)	$(140)	$15
T1	1,000	[illegible]	[illegible]
NT2	[illegible]	[illegible]	[illegible]
T2	(300)	[illegible]	[illegible]

In 1983, NT1, in addition to its other business activities, acted as a collection agency for T1. Deductions attributable to those activities exceeded gross income attributable to those activities by $70. NT1's other activities generated a $10 gain. In 1984 and 1985, NT1 acted as a collection agency for T1 as its sole activity.

(b) The tentative taxable incomes of T1 and T2 for 1983 (determined under paragraph (e) of this section) as of the close of that year are adjusted by paragraph (f) of this section as follows:

(i) T1's tentative taxable income:		
T1's tentative taxable income (before the application of paragraph (f) of this section		$1,000
Less:		
T2's tentative taxable loss	$300	
NT1's functionally related loss (limited by NT1's overall loss)	60	360
T1's tentative taxable income for 1983		640

(ii) T2's tentative taxable income for 1983 is [illegible].

(c) The tentative taxable incomes of T1 and T2 for 1984 (determined under paragraph (e) of this section as of the close of that year) are adjusted by paragraph (f) of this section as follows:

(i) T1's tentative taxable income:

T1's tentative taxable income (before the application of paragraph (f) of this section)	$500
Less:	
T1's allocable portion of NT1's functionally related loss (140x500/(500+400))	78
T1's tentative taxable income for 1984	422

(ii) T2's tentative taxable income:

T2's tentative taxable income (before the application of paragraph (f) of this section	400
Less:	
T2's allocable portion of NT1's functionally related loss (140x400/(500+400))	62
T2's tentative taxable income for 1984	338

(d) For 1985, the amount under paragraph (f) (2) of this section for both T1 and T2 is $15 (NT1's tentative taxable income from functionally related activities for 1985). For 1983 and 1984, T1's tentative taxable income was reduced by a total of $138 (*i.e.*, $60 + $78) due to NT1's losses from functionally related activities. For 1984, T2's tentative taxable income was reduced by $62 due to those losses. Accordingly, under paragraph (f)(2) of this section, T1's tentative taxable income for 1983 is increased by $10 (*i.e.*, $15x$138/($138+$62)) and T2's tentative

taxable income is increased by $5 (*i.e.*, $15x$62/($138+$62)).

Example (2). (a) In 1983, corporations T, NT1, and NT2 are formed. these corporations constitute an affiliated group. NT2 provides computer services to T as its sole activity. For the calendar years 1983, 1984, and 1985, the group files a consolidated return. The tentative taxable income of each member (before the application of paragraph (f) of this section) is as follows:

	1983	1984	1985
T	$100	$0	$(200)
NT1	200	0	100
NT2	(300)	0	0

(b) Under paragraph (f)(1) of this section, T's tentative taxable income for 1983 (determined at the close of that year) is reduced to $80 (*i.e.*, $100 less NT2's $20 loss). For 1984, under paragraph (f)(2) of this section, T's tentative taxable income is increased by $20. For 1985, the consolidated net operating loss of $100 (all of which is attributable to T) is carried back to 1983. That $100 carryback is not limited by paragraph (f)(4)(iii) of this section, since consolidated taxable income for 1983 available for absorption after a bad debt deduction of $0 under section 593(b) (other than paragraph (2) thereof) for that year is $280. Accordingly, under paragraph (f)(1)(ii) of this section, T's tentative taxable income is reduced by the full $100, which is taken into account before the previous reduction of T's tentative taxable income under paragraph (f)(1)(iii) of this section. In addition, under paragraph (f)(3)(i) of this section, the group must file an amended return for 1984 to eliminate the increase to T's bad debt deduction for 1984 by reason of the consolidated net operating loss carryback to 1983.

Example (3). (a) T and NT are formed in 1983 and are the only members of an affiliated group filing a consolidated return on a calendar year basis. NT provided computer services to T as its sole activity. For 1983, 1984, and 1985, the tentative taxable income of T and NT (before the application of paragraph (f) of this section) is as follows:

	1983	1984	1985
T	$100	$0	$0
NT	0	40	(40)

(b) At the close of 1983, T's tentative taxable income is $100. For 1985, however, the group has a consolidated net operating loss of $40, all of which is attributable to NT's functionally related activities and which is carried back to 1983. However, T's tentative taxable income for 1983 is not reduced under paragraph (f)(1)(iv) of this section, since, under paragraph (f)(4)(iv) of this section, NT's 1984 income attributable to functionally related activities of $40 is netted against that $40 carryback.

Example (4). (a) In 1983, corporations T1, T2, NT1, and NT2 are formed. For calendar years 1983, 1984, and 1985, the affiliated group consisting of T1, T2, NT1, and NT2 filed a consolidated return. NT1 provided computer services to T1 as its sole activity. The tentative taxable income of each member (before the application of paragraph (f) of this section) is as follows:

	1983	1984	1985
T1	($50)	100	$0
T2	(50)	(60)	(25)
NT1	(50)	(40)	(99)
NT2	120	30	100

(b) For 1983, the group has a consolidated net operating loss of $30, apportioned $10 each to T1, T2, and NT1 under § 1.1502–79(a)(3). For 1984, the only thrift with tentative taxable income greater than zero (before applying paragraph (f) of this section) is T1. That tentative taxable income of $100 is first reduced to $20 by T2's $80 1984 loss under paragraph (f)(1)(i) of this section. Next, T1's remaining tentative taxable income of $20 is reduced to $10 by the portions attributable to T1 and T2 of the 1983 consolidated net operating loss carryover to 1984 under paragraph (f)(1)(ii) of this section. The sum of those portions is limited to $10 (*i.e.*, $5 each) by paragraph (f)(4)(iii) of this section because 1984 consolidated taxable income available for absorption after a bad debt deduction under section 593(b) (other than paragraph (2) thereof) for each thrift member for that year is $10. For that reason, paragraph (f)(4)(iii) of this section also prevents any further portion of that carryover from being taken into account in 1984 as a reduction under paragraph (f)(1) of this section. T1's remaining tentative taxable income of $10 is reduced to zero, under paragraph (f)(1)(iii) of this section, by NT1's 1984 tentative taxable loss.

(c) For 1985, the only thrift with tentative taxable income greater than zero (before applying paragraph (f) of this section) is T1. T1's tentative taxable income for 1985 of $30 is reduced to $5 by T2's 1985 loss of $25 under paragraph (f)(1)(i) of this section. Next, the portions attributable to T1 and T2 of the consolidated net operating loss carryover from 1983 to 1985 for purposes of paragraph (f)(1)(ii) of this section must be determined. That determination is made without applying the rules for loss absorption in computing consolidated taxable income under § 1.1502–21(b)(3). Those portions are instead determined in 3 steps under paragraph (f)(4)(i) of this section. The first of those steps is to determine each of T1's and T2's attributable portions of the 1983 consolidated net operating loss which under § 1.1502–79(a)(3) is $10 or $20 for both thrifts. The second of those steps is to apply the anti-double counting rule under paragraph (h)(3)(iii) of this section to reduce that $20 amount by the $10 total of the two $5 portions attributable to T1 and T2 of the consolidated net operating loss carryover from 1983 to 1984 taken into account as reductions to T1's tentative taxable income for 1984 under paragraph (f)(1)(ii) of this section. That leaves a $10 total amount available to be taken into account as reductions to T1's remaining tentative taxable income of $5 for 1985 under paragraph (f)(1)(ii) of this section. Under the third of those steps that $10 amount, however, is limited, under the loss absorption limit of paragraph (f)(4)(iii) of this section, to the $6 of the 1983 consolidated net operating loss carryover to 1985 which is absorbed in computing consolidated taxable income for 1985 since 1985 consolidated taxable income available for absorption after a bad debt deduction under section 593(b) (other than paragraph (2) thereof) for that year is $6 (*i.e.*, $30+$100−$99−$25). Because separate taxable income cannot be reduced below zero under paragraph (f)(1) of this section, T1's remaining tentative taxable income of $5 is thus reduced to zero by the portions attributable to T1 and T2, respectively, of the consolidated net operating loss carryover from 1983 to 1985 under paragraph (f)(1)(ii) of this section.

(Secs. 1502 and 7805 of the Internal Revenue Code of 1954 (68A Stat. 637, 917; 26 U.S.C. 1502, 7805))

Roscoe L. Egger, Jr.,

Commissioner of Internal Revenue.

Approved: March 14, 1983.

John E. Chapoton,

Assistant Secretary of the Treasury.

BILLING CODE 4830-01-M

Fiscal Service

31 CFR Part 240

Extension of the Treasury's Reclamation Authority

AGENCY: Bureau of Government Financial Operations, Fiscal Service, Treasury.

ACTION: Temporary rule.

SUMMARY: Under 31 CFR 240.4 and 240.5, Treasury has the right to refunds from banks and other indorsers receiving payment on Treasury checks bearing forged or unauthorized indorsements or any other material defects or alterations. The United States has a common law right to offset amounts owed to it against amounts in its possession belonging to its debtors. *United States v. Munsey Trust Co.*, 332 U.S. 234, 239 (1947). Further, Treasury is authorized under the Federal Claims Collection Act of 1966, as amended by Pub. L. 97–365, section 10, to issue regulations that authorize it to recover amounts of delinquent reclamations and accrued interest thereon by offsetting those amounts against amounts in the possession of the United States that are owed to presenting banks.

For reasons stated in the Supplementary Information section of this rule, Treasury has decided to publish this temporary rule with an effective date of fewer than 30 days from the date of publication. In the near future, Treasury will be publishing a

Notice of Proposed Rulemaking requesting public comments on whether procedures similar to those contained in this temporary rule should be adopted as a final rule.

EFFECTIVE DATE: March 17, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Michael D. Serlin, Assistant Commissioner, Governmentwide Accounting, Room 418, Treasury Annex, Pennsylvania Avenue and Madison Place, N.W., Washington, D.C. 20226 (202–566–5594).

SUPPLEMENTARY INFORMATION: The purpose of the rule is more effective debt collection. Under the Federal Claims Collection Act of 1966, as amended, the Secretary of the Treasury has the duty to attempt collection of all claims of the United States for money or property arising out of the activities of, or referred to Treasury. *See*, section 1, Pub. L. 97–258, 96 Stat. 877 at 971, Sept. 13, 1982 (Revised 31 U.S.C.A. 3711 (1982)) and 4 CFR 102.3. Treasury's claims against indorsers of, and banks that present for payment, Treasury checks bearing forged or unauthorized indorsements are within the scope of this duty. Historically, many presenting banks have declined to pay these legitimate claims (reclamations), forcing Treasury to either litigate its claims, a procedure which is rarely cost-effective, or absorb the loss.

Treasury first advised the public that it was considering collecting amounts owed it because of check claims by offset against amounts owed a presenting bank by a Federal Reserve Bank in an Advance Notice of Proposed Rulemaking (ANPR) published in the **Federal Register** on April 25, 1979 (44 FR 24306). (Although the term "setoff" was used in the ANPR and in the Notice of Proposed Rulemaking discussed below, the term "offset" will be used uniformly here because the debt collection methods described are substantially the same.) Because of the substantial questions raised by several commenters, Treasury withheld further action on the proposal pending additional consideration. 44 FR 53080, Sept. 12, 1979.

After further consideration, Treasury again invited comments for the public concerning a proposed change in the regulations that would allow Treasury to recover delinquent reclamations through offset. Notice of Proposed Rulemaking (NOPR), published November 4, 1981 (46 FR 54762). Unlike the ANPR, the NOPR provided specific regulatory language for comment. Although the NOPR also provided for recovery from presenting banks' reserve account balances, the Supplementary Information portion of the document referred both to offset authorized by contract between Treasury and presenting banks and to offset authorized at common law. This latter type of offset is referred to by regulations implementing the Federal Claims Collection Act. 4 CFR 102.3.

Treasury received 35 comments on the NOPR. Many of the comments alleged that Treasury lacked the statutory authority to offset and that the unavailability of an oral pre-offset hearing deprived affected banks of due process. In Treasury's view, the subsequent passage of Pub. L. 97–365, the Debt Collection Act of 1982 (the Act), resolves these objections. The Act gives federal agencies express authority to recover debts by administrative offset, referred to in this rule as "offset," under a comprehensive administrative procedure that does not require an oral hearing. *Compare*, Pub. L. 97–365, section 5. Congress' conscious omission of the right to an oral hearing reflects its assessment that due process does not require an oral hearing in this context. However, section 10 of the Act does require that, prior to effecting offset, agencies provide the debtor with:

(1) Written notification of the nature and amount of the claim, the intention of the agency to collect the claim through administrative offset, and an explanation of the rights of the debtor under this section;

(2) an opportunity to inspect and copy the records of the agency with respect to the claim;

(3) an opportunity for the review, within the agency, of the determination of the agency with respect to the claim; and

(4) an opportunity to enter into a written agreement with the head of the agency or his designee, for the repayment of the amount of the claim.

Recognizing that due process is a flexible concept and that courts often defer to Congress' view of the requisities of due process, *i.e.*, acts of Congress are presumed to be constitutional, *Buttfield v. Stranahan*, 192 U.S. 470 (1904), Treasury does not consider an oral hearing necessary to afford a presenting bank due process in connection with recovery of these check claims.

In addition to its authority to effect offset under the Federal Claims Collection Act, *as amended*, Treasury may also retain its common law right of offset. *United States v. Munsey Trust Co.*, 332 U.S. 234, 239 (1947).

The remaining comments on the November 1981 proposed rule and Treasury's responses thereto are as follows:

(1) Some commenters thought that the existing system (that is, voluntary payment of reclamations) would be more effective if Treasury began reclamations sooner, thus making the rule unnecessary. Delayed reclamation by Treasury makes it more difficult for the presenting banks to recover from prior indorsers.

Response: A reclamation is not begun until a payee has made a claim against Treasury for the proceeds of his or her check or until Treasury is notified of a payee's death. Treasury can not know that there is a forged or unauthorized endorsement before that time. Under section 1, Pub. L. 97–258, 96 Stat. 877 at 970, Sept. 13, 1982 (Revised 31 U.S.C.A. 3702 (1982)), a payee can submit a claim up to six years after the date the check was issued. Most delays in beginning a reclamation are caused by the delay in receiving the claim from the payee. Furthermore, under section 1, Pub. L. 97–258 96 Stat. 877 at 971, Sept. 13, 1982 (Revised 31 U.S.C.A. 3712 (1982)), the United States has at least six years from the date a check is presented to it for payment to make a claim therefor against a prior indorser. With regard to the presenting bank's rights against prior indorsers, as long as the presenting bank promptly notifies a prior indorser upon receipt of a reclamation notice that the prior indorser appears to have breached its warranty that all prior endorsements were genuine or authorized, the fact that the reclamation notice was delayed does not affect the rights of the presenting bank against the prior indorser. Uniform Commercial Code ("UCC") 4–207(4) allows a presenting bank to recover against a prior indorser "within a reasonable time after the person claiming learns of the breach [of the warranty under UCC 4–207(2)]."

(2) Several commenters alleged that Treasury is uncooperative in providing sufficient information to determine the presenting bank's liability when reclamation is initiated.

Response: With respect to providing the presenting banks with sufficient information to determine their liability, Treasury has always provided a copy of the check and the payee's claim, where a payee has filed a claim. In addition, Treasury recently has made significant improvements in the quality of microfilm check copies provided to presenting banks with reclamation demands. Also, a staff has been established within the Bureau of Government Financial Operations with the sole responsibility for processing requests from the banking community on a timely basis. Treasury will continue its efforts to be more responsive to the banking community.

(3) Some commenters argued that Treasury has no legal authority to issue the proposed rule.

Response: The Supreme Court has recognized Treasury's authority to issue regulation governing the rights and duties of the United States on the commercial paper it issues, *Clearfield Trust Co. v. United States.* 318 U.S. 363, 366 (1943), and the United States' common law right to offset has been recognized for many years, *United States v. Munsey Trust Co.,* 332 U.S. 234; 4 CFR 102.3.

In addition, as previously stated, the Federal Claims Collection Act, as amended, provides express statutory authority to offset.

(4) There is no provision for presenting banks to receive interest payments on improper offsets.

Response: Treasury has no legal authority to pay interest on amounts wrongfully withheld. However, because collection by offset will be preceded by notice to the debtor of the amount due, and because the debtor will have an opportunity to contest the indebtedness before it is collected, the risk of erroneous collection will be minimal.

(5) The presenting banks do not have sufficient time to investigate reclamations. A longer period was suggested.

Response: With respect to suggestions for a longer period before collection, the final rule has been changed so that collection will not occur prior to 120 days after the reclamation date.

Section 10 of Pub. L. 97–365 requires each agency that promulgates administrative offset regulations to consider:

(1) The best interests of the United States,

(2) The likelihood of collecting a claim by administrative offset, and

(3) with respect to the collection of claims after the expiration of the statute of limitations in 28 U.S.C. 2415, the cost effectiveness of leaving such claims unresolved for more than six years.

Because Treasury's right to reclaim is limited by section 1, Pub. L. 97–258, 96 Stat. 877 at 971, Sept. 13, 1982 (Revised 31 U.S.C.A. 3712(a) (1982)), rather than 28 U.S.C. 2415, we conclude that the third consideration is inapplicable to this rule. This rule is in the best interests of the United States because it will enable Treasury efficiently to recover debts that it could not otherwise collect in a cost-effective manner. Also, because offset will be sought against presenting banks that have continuing financial dealings with the United States, the likelihood of recovery by offset will be substantial.

The substance of this temporary rule on the one hand, and the proposal in the ANPR and the NOPR on the other, are substantially the same with one difference. All three involve enforced collection, without resort to litigation, of amounts presenting banks owe Treasury because they received payment on checks involving breaches of the banks' warranties that indorsements were genuine or authorized. All involved recovery by offset against amounts the United States or its agents owe the presenting banks independent of the payment on a check. All afford presenting banks the opportunity to present evidence and arguments contesting Treasury's claims before collection takes place. The primary difference between the ANPR, the NOPR and this temporary rule, is the source of funds for that offset. The ANPR and the NOPR targeted presenting banks' reserve account balances and this temporary rule targets other indebtedness of the United States to the presenting banks.

Accordingly, it is Treasury's view that there is good cause not to issue an additional NOPR. *See,* 5 U.S.C. 553(b)(B). Such an additional NOPR is unnecessary in view of the fact that Treasury has repeatedly sought comments from affected parties on proposals to implement some form of offset. *See,* Advance Notice of Proposed Rulemaking, 44 FR 24308, and Notice of Proposed Rulemaking, 46 FR 54762. The affected parties have had an adequate opportunity to express their views on the concept of offset. Because Treasury envisioned offset against reserve account balances at earlier stages of the rulemaking process, none of the negative comments received by Treasury referred to common law offset, which we believe is substantially similar to "administrative offfset" under section 10 of the Debt Collection Act. We note, however, that common law offset has been accepted generally in the banking community as a debt collection method. In addition, it is specifically referred to as an appropriate debt collection method in the Federal Claims Collection Standards, 4 CFR Part 102. We, therefore, do not believe that the delay in collecting debts that an additional comment period would require is appropriate.

Delaying collection on long-outstanding reclamations pending publication of an additional NOPR, receipt and assessment of comments, and publication of a final rule would be contrary to the significant public interest in timely collection of debts owed to the United States. At the end of November, 1982, Treasury had outstanding reclamations issued since May 20, 1981, totalling $14.13 million. Of that amount, $4.60 million was for reclamations that had been outstanding for more than 120 days. Treasury finds that the public interest would best be served by collecting delinquent reclamations in a more timely fashion as soon as possible and that this rule is essential thereto. In addition, Treasury is presently owed $118,000 in interest on reclamations for which the bank has paid the principal amount, but has failed to pay accrued interest. Unlike the principal amounts owed Treasury, those interest amounts do not accrue interest. It is likely that this sum will continue to grow as long as there is no offset mechanism in place. Therefore, it is imperative that Treasury have an efficient means to collect these debts as soon as possible.

Based on the foregoing, Treasury has concluded that it has good cause as required by 5 U.S.C. 553(d)(3) for making this rule effective less than 30 days from the date of publication. This conclusion is based substantially on the above-identified cost to the government of further delay in publishing this offset rule. In addition, the present reclamation system has existed for many years. Treasury has repeatedly informed banks of, and the banks have been given ample time to, exercise their right to contest Treasury's claims. They are aware of the quality and quantity of information that Treasury requires before it will abandon a reclamation. Finally, Treasury does not intend to offset until it has considered each argument timely presented by a bank and has concluded that, notwithstanding those arguments, the bank is liable for the amount of the reclamation.

It should be noted that the time available to banks to either pay or submit a protest in order to avoid offset action will vary depending on when the reclamation was issued. This variation will exist during the period the temporary rule is to be effective. An example of the variation is that the presenting bank will have until April 25, 1983, to pay or submit a protest in order to avoid offset of a reclamation issued on November 23, 1982; but in the case of a reclamation issued on April 24, 1983, it must submit a protest by July 25, 1983, or pay the amount owed by August 25, 1983, in order to avoid offset. The text of the rule sets out these timeframes specifically with respect to all periods covered.

It is possible that in some cases payment will have been made or a valid protest submitted by a bank before offset, but too late for Treasury to stop the offset process. To cover that possiblity, section 240.7(d) of the regulation provides for prompt refund of

the amount of the overpayment or erroneous offset.

It has been determined that this amendment is not a "major rule" as defined in Executive Order 12291, dated February 17, 1981. This determination is based on the fact that the rule's only purpose and effect will be to increase the efficiency and effectiveness of the United States' efforts to collect debts that arise under existing law and for the collection of which the Secretary is responsible under existing law. In addition, the only significant alternative collection device, litigation, has not been sufficiently effective. The provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) do not apply to this rule because a notice of proposed rulemaking is not required by 5 U.S.C. 553.

List of Subjects in 31 CFR Part 240

Banks, Banking, Forgery, Treasury checks.

PART 240—INDORSEMENT AND PAYMENT OF CHECKS DRAWN ON THE UNITED STATES TREASURY

Accordingly, 31 CFR Part 240 is amended as follows:

1. By revising the authority citation to read as follows:

Authority: 5 U.S.C. 301; 12 U.S.C. 391; sec. 1, Pub. L. 97–258, 96 Stat. 877 at 955, Sept. 13, 1982 (Revised 31 U.S.C.A. 3331 (1982)); sec. 1, Pub. L. 97–258, 96 Stat. 877 at 957, Sept. 13, 1982 (Revised 31 U.S.C.A. 3343 (1982)); sec. 1, Pub. L. 97–258, 96 Stat. 877 at 971, Sept. 13, 1982 (Revised 31 U.S.C.A. 3711 (1982)), as amended by secs. 10 and 11, Pub. L. 97–365; 318 U.S. 363 (1943); and 332 U.S. 234, 239 (1947).

2. By revising § 240.1 to read as follows:

§ 240.1 Scope of regulations.

The regulations in this part prescribe the requirements for indorsement and the conditions for payment of checks drawn on the United States Treasury. These regulations also establish procedures for the collection of amounts due the United States Treasury because of payments on checks bearing forged or other unauthorized indorsements, or other material defects or alterations.

3. By revising § 240.2 to read as follows:

§ 240.2 Definitions.

(a) "Check" or "checks" means a check or checks drawn on the United States Treasury.

(b) "Check payment" means the amount paid to a presenting bank in accordance with § 240.8 (a)(3) of this Part.

(c) "Days" means calendar days.

(d) "Financial organization" means any bank, savings bank, savings and loan association, Federal or State chartered credit union, or similar institution.

(e) "Item" means a reference in a monthly interest billing statement to a check for the amount of which Treasury has demanded refund from a presenting bank.

(f) "Monthly interest billing statement" means a statement prepared by Treasury and sent to a presenting bank which includes the following information regarding each outstanding demand for refund:

(1) The reclamation date;

(2) The reclamation number;

(3) Check identifying information;

(4) The balance due, including interest; and

(5) If applicable, that the demand is subject to collection by immediate offset.

(g) "Person" or "persons" means an individual or individuals, or an organization or organizations, including all forms of financial organizations.

(h) "Presenting bank" means: (1) A financial organization which, either directly or through a correspondent banking relationship, presents checks to and receives credit from a Federal Reserve Bank, or (2) a despositary which is authorized to charge checks directly to the General Account of the United States Treasury and present them directly to Treasury for payment.

(i) "Protest" means a presenting bank's written statement and any supporting documentation tending to prove that it is not liable for refund of the reclamation balance.

(j) "Reclamation" means a demand by Treasury for refund of the amount of a check payment.

(k) "Reclamation date" means the date on which a demand for refund was prepared. This date appears on the face of the reclamation ticket. Normally, demands are sent to presenting banks within two working days of the reclamation date.

(l) "Treasury" means the United States Treasury.

(m) "U.S. securities" means securities of the United States and securities of Federal agencies and wholly or partially Government-owned corporations for which the Treasury acts as transfer agent.

(n) "Unauthorized indorsement" means (1) an indorsement made by a person other than the payee, except as authorized by and in accordance with § 240.4 and §§ 240.10 through 240.14 of this part, (2) an indorsement by a financial organization under circumstances in which the financial organization breaches the guaranty required of it by 31 CFR 209.10(a) (*see* 31 CFR 209.9), or (3) a missing indorsement where the depositary bank had no authority to supply the indorsement.

4. By revising § 240.5 to read as follows:

§ 240.5 Collection of amounts of paid checks.

(a) If, after a check has been paid by Treasury, it is found to:

(1) Bear an unauthorized indorsement, or

(2) Contain any other material defect or alteration which was not discovered upon first examination,

then, upon demand by the Treasury in accordance with the procedures specified in § 240.6 of this Part, the presenting bank or other indorser shall refund to Treasury the amount of the check payment.

(b) Interest on any unpaid item shall commence to accrue on the sixty-first day after the reclamation date. Interest shall be calculated at the rate set from time to time for purposes of section 1, Pub. L. 97–258, 96 Stat. 877 at 882 (Revised 31 U.S.C.A. 323 (1982)). Interest shall continue to accrue until the amount demanded is paid or the reclamation is abandoned.

(c) In addition to its right to recover interest, Treasury shall have the right to recover such other applicable charges (*e.g.*, administrative collection costs, late payment penalties) as may be authorized or required by law.

§§ 240.6–240.14 [Redesignated from §§ 240.6–240.12].

5. By redesignating §§ 240.6 through 240.12 as §§ 240.8 through 240.14, respectively, and by adding new §§ 240.6 and 240.7 as follows:

§ 240.6 Demand and protest.

(a) For all reclamations an initial demand for refund of the amount of a check payment will be made by sending a "Request for Refund (Reclamation)," to the presenting bank. This Request shall advise the presenting bank of the amount demanded and the reason for the demand. Treasury will make follow-up demands by including each unpaid item on at least three monthly interest billing statements sent to the presenting bank. Monthly interest billing statements will identify any unpaid reclamation demands and will also show the amount of any accrued interest for each outstanding reclamation. Beginning with monthly interest billing statements issued on or about the end of March, 1983, monthly interest billing

statements will contain or be accompanied by notice to the bank that:

(1) Treasury intends to collect the debt through administrative offset if the reclamation is not paid within 120 days of the reclamation date;

(2) the bank has an opportunity to inspect and copy Treasury's records with respect to the reclamation,

(3) the bank may, by filing a protest, request Treasury to review its decision that the bank is liable for the reclamation, and

(4) the bank has an opportunity to enter into a written agreement with Treasury for the repayment of the amount of the reclamation. In order for a bank to request such a repayment agreement, it must demonstrate to the satisfaction of Treasury that it is unable to repay the entire amount owed at the time that it is due.

(b) Requests for an appointment to inspect and copy Treasury's records with respect to a reclamation and requests to enter into repayment agreements should be sent in writing to: Department of the Treasury, Division of Check Claims, Reclamation Policy and Collection Section, 401 14th Street SW., Washington, D.C. 20227.

(c) (1) For reclamations dated on or before December 24, 1982, presenting banks will have been sent an initial demand and at least three of the followup demands described in paragraph (a) of this section before offset is accomplished. However, only two of the followup demands will contain the information described in paragraphs (a) (1) through (4) of this section. With respect to these reclamations, if Treasury has not received payment of the amount demanded or a protest meeting the requirements of paragraph (d) (1) of this section by April 25, 1983, the amount of the reclamation and accrued interest will be offset.

(2) For reclamations dated from December 25, 1982, through January 24, 1983 inclusive, presenting banks will have been sent an initial demand and four of the followup demands described in paragraph (a) of this section before offset is accomplished. However, only three of the followup demands will contain the information described in paragraphs (a) (1) through (4) of this section. With respect to these reclamations, if Treasury has not received payment of the amount demanded or a protest meeting the requirements of paragraph (d) (1) of this section by May 25, 1983, the amount of the reclamation and accrued interest will be offset.

(3) For reclamations dated from January 24, 1983, through February 24, 1983 inclusive, presenting banks will have been sent an initial demand and four of the followup demands described in paragraph (a) of this section before offset is accomplished. With respect to these reclamations, if Treasury has not received payment of the amount demanded or a protest meeting the requirements of paragraph (d) (1) of this section by June 25, 1983, the amount of the reclamation and accrued interest will be offset.

(4) For reclamations dated from February 25, 1983, through March 24, 1983 inclusive, presenting banks will have been sent an initial demand and four of the followup demands described in paragraph (a) of this section before offset is accomplished. With respect to these reclamations, if Treasury has not received payment of the amount demanded or a protest meeting the requirements of paragraph (d) (1) of this section by July 25, 1983, the amount of the reclamation and accrued interest will be offset.

(5) For reclamations dated from March 25, 1983, through April 24, 1983 inclusive, presenting banks will have been sent an initial demand and four of the followup demands described in paragraph (a) of this section before offset is accomplished. With respect to these reclamations, if Treasury has not received a protest meeting the requirements of paragraph (d) (1) of this section by July 25, 1983, or payment of the amount demanded by August 25, 1983, the amount of the reclamation and accrued interest will be offset.

(6) For reclamations dated on or after April 25, 1983, presenting banks will be sent an initial demand and three of the followup demands described in paragraph (a) of this section before offset is accomplished. With respect to these reclamations, if Treasury has not received a protest meeting the requirements of paragraph (d) (1) of this section within 90 days of the reclamation date or payment of the amount demanded within 120 days of the reclamation date, the amount of the reclamation and accrued interest will be offset.

(d) (1) If a presenting bank wishes to contest its liability for the principal amount demanded, it shall send a protest, *i.e.*, a written statement and all documentary evidence (*e.g.*, affidavits, account agreements, signature cards) and other written information raising a question of law or fact which, if resolved in the bank's favor, would disprove its liability for the reclamation, to: Department of the Treasury, Division of Check Claims, Reclamation Policy and Collection Section, 401 14th Street SW., Washington, D.C. 20227.

The Assistant Director (Support Services), Division of Check Claims, who has supervisory authority over the Reclamation Policy and Collection Section, or his authorized subordinate, shall consider and decide any protest properly submitted under this paragraph. Neither the Assistant Director (Support Services), Division of Check Claims, nor any of his subordinates, shall have any involvement in the process of making findings or demands under § 240.5(a). In order to be considered, and to be timely, a protest must be received at the above address by the time specified in paragraph (c) of this section. Treasury will refrain from collection in accordance with § 240.7 while a timely protest is being considered.

(2) If Treasury accepts the protest, the presenting bank shall be notified in writing that Treasury's efforts to collect the item and any accrued interest have been abandoned.

(3) If the evidence sent by the presenting bank does not satisfy Treasury that refund of the amount demanded is not required under § 240.5(a), Treasury will notify the presenting bank in writing of its decision that the bank is liable for the amount demanded. If the presenting bank fails to send the amount demanded within 30 days of the date of Treasury's decision, Treasury shall proceed to collect the amount owed in acordance with § 240.7, provided that no offset shall be taken sooner than 120 days after the reclamation date.

§ 240.7 Offset.

(a) If an item, and/or accrued interest on that item remain unpaid for 120 days after the reclamation date and the presenting bank has been sent at least one monthly interest billing statement informing it that Treasury intends to collect that item by offset, Treasury may refer the matter to any other federal agency and request that agency to offset the indebtedness and other applicable charges against amounts owed by the other federal agency to the presenting bank. Monthly interest billing statements will identify those items that are to be referred to another agency for offset. If an agency to which an indebtedness is referred in accordance with this paragraph is unable to effect offset in whole or in part within 30 days of the date that the matter is referred to it, it shall so inform Treasury and terminate its efforts to offset. Treasury may then refer the debt to any other federal agency and request offset in accordance with this paragraph. Treasury designates each agency acting

under this paragraph as its designee for the sole purpose of effecting offset. No such designee shall be liable to any party for any loss resulting from its action under this paragraph.

(b) If Treasury is unable to collect an amount owed by use of the offset described in paragraph (a) of this section, Treasury shall take such action against the presenting bank as may be necessary to protect the interests of the United States, including referral to the Department of Justice.

(c) The procedures provided for in §§ 240.5, 240.6(c), and this section shall apply to reclamations bearing reclamation dates on or after May 26, 1981.

(d) If Treasury effects offset under this section and it is later determined that the presenting bank paid the amount of the reclamation and accrued interest thereon, or that a presenting bank which had timely filed a protest was not liable for the amount of the reclamation, Treasury shall promptly refund to the presenting bank the amount of its payment.

Dated: March 14, 1983.

W. E. Douglas,

Commissioner, Bureau of Government Financial Operations.

BILLING CODE 4810-25-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Parts 64 and 66

[CGD 78-156]

Marking of Structures, Sunken Vessels, and Other Obstructions

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: These final rules revise regulations which govern the marking of structures (including Offshore Thermal Energy Conversion (OTEC) facilities), sunken vessels, and other obstructions. These revisions expand the scope of the regulations so as to correspond with statutory amendments to 14 U.S.C. 85 and 86 covering certain obstructions beyond the territorial seas of the United States, made by Pub. L. 93-283, sections 1(2) and 1(3) (88 Stat. 139). Additional changes, primarily editorial, delete redundant and archaic requirements. These changes also enable the regulations to be more clearly understood.

EFFECTIVE DATE: April 18, 1983.

FOR FURTHER INFORMATION CONTACT: Lieutenant (Junior Grade) Robert C. Hayden, Ofice of Navigation, Short Range Aids to Navigation Division (G-NSR-1/14), Rm 1416, U.S. Coast Guard Headquarters, 2100 Second St. SW., Washington, D.C. 20593, (202) 426-1973, between 7 a.m. and 3:30 p.m., Monday through Friday, except holidays.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking (NPRM) was published in the **Federal Register** of 19 November 1981, beginning at page 56829 (46 FR 56829). Interested parties were given until January 18, 1982 to submit comments. No requests for a public hearing were received and no hearing was held.

Drafting Information

The principal persons involved in drafting this proposal are Lieutenant (Junior Grade) Robert C. Hayden, Project Manager, Office of Navigation, and Lieutenant Mark D. Hanlon, Project Attorney, Office of the Chief Counsel.

Discussion of Comments

Comments from four sources were received. One comment recommended that § 64.01-3(b)(5) be changed to read: "Artificial islands and structures subject to Part 67 of this subchapter." This is incorporated into the final rule, since structures subject to Part 67 must be exempted from Part 64.

Another comment demonstrated that proposed § 64.20-1 would eliminate the existing application process required for aids to navigation on structures, as prescribed by § 66.01-35. This was not our intent. The application procedure serves an important function by requiring the owner or operator to recognize responsibility for operation, maintenance, and eventual disestablishment of the aid to navigation. Therefore, the existing application requirement in § 66.01-35 is transferred to § 64.20-1.

Another comment suggested that in proposed § 64.20-1 the word "building" should be changed to "establishing" since "building" suggests a fixed structure. The regulations are intended to include both floating and fixed structures, therefore, we have incorporated the word "establishing".

Another comment indicated that upon removal of § 66.01-35, §§ 66.01-40 and 45 become incomplete or meaningless. In § 66.01-40 this occurs because reference is made to the former title of Part 64, Part 66, and §§ 66.01-35 which no longer exist. The latter part of § 66.01-45 refers to penalties concerning structures which have been transferred to Part 64. To solve these problems this document modifies § 66.01-40(a) to reflect the new title of Part 64 and changes any reference to Part 66, which no longer exists, to Subchapter J, which contains the current regulations for bridges. § 66.01-40(b) is amended to delete references to § 66.01-35 and changes references from Part 66 to Subchapter J. The part of § 66.01-45 which refers to structures is deleted.

In addition to these editorial changes, the recitation of "Authority" for Parts 64 and 66 is expanded to include 14 U.S.C. 83; 33 U.S.C. 409; 42 U.S.C. 9118; and 43 U.S.C. 1333.

Regulatory Evaluation

These final regulations have been evaluated under E.O. 12291 and DOT Order 2100.5, "Policies and Procedures for Simplification, Analysis, and Review of Regulations," dated May 22, 1980 and have been determined to be neither major nor significant.

The proposed rules would revise regulations which govern the marking of miscellaneous structures (not covered under 33 CFR Part 67), sunken vessels, and other obstructions. Due to expanded statutory jurisdiction, the regulations would require marking of structures, sunken vessels and other obstructions outside U.S. territorial waters. Current regulations require markings of structures, sunken vessels and other obstructions inside U.S. territorial waters. The Coast Guard expects the impact of this proposed rule to be minimal. Of an estimated 500 private aids to navigation to be put in service next year, fewer than 25 will result from this regulation.

Where markings are required, the cost would be minimal when compared with the potential cost of ship and cargo loss and the potential cost of pollution damage to the environment. The estimated cost of marking an obstruction varies considerably with the size of the object, its location, and the degree of hazard to navigation presented. The cost may range from $300 to $10,000 per year. An average cost is about $1,000 per year.

In the areas outside U.S. territorial waters, covered by the expanded applicability of these regulations, marking is only expected to be required on structures that have been erected for commercial purposes. In these instances, the cost associated with required obstruction marking is insignificant when compared with the total cost of the structure.

By comparison, the damage to a vessel caused by collision with a structure or other obstruction can range into the millions of dollars. In addition there may be injuries or loss of life and

environmental damage due to pollution. While the likelihood of such incidents can not be established, marking is required only in these instances where there is a reasonable risk that they may occur.

Regulatory Flexibility Analysis

The proposed regulations have been evaluated under Pub. L. 96-354 (94 Stat. 1168) and are certified as having no significant economic impact on a substantial number of small entities. No significant impact was found because these final regulations primarily update, simplify and consolidate existing regulations by clarifying the applicability of the regulations, deleting extraneous material, and organizing the regulations in a more logical manner. Few obstructions owned by small entities are likely to require marking in the areas of expanded jurisdiction.

List of Subjects in 33 CFR Parts 64 and 66

Navigation (water).

In consideration of the foregoing, 33 CFR Parts 64 and 66 are amended as follows:

1. By revising Part 64 to read as follows:

PART 64—MARKING OF STRUCTURES, SUNKEN VESSELS AND OTHER OBSTRUCTIONS

Subpart 64.01—General

Sec.

64.01-1 Purpose.
64.01-3 Scope.
64.01-6 Definition of terms.

Subpart 64.10—Sunken Vessels and Other Obstructions

64.10-1 Markings and notification requirements.
64.10-3 Approval of markings.
64.10-6 Duration of marking on sunken vessels in navigable waters.

Subpart 64.20—Structures

64.20-1 Marking and notification requirements.
64.20-3 Duration of marking of structures.

Subpart 64.30—Miscellaneous Provisions

64.30-1 Determination of marking necessity.
64.30-3 Marking by the Coast Guard.

Authority: 14 U.S.C. 81, 83, 85, 86, 92, 633; 33 U.S.C. 409; Pub. L. 96-320, 94 Stat. 974 (42 U.S.C. 9118); 43 U.S.C. 1333; [49 CFR 1.46(b)]

Subpart 64.01—General

§ 64.01-1 Purpose.

This part prescribes rules relating to the marking of structures, sunken vessels and other obstructions for the protection of maritime navigation.

§ 64.01-3 Scope.

(a) Except as provided in paragraph (b) of this section these rules apply to—

(1) Structures located in or over waters subject to the jurisdiction of the United States and, on the high seas, structures owned or operated by persons subject to the jurisdiction of the United States;

(2) Sunken vessels in the navigable waters or waters above the continental shelf of the United States; and

(3) Other obstructions existing on or in the navigable waters or waters above the continental shelf of the United States.

(b) The following obstructions are exempt from the requirements of this part—

(1) Dredging pipelines subject to subchapter D of this chapter;

(2) Bridges subject to subchapter J of this chapter;

(3) Vessels subject to the International Regulations for preventing Collisions at Sea, 1972 (1972 COLREGS) or the Inland Navigation Rules;

(4) Deepwater port facilities subject to subchapter NN of this chapter; and

(5) Artificial islands and structures subject to Part 67 of this subchapter.

§ 64.01-6 Definition of terms.

As used in this part:

"Markings" means the lights and other signals placed on or near structures, sunken vessels, and other obstructions for the protection of navigation.

"Structures" means any fixed or floating obstruction, intentionally placed in the water, which may interfere with or restrict marine navigation.

Subpart 64.10—Sunken Vessels and Other Obstructions

§ 64.10-1 Marking and notification requirements

(a) The owner of a vessel, raft or other craft wrecked and sunk in a navigable channel is required by 33 U.S.C. 409 to mark it immediately with a buoy or daymark during the day and with a light at night. The courts have interpreted the statute very broadly, holding that it is not to be applied to vessels only and that "navigable channel" is not limited to those channels marked by buoys or other aids to navigation. Sunken vessels and other obstructions should be marked whenever they constitute a hazard to navigation.

(b) Owners of vessels sunk in waters subject to the jurisdiction of the United States or sunk on the high seas, if the owner is subject to the jurisdiction of the United States, shall promptly report to the District Commander, in whose jurisdiction the obstruction is located, the action they are taking to mark the sunken vessel, giving the following information (in addition to the report required by 46 CFR 4.05-1, Notice of Marine Casualty):

(1) Name and description of the sunken vessel;

(2) Accurate description of the location of the vessel;

(3) Depth of water over the vessel; and

(4) Location and type of marking established, including color and shape of buoy or other daymark and characteristic of the light.

(c) Owners of other obstructions may report the existence of such obstructions and mark them in the same manner as prescribed for sunken vessels.

Note.—Outer Continental Shelf (OCS) lessees are subject to additional notification requirements provided in OCS Order No.1, paragraph 4 (44 FR 76216, December 21, 1979), issued by U.S. Geological Survey.

§ 64.10-3 Approval of markings.

(a) All markings of sunken vessels and other obstructions established in accordance with § 64.10-1 must be reported to and approved by the appropriate District Commander.

(b) Should the District Commander determine that these markings are inconsistent with Part 62 of this subchapter, they must be replaced as soon as practicable with approved markings.

§ 64.10-6 Duration of marking on sunken vessels in navigable waters.

Markings shall be maintained until—

(a) The sunken vessel or other obstruction is removed; or

(b) The right of the owner to abandon is legally established and exercised.

Note.—Notices of abandonment of sunken vessels or other obstructions will not be accepted by the Coast Guard. Any notice of intention to abandon should be addressed to the District Engineer, Corps of Engineers, U.S. Army, within whose district the sunken vessel or other obstruction is located.

Subpart 64.20—Structures

§ 64.20-1 Marking and notification requirements.

Before establishing a structure, the owner or operator shall apply for Coast Guard authorization to mark the structure in accordance with § 66.01-5 of this chapter. The appropriate District Commander will determine the marking requirements.

§ 64.20-3 Duration of marking on structures.

Markings determined to be required shall be established and maintained until—

(a) The structure is removed; or
(b) Otherwise directed by the District Commander.

Subpart 64.30—Miscellaneous Provisions

§ 64.30-1 Determination of marking necessity.

(a) In determining the necessity of marking for the protection of maritime navigation, the District Commander considers, but is not limited to, the following—
(1) Physical characteristics of the obstruction;
(2) Depth of water in which it is located;
(3) Proximity of the obstruction to historic or designated vessel routes;
(4) Proximity of the obstruction to other obstructions or aids to navigation; and
(5) Type of vessel traffic at the obstruction site.
(6) [Reserved]

§ 64.30-3 Marking by the Coast Guard.

(a) The District Commander may mark for the protection of maritime navigation any structure, sunken vessel or other obstruction that is not suitably marked by the owner. Markings established by the Coast Guard do not relieve the owner's duty or responsibility to mark the sunken vessel or other obstruction, or to remove it as required by law.
(b) Costs for markings established by the Coast Guard will be determined in accordance with Part 74 of this Chapter.
(c) Costs for marking of a sunken vessel or other obstruction shall be charged to the owner and shall continue until—
(1) The vessel or other obstruction is removed;
(2) The right of the owner to abandon is legally established and has been exercised; or
(3) The District Commander directs otherwise.

Note.—When the needs of navigation permit, the owner may be given reasonable opportunity to establish and maintain the necessary markings.

PART 66—PRIVATE AIDS TO NAVIGATION

2. The authority for Part 66 is revised to read as follows:

Authority: 14 U.S.C. 81, 83, 85, 86, 92, 633, 33 U.S.C. 409; Pub. L. 96-320, 94 Stat. 974 (42 U.S.C. 9118), 43 U.S.C. 1333 unless otherwise noted.

§ 66.01-35 [Removed]

3. By removing 33 CFR 66.01-35.
4. By revising 33 CFR 66.01-40 to read as follows:

§ 66.01-40 Exemptions.

(a) Nothing in the preceding sections of this subpart shall be construed to interfere with or nullify the requirements of existing laws and regulations pertaining to the marking of structures, vessels and other obstructions sunken in waters subject to the jurisdiction of the United States (Part 64 of this subchapter), the marking of artificial islands and structures which are erected on or over the seabed and subsoil of the Outer Continental Shelf (Part 67 of this subchapter), or the lighting of bridges over navigable waters of the United States (subchapter J of this subchapter).
(b) Persons marking bridges pursuant to subchapter J of this title are exempted from the provisions of § 66.01-5.

By revising § 66.01-45 to read as follows:

§ 66.01-45 Penalties.

Any person, public body or instrumentality, excluding the armed forces, who shall establish, erect or maintain any aid to maritime navigation without first obtaining authority to do so from the Coast Guard, with the exception of those established in accordance with § 64.10 of this chapter, or who shall violate the regulations relative thereto issued in this part, is subject to the provisions of 14 U.S.C. 83.

Dated: March 3, 1983.

R. A. Bauman,

Rear Admiral, U.S. Coast Guard, Chief, Office of Navigation.

33 CFR Part 110

[CGD 09-82-04]

Special Anchorage Area; Fish Creek Harbor, Fish Creek, Wisconsin

AGENCY: Coast Guard, DOT.

ACTION: Final rule, Correction.

SUMMARY: This document corrects the area description contained in final regulations establishing a Special Anchorage Area at Fish Creek Harbor, Fish Creek, Wisconsin which was published 16 August 1982 (47 FR 35482).

The final rule description of the Special Anchorage Area placed a portion of it on shore. This correction is intended to redescribe the Anchorage Area entirely within the harbor.

FOR FURTHER INFORMATION CONTACT: Ensign Steven J. Boyle, Marine Port and Environmental Safety Branch, Ninth Coast Guard District, 1240 East 9th Street, Cleveland, OH 44199, or phone (216) 522-7064. Normal office hours are between 8 a.m. and 4 p.m., Monday through Friday, except holidays.

PART 110—[AMENDED]

Accordingly, the Coast Guard is correcting 33 CFR 110.79c to read as follows:

§ 110.79c Fish Creek Harbor, Fish Creek, Wisconsin

The area within the following boundaries: Beginning at latitude 45°07'58" N., longitude 87°14'41" W.; thence to latitude 45°07'58" N., longitude 87°14'35" W.; thence to latitude 45°07'50" N., longitude 87°14'30" W.; thence to latitude 45°07'47" N., longitude 87°14'38" W.; thence to the point of beginning.

(Sec. 1, 28 Stat. 647, as amended (33 USC 258); sec. 6(g)(1)(c) 80 Stat. 937 (49 USC 1655(g)(1)(c)); 49 CFR 1.46(c)(3); 33 CFR 1.05-1(g) (1) and (2))

Dated: March 8, 1983.

Henry H. Bell,

Rear Admiral, Coast Guard, Commander, Ninth Coast Guard District.

[FR Doc. 83-6670 Filed 3-16-83; 8:45 am]

BILLING CODE 4910-14-M

---

33 CFR Part 100

[CGD11 CR-04-83]

Establishment of Special Local Regulations; "NJBA Regatta"

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: Special local regulations are being adopted for the NJBA Regatta high speed ski boat race on the Colorado River, to be held on 12 and 13 March 1983 between river mile 179½ and Headgate Rock Dam. The regulations are needed to provide for the safety of life on navigable waters during the event.

EFFECTIVE DATE: These regulations become effective on 12 March 1983 and terminate on 13 March 1983.

FOR FURTHER INFORMATION CONTACT: Lt. N. M. Turner, Commander(bpa), Eleventh Coast Guard District, 400 Oceangate, Long Beach, California 90822, (213) 590-2213.

SUPPLEMENTARY INFORMATION: A notice of proposed rule making has not been published for these regulations and they are being made effective in less than 30 days from the date of publication. There was not sufficient time to publish proposed rules in advance of the event

or to provide for a delayed effective date.

Drafting information: The principal individuals involved in drafting this rule are Lt. Noris M. Turner, Chief, Boating and Public Affairs Branch, Eleventh Coast Guard District, and Lt. Catherine M. Kelly, Project Attorney, Legal Office, Eleventh Coast Guard District.

Discussion of regulations: The National Jet Boat Association's "NJBA Regatta" will be conducted on the Colorado River beginning March 12, 1983, starting from river mile 179½. This event will have 200 18- to 20-foot inboard high speed ski boats that could pose hazards to navigation. Vessels desiring to transit the regulated area may do so only with clearance from a patrolling law enforcement vessel or an event committee boat.

Evaluation: These regulations have been reviewed under the provisions of Executive Order 12291 and have been determined not to be a major rule. This conclusion follows from the fact that the regulated area will be open for the passage of commercial vessels and can be opened periodically to recreational vessels.

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water).

PART 100—SAFETY OF LIFE ON NAVIGABLE WATERS

In consideration of the foregoing, Part 100 of Title 33, Code of Federal Regulations, is amended by adding the following section:

§ 100.35–11–CR04 National Jet Boat Association/NJBA Regatta.

(a) *Regulated area.* The following regulated area will be closed intermittently to all vessel traffic from 7:00 AM to 8:00 PM each day on 12 and 13 March 1983: That portion of the Colorado River commencing at approximate river mile 179½, thence southerly along the natural flow of the river to Headgate Rock Dam and return to the starting point.

(b) *Special local regulations.* (1) No vessels, other than participants, U.S. Coast Guard operated and employed small craft, public vessels, state and local law enforcement agencies and the sponsor's vessels shall enter the regulated area during the above hours, unless cleared for such entry by or through a patrolling law enforcement vessel, or an event committee boat.

(2) These regulations are temporary in nature and shall cease to be in effect or further enforced at the end of the period set forth.

(46 U.S.C. 454; 49 U.S.C. 1655(b)(1); 33 CFR 100.35; 49 CFR 1.46(b))

Dated: February 23, 1983.

A. P. Manning,

Rear Admiral, U.S. Coast Guard, Commander, Eleventh Coast Guard District.

33 CFR Part 110

[CCGD8-82-13]

Anchorage Regulations; Lower Mississippi River

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard has amended the anchorage regulations on the Lower Mississippi River by establishing a permanent anchorage in the vicinity of Magnolia, Louisiana called the Magnolia Anchorage. This action was necessary to provide needed additional anchorage space for deep draft vessels.

EFFECTIVE DATE: April 18, 1983.

FOR FURTHER INFORMATION CONTACT: Lcdr R. E. Ford, Port Safety Officer, Captain of the Port, New Orleans, LA, U.S. Coast Guard, 4640 Urquhart Street, New Orleans, LA 70117, Tel: (504) 589–7118.

SUPPLEMENTARY INFORMATION: On October 28, 1982, the Coast Guard published a Notice of Proposed Rulemaking in the **Federal Register** for this regulation (47 FR 47866). Interested persons were requested to submit comments and no comments were received.

Drafting Information: The drafters of this regulation are Lt M. W. Brown, Project Officer, c/o Commander, Eighth Coast Guard District (mps) and Lt J. C. Helfrich, Project Attorney, c/o Commander, Eighth Coast Guard District (dl), Hale Boggs Federal Building, 500 Camp Street, New Orleans, LA 70130.

Economic Assessment and Certification: These regulations are considered to be nonsignificant in accordance with guidelines set out in the Policies and Procedures for Simplification, Analysis, and Review of Regulations (DOT Order 2100.5 of 5–22–80). An economic evaluation of the proposal was not conducted since its impact is expected to be minimal. Any economic effects will be positive, however, as this anchorage will decrease transit times and will mean lower operating costs for vessels. It is also certified that in accordance with section 605(b) of the Regulatory Flexibility Act, these rules will not have a significant economic impact on a substantial number of small entities.

Anchorage grounds.

Final Regulation

In consideration of the foregoing, Part 110 of Title 33, Code of Federal Regulations is amended as follows:

PART 110—[AMENDED]

33 CFR 110.195 is amended by redesignating (a)(5) through (a)(26) as (a)(6) through (a)(27) and by adding a new paragraph (a)(5) to read as follows:

§ 110.195 Mississippi River Below Baton Rouge, LA, including South and Southwest Passes.

(a) * * *

(5) *Magnolia Anchorage.* An area 1.4 miles in length along the right descending bank of the river from mile 45.5 to mile 46.9 above Head of Passes. From mile 45.5 to mile 46.3 the area has a width of 1100 feet. From mile 46.3 to mile 46.9 the area has a width of 600 feet as measured 500 feet riverward from the right descending bank.

33 CFR Part 117

[CGD 01-82-15]

Drawbridge Operation Regulations; Back Cove, Portland, Maine

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: At the request of the Canadian National Railway Company the Coast Guard is changing the regulations governing the operation of the railroad drawspan across Back Cove to allow the drawspan to be maintained in a closed position. The existing regulations permit the Canadian National to require a 24 hour notice for an opening of the draw. The draw has not been opened except for inspection purposes during the last three years. The change will provide for the reasonable needs of navigation.

EFFECTIVE DATE: April 18, 1983.

FOR FURTHER INFORMATION CONTACT: William J. Naulty, Chief, Bridge Branch,

First Coast Guard District, Boston, MA. 02114 (617–223–0645).

SUPPLEMENTARY INFORMATION: On 7 October 1982 the Coast Guard published a proposed rule (47 FR 44258) concerning this amendment. The Commander, First Coast Guard District published the proposal as a Public Notice dated 10 December 1982 and as an item in the Local Notice to Mariners. Interested persons were given until 24 January 1983 to submit comments.

Drafting Information

The principal persons involved in drafting this proposal are: William J. Naulty, Chief, Bridge Branch, First Coast Guard District, and Lieutenant Susan M. Krupanski, Project Attorney, Assistant Legal Officer, First Coast Guard District.

Discussion of the Proposed Regulation

There was no response to the **Federal Register** notice. Two letters, one each from the National Marine Fisheries Service (NMFS) and the Wm. Underwood Company, were generated by the First District notice. The NMFS indicated no objection to the proposal. The Wm. Underwood Co. expressed concern that a closing of the drawspan could reduce the future value of its Burnham and Morrill Company Plant (B & M) located above the bridge. The company also expressed concern about fire protection if fire boats are not able to approach the plant.

The B & M Company no longer uses its marine facility and does not plan to use it in the foreseeable future. Nevertheless, there is no reason to discourage any subsequent desire to reestablish marine operations. As for fire protection, the Deputy Chief of the City of Portland Fire Department has stated that the B & M plant can be protected adequately by the Fire Department's land vehicles. These final regulations have been reviewed under provisions of Executive Order 12291 and have been determined not to be a major rule. They are considered to be nonsignificant in accordance with guidelines set out in the Policies and Procedures for Simplification, Analysis, and Review of Regulations (DOT Order 2100.5 of 22 May 1980). As explained above, an economic evaluation has not been conducted. In accordance with section 605(d) of the Regulatory Flexibility Act (94 Stat. 1164), it is also certified that these rules will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 117

Bridges.

PART 117—[AMENDED]

In consideration of the foregoing, Part 117 of Title 33 of the Code of Federal Regulations is amended by revising § 117.20 to read as follows:

§ 117.20 Back Cove, Portland, Maine

(a) The drawspan of this bridge need not be opened for the passage of vessels.

(b) The draw shall be returned to operable condition within six months after notification from the Commandant to take such action.

(33 U.S.C. 499; 49 U.S.C. 1655(g)(2); 49 CFR 1.46(c)(5); 33 CFR 1.05–1(g)(3))

Dated: March 2, 1983.

L. L. Zumstein,

Rear Admiral, Coast Guard, Commander, First Coast Guard District.

BILLING CODE 4910-14-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 2

[OLEC-FRL 2322-7]

Public Information

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This rule modifies the Environmental Protection Agency (EPA) regulations regarding the collection of fees for Freedom of Information Act (FOIA) requests. This modification is intended to preserve public funds by requiring full payment in advance, thereby reducing costs to the Government of collecting fees and to avoid defaults by individuals who request costly record searches. This modification of EPA's regulation will permit EPA to collect amounts owed before records are released to requesters.

EFFECTIVE DATE: March 17, 1983.

FOR FURTHER INFORMATION CONTACT: Charles Breece, Office of General Counsel, Contracts and Information Law Branch (A–134), Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460, Telephone: 202–382–5460.

SUPPLEMENTARY INFORMATION: The Freedom of Information Act permits EPA to charge fees for photocopying records which are to be released and for the time expended in searching for such records. EPA's current policy for collecting fees was published in the **Federal Register** on September 1, 1976 (43 FR 38902). Under the current EPA regulations, an EPA office may request prepayment in cases where costs for services rendered in connection with a FOIA request exceed $25. However, if a requester makes an assurance to pay the amount of fees due, an EPA office could release the requested records without actually receiving payment. Many EPA office are disclosing records based upon assurances to pay by requesters. In a recent audit, EPA's Office of Inspector General found that a number of requesters who have received records under FOIA are not making timely payments for such records. Collecting these unpaid amounts increases EPA's costs of administering the FOIA.

EPA will discontinue the practice of releasing records before payment is received. By requiring full payment in advance, EPA will eliminate defaults by individuals who request costly record searches and will reduce the costs to EPA of collecting from persons who fail to pay. This rule also requires requesters to submit payments to the EPA Financial Management offices.

Robert M. Perry,

Associate Administrator and General Counsel.

List of Subjects in 40 CFR Part 2

Administrative practice and procedure, Freedom of information, Confidential business information.

PART 2—[AMENDED]

Accordingly, the Environmental Protection Agency revises 40 CFR 2.120 (b), (c), and (e) as follows:

§ 2.120 Fees; payment; Waiver.

* * * * *

(b) *Method of Payment.* All fee payments shall be in the form of a check or money order payable to the "U.S. Environmental Protection Agency" and shall be sent (accompanied by a reference to the pertinent Request Identification Number(s)) to the appropriate Headquarter's or Regional Financial Management Officer.

(c) *Notice of estimated fees in excess of $25.* (1) Where it is estimated that the fee chargeable under this section will amount to more than $25, and the requester had not submitted payment in advance to cover the estimated fees, the requester shall be notified of the amount of the estimated fees or such portion thereof as can readily be estimated. In such cases, a request will not be deemed to have been received until the requester is notified of the estimated fees and the requester pays the total amount of fees due (or estimated to become due) under this section. Such a notification of costs

shall be transmitted to the requester as soon as possible, but in any event within five working days, giving the best estimate possible.

(2) Where an estimated fee, paid by the requester in advance, exceeds the fee chargeable under the fee schedule for services actually performed, the balance will be refunded by the Agency. Where the actual fees due for the services are in excess of the estimate, the requester will be required to remit the amount of the actual fees before the copies are released.

* * * * *

(e) In the event a requester who is in arrears for previous requests makes a request under this Part, the EPA Freedom of Information Officer shall inform the requester that EPA will not process the request until the arrears have been paid in full. Any request made by an individual who specifies an affiliation with or representation of a corporation, association, law firm, or other organization shall be deemed to be a request by the corporation, association, law firm, or other organization. If an organization can show that the person who made the request for which payment is overdue did not make the request on behalf of the organization, the organization will not be considered in arrears, but the individual shall be.

40 CFR Part 52

[A-10-FRL 2307-7]

Approval and Promulgation of State Implementation Plans; Revision to Oregon State Implementation Plan

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: By this Notice, EPA announces its approval of a revision to the State of Oregon Implementation Plan (SIP). This revision is the removal of the Mid-Willamette Valley Air Pollution Authority (MWVAPA) Regulations from the SIP. MWVAPA was dissolved in 1975.

DATES: This action will be effective on May 16, 1983 unless notice is received before April 18, 1983 that someone wishes to submit adverse or critical comments. If such notice is received, EPA will open a formal thirty-day comment period on this action.

ADDRESSES: Copies of the materials submitted to EPA may be examined during normal business hours at:

Central Docket Section (10A-82-18), West Tower Lobby, Gallery I, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460

Air Programs Branch, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101

State of Oregon, Department of Environmental Quality, 522 S.W. Fifth, Yeon Building, Portland, Oregon 97207.

Copy of the State's submittal may be examined at: The Office of the Federal Register, 1100 L Street NW., Room 8401, Washington, D.C.

Comments should be addressed to: Laurie M. Kral, Air Programs Branch, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101.

FOR FURTHER INFORMATION CONTACT: David C. Bray, Air Programs Branch, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington, 98101, Telephone: (206) 442-1980, FTS: 399-1980.

SUPPLEMENTARY INFORMATION: In 1970, MWVAPA adopted rules which were approved as part of the Oregon SIP in 1972. However, the MWVAPA was dissolved in 1975. To simplify the State's rules, the Environmental Quality Commission voted on June 11, 1982 to repeal all but three of the MWVAPA rules and to remove all of the MWVAPA rules from the Oregon SIP. On August 9, 1982 the Oregon Department of Environmental Quality submitted a request to remove the MWVAPA rules as a revision to the Oregon SIP.

All of the MWVAPA rules which are necessary to meet the requirements of the Clean Air Act are duplicated in the Department of Environmental Quality's rules with equal or more stringent provisions. The three remaining rules, which pertain to odors, nuisance and large particle fallout, are not needed to maintain ambient air quality standards in the affected counties. Therefore, EPA is approving the removal of the MWVAPA regulations.

The public should be advised that this action will be effective 60 days from the date of this **Federal Register** notice. However, if notice is received within 30 days that someone wishes to submit adverse or critical comments on any or all of the revisions approved herein, the action on those revisions will be withdrawn and two subsequent notices will be published before the effective date. One notice will withdraw the final action on those revisions and another will begin a new rulemaking by announcing a proposal of the action on those revisions and establishing a comment period.

Under Section 307(b)(1) of the Clean Air Act, judicial review of this action is available only by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit within 60 days of the date of publication of this notice. Under Section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may not be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator has certified that SIP approvals under Sections 110 and 172 of the Clean Air Act will not have a significant impact on a substantial number of small entities (46 FR 8709, January 27, 1981). This action constitutes a SIP approval under Section 110 within the terms of the January 27, 1981 certification.

Under Executive Order 12291, EPA must judge whether or not a regulation is "major" and therefore subject to the requirements of regulatory impact analysis. This regulation is not judged to be major, since it merely approves actions taken by the State and does not establish any new requirements.

The Office of Managment and Budget has exemped this rule from the requirements of Section 3 of Executive Order 12291.

This notice of final rulemaking is issued under the authority of Section 110 of the Clean Air Act, as amended (42 U.S.C. 7410(a)).

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons, Intergovernmental relations.

Note.—Incorporation by reference of the Implementation Plan for the State of Oregon was approved by the Director of the Office of Federal Register on July 1, 1982.

Dated: March 8, 1983.

Anne M. Burford,

Administrator.

PART 52—[AMENDED]

Part 52 of Chapter I, Title 40 Code of Federal Regulations is amended as follows:

Subpart MM—Oregon

In § 52.1970, paragraph (c)(56) is added as follows:

§ 52.1970 Identification of plan.

* * * * *

(c) * * *

(56) On August 9, 1982 the State of Oregon Department of Environmental

Quality submitted a revision to remove the Mid-Willamette Valley Air Pollution Authority Regulations from the Oregon state implementation plan.

BILLING CODE 6560-50-M

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

Urban Mass Transportation Administration

49 CFR Part 670

[UMTA Docket No. 82-2]

Transfer of Conrail Commuter Service Operations

AGENCY: Federal Railroad Administration (FRA) and Urban Mass Transportation Administration (UMTA), Department of Transportation (DOT).

ACTION: Amendment to final rule.

SUMMARY: The purpose of this document is to amend a final rule published in the **Federal Register** on August 5, 1982, allocating funds appropriated by Congress to facilitate transfer of commuter rail service from the Consolidated Rail Corporation (Conrail) to other operators. As a result of Congressional action contained in the Department of Transportation and Related Agencies Appropriation Act, 1983, changes to the funding allocations are necessary in order to conform the regulations to Congressional directive.

DATE: This amendment is effective on December 18, 1982.

FOR FURTHER INFORMATION CONTACT: William R. Fashouer, Office of the Chief Counsel of FRA, (202) 426–7710, or Anthony A. Anderson, Office of the Chief Counsel of UMTA (202) 426–4011, both located at 400 Seventh Street, SW., Washington, D.C. 20590. FRA and UMTA office hours are from 8:30 a.m. to 5:00 p.m. e.s.t., Monday through Friday.

SUPPLEMENTARY INFORMATION: This document prescribes standards for the obligation and equitable distribution of funds authorized under section 1139(b) of the Northeast Rail Service Act of 1981 (NERSA), Subtitle E of Title XI of Pub. L. No. 97–35, 95 Stat. 643 (1981).

Background

On August 13, 1981, Congress enacted NERSA, which provides for the transfer of commuter rail service operations from Conrail to either the Northeast Commuter Services Corporation (NCSC) or directly to the commuter authorities for whom Conrail had provided the service. Section 1139(b) of NERSA authorizes $50,000,000 to be appropriated to the Secretary of Transportation to facilitate the transfer of commuter rail services from Conrail to other operators. Congress appropriated $45,000,000 for this purpose in the Department of Transportation and Related Agencies Appropriation Act, 1982 (Pub. L. No. 97–102, 95 Stat. 1451), and an additional $5,000,000 in the Supplemental Appropriations Act, 1982 (Pub. L. No. 97–257, 96 Stat. 853).

Section 1139(b) of NERSA requires the Secretary to issue regulations governing the obligation and distribution of the transition assistance. FRA and UMTA issued a final rule implementing section 1139(b) on August 5, 1982 (47 FR 33965). The final rule established applicant eligibility criteria, set forth a formula for the allocation of funds appropriated for the transfer, identified eligible uses for the allocated funds, and outlined application procedures.

Subsequent to the issuance of the final rule, Congress enacted the Department of Transportation and Related Agencies Appropriation Act, 1983 (Pub. L. No. 97–369). The 1983 DOT Appropriation Act appropriates an additional $75,000,000 for necessary expenses to carry out section 1139(b) of NERSA to be derived from funds previously appropriated for purchase of Conrail securities. This brings the total amount appropriated for expenses attendant to the transfer of Conrail commuter rail services to $125,000,000. In addition to providing an appropriation of $75,000,000, Congress included in the Conference Report accompanying the Act specific direction as to how all appropriated funds are to be allocated between the commuter authorities and NCSC. H.R. Rep. No. 960, 97th Cong., 2nd Sess. 15 (1982). The Conference Report allocation is as follows:

MTA/CDOT	$59,000,000
SEPTA	39,000,000
New Jersey Transit	22,000,000
MDOT/NCSC	5,000,000
Total	125,000,000

The appropriation of additional commuter service transition assistance and adoption by Congress of specific funding allocations necessitates changes to the final rule issued by FRA and UMTA on August 5, 1982.

The only section of the final rule affected by the Congressional action is § 670.9, *Commuter service transition assistance,* which allocates funds to NCSC and the six commuter authorities. Under the final rule NCSC was to receive $4 million for general administrative expenses and the costs of services it provides in common for all commuter authorities. The remainder of the transition assistance appropriated by Congress in fiscal year 1982 was to be allocated among the six commuter authorities on the basis of calendar year 1980 car mile and revenue passenger data provided by Conrail to each agency. Except for two categories of expenses, NCSC development of an Accounting Management Control Data Processing System, and NCSC conduct of SEPTA labor negotiations, transition assistance allocated to the commuter authorities was to be provided directly to them.

In order to conform with Congress' directive section 670.9(a) is being revised to provide that MDOT, DelDOT, and NCSC together will be eligible to receive a total of $5,000,000 in commuter transition assistance funds. NCSC has estimated that it will require approximately $4,762,000, while MDOT and DelDOT have estimated their total requirements to be $126,750 and $20,000 respectively. So as to assure that NCSC's needs are met, while also anticipating the possibility of additional requirements from MDOT or DelDOT, NCSC will be eligible to receive up to $4,780,000, MDOT will be eligible to receive up to $190,000 and DelDOT will be eligible to receive up to $30,000, the latter two amounts being approximately 150% of MDOT's and DelDOT's respective estimated requirements. In addition, NCSC will be eligible to receive any funds for which DelDOT or MDOT is eligible but which are not distributed to those authorities.

Commuter transition assistance for DelDOT was not included in the Congressional allocation included in the Conference Report. However, because DelDOT has incurred transition costs, the Administrators have determined that DelDOT should continue to receive reimbursement for such transition costs as was provided in the final rule published on August 5, 1982. Funds for DelDOT will be derived from the $5,000,000 allocated in the Conference Report to MDOT and NCSC. Providing funds for DelDOT will not have a significant impact on this allocation since DelDOT's transition costs are relatively small.

Commuter transition assistance funds provided to NCSC are to be used to cover general administrative expenses and the costs of services it provides in common for all commuter authorities. NCSC would also be authorized, with the approval of the Administrators, to expend some of these funds for development of the Accounting Management Control Data Processing System.

Section 670.9(b) is being revised to provide that MTA/CDOT, SEPTA, and

NJ Transit will be eligible to receive up to $120,000,000 in transition assistance funds appropriated by Congress under section 1139(b). The distribution to each commuter authority will be based on the Congressional earmarking contained in the Conference Report accompanying the 1983 DOT Appropriations Act. Accordingly, MTA/CDOT will be eligible to receive up to $59,000,000, SEPTA will be eligible to receive up to $39,000,000 and NJ Transit will be eligible to receive up to $22,000,000.

Section 670.9(c) providing for direct distribution to NCSC of certain commuter authority allocations will remain unchanged since these funds have already been provided to and expended by NCSC to the extent required.

Section 670.9(d) outlining which entity would be entitled to apply for particular types of assistance also remains unchanged.

Section 670.9(e) outlining the time period during which transition assistance will be available has been amended to provide that funds appropriated in the 1983 DOT Appropriations Act are available as of December 18, 1982, the effective date of the Act. The provision that all funds shall remain available until October 1, 1986 is a statutory requirement and remains unchanged.

Section 670.13, *Applications*, is also being revised in order to correct an error found in the final rule. The reference to Appendix B in § 670.13(c)(1) should have referred to Appendix C and the final rule is being amended accordingly.

FRA and UMTA have decided to adopt these amendments to § 670.9 without a notice and comment period because these amendments simply incorporate changes made by Congress in the 1983 DOT Appropriations Act and make minor corrections to the final rule. Since FRA and UMTA are without discretion in including these provisions, no useful purpose would be served by a notice and comment procedure. The inclusion of a notice and comment period would introduce needless delay into a process that requires expeditious action. In addition, in the recently enacted Rail Safety and Service Improvement Act of 1982 (Pub. L. 97–468) Congress amended section 1139(b) of NERSA to provide that any funds appropriated under the authority of section 1139(b) are to be distributed by the Secretary to NCSC and the commuter authorities within sixty days after receipt of an application or within sixty days after the date of enactment of the Rail Safety and Service Improvement Act of 1982, whichever is later. Thus, Congress has made it clear that it wishes commuter transition assistance to be distributed without delay. A notice and comment period would restrict distribution of recently appropriated funds and frustrate Congressional intent.

Regulatory Evaluation

FRA and UMTA determined that since the economic impact of the final rule was minimal, it did not constitute a major rule under the terms of Executive Order 12291 or a significant rule under DOT's regulatory policies or procedures. As a result, the final rule did not require a regulatory impact analysis pursuant to Executive Order 12241 or a regulatory analysis or regulatory evaluation pursuant to DOT's regulatory policies and procedures. FRA and UMTA have determined that the economic impact of the rule remains small and that as amended it does not constitute a major rule.

Likewise, since the amendment makes only minor changes to the final rule, it is certified that the rule will not have a significant impact on a substantial number of small entities under the provisions of the Regulatory Flexibility Act.

List of Subjects in 49 CFR Part 670

Railroads.

Issued: March 9, 1983.

Robert W. Blanchette,

Administrator, Federal Railroad Administration.

Arthur E. Teele, Jr.,

Administrator, Urban Mass Transportation Administration.

PART 670—[AMENDED]

For the reasons set out in the preamble, 49 CFR Part 670 is amended by amending §§ 670.9 and 670.13, and by deleting Appendix A.

1. Section 670.9 is amended by revising paragraphs (a), (b), and (e) to read as follows:

§ 670.9 Commuter service transition assistance.

(a) *Transition assistance allocated to MDOT, DelDOT, and NCSC.* (1) MDOT, DelDOT, and NCSC together shall be eligible to receive a total of $5,000,000 in commuter transition assistance funds appropriated by Congress under section 1139(b) of the Act as follows:

MDOT shall be eligible to receive up to $190,000;

DelDOT shall be eligible to receive up to $30,000;

NCSC shall be eligible to receive up to $4,760,000.

In addition, NCSC shall be eligible to receive any funds for which DelDOT or MDOT is eligible but which are not distributed to those commuter authorities.

(2) Commuter transition funds provided to NCSC shall be used to cover general administrative expenses and the costs of services it provides in common for all commuter authorities, such as the transfer of assets from Conrail to the commuter authorities. With the approval of the Administrator, NCSC may also expend funds allocated pursuant to this paragraph (a) for the purposes outlined in paragraph (c)(1) of this section.

(3) To the extent that NCSC does not require all the funds for which it is eligible under this subsection (a), such funds shall be reallocated by, and in the discretion of, the Administrator among the commuter authorities to reimburse transition expenses not otherwise funded hereunder. Such reallocated funds shall be in addition to the funds provided to the commuter authorities under paragraphs (a) (1) or (b) of this section.

(b) *Transition assistance allocated to MTA, CDOT, NJ Transit, and SEPTA.* (1) MTA, CDOT, NJ Transit, and SEPTA shall be eligible to receive a total of $120,000,000 in commuter transition funds appropriated by Congress under section 1139(b) of the Act as follows:

MTA and CDOT together shall be eligible to receive up to $59,000,000;

NJ Transit shall be eligible to receive up to $22,000,000;

SEPTA shall be eligible to receive up to $39,000,000.

(2) Except for the specific expense categories outlined in paragraph (c) of this section, transition assistance funds made available under this paragraph (b) shall be provided directly to the commuter authorities.

* * * * *

(e) *Timing of Transition Assistance.* Transition assistance funds appropriated by Congress pursuant to section 1139(b) of the Act in the 1982 Department of Transportation and Related Agencies Appropriation Act (Pub. L. No. 97–102) shall be made available for disbursement to applicants as of February 4, 1982. Transition assistance funds appropriated by Congress in the 1983 Department of Transportation and Related Agencies Appropriation Act (Pub. L. No. 97–369) shall be made available for disbursement to applicants as of December 18, 1982. All funds shall remain available until October 1, 1986.

2. Section 670.13 is amended by revising paragraph (c)(1) to read as follows:

§ 670.13 Applications.

* * * * *

(c) *Execution and filing of application.* (1) Each application shall bear the date of execution and be signed by the Chief Executive Officer of the applicant. Each person required to execute the application will execute a certificate in the form of Appendix C to this Part.

* * * * *

Appendix A [Removed]

3. Appendix A to Part 670 is removed.

BILLING CODE 4310-08-M; 4310-57-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 671

[Docket No. 30314-38]

Tanner Crab off Alaska

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Rule-related notice; closure.

SUMMARY: The Director, Alaska Region, National Marine Fisheries Service, has determined that the optimum harvest level of Tanner crab in the Kodiak District in Registration Area J will be achieved on March 14, 1983, and that early closure of the fishery is necessary to protect Tanner crab stocks from overfishing. The Secretary of Commerce therefore issues this notice of closure of the Kodiak District to fishing for Tanner crab by vessels of the United States on March 14, 1983.

DATE: This notice is effective from 12:00 noon, Alaska Standard Time (AST), March 14, 1983, until 12:00 noon Alaska Daylight Time (ADT), April 30, 1983, for seven of the eight management sections and May 15 for the Semedi Island Section. This notice of closure was filed for public inspection with the Office of the Federal Register on March 14, 1983, at 4:55 p.m. Public comments on this notice of closure are invited until March 29, 1983.

ADDRESS: Comments should be sent to Robert W. McVey, Director, Alaska Region, (Regional Director), National Marine Fisheries Service, (NMFS), P.O. Box 1668, Juneau, Alaska 99802.

FOR FURTHER INFORMATION CONTACT: Raymond E. Baglin (Fishery Biologist, Kodiak Field Office, NMFS), 907-486-4791.

SUPPLEMENTARY INFORMATION: The fishery management plan for the Commercial Tanner Crab Fishery off the Coast of Alaska (FMP), governing this fishery in the fishery conservation zone under the Magnuson Fishery Conservation and Management Act, provides for inseason adjustments, by field order, of season and area openings and closures. Implementing rules at 50 CFR 671.27(b) specify that these orders will be issure by the the Secretary of Commerce under criteria set out in that section.

50 CFR 671.26(f) establishes five districts within Registration Area J. In order to prevent overfishing of individual Tanner crabs stocks, 50 CFR 671.27(b) allows closure or partial closure of a particular district when the desired harvest level is reached. One of the districts in Registration Area J is the Kodiak District which is further divided into eight management sections. Although an optimum yield of 35 million pounds is specified in the FMP for the Kodiak District overall, results of Tanner crab surveys conducted by the Alaska Department of Fish and Game (ADF&G) in 1982 indicate the optimum harvest should be between 17.4 and 29.0 million pounds.

Fishing began in the Kodiak District when the season opened on February 10, 1983. All management sections are scheduled to close on April 30, except for the Semidi Island Section which is scheduled to close on May 15. Since February 10, 1983, approximately 350 vessels have landed Tanner crab, which is the largest number of vessels to fish in this district historically and is a 60 percent increase in the number of vessels compared to 1982. The catch per unit of effort (CPUE) was approximately 53 crabs per pot at the start of the season, but has since declined to 17 crabs per pot. Many of the legal crab (males above the minimum size) are newly recruited into the fishery. Large numbers of female and sublegal male crabs are also being caught, which must be sorted and returned to the sea. These crabs are experiencing handling mortality during sorting, which is a loss to the fishery in future seasons. Catches of crab that have just molted and therefore are in a "soft shell" condition are reported to be increasing. These crab also experience high mortality due to handling.

The rapid decline in CPUE indicates that stocks are not sufficiently abundant to support a fishery through the scheduled April 30 closure date for seven of the management sections and through May 15 for the Semidi Island Section. The low CPUE, as well as the high mortality due to sorting and the increasing softshell condition of the crab, indicate that the optimal harvest level for the district should be 17.4 million pounds, which is the low end of the projected range. This amount will be achieved by 12:00 noon, March 14, 1983.

In light of this information, the Regional Director, in accordance with 50 CFR 671.27(b), has determined that:

1. The actual conditions of Tanner crab stocks in the Kodiak District are substantially different from conditions that were anticipated at the beginning of the fishing year; and

2. These differences reasonably support the need to protect those Tanner crab stocks by closing the Kodiak District of Registration Area J.

For these reasons, the Kodiak District of Registration Area J, as defined in 50 CFR 671.26(f)(1)(i), is closed to all fishing for Tanner crab in all management sections from 12:00 noon, AST, March 14, 1983, until 12:00 ADT, April 30, 1983, for seven of the eight management sections, and until 12:00 noon ADT, May 15, 1983, for the eighth management section, the Semidi Island Section, at which time the closure of these sections prescribed in 50 CFR 671.26(f)(2)(i) will begin.

This closure will not be effective prior to filing this notice for public inspection with the Office of the Federal Register and publicizing the closure for 48 hours through ADF&G procedures, under 50 CFR 671.27(a)(2). Under 50 CFR 671.27(b)(4), public comments on this notice of closure may be submitted to the Regional Director, at the address stated above, for 15 days following the effective date. During the 15-day comment period, these data upon which this notice is based will be available for public inspection during business hours (8:00 a.m. to 4:30 p.m.) at (1) the NMFS Kodiak Field Office, ADF&G Building, at Kashevaroff and Mission Roads, Kodiak, Alaska 99615, and (2) the NMFS Alaska Regional Office, Federal Building, Room 453, 709 West Ninth Street, Juneau, Alaska 99802. If comments are received, the necessity of this closure will be reconsidered and a subsequent notice will be published in the **Federal Register** either confirming this field order's continued effect, modifying it, or rescinding it.

Other Matters

Tanner crab stocks in the Kodiak District will be subject to harm by overfishing and handling mortality unless this order takes effect promptly. The Agency therefore finds for good cause that advance notice and public comment on this order is contrary to the public interest, and that there should be no delay in its effective date.

This action is taken under the authority of regulations specified at 50

CFR 671.27, and is taken in compliance with Executive Order 12291.

Proposed Rules

Federal Register
Vol. 48, No. 53
Thursday, March 17, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Federal Grain Inspection Service

7 CFR Part 810

Request for Public Comment on U.S. Standards for Rye

AGENCY: Federal Grain Inspection Service, USDA.

ACTION: Prenotice: Review of existing regulations.

SUMMARY: As part of the periodic review of existing regulations, the Federal Grain Inspection Service (FGIS) will study and evaluate the U.S. Standards for Rye to determine their effectiveness and responsiveness to the needs of the grain industry. Views and comments are solicited from interested parties to help in the study and evaluation of present grading practices relating to the standards for rye and in the development of recommendations for change.

DATE: Comments must be submitted on or before May 16, 1983.

ADDRESS: Comments must be submitted in writing in duplicate, to Lewis Lebakken, Jr., Regulations and Directives Unit, USDA, FGIS, Room 0667 South Building, 1400 Independence Avenue, SW., Washington, DC 20250, telephone (202) 382–1738. All comments received will be made available for public inspection at the above address during regular business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT: Lewis Labakken, Jr., address as above, telephone (202) 382–1738.

SUPPLEMENTARY INFORMATION: This study and evaluation of the rye standards is part of the periodic review of existing regulations. The review will include a determination of the continued need for the standards; the potential for clarifying or simplifying the language of the standards; a review of changes in marketing practices and functions affecting the standards; a review of changes in technology and economic conditions in the area affected by the standards; and a determination of the potential for improving the standards and their application through the incorporation of grading factors or tests which better indicate quality attributes. The objective is to assure that the standards continue to serve the needs of the market to the greatest possible extent.

The public is further advised that specific issues with respect to the standards for rye have been identified by FGIS, as stated below. Information and data are specifically requested on these issues, in addition to other recommendations which should be considered by FGIS in this review.

1. Should the format of the rye standards (7 CFR 810.401 *et seq.*) be updated to conform to the current arrangement of the sections as appears in the wheat standards? This would basically consist of realigning sections both in terms of their order and the internal presentation of the provisions.

2. Official certificates show the moisture content of rye, making the special grade "Tough" (7 CFR 810.404) and the Sample grade requirement for high-moisture rye unnecessary. The special grade "Tough" is not descriptive of grain quality; and the placement of moisture content on certificates, which is currently used to determine this condition, make this special grade designation unnecessary. Therefore, should the special grade "Tough" be deleted from the standards?

This request for public comment does not constitute notification that changes to the standards are or will be proposed. Any action with respect to the existing standards will be published in the **Federal Register** at a later date. The actions which may be proposed at that time can include continuation of the standards without change; revision in whole or in part; or elimination.

The U.S. Department of Agriculture encourages citizen participation and solicits the public's views on any changes which may improve the official grading standards for rye.

BILLING CODE 3410-EN-M

Agricultural Marketing Service

7 CFR Parts 907 and 908

[Docket Nos. A0-245-A8 & A0-250-A6]

Navel Oranges Grown in Arizona and Designated Part of California; Valencia Oranges Grown in Arizona and Designated Part of California; Hearing on Proposed Amendment of Marketing Agreements and Orders 907 and 908, Both as Amended

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Public hearing on proposed rulemaking.

SUMMARY: Notice is hereby given of a public hearing to be held to consider a proposed amendment of the marketing agreement and Marketing Order 907 (7 CFR Part 907), covering navel oranges grown in California and Arizona, and a proposed amendment of the marketing agreement and Marketing Order 908 (7 CFR Part 908), covering Valencia oranges grown in California and Arizona.

The prinicipal proposals included proposals that would: define a cooperative marketing organization for purposes of committee representation; limit the number of consecutive terms that an administrative committee member may serve; authorize increased compensation for committee members; redefine the non-industry member of each committee as a "public member"; provide for an additional alternate for each handler member on the committees; modify the requirements of each committee's annual report; permit each committee to charge interest and/or a penalty when handlers are late in paying assessments; revise procedures that handlers follow in applying for prorate bases; require handlers to retain certain records for a specific period; authorize the committees to remove handlers from the prorate base if prescribed reports are not submitted; provide for a periodic referendum on continuance of the marketing orders;

and revise the procedures for issuing early maturity allotments. Other changes, primarily adminstrative in nature, were also proposed as discussed in Supplementary Information.

DATE: The hearing will begin at 9:00 a.m. on April 5, 1983.

ADDRESS: The hearing will be held in the Fine Arts Building, Kern County Fairgrounds, 1142 South "P" Street, Bakersfield, California, 93307.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Chief, Fruit Branch, Fruit and Vegetable Division, AMS, USDA, Washington, D.C. 20250 telephone 202–447–5975.

SUPPLEMENTARY INFORMATION: Amendments have been proposed by the Navel Orange Administrative Committee (NOAC) and the Valencia Orange Administrative Committee (VOAC), California Citrus Mutual, citrus growers Don A. Schroeder and Berne H. Evans, III, groups of citrus growers and handlers represented by Perry L. Walker, and J. Kent Burt, Dennis N. Torigian, and Carl A. Pescosolido, Jr.

The principal proposals submitted by other citrus organizations or individuals which differ in subject matter from those of the NOAC and VOAC would: provide for advertising under the marketing orders; limit the maximum number of weeks of regulation and establish two-week prorate periods in lieu of the weekly periods currently authorized under the orders; provide for a marketing incentive provision whereby handlers could increase their weekly prorate; eliminate volume regulation provisions; exempt handlers from reporting requirements for shipments of 100 cartons or less to charitable institutions; revise the composition of the committee memberships; provide that, of the grower members on the administrative committees, not more than four may be affiliated with the same marketing organization; redefine the term "grower"; redefine voting rights for growers and revise nomination procedures including providing for mail balloting; provide for nomination of one-half of the committees' membership annually; increase the term of office of committee members; require that all committee members vote on all propositions before the committee; require a quorum of nine members to conduct committee business; require that committee meetings be held in each district at least once per season and that other meetings be held in each district based upon the districts' production; require the manager to poll all marketing organizations before committee meetings to obtain specific marketing information; require that growers own a specific minimum number of acres of navel or Valencia oranges for a specific minimum time to serve on the committees; delete the provision of the orders relative to forfeiture or unused handler allotments; and provide for "banking" of unused weekly allotments. Other changes, primarily administrative in nature, were also proposed.

The Department of Agriculture proposes that it be authorized to make any necessary conforming changes which may result from this proceeding.

A prenotice press release announcing the committees' proposals was issued on January 7, 1983, allowing comments by growers, handlers, and the public through January 24, 1983. Two written comments and five amendment proposals were received. Sufficient justification exists to hold a hearing on the proposed amendments.

This administrative action is governed by the provisions of Section 556 and 557 of Title 5 of the United States Code, and therefore is excluded from the requirements of Executive Order 12291.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. This action is designed to promote orderly marketing of the California-Arizona navel and Valencia orange crops for the benefit of producers and will not substantially affect costs for the directly regulated handlers.

The hearing is called pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900). The proposed amendments of the marketing agreements and orders have not received the approval of the Secretary of Agriculture.

The public hearing is for the purpose of: (i) Receiving evidence about the economic and marketing conditions which relate to a proposed amendment of the marketing agreements and orders; (ii) determining whether there is a need for amendment to the marketing agreements and orders; and (iii) determining whether the proposed amendments or appropriate modifications of them will tend to effectuate the declared policy of the Act.

Marketing agreements and orders, California, Arizona, Oranges (Navel), (Valencia).

PART 907—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

PART 908—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Proposals of the Navel Orange Administrative Committee and the Valencia Orange Administrative Committee are as follows:

Proposal No. 1:

Amend §§ 907.17 and 908.18 by replacing the figure "924" with the figure "1,000".

Proposal No. 2:

Add new §§ 907.19 and 908.19a to read:

§ 907.19 and § 908.19a Cooperative marketing organization.

"Cooperative Marketing Organization" means a cooperative which directly arranges the sale or consignment of more than 50 percent of the oranges which it or its patrons handle in fresh domestic and export channels. At any given time the above determination shall be made on the basis of the quantity of oranges handled to date in the then current fiscal year. The exercise of the authority to approve or disapprove of a sale or consignment arranged by another person shall not be deemed to be the equivalent of arranging a sale or consignment.

Proposal No. 3:

Revise §§ 907.20 and 908.20 to read:

§ 907.20 Establishment and membership.

There is hereby established a Navel Orange Administrative Committee consisting of 11 members, for each of whom there shall be one alternate, and for each grower and handler member an additional alternate. Six of the members and their respective alternates shall be growers. Four of the members and their respective alternates shall be handlers, or employees of handlers, or employees of central marketing organizations. One member of the committee and the alternate of such member shall be persons possessing the qualifications provided in § 907.22(f). The six members of the committee who shall be growers are referred to in this subpart as "grower" members of the committee and the four members who shall be handlers, or employees of handlers, or employees of central marketing organizations are referred to in this subpart as "handler" members of the committee. The member of the committee nominated and selected pursuant to §§ 907.22(f) and

907.23, respectively, shall be referred to in this subpart as the "public" member of the committee.

§ 908.20 Establishment and membership.

There is hereby established a Valencia Orange Administrative Committee consisting of 11 members, for each of whom there shall be one alternate, and for each grower and handler member an additional alternate. Six of the members and their respective alternates shall be growers. Four of the members and their respective alternates shall be handlers, or employees of handlers, or employees of central marketing organizations. One member of the committee and the alternate of such member shall be persons possessing the qualifications provided in § 908.22(f). The six members of the committee who shall be growers are referred to in this subpart as "grower" members of the committee and the four members who shall be handlers, or employees of handlers, or employees of central marketing organizations are referred to in this subpart as "handler" members of the committee. The member of the committee nominated and selected pursuant to §§ 908.22(f) and 908.23, respectively, shall be referred to in this subpart as the "public" member of the committee.

Proposal No. 4:

Revise §§ 907.21 and 908.21 to read:

§ 907.21 Term of office.

The term of office of each member and alternate member of the committee shall be for a period of two years, and such terms shall begin on October 1 of each even-numbered year: *Provided,* That such members and alternates shall serve in such capacities for the portion of the term of office for which they are selected and qualify and until their respective successors are selected and have qualified. The consecutive terms of office of members, not including alternate members or additional alternate members, shall be limited to five terms, beginning with terms starting October 1, 1982.

§ 908.21 Term of office.

The term of office of each member and alternate member of the committee shall be for a period of two marketing years, and such terms shall begin on February 1 of each even-numbered year: *Provided,* That such members and alternates shall serve in such capacities for the portion of the term of office for which they are selected and qualify and until their respective successors are selected and have qualified. The consecutive terms of office of members, not including alternate members or additional alternate members, shall be limited to five terms, beginning with terms starting February 1, 1982.

Proposal No. 5:

Amend §§ 907.22 and 908.22 by revising paragraphs (b), (c), (d), and (f) to read:

§ 907.22 Nominations.

* * * * *

(b) Any cooperative marketing organization, or the growers affiliated therewith, which handled more than 50 percent of the total volume of oranges during the fiscal year in which nominations for members and alternate members of the committee are submitted shall nominate three grower members, three alternate grower members, three additional alternate grower members, two handler members, two alternate handler members, and two additional alternate handler members of the committee.

(c) All cooperative marketing organizations which market oranges and which are not qualified under paragraph (b) of this section, or growers affiliated therewith, shall nominate one grower member, one alternate grower member, one additional alternate grower member, one handler member, one alternate handler member, and one additional alternate handler member.

(d) All growers who are not affiliated with a cooperative marketing organization which markets oranges shall nominate two grower members, two alternate grower members, two additional alternate grower members, one handler member, one alternate handler member, and one additional alternate handler member.

* * * * *

(f) The members of the committee selected by the Secretary pursuant to § 907.23 shall meet on a date designated by the secretary and, by concurring vote of at least six members, shall nominate a public member and an alternate public member of the committee, which persons shall not be growers or handlers, or employees, agents, or representatives of a grower or handler (other than a charitable or educational institution which is a grower or handler), or of a central marketing organization.

908.22 Nominations.

* * * * *

(b) Any cooperative marketing organization, or the growers affiliated therewith, which handled more than 50 percent of the total volume of oranges handled during the marketing year in which nominations for members and alternate members of the committee are submitted, shall nominate three grower members, three alternate grower members, three additional alternate grower members, two handler members, two alternate handler members, and two additional alternate handler members.

(c) All cooperative marketing organizations which market oranges and which are not qualified under paragraph (b) of this section, or the growers affiliated therewith, shall nominate one grower member, one alternate grower member, one additional alternate grower member, one handler member, one alternate handler member, and one additional alternate handler member.

(d) All growers who are not affiliated with a cooperative marketing organization which markets oranges shall nominate two grower members, two alternate grower members, two additional alternate grower members, one handler member, one alternate handler member, and one additional alternate handler member.

* * * * *

(f) The members of the committee selected by the Secretary pursuant to § 908.23 shall meet on a date designated by the Secretary and, by a concurring vote of at least six members, shall nominate a public member and an alternate public member of the committee, which persons shall not be growers or handlers, or employees, agents, or representatives of a grower or handler (other than a charitable or educational institution which is a grower or handler), or of a central marketing organization.

Proposal No. 6:

Revise §§ 907.23 and 908.23 to read:

§ 907.23 Selection.

From the nominations made pursuant to § 907.22(b) or from other qualified growers and handlers the Secretary shall select three grower member of the committee, an alternate and an additional alternate to each of such grower member; also two handler members of the committee, an alternate, and an additional alternate to each of such handler members. From the nominations made pursuant to § 907.22(c) or from other qualified growers and handlers the Secretary shall select one grower member of the committee, an alternate and an additional alternate to such grower member; also one handler member of the committee, an alternate and an additional alternate to such handler member. From the nominations made pursuant to § 907.22(d) or from other qualified growers and handlers the

Secretary shall select two grower members of the committee, an alternate and an additional alternate to each of such grower members; also one handler member of the committee, an alternate and an additional alternate to such handler member. From the nominations made pursuant to § 907.22(f) or from other qualified persons the Secretary shall select one public member and one alternate public member of the committee.

§ 908.23 Selection.

From the nominations made pursuant to § 908.22(b) or from other qualified growers and handlers the Secretary shall select three grower members of the committee, an alternate and an additional alternate to each of such grower members; also two handler members of the committee, an alternate, and an additional alternate to each of such handler members. From the nominations made pursuant to § 908.22(c) or from other qualified growers and handlers the Secretary shall select one grower member of the committee, an alternate and an additional alternate to such grower member; also one handler member of the committee, an alternate and an additional alternate to such handler member. From the nominations made pursuant to § 908.22(d) or from other qualified growers and handlers the Secretary shall select two grower members of the committee, an alternate and an additional alternate to each of such grower members; also one handler member of the committee, an alternate and an additional alternate to such handler member. From the nominations made pursuant to § 908.22(f) or from other qualified persons the Secretary shall select one public member and one alternate public member of the committee.

Proposal No. 7:

Revise §§ 907.31 and 908.31 to read:

§ 907.31 and § 908.31 Expenses and compensation.

The members of the committee, and their respective alternates when acting as members, shall be reimbursed for expenses necessarily incurred by them in the performance of their duties under this part and shall receive compensation at a rate to be recommended by the committee and approved by the Secretary, which rate shall not exceed $100 per day or portion thereof spent in performing such duties. An alternate member shall be reimbursed for reasonable expenses necessarily incurred by such alternate in attending committee meetings and shall receive compensation at the rate provided in this section, notwithstanding that the committee member for whom such alternate serves also attends such meetings.

Proposal No. 8:

Revise §§ 907.32 and 908.32 to read:

§ 907.32 Annual review and meeting.

The Committee shall, as soon as practicable after the marketing of the crop is completed, prepare and mail an annual report to the Secretary and to each handler and grower of record. This annual report shall contain at least a complete review, by prorate districts, of the regulatory operations during the fiscal year, as conducted under the marketing policy established pursuant to § 907.50(a). The committee shall hold an open meeting to review the whole record of the operations of this part and any such meeting shall be held as soon as practicable after the mailing of the annual report, which shall contain notice of the time and place of the meeting.

§ 908.32 Annual review and meeting.

The Committee shall, as soon as practicable after the marketing of the crop is completed, prepare and mail an annual report to the Secretary and to each handler and grower of record. This annual report shall contain at least a complete review, by prorate districts, of the regulatory operations during the fiscal year, as conducted under the marketing policy established pursuant to § 908.50(a). The committee shall hold an open meeting to review the whole record of the operations of this part and any such meeting shall be held as soon as practicable after the mailing of the annual report, which shall contain notice of the time and place of the meeting.

Proposal No. 9:

Add new §§ 907.34 and 908.34 to read:

§ 907.34 and § 908.34 Consumer affairs advisors.

The Committee may appoint such consumer affairs advisors as it deems appropriate, and determine the compensation and duties of each.

Proposal No. 10:

Add a new paragraph (d) to §§ 904.41 and 908.41 to read:

§ 907.41 and § 908.41 Assessments.

* * * * *

(d) Assessments not paid within a period of time prescribed by the committee may be made subject to interest or penalty charges, or both. The period of time, rate of interest, and penalty charge shall be as recommended by the committee and approved by the Secretary: *Provided,* That when interest or penalty charges are in effect, they shall be applied to all assessments not paid within the prescribed period of time.

Proposal No. 11:

Amend §§ 907.53 and 908.53 by revising paragraphs (b), (c), (g), and (h), and adding a new paragraph (i) to read:

§ 907.53 and § 908.53 Prorate bases.

* * * * *

(b) Such application shall be substantiated in such manner and shall be supported by such evidence as the committee may require, and shall include at least (1) the name and address of the producer or duly authorized agent, if any, for each grove or portion thereof, the fruit of which is included in the quantity of oranges available for current shipment by the applicant; (2) an accurate description of the location of each such grove or portion thereof, including the number of acres contained therein; (3) an estimate of the quantity of oranges available for current shipment, in terms of a unit of measure designated by the committee, contained in each grove or portion thereof described in paragraph (b)(2) of this section; and (4) an estimate of the total quantity of oranges available for current shipment by the applicant in terms of a unit measure designated by the committee. If at the time of filing of an application under this section the committee finds that there is an error, omission or inaccuracy in such application, or that any estimates contained in such application are not reasonably calculated to apprise the committee of the information required by this section, it shall return the application to the applicant for correction or completion. Applicants may re-submit applications to the committee for its consideration at any subsequent time. Paragraphs (g) and (h) of this section shall not apply to such applications.

(c) Each application shall include a certification by the handler that such handler has control, for all purposes relating to this part, of the oranges described in the application.

* * * * *

(g) The committee shall determine the accuracy of the information submitted pursuant to this section. Except as provided in paragraph (b) of this section, whenever the committee finds that there is an error, omission, or inaccuracy in any such information, it shall correct the same and shall give the person who

submitted such report a reasonable opportunity to discuss with the committee the factors considered in making the correction. If it is determined that an error, omission, on inaccuracy has resulted in the establishment of a smaller or a larger quantity of oranges available for current shipment than that to which a person was entitled under this part, such quantity shall be increased or decreased, over such period as may be determined by the committee, by an amount necessary to correct the error, omission or inaccuracy.

(h) Each week during the marketing season when volume regulation is likely to be recommended, the committee shall compute, with respect to each prorate district, the total quantity of oranges available for current shipment by each person who has applied for a prorate base and for allotments, except as provided in (b) of this section. On the basis of such computation, the committee shall fix a prorate base for each person who is entitled thereto. Such prorate base shall represent the ratio between the total quantity of oranges available for current shipment in the particular prorate district by each applicant and the total quantity of oranges available for current shipment in such district by all such applicants. The committee shall notify the Secretary of the prorate base fixed for each person and shall notify each such person of the prorate base so fixed.

(i) The committee shall, with the approval of the Secretary, adopt procedural rules and regulations to effectuate the provisions of this section.

Proposal No. 12:

Revise §§ 907.60 and 908.60 to read:

§ 907.60 Early maturity allotments.

Notwithstanding the provisions of § 907.54 the committee may, prior to the reaching of general maturity, issue special allotments for the handling of oranges of early maturity. Handlers controlling oranges of early maturity may apply to the committee for such allotments on forms prescribed by the committee and shall furnish to the committee such information as it may require. On the basis of all available information and after consideration of all of the factors enumerated in § 907.51(b) the committee shall determine the extent to which early maturity allotment shall be granted. Total early maturity allotments approved by the committee shall be allocated in an equitable manner among the requesting handlers who qualify therefor. Early maturity allotments issued to any handler may be used only during the week for which issued, and the undershipment of any such allotment shall not entitle such handler to handle an additional quantity of oranges due to such undershipment. Upon the reaching of general maturity, the quantity of oranges available for current shipment of any handler who failed to use all of the early maturity allotments issued to such handler shall be adjusted downward by the committee. Early maturity allotments are transferrable to other handlers who received early maturity allotments in the same weekly period: *Provided,* That transfers of early maturity allotments shall be made through the committee: *And Provided Further,* That, upon such transfer of allotment, the transferee shall be obligated to use the transferred allotment during the week for which it was issued and if such handler fails to do so shall have such handler's oranges available for current shipment adjusted in the same manner as if the transferred allotment had been issued to such handler by the committee. The committee shall, with the approval of the Secretary, adopt procedural rules and regulations to effectuate the provisions of this part.

§ 908.60 Early maturity allotments.

Notwithstanding the provisions of § 908.54 the committee shall, prior to the reaching of general maturity, issue special allotments for the handling of early maturity oranges. Handlers controlling early maturity oranges may apply to the committee for such allotments on forms prescribed by the committee and shall furnish to the committee such information as it may require. On the basis of all available information and after consideration of all of the factors enumerated in § 908.51(b) the committee shall determine the extent to which early maturity allotment shall be granted. Total early maturity allotments approved by the committee shall be allocated in an equitable manner among the requesting handlers who qualify therefor. Early maturity allotments issued to any handler may be used only during the week for which issued, and the undershipment of any such allotment shall not entitle such handler to handle an additional quantity of oranges due to such undershipment. Upon the reaching of general maturity, the quantity of oranges available for current shipment of any handler who failed to use all of the early maturity allotments issued to such handler shall be adjusted downward by the committee. Early maturity allotments are transferrable to other handlers who received early maturity allotments in the same weekly period: *Provided,* That transfers of early maturity allotments shall be made through the committee: *And Provided Further,* That, upon such transfer of allotment, the transferee shall be obligated to use the transferred allotment during the week for which it was issued and if such handler fails to do so shall have such handler's oranges available for current shipment adjusted in the same manner as if the transferred allotment had been issued to such handler by the committee. The committee shall, with the approval of the Secretary, adopt procedural rules and regulations to effectuate the provisions of this part.

Proposal No. 13:

Revise §§ 907.70 and 908.70 to read:

§ 907.70 and § 908.70 Weekly report.

On or before such day of each week as may be designated by the committee, each person who first handles oranges shall report to the committee, in such manner as may be designated and on forms made available by it, the following information with respect to the total of all oranges disposed of by each such handler during the immediately preceding week: (a) The total quantity handled; (b) the total quantity disposed of for manufacture into by-products, showing the identity of each by-products processor involved and the quantity of each; (c) the total quantity disposed of for export, showing the destination and quantity of each such disposition; (d) the total quantity shipped for disposition to persons on relief, including quantity donated for charitable purposes, and shipments by parcel post or express, showing the destination and quantity of each such shipment; and (e) the total quantity disposed of otherwise, showing manner and quantity of each such disposition.

Proposal No. 14:

Revise §§ 907.71 and 908.71 to read:

§ 907.71 and § 908.71 Manifest report.

Each person who first handles oranges shall furnish to the committee information regarding the size of oranges in each standard packed carton or its equivalent handled by such handler whether such shipments were destined to points in the United States and Alaska or to Canada and shall mail or deliver such information to said committee or its duly authorized representative within 24 hours after shipment is made in such manner as the committee shall prescribe and upon forms prepared by it.

Proposal No. 15:

Add a new subtitle "Records and Retention" following §§ 907.72 and 908.72, and new §§ 907.73 and 908.73 to read:

§ 907.73 and § 908.73 Records and retention.

(a) Each handler shall maintain records which will clearly show the details of such handler's receipts and acquisitions of oranges, sales, shipments, dispositions, inventories, and such other pertinent information as will substantiate the information submitted to the committee pursuant to this part.

(b) Each handler shall retain all records prepared or received in connection with the handling of oranges, including records of receipts and acquisitions, sales tickets, copies of statements of sales to customers, accounts of sales, correspondence, papers relating to damage and loss claims against carriers, an itemized daily record of cash receipts, ledger records in which purchases and sales can be verified, cash receipts and disbursement journals, bank statements, cancelled checks, bills of lading, truck manifests, car manifests, and all other pertinent records relating to the acquisition, handling, and disposition of oranges. All such records shall be retained by the handler for a period of four years following the end of the applicable crop year. If, within the four-year period, the committee notifies the handler in writing that the retention of such records, or specified records, is necessary in connection with proceedings under the Act, a court action, or a compliance investigation by the Secretary or the committee specified in such notice, the handler shall retain such records, or specified records, until further written notification from the committee. The committee shall give further written notification to the handler when retention of the records is no longer necessary.

(c) Each handler shall make available to authorized representatives of the committee and the Secretary at any time during reasonable business hours all records provided for in this part for examination and audit, and shall permit access to all premises where records are maintained or stored and where oranges are received, stored, prepared for market, or handled. The committee shall make such checks of oranges or audits of handlers' records as it deems appropriate or which are requested by the Secretary to insure that accurate information as required in this part is being furnished by handlers.

(d) All reports and information submitted by handlers pursuant to the provisions of this part shall be received by, and at all times be in the custody of one or more designated employees of the committee. No such employees shall disclose to any person, other than the Secretary upon request therefor, data, or information obtained or extracted from such reports and records which might affect the trade position, financial condition, or business operation of the particular handler from whom received: *Provided,* That such data and information may be combined, and made available in the form of general reports in which the identities of the individual handlers furnishing the information is not disclosed.

(e) The committee shall, with the approval of the Secretary, adopt rules and regulations to effectuate the provisions of this section.

Proposal No. 16:

Add new §§ 907.74 and 908.74 to read:

§ 907.74 and § 908.74 Failure to report.

In the event a handler fails to submit in the prescribed amount of time the reports required by the provisions of this part and the procedural rules and regulations thereunder, the committee may remove such handler from the prorate base and may refuse to issue any additional allotment to such handler, except as required for purposes of allotment loan repayments by such handler.

Proposal No. 17:

Amend §§ 907.83 and 908.83 by removing paragraph (c), redesignating paragraph (d) as paragraph (f) and adding new paragraphs (c), (d) and (e) to read:

§ 907.83 Termination.

* * * * *

(c) The Secretary shall terminate the provisions of this subpart at the end of a crop year in which the Secretary has found by referendum that such termination is favored by a majority of the growers who, during a representative period determined by the Secretary, have been engaged in the production for market of oranges in the production area: *Provided,* That such majority has during such representative period produced for market more than 50 percent of the total volume of such oranges produced for market within the production area; but such termination shall be effective only if announced on or before September 15, of the then current fiscal year.

(d) Upon recommendation of the committee, received not later than January 15 of an odd numbered year, the Secretary shall conduct a referendum prior to March 15 of such year to ascertain whether termination of this part is favored by growers as determined in accordance with (c) of this section. The committee, with the approval of the Secretary, shall adopt such rules and regulations as necessary to establish the basis for the recommendation provided for in this section.

(e) The Secretary shall conduct a referendum by August 1, of the tenth year following the effective date of this section and no later than August 1, every tenth year thereafter to find whether, in accordance with (c) of this section, termination of the order is favored by producers: *Provided,* That if a termination referendum or an affirmative amendment referendum is held within any ten year period of time as herein provided, the next termination referendum shall be held by August 1, of the tenth year following such referenda.

§ 908.83 Termination.

* * * * *

(c) The Secretary shall terminate the provisions of this subpart at the end of a crop year in which the Secretary has found by referendum that such termination is favored by a majority of the growers who, during a representative period determined by the Secretary, have been engaged in the production for market of oranges in the production area: *Provided,* That such majority have during such representative period produced for market more than 50 percent of the total volume of such oranges produced for market within the production area; but such terminations shall be effective only if announced on or before December 1 of the then current fiscal year.

(d) Upon recommendation of the committee, received not later than August 15 of an odd numbered year, the Secretary shall conduct a referendum prior to October 15 of such year to ascertain whether termination of this part is favored by growers as determined in accordance with (c) of this section. The committee, with the approval of the Secretary, shall adopt such rules and regulations as necessary to establish the basis for the recommendation provided for in this section.

(e) The Secretary shall conduct a referendum by October 15 of the tenth year following the effective date of this section and no later than October 15 every tenth year thereafter to find whether, in accordance with (c) of this section, termination of the order is

favored by producers: *Provided,* That if a termination referendum or an affirmative amendment referendum is held within any ten year period of time as herein provided, the next termination referendum shall be held by August 1 of the tenth year following such referenda.

(f) The provisions of this part shall, in any event, terminate whenever the provisions of the Act authorizing them cease to be in effect.

Proposals by California Citrus Mutual:

1. Provide for mail balloting for nomination of committee members.
2. Amend termination provisions to provide for a continuance referendum every six years or whenever a petition requesting such referendum is signed by 30 percent of the orange growers.
3. Provide that the Secretary of Agriculture hold a hearing to amend the orders when presented with a petition requesting such hearing signed by 15 percent of the orange growers.
4. Provide that terms of office for administrative committee members be limited to two consecutive four-year terms. Persons are eligible to serve again after a two-year period off the committee.
5. Amend the nomination provisions to nominate one-half of each committee's members annually.
6. Amend eligibility requirements to serve on the administrative committees (i.e. require that a grower lease or own 20 acres of navel or Valencia orange trees for a period of not less than the two years preceding nomination).
7. Provide that at least every other meeting of the NOAC or VOAC be held in the district shipping the majority of navel or Valencia oranges respectively.
8. Amend the order to include shipments of oranges destined to Mexico in the weekly prorate.
9. Amend procedures for issuing early maturity allotments.
10. Revise the forfeiture provisions of the orders.

Proposals of the Committee To Improve Marketing Orders 907 and 908 Represented by Perry L. Walker

Proposal No. 1:

Revised §§ 907.20 and 908.20 to read:

§ 907.20 Establishment and membership.

(a) There is hereby established a Navel Orange Administrative Committee consisting of 11 members, for each of whom there shall be one alternate, and for each grower member an additional alternate.

(b) Nine of the members and their respective alternates shall be growers, and they shall be known as grower members. Each grower member must be a person who has been actively involved in the commercial production of navel oranges for at least five years prior to appointment. No more than four grower members and their respective alternates shall be affiliated with the same central marketing organization. Grower members are to reflect the industry's geographic production percentage by district; provided, however, that each production district shall be represented by at least one grower member and alternate.

(c) Two members and their respective alternates shall be nominated as provided in § 907.22(f), and shall be known as the public members. A public member may be any person who has had neither a personal nor a professional relationship with the citrus industry within the past five years prior to appointment.

(d) Any committee member or alternate must immediately resign if such member should become ineligible.

§ 908.20 Establishment and membership.

(a) There is hereby established a Valencia Orange Administrative Committee consisting of 11 members, for each of whom there shall be one alternate, and for each grower member an additional alternate.

(b) Nine of the members and their respective alternates shall be growers, and they shall be known as grower members. Each grower member must be a person who has been actively involved in the commercial production of Valencia oranges for at least five years prior to appointment. No more than four grower members and their respective alternates shall be affiliated with the same central marketing organization. Grower members are to reflect the industry's geographic production percentage by district; provided, however, that each production district shall be represented by at least one grower member and alternate.

(c) Two members and their respective alternates shall be nominated as provided in § 908.22(f), and shall be known as the public members. A public member may be any person who has had neither a personal nor a professional relationship with the citrus industry within the past five years prior to appointment.

(d) Any committee member or alternate must immediately resign if such member should become ineligible.

Proposal No. 2:

Revise §§ 907.21 and 908.21 to read:

§ 907.21 Term of office.

(a) The term of office for each committee member and their respective alternates shall be three years. It shall commence on October 1 of the year in which each member is appointed and shall continue until a succesor has been selected and has qualified. The term of office for any person nominated pursuant to § 907.22(h) shall continue only until the next regular election, whereupon a new member shall be elected to fill the unexpired term.

(b) During the transition period the procedure shall be as follows: The four non-grower members and their respective alternates shall immediately resign from the committee. The committee manager shall immediately conduct an election to fill all four vacancies; the three candidates receiving the greatest number of votes shall be nominated to the Secretary to serve three-year terms, with the remaining candidate nominated for a one-year term. The present chairman shall resign and the Secretary shall appont a public member/chairman to serve a three-year term. At the time of the next regular election, all six grower members not elected a the previous election shall resign. The three candidates receiving the greatest number of votes shall be nominated for three-year terms, with the remaining three nominated for a one-year term. The Secretary shall appoint a second public member for a three-year term. The same procedures shall apply in the case of alternates and additional alternates.

§ 908.21 Term of office.

(a) The term of office for each committee member and their respective alternates shall be three years. It shall commence on February 1 of the year in which each member is appointed and shall continue until a successor has been selected and has qualified. The term of office for any person nominated pursuant to § 908.22(h) shall continue only until the next regular election, whereupon a new member shall be elected to fill the unexpired term.

(b) During the transition period the procedure shall be as follows: The four non-grower members and their respective alternates shall immediately resign from the committee. The committee manager shall immediately conduct an election to fill all four vacancies; the three candidates receiving the greatest number of votes shall be nominated to the Secretary to serve three-year terms, with the remaining candidate nominated for a one-year term. The present chairman shall resign and the Secretary shall appoint a public member/chairman to serve a three-year term. At the time of

the next regular election, all six grower members not elected at the previous election shall resign. The three candidates receiving the greatest number of votes shall be nominated for three-year terms, with the remaining three nominated for a one-year term. The Secretary shall appoint a second public member for a three-year term. The same procedures shall apply in the case of alternates and additional alternates.

Proposal No. 3:

Revise §§ 907.22 and 908.22 to read:

§ 907.22 Nominations.

(a) Voting rights on industry matters, including referenda and committee nominations, shall be determined by navel orange acreage as follows: forty acres of less shall entitle each grower to one vote; each additional twenty acres beyond the forty acre base entitles each grower to one-half additional vote; provided, however, that in order to qualify, an acreage must have been planted during six consecutive seasons prior to the season in which qualification is claimed.

(b) When acreage is owned or leased by more than one person (including partnerships, owner-syndicates, landlord-tenant arrangements, corporations and/or other multiple ownership configurations), one individual must be appointed as the voting member of each group.

(c) The committee manager shall notify growers of any vacancies among growers, alternates, and additional alternates on the committee. The committee manager shall mail grower information forms to all industry growers requesting each grower's name and acreage amount by district.

(d) Any industry grower, other than a present member of the committee except a member nominated pursuant to § 907.22(h), desiring nomination to fill a committee vacancy shall obtain from and return to the committee manager a nomination petition containing a minimum of twenty grower endorsements, the nominee's name, address, acreage by district and marketing affiliation. Upon receipt of the completed petition, the committee manager shall certify the candidate's eligibility and the grower endorsements, whereupon the candidate's name shall be placed on the ballot.

(e) The committee manager shall prepare a ballot which shall contain at least two proposed candidates for each vacancy. Each candidate's name, address, navel orange acreage by district, and marketing affiliation shall be indicated on the ballot. All balloting shall be conducted by mail and certified by the Administrator. For each grower, alternate, and additional alternate position, the candidate receiving the geatest number of votes shall be the nominee for consideration and appointment to the committee by the Secretary.

(f) Whenever a vacancy occurs among the public members or their alternates, the members of the committee selected by the Secretary pursuant to § 907.23 shall meet on a date designated by the Secretary and, by a concurring vote of at least six members, shall nominate a member and an alternate member of the committee.

(g) When a vacancy occurs on the committee due to a change in a member's eligibility or otherwise, the committee shall nominate a replacement who has the same qualifications.

§ 908.22 Nominations.

(a) Voting rights on industry matters, including referenda and committee nominations, shall be detemined by Valencia orange acreage as follows: forty acres or less shall entitle each grower to one vote; each additional twenty acres beyond the forty acre base entitles each grower to one-half additional vote; provided, however, that in order to qualify, any acreage must have been planted during six consecutive seasons prior to the season in which qualification is claimed.

(b) When acreage is owned or leased by more than one person (including partnerships, owner-syndicates, landlord-tenant arrangements, corporations and/or other multiple ownership configurations), one individual must be appointed as the voting member of each group.

(c) The committee manager shall notify growers of any vacancies among growers, alternates, and additional alternates on the committee. The committee manager shall mail grower information forms to all industry g owers requesting each grower's name and acreage amount by district.

(c) Any industry grower, other than a present member of the committee except a member nominated pursuant to § 908.22(h), desiring nomination to fill a committee vacancy shall obtain from and return to the committee manager a nomination petition containing a minimum of twenty grower endorsements, the nominee's name, address, acreage by district and marketing affiliation. Upon receipt of the completed petition, the committee manager shall certify the candidate's eligibility and the grower endorsements, whereupon the candidate's name shall be placed on the ballot.

(e) The committee manager shall prepare a ballot which shall contain at least two proposed candidates for each vacancy. Each candidate's name, address, Valencia orange acreage by district, and marketing affiliation shall be indicated on the ballot. All balloting shall be conducted by mail and certified by the Administrator. For each grower, alternate, and additional alternate position, the candidate receiving the greatest number of votes shall be the nominee for consideration and appointment to the committee by the Secretary.

(f) Whenever a vacancy occurs among the public members or their alternates, the members of the committee selected by the Secretary pursuant to § 908.23 shall meet on a date designated by the Secretary and, by a concurring vote of at least six members, shall nominate a member and an alternate member of the committee.

(g) When a vacancy occurs on the committee due to a change in a member's eligibility or otherwise, the committee shall nominate a replacement who has the same qualifications.

Proposal No. 4:

Revise §§ 907.23 and 908.23 to read:

§ 907.23 Selection.

From the nominations made pursuant to § 907.22(e) or from other qualified growers, the Secretary shall select and appoint the number of growers, alternates, and additional alternates needed to fill any vacancies on the committee. From the nominations made pursuant to §§ 907.22(g) and 907.22(h) or from other qualified persons, the Secretary shall select and appoint the number of public members and alternates needed to fill any vacancies on the committee.

Conforming changes: the committee will neet to amend its rules and regulations, specifically § 907.102, to reflect the above changes; other sections of the order will require slight conforming changes.

§ 908.23 Selection.

From the nominations made pursuant to § 908.22(e) or from other qualified growers, the Secretary shall select and appoint the number of growers, alternates, and additional alternates needed to fill any vacancies on the committee. From the nominations made pursuant to §§ 908.22(g) and 908.22(h) or from other qualified persons, the Secretary shall select and appoint the number of public members and alternates needed to fill any vacancies on the committee.

Conforming changes: the committee will need to amend its rules and regulations, specifically § 908.102, to reflect the above changes; other sections of the order will require slight conforming changes.

Proposal No. 5:

Revise §§ 907.30 and 908.30 to read:

§ 907.30 Procedure.

(a) No committee business shall be conducted unless a quorum of nine members (or alternates when acting for absent members) is present.

(b) All members, including the chairman, shall vote affirmatively or negatively on all proposals before the committee; no abstentions shall be allowed. The votes of each member on each proposal shall be recorded in the minutes.

(c) Committee meetings shall be held in each district based on the volume of navel oranges produced in such district; provided, however, that at least one meeting per season shall be held in each district.

(d) The committee manager will poll all marketing organizations on or before the Friday prior to any NOAC meeting to obtain the following information: (1) volume recommendations for the affected prorate period; and (2) other pertinent market information that will assist and guide the committee in its deliberations such as demand, price trends, and comparative commodity information. A summary of these recommendations shall be made a part of the committee's minutes. Minutes shall be promptly distributed by mail to all interested persons.

§ 908.30 Procedure.

(a) No committee business shall be conducted unless a quorum of nine members (or alternates when acting for absent members) is present.

(b) All members, including the chairman, shall vote affirmatively or negatively on all proposals before the committee; no abstentions shall be allowed. The votes of each member on each proposal shall be recorded in the minutes.

(c) Committee meetings shall be held in each district based ont he volume of Valencia oranges produced in such district; provided, however, that at least one meeting per season shall be held in each district.

(d) The committee manager will poll all marketing organizations on or before the Friday prior to any VOAC meeting to obtain the following information: (1) volume recommendations for the affected prorate period; and (2) other pertinent market information that will assist and guide the committee in its deliberations such as demand, price trends, and comparatively commodity information. A summary of these recommendations shall be made a part of the committee's minutes. Minutes shall be promptly distributed by mail to all interested persons.

Proposal No. 6:

Amend §§ 907.31 and 908.31 by changing "$25 per day" to "$250 per day".

Proposal No. 7:

Add a new §§ 907.34 and 908.34 to read:

§ 907.34 Generic advertising.

The committee, with the approval of the Secretary, may establish or provide for the establishment of a generic advertising program to assist, improve, and promote the consumption of navel oranges grown in California and Arizona. Such a program shall commence not later than the beginning of the 1983–84 marketing season, the expenses of such program to be paid from funds collected pursuant to this part.

§ 908.34 Generic advertising.

The committee, with the approval of the Secretary, may establish or provide for the establishment of a generic advertising program to assist, improve, and promote the consumption of Valencia oranges grown in California and Arizona. Such a program shall commence not later than the beginning of the 1983–84 marketing season, the expenses of such program to be paid from funds collected pursuant to this part.

Proposal No. 8:

1. Add a new paragraph (e) to §§ 907.51 to read:

§ 907.51 Recommendations for volume regulation.

* * * * *

(e) The committee shall not recommend volume regulation prior to December 25. The committee may recommend volume regulation for up to six prorate periods. Each such period shall consist of two consecutive weeks. The prorate periods may or may not be consecutive at the discretion of the committee. Open movement shall prevail during any portion of the season in which volume regulations is not in effect.

2. Conforming changes: the term "week", wherever used in this part, shall be revised to read "prorate period".

3. Revise § 908.51 to read:

§ 908.51 Recommendations for volume regulation.

* * * * *

(e) The committee shall not recommend volume regulation prior to the first Monday in April. The committee may recommend volume regulation for up to three prorate periods. Each such period shall consist of two consecutive weeks. The prorate periods may or may not be consecutive at the discretion of the committee. Open movement shall prevail during any portion of the season in which volume regulation is not in effect.

4. Conforming changes: the term "week", wherever used in this part, shall be revised to read "prorate period".

Proposal No. 9:

Amend §§ 907.54 and 908.54 by redesignating the first paragraph as paragraph (a) and adding a new paragraph (b) to each section to read:

§ 907.54 Allotments.

* * * * *

(b) During any period in which volume regulation is in effect, each handler shall be entitled to apply for an additional allotment (without deduction from any subsequent allotments) of up to 20% of such handler's base allotment calculated in paragraph (a). Application for this marketing incentive allotment must be made no later than four days prior to the next NOAC meeting and shall not be denied. This incentive increase is in addition to the allowance for overshipments provided for in § 907.55. Any portion of such incentive allotment unused during the prorate for which it was granted shall be deducted from the handler's prorate base.

§ 908.54 Allotments

* * * * *

(b) During any period in which volume regulation is in effect, each handler shall be entitled to apply for an additional allotment (without deduction from any subsequent allotments) of up to 20% of such handler's base allotment calculated in paragraph (a). Application for this marketing incentive allotment must be made no later than four days prior to the next NOAC meeting and shall not be denied. This incentive increase is in addition to the allowance for overshipments provided for in § 908.55. Any portion of such incentive allotment unused during the prorate for which it was granted shall be deducted from the handler's prorate base.

Proposal No. 10:

Revise the introductory text and paragraph (a) of §§ 907.67 and 908.67 as follows:

§ 907.67 and § 908.67 Oranges not subject to regulation.

Except as otherwise provided in this section, nothing contained in this subpart shall be construed to authorize any limitation of the right of the initial handler of oranges to: (a) Handle oranges to charitable institutions for consumption by such institutions or to relief agencies for distribution by such agencies: *Provided,* That all charitable organizations seeking product donations shall apply to the committee for certification; provided, however, that donations to any one charity in the amount of 100 cartons or less shall not require certification. All bona fide charitable organizations shall be qualified as such with the Internal Revenue Service. Certification shall not be denied on the basis of race, color, creed, or religion.

* * * * *

Proposal No. 11:

Amend §§ 907.83 and 908.83 by adding new paragraphs § 907.83 (c)(4) and (c)((5); and § 908.83 (c)(4) and (c)(5) to read:

§ 907.83 Termination.

* * * * *

(c) * * *

(4) A mandatory amendatory or continuance referendum shall be held within 120 days after a petition containing the names of at least five percent of industry growers is submitted to the committee; provided, however, that a continuance referendum shall be held at least every three years.

(5) Voting rights on any such referendum shall be those provided for in § 907.22.

* * * * *

§ 908.83 Termination.

* * * * *

(c) * * *

(4) A mandatory amendatory or continuance referendum shall be held within 120 days after a petition containing the names of at least five percent of industry growers is submitted to the committee; provided, however, that a continuance referendum shall be held at least every three years.

(5) Voting rights on any such referendum shall be those provided for in § 908.22

* * * * *

Proposals Submitted by J. Kent Burt, Dennis N. Torigian, and Carl A. Pescosolido, Jr.

Remove §§ 907.51 through 907.61a.
Remove §§ 908.51 through 908.61a.

Proposals Submitted by Don A. Schroeder:

1. Eliminate the provisions relative to the forfeiture of unused allotments.
2. Provide for the establishment of an allotment "banking" system wherein handlers deposit unused weekly allotments. Such deposits are to be redistributed to eligible handlers as loans, subject to a maximum weekly withdrawal of 50 percent of the handler's weekly prorate. A minimum reserve of 20 percent of the weekly schedule or any amount above that set by the committees would be established in the "bank" and redistribution and repayment of loans would be based on tree crop.

Proposal Submitted by Bernie H. Evans, III:

Revise procedures for issuing early maturity allotments.

Proposal by the Fruit and Vegetable Division, Agricultural Marketing Service:

Make such changes as may be necessary to make both marketing agreements and orders conform with any amendment thereto that may result from the hearing.

Dated: March 11, 1983.

William T. Manley,

Deputy Administrator, Marketing Program Operations.

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 83-AWA-4]

Proposed Alteration of VOR Federal Airways

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposal alters the descriptions of several VOR (very high frequency omnidirectional tactical air navigational aid) Federal airways in the vicinity of Montpelier, VT, VORTAC. The Montpelier VORTAC (very high frequency omnidirectional radio range tactical air navigational aid) will be relocated approximately 9 miles southeast of the present location. This action amends the descriptions of all airways affected by the relocation.

DATES: Comments must be received on or before May 2, 1983.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA, New England Region, Attention: Manager, Air Traffic Division, Docket No. 83-AWA-4, Federal Aviation Administration, 12 New England Executive Park, Burlington, MA 01803.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, D.C.

An informal docket may also be examined during normal business hours at the office of the Regional Air traffic Division.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Regulations and Obstructions Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8783.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 83-AWA-4." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date

for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA–430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426–8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the descriptions of VOR Federal Airways V–72, V–104, and V–447. The Montpelier VORTAC is being relocated to lat. 44°05'8"N, long. 72°26'59"W, which is approximately 9 miles southeast of the present location. This action amends the descriptions of the affected airways. Section 71.123 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70–3A dated January 3, 1983.

List of Subjects in 14 CFR Part 71

VOR airways, Aviation safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

V–72 [Amended]

By deleting all the words after the word "Montpelier."

V–104 [Amended]

By deleting all after the words "Bangor, ME." and substituting the words "The airspace within Canada is excluded."

V–447 [Amended]

By deleting the words "INT Montpelier 020° and Sherbrooke, PQ, Canada, 217° radials; Sherbrooke." and substituting the words "to Sherbrooke, PQ, Canada."

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

Note.—The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, D.C., on March 8, 1983.

B. Keith Potts,

Manager, Airspace-Rules and Aeronautical Information Division.

[Airspace Docket No. 82–ANM–24]

Proposed Alteration and Revocation of Airways

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposal would alter the descriptions of several VOR Federal Airways in the vicinity of Great Falls, MT, by revoking the alternate route structure and by extending V–19 from Lewistown, MT, to Havre, MT. This action would improve traffic flow in the area when the Hays Military Operations Area (MOA) is active, reduce chart clutter, increase safety, and reduce controller workload.

DATE: Comments must be received on or before May 2, 1983.

ADDRESS: Send comments on the proposal in triplicate to: Director, FAA, Northwest Mountain Region, Attention: Manager, Air Traffic Division, Docket No. 82–ANM–24, Federal Aviation Administration, FAA Building, Boeing Field, Seattle, WA 98108.

The official docket may be examined in the Rules Docket, weekdays, except Federal Holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, D.C.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Regulations and Obstructions Branch (AAT–230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426–8783.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspect of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 82–ANM–24." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comment received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA–430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426–8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) that would extend V–19 and revoke V–19W between Great Falls, MT,

and Lewistown, MT, and revoke V–120W between Great Falls and Lewistown. The airway extension would provide controlled airspace that bypasses the Hays MOA without adding excessive mileage and inconvenience to the pilot. This action aids flight planning, increases safety, and reduces chart clutter and controller workload. Section 71.123 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70–3A dated January 3, 1983.

List of Subjects in 14 CFR Part 71

VOR Federal airways, Aviation safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

V–19 [Amended]

By deleting the words "Lewistown; Great Falls, MT, including a Walternate via INT Lewistown 274° and Great Falls 122° radials." and substituting the words "Lewistown; INT Lewistown 322°T(304°M) and Havre, MT, 226°T(207°M) radials; to Havre."

V–120 [Amended]

By deleting the words "Lewistown, MT, including a N alternate INT Great Falls 074° and Lewistown 308 radials; 41 miles, 72 miles, 85 MSL, Miles City, MT," and substituting the words "Lewistown, MT; Miles City, MT."

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(C)); and 14 CFR 11.65)

Hor.—The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore–(1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, D.C., on March 8, 1983.

B. Keith Potts,

Manager, Airspace-Rules and Aeronautical Information Division.

Proposed Alteration of VOR Federal Airways

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposal alters the description of several airways in the vicinity of Los Angeles, CA, by deleting alternate airway segments and renumbering other airway segments. This action supports our agreement with the International Civil Aviation Organization (ICAO) to eliminate all alternate airway designations from the National Airspace System.

DATE: Comments must be received on or before May 2, 1983.

ADDRESS: Send comments on the proposal in triplicate to: Director, FAA, Western-Pacific Region, Attention: Manager, Air Traffic Division, Docket No. 82–AWP–22, Federal Aviation Administration, 15000 Aviation Blvd., P.O. Box 92007, Worldway Postal Center, Los Angeles, CA 90009.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, D.C.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Regulations and Obstructions Branch (AAT–230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426–8783.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 82–AWP–22." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA–430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426–8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the descriptions of several airways in the vicinity of Los Angeles, CA, by deleting the alternate route segments. Those alternate routes required for air traffic control have been assigned new numbers. This action supports our agreement with ICAO to eliminate all alternate route designations from our National Airspace System. Section 71.123 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70–3A dated January 3, 1983.

List of Subjects in 14 CFR Part 71

VOR Federal airways, Aviation safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.123 of Part 71) of the Federal Aviation Regulations (14 CFR Part 71 as follows:

V–264 [Amended]

By deleting the words "Twentynine Palms, CA, including a S alternate from Los Angeles to Twentynine Palms via Paradise, CA, and Palm Springs, CA; 17 miles, 29 miles 55 MSL," and substituting the words "Twentynine Palms, CA,"

V–370 [New]

From Los Angeles, CA, via Paradise, CA; Palm Springs, CA; to Twentynine Palms, CA.

V–16 [Amended]

By deleting the words "Palm Springs, CA, including a S alternate from Los Angeles via Los Angeles 138° and Seal Beach, CA, 287° radials; Seal Beach; March, CA; INT March 068° Palm Springs 273° radials; to Palm Springs; Blythe, CA; 21 miles, 60 miles, 55 MSL, Buckeye, AZ;" and substituting the words "Palm Springs, CA; Blythe, CA; Buckeye, AZ;"

V–372 [New]

From Seal Beach, CA, via March, CA; INT March 068°T(054°M) and Palm Springs, CA, 273°T(256°M) radials; Palm Springs; to Blythe, CA.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

Note.—The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore— (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, D.C., on March 8, 1983.

[Airspace Docket No. 83-ACE-2]

Proposed Alteration of VOR Federal Airways

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: These proposals alter the descriptions of several very high frequency omnidirectional radio range (VOR) Federal airways/jet routes in the vicinity of Wichita, KS. The Wichita very high frequency omnidirectional radio range tactical air navigational aid (VORTAC) will be relocated approximately 6 nautical miles west of its present location. These actions amend the descriptions of all airways affected by the move to the new location.

DATES: Comments must be received on or before May 2, 1983.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA, Central Region, Attention: Manager, Air Traffic Division, Docket No. 83–ACE–2, Federal Aviation Administration, 601 E. 12th Street, Kansas City, MO 64106.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. the FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, D.C.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Regulations and Obstructions Branch (AAT–230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426–8783.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposals. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposals. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 83–ACE–2." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA–430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426–8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

The Proposals

The FAA is considering amendments to § 71.123 and § 75.100 of Parts 71 and 75 of the Federal Aviation Regulations (14 CFR Parts 71 and 75) to alter the descriptions of VOR Federal Airways V–73, V–77, V–261, V–280, V–350, V–532, and Jet Route J–182. The Wichita VORTAC is being relocated to lat. 37°44'43" N., long. 97°35'01" W., which is approximately 6 nautical miles west of the present location. These actions amend the descriptions of the affected airways/jet routes. Sections 71. 123 and 75.100 of Parts 71 and 75 of the Federal Aviation Regulations were republished in Advisory Circular AC 70–3A dated January 3, 1983.

List of Subjects in 14 CFR Parts 71 and 75

Airways/jet routes, Aviation safety.

The Proposed Amendments

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend §§ 71.123 and 75.100 of Parts 71 and 75 of the Federal Aviation Regulations (14 CFR Parts 71 and 75) as follows:

PART 71—[AMENDED]

§ 71.123 [Amended]

V–73 [Amended]

By deleting the words "From Tulsa, OK, via Wichita, KS;" and substituting the words "From Tulsa, OK, via INT Tulsa 319°T(311°M) and Wichita, KS, 136°T(127°M) radials;"

V–77 [Amended]

By deleting the words "Wichita, KS; INT Wichita 037° and Topeka, KS, 236° radials;

Topeka;" and substituting the words "Wichita, KS; INT Wichita 042°T(033°M) and Topeka, KS, 236°T(226°M) radials; Topeka;"

V-281 [Revised]

From Wichita, KS; to Manhattan, KS.

V-532 [Amended]

By deleting the words "Wichita, KS; INT Wichita 356° and Salina, KS 169° radials;" and substituting the words "Wichita, 004°T(355°M) and Salina 169°T(160°M) radials;"

V-280 [Amended]

By deleting the words "Hutchinson; INT Hutchinson 062° and Topeka, KS, 236° radials;" and substituting the words "Hutchinson; INT Hutchinson 061°T(053M) and Topeka 236°T(226°M) radials;"

§ 75.100 [Amended]

J-102 [Revised]

From Goodland, KS, via Wichita, KS; INT Wichita 122°T(113°M) and Razorback, AR, 291°T(284°M) radials; to Razorback.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

Note.—The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore (1) Is not a "major rule" under Executive Order 12291; (2) is not a "Significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, D.C., on March 8, 1983.

B. Keith Potts,

Manager, Airspace-Rules and Aeronautical Information Division.

BILLING CODE 4910-13-M

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Parts 1500 and 1513

Requirements to Address Strangulation Risk Presented by Toy Chests

AGENCY: Consumer Product Safety Commission.

ACTION: Proposed rule.

SUMMARY: Based on available information, the Commission preliminarily believes that certain toy chests with hinged lids present a strangulation risk to children and that a mandatory rule may be necessary to address that risk. The Commission is therefore proposing a rule, supported by a preliminary regulatory analysis, and soliciting public comment.

DATES: Comments and submissions are due no later than April 18, 1983. The rule is proposed to become effective and to apply to toy chests in the channels of distribution after expiration of the 90 calendar day period of continuing session of Congress following final issuance of the rule.

ADDRESS: Comments and submissions should be sent, preferably in five copies, to Office of Secretary, Consumer Product Safety Commission, Washington, D.C. 20207.

FOR FURTHER INFORMATION CONTACT: Ms. Elaine Tyrrell, Office of Program Management, Consumer Product Safety Commission, Washington, D.C. 20207; telephone (301) 492-6554.

SUPPLEMENTARY INFORMATION:

I. Advance Notice of Proposed Rulemaking

In April 1982 the Commission issued an advance notice of proposed rulemaking (ANPR) concerning a strangulation risk that certain toy chests with hinged lids present to children. 47 FR 16041 (April 14, 1982). The ANPR, the first of three required stages in the issuance of a mandatory rule for children's articles under the Federal Hazardous Substances Act, discussed the statutory framework of the rulemaking proceeding; the scope of the proceeding; the strangulation risk; and the alternatives to a mandatory rule:[1]

A. Statutory Framework

Under the Federal Hazardous Substances Act (FHSA), the Consumer Product Safety Commission has authority to regulate the safety of articles intended for use by children. 15 U.S.C. 1261 *et seq.* Alternatively, if the Commission finds that it is in the public interest to regulate a risk associated with a particular children's article under the Consumer Product Safety Act, it may regulate such article under that statute. 15 U.S.C. 2079(d).

During 1981 Congress amended both acts to require a three-stage proceeding for the regulation of consumer products (including children's articles). Consumer Product Safety Amendments of 1981 (Pub. L 97-35). The proceeding must begin with an advance notice of proposed rulemaking, and that notice must include information about the product, the risk, any existing voluntary standards and the regulatory alternatives under consideration. 15 U.S.C. 1262(f).

The required second stage involves a **Federal Register** document that includes the text of a proposed rule, any alternatives, and a preliminary regulatory analysis that contains (a) a preliminary description of the potential benefits and potential costs of the proposal; (b) a discussion of the reasons that a voluntary standard submitted in response to the ANPR was not published as the proposal; (c) a discussion of why the Commission believes preliminarily that a submitted plan for a voluntary standard "would not, within a reasonable period of time, be likely to result in the development of a voluntary standard that would eliminate or adequately reduce the risk of injury identified. * * *"; and (d) a description and discussion of any reasonable alternatives to the proposal. 15 U.S.C. 1262(h).

A final rule, the third stage, must be accompanied by a final regulatory analysis. 15 U.S.C. 1261(i)(1). It must also be supported by a number of findings concerning any then-existing voluntary standard and the benefits, costs, and burden of the mandatory rule. 15 U.S.C. 1262(i)(2).

Under the Federal Hazardous Substances Act, the Commission may determine by regulation (according to the three-stage proceeding just described) that "[a]ny toy or other article intended for use by children * * * presents an electrical, mechanical, or thermal hazard" 15 U.S.C. 1261(f)(1)(D). The Commission may conclude that an article presents a mechanical hazard if "in normal use or when subjected to reasonably foreseeable damage or abuse, its design or manufacture presents an unreasonable risk of personal injury or illness * * * from * * * openings or closures, * * * from moving parts, * * * because of instability, or * * * because of any other aspect of the article's design or manufacture." 15 U.S.C. 1261(s). If the Commission makes such a determination about a toy or other children's article, the article is deemed a "hazardous substance" and a "banned hazardous substance," and its

[1] Six documents in the record of the rulemaking proceeding were listed at the end of the ANPR. Those six and some additional documents are listed at the end of this proposed rule. The numbers in parentheses throughout the text of this document refer to that list. All documents on the list are available from the Commission's Office of the Secretary.

introduction or delivery for introduction into interstate commerce is prohibited. 15 U.S.C. 1261(f)(1)(D), 1261(q)(1)(A), and 1263(a).

B. Scope

The ANPR applied to all toy chests that met the working definition of "containers with hinged lids that are marketed for storing children's toys." A refinement of this definition to address size is discussed in section IIIB below.

The ANPR explained the Commission's awareness that many products, such as trucks and old packing cartons, are used as toy chests but are not included within the definition (12). The inclusion of such products would make a mandatory rule both unworkable and unenforceable because of the many different types of products that can be—and are—used as toy chests.

C. Risk of Injury

In the ANPR, the Commission stated that it has documented 21 fatalities and one case of permanent brain damage from falling toy chest lids (3). The pattern generally involves a toy chest lid falling on a child while he or she is leaning into the chest (4). If the child's neck is extended across the upper edge of the front of the chest when the lid falls, the child can be caught and strangled (4).

The ANPR also stated that most of the victims in the documented incidents were between ages of 10 and 12 months, with one victim 16 and one 19 months of age (4). As discussed in section IIIA below, this age distribution was incorrect.

The most likely hazard scenario occurs when the toy chest lid is left open or the child is attracted to the toy chest and opens it himself or herself (4). At the age of many of the victims, children are reasonably mobile and may be walking to some degree, but are basically unsteady on their feet (4). Because of this, the child may push or lean on the toy chest while looking in (4). If this occurs, the lid may fall and strike the child if there is not an adequate lid support device attached to the toy chest (4).

If the child is not found immediately, the consequences can be fatal. It is not known, however, whether the initial impact causes death or whether the child ultimately strangles because of the entrapment.

D. Alternatives for Addressing Risk

In issuing the ANPR, the Commission recognized that a mandatory rule was not necessarily the only way to address the toy chest strangulation risk. The ANPR specifically discussed (1) the voluntary standard effort that the American Society for Testing and Materials, in cooperation with the Toy Manufacturers of America, had initiated and (2) an information and education approach.

E. Solicitation of Public Input

The ANPR solicited public comments on the identified risk of injury and on the other subjects discussed. In particular, the ANPR sought comments on possible alternatives to a mandatory rule. As required by the Federal Hazardous Substances Act, the Commission invited: (1) The submission of any existing standard or portion of a standard that addresses the risk of strangulation form toy chests and (2) the submission of any statements of intention to develop a voluntary standard or to modify an existing standard that addresses that risk, along with a plan to do so.

II. Response to the ANPR

The Commission received seven comments in response to the ANPR. One of them consisted of 47 individual comments from members of a Legal Environment of Business class at Ohio State University (16). Three of the comments concerned a voluntary standard for toy chests that is being developed by the American Society for Testing and Materials (ASTM), under the sponsorship of the Toy Manufacturers of America (TMA). These comments were from TMA's attorney (17), TMA's president (19), and ASTM's president (20). Two comments came from toy chest manufacturers, Nu-Line Industries (18) and Gerad, Inc. (22). The Public Action Coalition on Toys also submitted a comment (21).

A. Ohio State Comments

With one exception, the comments from the Ohio State students supported the issuance of a mandatory rule for toy chests or an information and education approach to warn the public, or both. Many of the comments discussed possible requirements that could be imposed on toy chests to address the strangulation risk, such as mandating the use of "slow-closing" devices like the ones used on screen and storm doors.

The one exception was a comment from Ms. Cynthia Bavaria who, first, challenged the Commission's authority to regulate toy chests under the Federal Hazardous Substances Act, an act that provides regulatory authority over "toys and other articles intended for use by children." She stated that toy chests are not toys that children play with, but rather products that "[m]others use * * * to store toys." Second, Ms. Bavaria contended in her comment that a regulation for only some products used as toy chests (referring to the limited definition discussed in the ANPR) will raise the consumers' costs and encourage them to buy toy chest products that will not be regulated. As a result, competition will be unfairly hindered and the regulation will be ineffective. Third, this comment pointed out that the three fatalities each year from toy chest strangulation cannot be evaluated without comparing that figure to the fatalities caused by other products.

The Commission responds as follows to Ms. Bavaria's comments:

1. Toy chests are articles intended for use by children, within the statutory authority because they are used by both children and adults. The 21 fatalities of children who were using toy chests, apparently unsupervised by any adult, is the best evidence of their use by children. A product that is used by both children and adults—like toy chests—is an article intended for use by children under the FHSA, according to a judicial decision in a case that challenged the Commission's bicycle regulation. *Forest v. CPSC*, 559 F.2d 774 at 783–6 (C.A.D.C. 1977).

2. As discussed in section IIIF(1) below, the Commission believes that any increased cost resulting from compliance with a mandatory standard for toy chests will be minimal. It is therefore unlikely that there will be any effect on competition or any incentive for consumers to purchase, for use as a toy chest, a product that is not covered by the rule.

3. Based on its experience with many injuries and deaths caused by consumer products, the Commission believes that three fatalities each year (the updated figure is now closer to two) is a large number to be caused by a particular hazard presented by a product that is not inherently dangerous. This is especially true when the total number of toy chests on the market and in consumers' hands is much smaller than the number of some other children's products like cribs and strollers. In any case, the risk presented must be balanced against the costs associated with the "fix," which are minimal for this particular risk (see section IV below). Finally, the Commission notes (a) that there may be more fatalities and "near misses" than it now knows of and (b) that children who are too young to protect themselves deserve the greatest possible protection from a hazard, even

if a government-imposed rule is necessary to provide it.

B. Comments on Voluntary Standard Development

The comments from TMA, Nu-Line, and ASTM generally supported a voluntary standard for toy chests as an alternative to a mandatory rule (18), (19), (20). The Commission has closely monitored the voluntary standard development proceeding, and the following is a description of all recent voluntary efforts:

In March 1981 the Comission staff contacted the ASTM Committee on Consumer Products (F15) about the development of a voluntary standard for toy chests (8). The Committee chairman explained that toy chests had been dropped as a possible project because there had been little interest expressed by industry (8). ASTM had contacted two children's products trade associations, TMA and Juvenile Products Manufacturers Association (JPMA) but they were not interested because they did not represent a majority of the manufacturers of toy chests (8).

In June 1981 the Commission staff wrote to all known manufacturers of toy chests, soliciting support and commitment to participate in developing a voluntary standard (8). After about two-thirds of the manufacturers responsed favorably, ASTM agreed to call an organizational meeting to establish a task group to develop a standard. Manufacturers, consumers and other interested persons were invited to attend a meeting on September 16, 1981 (8). However, only two manufacturers sent representatives to the meeting and, because of this poor attendance by manufacturers, no task group was formed (8).

Following a Commission briefing in December 1981, TMA offered to sponsor a voluntary standard for toy chests and to invite all manufacturers to participate (9). Commission staff provided a list of 34 firms believed to be producers or distributors of toy chests. TMA contacted ASTM and arranged for a meeting on May 4, 1982 to establish a task group. The task group formed at that meeting decided to develop a voluntary standard for toy chests and to incorporate identical provisions into an existing voluntary standard for toy safety (13).

Commission staff provided to the task force injury data and recommendations to address the risk of strangulation from falling toy chest lids (13, 15). A draft standard that incorporated staff recommendations was circulated for ballot vote by ASTM in July 1982, with a request that all ballots and comments be returned by August 1982 (23). ASTM mailed the draft standard and ballot forms to all known manufacturers of toy chests, regardless of whether they were able to attend the May 4 meeting.

By September 16, 1982, ASTM had received only 11 responses to their request for ballots and only three of these were from manufacturers of toy chests (27). In response to Commission staff concerns about the small number of manufacturers who voted on the draft standard, TMA attempted to contact each manufacturer directly. TMA found that some manufacturers were no longer producing toy chests and that there was some duplication on the list of firms (36). TMA provided to ASTM a revised list of 28 manufacturers and, after contacting them, the President of TMA indicated to Commission staff that the majority of manufacturers supported the voluntary standard (27).

Based on submitted comments, the voluntary standard was revised. On October 29, 1982 ASTM distributed this revised second draft standard and a ballot, with a due date of November 30, 1982 (43). In telephone conversations with Commission staff in January 1983, ASTM staff reported that the response to the second ballot was "good." Thirteen toy chest manufacturers and two lid support producers responded; all of these were affirmative votes or abstentions (27).

ASTM considered these second ballot results to provide task group approval, and therefore planned to sent the draft standard concurrently to its Standards Development Subcommittee and the main Consumer Products Committee (F-15) by the end of January 1983 (57). If those two committees approve the revised standard, ASTM estimates that the ballot for final ASTM approval could take place in May or June 1983 (57). If no negative votes are received on this ballot, the standard could be published in late 1983.

The Commission discusses in section IIIF(2) below whether a voluntary standard can be expected to address adequately the toy chest strangulation risk.

C. PACT and Gerad Comments

The comment received from the Public Action Coalition on Toys (PACT) urged th Commission to issue a mandatory standard because the alternative of a voluntary standard has not proven to be either timely or effective (21). Specifically, PACT stated that the lack of cohesiveness of the toy chest manufaturers provides "no assurance that all toy chest manufacturers would help develop and conform to the requirements of a voluntary standard." As just noted, the adequacy of a voluntary standard is discussed in section IIIF(2) below.

PACT additionally stated that an information and education effort alone would place "an undue burden on the shoulders of the consumer." Section IIIF(3) below discusses information and education activities. Finally, PACT supported the approach of requiring "a non-adustable device that would need an external downward force to lower a toy chest lid." This is basically the approach taken by the proposed standard (see section III C below).

The comment from Gerad, Inc. supported a regulation for toy chests, but suggested that it include an exemption for light-weight lids, such as the one on the chest that Gerad manufactures (22). The Commission has considered this suggestion and does not now believe that any hinged lid would be so light that it would not pose an unreasonable risk of death or injury to children from entrapment reulsting in strangulation. However, the Commission staff will be evaluating Gerad's toy chest during the comment period, and may reach a different conclusion. Comments on this issue are solicited from other manfuacturers and members of the public.

III. Proposed Rule

A. Risk of Injury

When the Commission issued the ANPR, it had documented 21 deaths and one case of permanent brain damage that were caused by falling toy chest lids (see section I C above). Since that time, another serious accident has occurred and come to the Commission's attention. It involved a 20-month-old child who suffered blindness and partial paralysis when a toy chest lid fell on his head or neck (61). Based on the Commission's preliminary investigation, the toy chest involved had a friction-type lid support device that failed to prevent the lid from falling (61).

In addition, the Commission has documented three "near misses," incidents in which a toy chest lid fell on a child who was rescued and escaped permanent injury (61).

The Commission has found that it incorrectly reported in the ANPR the age distribution of the victims (see section IC above). Including the most recent incident, eight of the victims were between 10 and 12 months of age, and all but two of the 23 victims were under two years of age (61).

B. Scope

As mentioned earlier, the working definition of toy chest requires refinement to account for size (see section IB). If no minimum size were included for toy chests, certain containers for toys that are too small to present the identified risk would be covered by the proposed rule. For example, certain brands of small toy cars and action figures are designed to fit into specialized carrying and storing cases. These cases are so small that no child could fit his or her head into them, especially since they are usually subdivided into even smaller compartments, and the strangulation risk is not presented. Therefore, it is both necessary and appropriate to propose a minimum size for toy chests covered by the rule.

In 1973 the Food and Drug Administration (FDA), which then administered the FHSA, proposed a mandatory toy chest rule (7). It would have applied to toy chests having a continuous enclosed volume greater than 1.1 cubic feet and a smallest internal dimension of six inches or more. Subsequently, TMA used the same size limitation when it developed provisions applicable to toy chests in a voluntary toy safety standard (1).

After evaluating these FDA and TMA size criteria, the Commission believes that they would effectively exclude from the rule toy chests that are too small to present the identified strangulation risk. While 1.1 cubic feet is small for a toy chest (58), this criterion on volume would exclude from the rule's coverage the specialized cases described above. It is also likely to exclude any other containers marketed for storing children's toys that are too small to present the strangulation hazard to children.

The six inch criterion is also a helpful one. All toy chest that the Commission has observed currently on the market have three dimensions—length, width, and depth (height)—each of which is larger than six inches (59). Nevertheless, it is theoretically possible that a toy chest will have a volume larger than 1.1 cubic feet and an internal dimension smaller than six inches. If such a toy chest existed, the Commission does not believe that it would present the strangulation risk because the head of the smallest child in the group at risk would be quite unlikely to fit into it. This is based on a commission staff estimate that such a head would measure approximately 4.4 inches by 5.7 inches by 6 inches (58). The six inch criterion used by the FDA and TMA is generally consistent with these dimensions and the Commission is proposing to use it, along with the volume limitation, to define the scope of the toy chest rule.

Therefore, as described in section 1513.2 below, the proposed rule includes toy chests that have a smallest internal dimension of six inches of more [2] and a volume greater than 1.1 cubic feet. If any comments on the proposal indicate that these size limitations are not appropriate for toy chests, either because they include toy chests that do not present the strangulation risk or because they exclude toy chests that do present the risk, the Commission will reconsider the scope of the rule.

C. Test Procedure

The purpose of the proposed rule is to distinguish the toy chests that present the strangulation risk from those that do not, and to ban the hazardous ones (see section 1513.1). The rule does this by requiring that a lid not fall of its own weight. Whether a child or adult opens a toy chest, the lid most remain at the position to which it was opened, and not "slam shut" or otherwise close onto and entrap a child's neck or head.

The proposed rule includes a test procedure with which toy chests must comply (§ 1513.3). The procedure is framed in performance terms so that manufacturers can select from among different design approaches to achieve compliance. The Commission at this time knows of three types of lid support devices that could be used with a toy chest so that it will comply with the proposed test procedure (59):

(a) spring-loaded support: A device which uses a spring in either compression or tension to counterbalance the weight of the lid. Several such devices are currently marketed and some serve a dual purpose of both hinge and lid support.

(b) friction-type support: A device with a slotted bar, attached to the lid, which slides through a clamp attached to the chest. Friction between the clamp and bar is sufficient to support the lid.

(c) ratchet-type device: A bar with multiple notches, attached to the lid, and a pawl, attached to the chest, which engages the notches to prevent the lid from dropping. The pawl must be released by some means for the lid to close.

While not every lid support device that falls into one of these categories will necessarily comply with the standard, any of the three types could be used. The existence of at least three types of devices provides a manufacturer with some freedom of choice about the design approach it wants to use.

The Commission emphasizes that neither the FHSA nor the proposed rule would require manufacturers to test toy chests. Rather, the test procedure describes the requirements that toy chests must meet in order to be in compliance and it also describes how the Commission will perform its testing for enforcement purposes. The Commission of course anticipates that manufacturers will test at least some of their toy chests.

The proposed test procedure incorporates the following criteria:

1. *Adjustment of the lid support device.* If a toy chest is sold unassembled, the consumer may have to install the lid support device. If so and if the device needs to be adjusted at the time of installation, the standard directs that such an adjustment be made, as long as it is described in the manufacturer's written instructions for consumer assembly (§ 1513.3(a)). No further adjustment of the lid support device is permitted, however, before or during the testing.

If a toy chest is sold to consumers in an assembled form, the standard permits *no* adjustment of the lid support device (§ 1513.3(a)). Since the chest is in a usable form when sold, it is possible (and perhaps even likely) that consumers will fail to make any adjustmeent that is necessary for proper functioning of the lid support device. Without the device, the lid will still open and close. Even if the manufacturer's written instructions described the adjustment, the Commission's experience is that some consumers fail to read any instructions that accompany already-assembled consumer products. Therefore, assembled toy chests must be tested as they are sold to consumers, without any adjustment at all to the lid support device.

2. *Permissible dropping motion of lid.* The purpose of the standard is to assure that the lid did not drop down when it is opened and released. However, the standard permits the lid to drop 0.25 inch or less (§ 1513.3(e)) because some dropping may occur when a ratchet-type lid support device is used to achieve compliance (59). Lid drop motion will be resisted only when the pawl is engaged in a notch in the bar, and some such motion may take place in order to achieve this engagement. The actual amount of lid drop will depend on the lid width and the pitch (number of notiches per inch) of the notches on the bar.

[2] Even if a marketed toy chest is not a rectangular box and therefore has varying lengths, widths, or depths, this size limitation would be appropriate.

The Commission sees no reason why the ratchet-type lid support devices should not be used for compliance with the standard. Therefore, it is proposing that a drop of 0.25 inch be permitted. The Commission believes that this is reasonable because it will allow many ratchet-type devices to be used and because such a small drop will not pose a strangulation risk to any children using the toy chest.

The Commission is especially interested in receiving comments on an appropriate lid drop criterion. If comments on the proposed rule suggest and provide a supporting rationale for a different amount of permissible drop (or for no drop at all), the Commission will reconsider the proposed criterion of 0.25 inch. The Commission's overriding consideration on this issue is and will remain whether any particular dropping motion will pose an unreasonable risk to children.

3. *Exemption for half-inch openings.* If a lid is opened 0.50 inch or less, the dropping restrictions in the proposed standard do not apply (§§ 1513.3 (b) and (d)). Certain types of lid support devices, a possible example being a spring-loaded support that uses an over-center lever arrangement, might not be effective in holding the weight of the lid in positions that are 0.50 inch or less above the fully-closed position (59).

The Commission is proposing to allow the lid to drop from such positions to accommodate any devices with this limitation. Because no child's head would fit into an opening as small as a half-inch, and no child would therefore be placed at risk by this allowance, the safety of the proposed rule is not compromised (58). In fact, if any comments suggest that this exemption from the dropping restriction be expanded to openings larger than 0.50 inch and provide a supporting rationale, the Commission will consider making such a change. The Commission would evaluate whether any permitted drop would pose a risk to children by allowing strangulation to occur.

4. *7000 cycles.* Even if a toy chest lid complies with the test procedure when it is new, it would not necessarily continue to comply after it is opened and closed many times. Since the effectiveness of the procedure depends on continuing compliance, the proposal incorporates a "cycling" requirement (section 1513.3(c)).

After being tested for dropping motion, the lid must be full opened without being forced and then fully closed (one complete cycle) 7000 times. The dropping test is then performed a second time (§ 1513.3(d)), and the toy chest must still comply (§ 1513.3(e)).

The Commission's data on the number of times a toy chest is opened and closed in its normal use range from once per week to eight times per day (58). The Commission staff's professional judgment is that an average of four openings and closing per day is a reasonable estimate (58). If a chest were opened and closed four times per day for five years, it would undergo approximately 7300 such cycles. Rounding off this figure, the proposed regulation requires that a chest undergo 7000 cycles.

The Commission believes that any one child might use a toy chest for about two years (58). The same chest may be "handed-down" through the generations, given to children of friends or relatives, or sold at garage sales. This could easily result in many more than 7000 cycles during the life of one toy chest. However, the Commission's engineering staff believes that any chest that complies with the dropping requirement after 7000 cycles is likely to be sufficiently resistant to wear that it would continue to comply with the test after being subjected to a greater number of cycles (59). In other words, if a lid support device still works after 7000 cycles, it will probably continue to work long after.

The proposed test procedure requires that each cycle be completed in approximately eight seconds. If the cycling were performed faster, heat might result from friction and the functioning of the lid support device could deteriorate. The eight-second criterion is designed to avoid this problem and to complete the cycling test in a reasonable time. The Commission also believes that a laboratory cycling machine could easily be designed and adjusted to approximate an eight-second cycle.

D. Labeling

The Commission has included in the proposed rule a requirement that toy chests be clearly marked to show the name and place of business of at least one of the following: manufacturer, importer, distributor, seller (§ 1513.4(a)). The purpose of this requirement is to assist in any recall or retrofit efforts that the Commission may require or the industry may undertake voluntarily, for noncomplying toy chests.

In addition, the proposed rule would require that each toy chest have some marking—for example a number or symbol—that is particular to toy chests of identical construction, composition, and dimensions (§ 1513.4(b)). The purpose of this requirement is the same.

E. Description of Industry [3]

The Commission has identified about 30 manufacturers of toy chests as of October 1982. A few firms account for a large percentage of total production. The Commission estimates that three or four toy chest manufacturers account for as much as 70 or 80 percent of the total annual production. Other firms enter and leave the toy chest business from time to time as market conditions seem to dictate. Toy chests require little capital investment, are simple to make, and can readily be added to or dropped from product lines. Many of the smaller manufacturers produce around 1000 or fewer units a year. Most of the firms produce, in addition to toy chests, many other children's and juvenile products such as cribs, table and chair sets, doll furniture, car seats, laundry hampers, and a variety of molded plastic products.

Toy chest manufacturers and non-cohesive industry group. Some manufacturers are members of the Juvenile Products Manufacturers Association and others are members of the Toy Manufacturers of America. Many of the identified manufacturers do not belong to either of these associations.

The market for toy chests tends to be fairly stable over time since large shifts in consumer demand or style changes do not occur. Advertising by manufacturers is limited mostly to trade magazines and journals and is presented in combination with other products marketed by the firm. Retail sales tend to be spread over the whole year with a significant portion occurring in the pre-Christmas season.

The distribution system for toy chests, as it is for other juvenile products, is relatively complex because of the many sources of supply and the potentially thousands of retail outlets which may be involved. Some manufacturers distribute their product through wholesalers or other distributors, who in turn supply retailers. Retail outlets range from small local toy stores and juvenile furniture stores to large discount toy chains, mass merchandisers, variety stores, department stores, and hardware stores.

Toy chest production was estimated at 650,000 units in 1982, reflecting an increase of 50,000 units over the 600,000 units estimated for 1979. The production of toy chests declined in 1980 and 1981 but seems to have recovered in 1982. During 1982, a number of firms have experienced declines while others have

[3] Unless noted otherwise, the information in this section and in section IIIF below is based on documents (26), (56), and (78).

increased their production. The retail value of current production, though difficult to estimate, is probably in the neighborhood of $22 million. Based on a customary 100 percent markup for such products, the value of the manufacturers' shipments of toy chests is around $11 million.

Manufacturers of toy chests normally produce more than one model and try to retain their share of the market primarily through decorative differences, though size, shape, and material used also are important factors. Toy chests with hinged lids generally have similar design characteristics. They are rectangular boxes with a volume ranging from abut 7,000 to 14,000 cubic inches. They are usually constructed from hardwood, particleboard, pressed-wood, or plastic. Most toy chests are shipped in "knocked-down" condition with a lid support device enclosed in the packaging. Most toy chest retail prices range from about $18 to $95 and appear to have remained stable during the last two to three years.

F. Preliminary Regulatory Analysis [1]

1. *Costs and benefits.* The major cost consideration of the proposed rule centers on a lid support device that would prevent the toy chest lid from dropping onto a child's neck. The rule would only apply to toy chests with hinged lids, and the Commission estimates that 300,000 of the total production of 650,000 toy chests, or a little less than 50 percent, fall within this category.

Almost all toy chests with hinged lids have lid support devices, but some models have been observed without them. Of the chests with hinged lids, about 180,000 units use adjustable lid supports and the other 120,000 units use nonadjustable lid supports. About 150,000 of the first category and 100,000 of the second category have the friction type. The remaining 30,000 units with adjustable and 20,000 units with nonadjustable lid supports use spring-loaded lid support devices.

The lid support devices are manufactured by firms producing hinges and other hardware supplies and are mostly utilized in applications other than toy chests, such as cabinets, stereo consoles, and other containers. These devices are available from several firms that have been supplying toy chest manufacturers. The cost of friction lid support devices ranges from about $.25 to $.60 per unit, with a weighted average cost of $.37 per unit. The cost of spring-loaded lid support devices, currently used, ranges from about $.60 to $1.50 per unit, with a weighted average cost of $1.05 per unit.

To comply with the proposed rule, some of the toy chest manufacturers may switch from adjustable to nonadjustable supports which are slightly less expensive, thereby reducing somewhat the cost of producing toy chests. Manufacturers probably use the adjustable devices because they can be adapted to lids of varying weights and because consumers may want to adjust the friction to suit their performance preferences.

One extreme possibility is that all toy chest manufacturers will switch to nonadjustable friction lid support devices. In this case the average cost per lid support should be around the weighted average cost of $.37 per unit. Based on the various devices currently being used by different manufacturers, the Commission staff has estimated that toy chest manufacturers would realize aggregate savings of around $34,000, or $.11 to $.12 per unit, on the average. The actual amount of cost reduction will, of course, vary from manufacturer to manufacturer depending on the level of current production, cost per unit, and the effect of switching from adjustable to nonadjustable and from spring-loaded to friction lid support devices.

Another extreme possibility is that all toy chest manufacturers will switch to an upgraded version of a nonadjustable spring-loaded device which costs $1.50 per unit. In this case, toy chest manufacturers would incur additional costs estimated at around $320,000 or about $1.07 per unit, on the average. Again, since the current cost of lid support devices varies from $.25 to $1.50 per unit, the actual cost of switching to the new device will vary from manufacturer to manufacturer. It should be noted that for some manufacturers, the actual increase in cost may be as little as $.05 per unit over the current cost.

The two limiting possibilities suggest that the cost effects of the proposed rule could range from cost savings of $34,000 to costs of $320,000. The actual cost effects are likely to be in the $80,000 to $200,000 range, based on currently used devices and volume of production. This range of costs would represent the situation of all but very few manufacturers. On this basis, and assuming the usual 100 percent markup for such products, the corresponding aggregate costs to consumers would be somewhere between $160,000 and $400,000.

The test procedures specified by the proposal are expected to be relatively easy and inexpensive to conduct, if manufacturers choose to conduct testing. The test requiring cycling of a toy chest lid at eight second time intervals over 7,000 cycles can be conducted manually or with equipment costing around $500. Some firms may do their own testing and others may depend on their lid support suppliers for certification. No significant costs are associated with testing.

Toy chest manufacturers have indicated that they intend to pass on to consumers any additional costs they may incur in complying with a final rule. These costs to consumers have been estimated to be somewhere between $160,000 and $400,000, or about $.53 to $1.33 per unit, for chests with hinged lids. These increases represent about .8 to 7 percent of retail prices. The figures indicate that the additional costs to consumers are expected to be relatively small and not likely to affect purchases of toy chests adversely.

Toy chests will continue to be produced in many different models, allowing consumers to choose from a large variety of styles and a broad range of prices. There may be some disutility associated with the use of complying lid support devices if the friction devices cause children to have difficulty in raising the lids. However, elimination of the strangulation hazard to children (and other injuries from falling lids) will enhance the utility of the hinged toy chests.

The Commission is not aware of any domestically produced toy chests being sold abroad. Imported toy chests currently account for around 20 percent of the domestic market, about the same as in 1979. The rule is not expected to affect foreign trade in these products.

To summarize the cost factors, the potential aggregate cost to manufacturers of $80,000 to $200,000 are estimated to add from $.27 to a maximum of $.67 per unit, on the average, to the cost of all toy chests with hinged lids. The corresponding cost to consumers, i.e. the relative increase in the retail price of toy chests, is estimated to range from around $.53 to $1.33 per unit.

The potential benefits resulting from compliance with the proposed rule are related to the prospective number of deaths and injuries that would be eliminated or reduced. Commission records indicate that during the last nine years toy chests have been involved in 21 strangulation deaths, or an average of over two per year. A small number of injuries of varying severity have occurred each year, but no reliable estimate is available. However, on rare

[1] See footnote 3.

occasions, incidents have led to brain damage, parapalegia, and blindness. Avoiding such injuries can result in multi-million dollar benefits as measured by numerous large financial settlements awarded to victims and their families for lifetime disabilities of these types. The proposed rule can be expected to eliminate all strangulation deaths associated with newly-produced complying toy chests and virtually all of the injuries from falling lids. Once all chests comply with the rule, it will eliminate two deaths a year on the average, at a cost to the public somewhere between $80,000 and $200,000 per life saved. These costs per life saved are well within even conservative estimates of the value of life.

Another way of assessing the merits of the proposal is to compare the expected value of losses to consumers from toy chest accidents with the costs incurred. If we assume that there are about 3 million toy chests with hinged lids being used by consumers and two deaths per year, then there is a 1 and 1.5 million chance of a toy chest being associated with a fatality each year. If the expected price increases are in the middle of the estimated range, than they will average about $.90 per unit. Assuming a product life of ten years, this yields a cost of $.09 per year to avoid a fatality. Under these assumptions, the rule provides low cost insurance to the consuming public.

As proposed, the rule would apply to all toy chests that are in the channels of distribution after the effective date. Therefore, the Commission has considered whether the economic effect of such coverage would be greater than that of a rule applicable only to toy chests manufactured after the effective date.

Many manufacturers belonging to TMA or JPMA are already using lid support devices that probably place their toy chests in compliance with the proposed rule. These firms account for about eighty percent of shipments. Other firms also use lid support devices that are likely to qualify their toy chests for compliance with the proposed rule. In addition the publicity surrounding the proposal may increase the current level of compliance. Retailers are likely to order complying toy chests, and manufacturers that have not already begun to produce complying chests will be influenced by these orders to produce complying chests before the effective date.

Available information suggests that inventories of toy chests in the hands of retailers are turned over in about ninety days and that manufacturer stocks on hand are usually relatively small. Therefore, by the time any rule becomes effective, more than four months from now, almost all retail inventories now on hand should be sold. Assuming that only complying units are shipped soon after this proposal, there will be a virtual elimination of noncomplying toy chests from the market by the effective date of a final rule.

While some noncomplying toy chests may still be unsold by the effective date, the economic impacts on firms holding such inventories are likely to be small. To the extent that there are any impacts at all, upon whom the impact falls (retailer or manufacturer) will depend on circumstances such as whether repurchase of goods is an existing practice and whether chests can be retrofitted by the retailer or must be sent back to the manufacturer. Transaction costs—potentially including shipping units back to the manufacturer, opening packages, retrofitting with new lid support devices, changing assembly instructions, and repacking and shipping—could amount to more than the cost of the chests. If so, disposal may be the most efficient means of complying with the rule. Even if this extreme were required in some instances, the impact is likely to be insignificant since toy chests are a very small part of total sales of most retailers.

Under all sets of circumstances likely to arise, no substantial impact is expected to be associated with a rule that applies to toy chests in the channels of distribution after the effective date.

2. *Voluntary standard effort.* An alternative approach to the Commission's proposed rule for toy chests is the voluntary standard that is currently being developed by TMA, under the auspices of ASTM. This voluntary standard is quite similar to the proposed mandatory rule for toy chests. With respect to the strangulation risk, they have virtually the same performance requirements (65). As a result, adoption of the ASTM voluntary standard, if fully complied with, would provide the same degree of protection from strangulation and would have approximately the same economic impact in terms of costs and benefits as that outlined above for the Commission's proposed mandatory rule. (The voluntary standard, however, would not apply to toy chests manufactured before its effective date.)

A crucial factor to take into account in considering possible adoption of the ASTM voluntary standard for toy chests is the expected degree of compliance of toy chest manufacturers with the voluntary standard. TMA has contacted all toy chest manufacturers that it, ASTM, and the Commission could identify to draw their attention to the requirements of the voluntary standard and to elicit their comments and support. TMA maintains it has received widespread support for the voluntary standard and that substantial compliance with its provisions will be forthcoming as soon as minor questions of language and interpretation have been clarified. A small sample of toy chest manufacturers contacted by the Commission staff confirmed that they support the voluntary standard and intend to comply with it (26) and (27).

TMA assertions notwithstanding, the Commission is concerned that compliance with the voluntary standard by domestic manufacturers and importers of toy chests may not prove to be adequate. One reason is the absence of cohesiveness in the industry and the fact that very few firms (only six identified in October 1982) are members of TMA. Another reason is that each year new firms replacing firms that leave the toy chest business may be unaware of, or decide not to comply with, the voluntary standard.

Most importantly, however, the Commission has not as yet received sufficient documentation to indicate that substantial compliance can be expected. If the number and relative size of the manufacturers who responded to TMA's and ASTM's inquiries about the standard is any indication of expected compliance, the extent of compliance might be only about 50 percent of all toy chests produced. If this should be the case, or even if the percent were somewhat higher, the degree of compliance with the voluntary standard would be too small to eliminate or adequately reduce the strangulation risk.

3. *Alternatives to proposed standard.* One possible alternative to the proposed standard is a ban of toy chests with hinged lids, currently estimated at about 300,000 annual production. Such a ban would probably lead to increased sales of toy chests with removable lids or sliding doors or no lids. Manufacturers' reactions to a ban are uncertain. For most firms the impact is likely to be slight, since toy chests are a small part of their product offerings. On the other hand, for a few firms, toy chests make up over a quarter of total sales. Also, a ban would eliminate from consideration the type of toy chest that about half of the buyers of these products choose. Such a ban could also result in less safety if consumers instead used such products as footlockers, deacon

benches, and other products with hinged lids for the storage of toys.

Due to the uncertainty of manufacturers' responses to a ban on toy chests with hinged lids, it is very difficult to estimate the costs likely to be incurred. Firms could react by removing hinges and putting handles on tops, redesigning to add sliding doors, or stopping production of toy chests altogether. Similarly, the benefits estimation is elusive because it depends on consumer reaction. Banning chests with hinged lids would certainly eliminate strangulation from newly-manufactured articles. However, as noted above, consumer use of close substitutes such as footlockers and deacon benches could result in strangulation incidents and reduce overall safety.

Another alternative approach to address the strangulation risk presented by toy chests is through a consumer information and education program. The Commission has already initiated a number of activities to warn consumers of the potential hazard involved, make suggestions for selecting new toy chests, and provide recommendations on making old toy chests and other items used as toy chests safer (54) and (76).

While the costs of an information and education program may be modest, the Commission believes it will be quite helpful in alerting consumers to the potential strangulation risk associated with toy chests. Such a program is particularly useful in cautioning consumers who are currently using cedar chests, footlockers, and similar items as toy chests. However, the Commission believes that information and education efforts in this case will not on their own address the strangulation risk adequately. Consumers who may not have been exposed to information programs will continue to acquire toy chests, both new and used, and may remain unaware of the strangulation risk. The Commission cannot be assured of constant and intensive information efforts that will reach all consumers. Therefore, a standard that addresses the safety of newly-manufactured toy chests is also necessary.

G. Effect on Small Business

Small manufacturers of toy chests have been able to compete successfully for a long time. The proposed rule would be likely to cause a relatively small cost increase ranging from $.27 to $.67 per unit on toy chests with lid support devices, and this increase is likely to be passed on to distributors and ultimately to consumers (56). The cost increase would not be a disproportionate burden on small firms (56).

If toy chest manufacturers choose to test their products in order to assure compliance, the testing procedure, as proposed, would add slightly to their costs (56). The cost of purchasing the appropriate testing equipment is relatively low when considered in terms of the life expectancy of the equipment and the overall cost of toy chest production of a firm. It is estimated that the testing process may cost the smaller producers about $1,000 during the first year the rule is in effect; most of the larger producers have been conducting their own testing and will probably not have to purchase additional testing equipment (56). The cost differential for compliance with the rule would not be likely to affect significantly the competition between larger and smaller manufacturers (56) and (78).

The Regulatory Flexibility Act (RFA, 5 U.S.C. 601 *et seq.*) requires that whenever an agency of the federal government publishes a proposal under the Administrative Procedure Act (5 U.S.C. 553), it should endeavor to give particular consideration to small businesses, small nonprofit organizations and small local governments (collectively called "small entities") that may be subject to the agency's requirements.

In accordance with section 605(b) of the RFA, the Commission has certified that the proposed toy chest rule, if issued in final form, would not have a significant economic impact on a substantial number of small entities, for the reasons discussed above. Therefore, the Commission has not prepared an intital regulatory flexibility analysis of the probable effect of the proposal on small entities, in accordance with section 603 of the RFA.

H. Environmental Considerations

The toy chest proposal published below falls within the categories of Commission actions described in 16 CFR 1021.5(c) that have little or no potential for affecting the human environment. For this reason, neither an environmental assessment nor an environmental impact statement is required. In any case, the Commission has considered the environmental effects, and concluded that there is little or no potential for a toy chest rule to affect the human environment.

I. Effective Date

Lid support devices of the type that will allow toy chest manufacturers to comply with the requirements of the proposed rule have been available for some time and can be obtained without any delay (26) and (56). In fact, several toy chest manufacturers began incorporating these devices in their new product lines during the last couple of years. Other toy manufacturers have said that they intend to do the same, upon issuance of the ASTM voluntary standard (26) and (27). The testing and other equipment is also available and may be obtained immediately (56). since a final toy chest rule could apply to toy chests in the channels of distribution after the effective date, it is quite likely (as discussed in section III F(1) above) that noncomplying toy chests will disappear from the channels of distribution before the effective date (78).

Based on this information, the Commission believes that a long lead time for the mandatory rule would not be necessary. However, some time should be allowed for those toy chest manufacturers who may need to purchase the required testing equipment and effect minor mold modifications and retooling. No inventory problems are expected as a result of the rule. Toy chests are produced and sold throughout the year, although more are sold during the Christmas season (56). However, uncertainty about relative impacts increases the closer the effective date is to the issuance date.

The Commission believes that an effective date three months after the date of issuance will generally provide toy chest manufacturers sufficient time to comply with the rule without undue burden, except that some firms might be placed at a disadvantage, particularly if they have to purchase and use testing equipment for the first time, or make arrangements with commercial laboratories for the testing of their products (56). Factors affecting relative impacts include inventories of lid support devices on hand, lags in ordering and receiving new shipments of lid support devices, possible changes required in printed material such as assembly instructions, and implementation of changes at the manufacturing or assembly level (56). The Commission does not know the importance of a firm's size when these factors are considered in conjunction with a proposed effective date. However, considering the small percent of sales of toy chests relative to other products for most firms, such firms should be able to adjust to an early effective date without much difficulty.

The Commission has balanced the economic factors against the risk of injury presented by toy chests. Especially in light of the recent severe injury incident (61), the Commission

believes that a three month effective date would be appropriate.

Under the Consumer Product Safety Amendments of 1981, Congress is authorized to exercise a legislative veto over rules issued under section 2(q)(1) or 3(e) of the FHSA (Pub. L. 97–35; 95 Stat. 703; 15 U.S.C. 1275). As a result, no toy chest rule may take effect until after the period during which Congress could exercise a legislative veto of it. 15 U.S.C. 1275(b).

Congress may exercise its legislative veto during the 90 calendar day period of continuing session of Congress following issuance of the rule. Interruptions in the continuing session of Congress are likely to extend that period beyond 90 days. If so, the effective date must be more than 90 days after final issuance of the toy chest rule. In any case, the effective date cannot be less than 90 days after final issuance.

Therefore, the Commission is proposing that the effective date be the day after the expiration of the 90 calendar day period of continuing session of Congress. This is consistent with its belief that an appropriate effective date would be three months following final issuance of a toy chest rule. The Commission especially welcomes public comments, along with any supporting rationales and data, that might support any later effective date.

IV. Conclusion

Based on the discussion above and on the information contained in the record of this proceeding, the Commission has found preliminarily that certain toy chests with hinged lids present a "mechanical hazard" within the meaning of section 2(s) of the Federal Hazardous Substances Act. 15 U.S.C. 1261(s). In normal use, the design of these toy chests presents an unreasonable risk of personal injury to children.[5]

This preliminary finding of "unreasonable risk" is based on a balancing of the injury, economic, and other data in the record. The risk presented to children is that the hinged lids could fall onto childrens' heads or necks, resulting in death or serious injury. This is a risk that children cannot protect themselves against and that adults may not even be aware of. The Commission is currently aware that 21 deaths and two incidents of serious permanent injury associated with the hazard of a toy chest lid falling on a child's head or neck have occurred since 1973. Such incidents have caused fatalities at a rate of more than two per year. The potential benefits from the elimination of this very serious risk of injury clearly outweigh the minimal economic harm that might result to the toy chest industry from necessary changes in hardware.

Accordingly, the Commission preliminarily finds that certain toy chests with hinged lids, in accordance with sections 2(s) and 2(f)(1)(D) of the FHSA, present a mechanical hazard and should be classified as hazardous substances. Pursuant to section 2(q)(1)(A) of the FHSA, the Commission finds that such toy chests must be banned from interstate commerce. In so finding, the Commission has considered the risk from hinged lid toy chests and the economic effects of the banning and safety requirements set forth below and has concluded that the potential reduction in risk to children from the proposed requirements bears a reasonable relationship to the costs of the rule:

List of Subjects in 16 CFR Parts 1500 and 1513

"Consumer protection, Hazardous materials, Infants and children, Toys.

Therefore, pursuant to provisions of the Federal Hazardous Substances Act (secs. 2(f)(1)(D), (q)(1)(A), (s); 3(e)(1), (h), 74 Stat. 372, 374, 375, as amended, 80 Stat. 1304–05, 83 Stat. 187–189, 95 Stat. 703; 15 U.S.C. 1261, 1262) and under authority vested in the Commission by the Consumer Product Safety Act (Pub. L. 92–573, sec. 30(a), 86 Stat. 1231, 15 U.S.C. 2079(a)), the Commission proposes to amend Title 16, Chapter II, Subchapter C by adding a new paragraph (a)(16) to § 1500.18 and a new Part 1513 as follows:

PART 1500—HAZARDOUS SUBSTANCES AND ARTICLES; ADMINISTRATION AND ENFORCEMENT REGULATIONS

§ 1500.18 Banned toys and other banned articles intended for use by children.

(a) *Toys and other children's articles presenting mechanical hazards.*

Under the authority of section 2(f)(1)(D) of the act and pursuant to provisions of section 3(e) of the act, the Commission has determined that the following types of toys or other articles intended for use by children present a mechanical hazard within the meaning of section 2(s) of the act because in normal use, or when subjected to reasonably foreseeable damage or abuse, the design or manufacture presents an unreasonable risk of personal injury or illness:

* * * * *

(16) Any toy chest that falls within the scope of § 1513.2 of this chapter but does not comply with the test criteria of § 1513.3 or the requirements of § 1513.4 and that is either (a) manufactured after [the effective date] or (b), regardless of the date of manufacture, is in the channels of distribution after [the effective date] so that it has not yet been sold to a consumer.

PART 1513—[ADDED]

PART 1513—CRITERIA FOR IDENTIFYING TOY CHESTS THAT PRESENT A STRANGULATION RISK

Sec.

1513.1 Purpose.
1513.2 Scope.
1513.3 Test procedure.
1513.4 Labeling.

PART 1513—CRITERIA FOR IDENTIFYING TOY CHESTS THAT PRESENT A STRANGULATION RISK

§ 1513.1 Purpose.

Certain hinged toy chests have caused the strangulation deaths of children when their lids closed on the children's heads or necks. The purpose of this Part is to identify, so that they can be banned under § 1500.18(a)(16) of this chapter, the toy chests that present this unreasonable risk of injury. The Commission will use the test method prescribed in § 1513.3 below to determine whether toy chests present such an unreasonable risk. However, this Part does not require any manufacturers or importers to test toy chests.

§ 1513.2 Scope.

This Part applies to all containers with hinged lids that are marketed for storing children's toys, as long as such containers have a continuous volume greater than 1.1 cubic feet and a smallest internal dimension of six inches or more.

§ 1513.3 Test procedure.

(a) If the toy chest is sold to consumers unassembled, assemble it in accordance with the manufacturer's written directions, including any specified adjustment to a lid support device. Following assembly, make no other adjustment to a lid support device.

[5] It should be noted that while the Commission is currently regulating toy chests for a single severe risk, toy chests are already covered by a number of Commission rules. The Commission's lead-in-paint regulations ban toys bearing lead-containing paint and the small parts rule bans certain toys that present a choking, aspiration, or ingestion hazard. (See 16 CFR Part 1303 and 16 CFR Parts 1500 and 1501, respectively). The Commission has also issued technical requirements for determining sharp points in toys and similar requirements for determining sharp edges. (See 16 CFR 1500.48 and 1500.49, respectively).

If the toy chest is sold to consumers assembled, make no adjustment to any lid support device before or during the test.

(b) Place the toy chest on a level surface and lift its lid to any position in its arc of travel that is more than 0.50 inch from its fully closed position. Release the lid and measure any dropping motion of the lid by measuring the straight line distance between the orginial and the new positions of a point on the outermost edge of the lid.

(c) Subject the lid to 7000 opening and closing cycles. One cycle consists of raising the lid from its fully closed position to its fully open position and then returning it to the fully closed position, without forcing the lid beyond its normal arc of travel. Each cycle shall be completed within approximately eight seconds.

(d) Repeat the procedure specified in paragraph (b).

(e) Neither the measured distance in paragraph (b) nor the measured distance in paragraph (d) shall be greater than 0.25 inch. If either measure distance is greater than 0.25 inch when the lid is dropped from any point in its arc of travel (other than a point that is 0.50 inch or less from the fully closed position), the toy chest fails to comply with this test procedure.

§ 1513.4 Labeling.

Each toy chest shall be clearly marked to indicate:

(a) The name and place of business (city and state) of the manufacturer, importer, distributor, and/or seller; and

(b) A number, symbol, or other marking (*e.g.*, model number, stock number, or catalog number) such that only toy chests of identical construction, composition, and dimensions shall bear identical markings.

Proposed Effective date: the day expiration of the 90 day calendar day period of continuing session of Congress following final issuance of the rule.

(Secs. 2 (f)(1)(D), (g)(1)(A), (s); 3 (e)(1), (h), 74 Stat. 372, 374, 375, 80 Stat. 1304–05, 83 Stat. 187–89, 95 Stat. 703; 15 U.S.C. 1261, 1262)

All comments and submissions should be sent, preferably in five copies, to the Office of the Secretary, Consumer Product Safety Committee, Washington, D.C. 20207 no later than April 18, 1983.

Dated: March 11, 1983.

Sheldon D. Butts,

Acting Secretary, Consumer Product Safety Commission.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 271

[Docket No. RM79-76-171 (Texas-9 Addition III)]

High-Cost Gas Produced From Tight Formations, Texas

March 14, 1983.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.703). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This Notice of Proposed Rulemaking by the Director of the Office of Pipeline and Producer Regulation contains the recommendation of the Railroad Commission of Texas that an additional area of the Travis Peak Formation in Nacogdoches County, Texas, be designated as a tight formation under § 271.703(d).

DATE: Comments on the proposed rule are due on April 29, 1983.

PUBLIC HEARING: No public hearing is scheduled in this docket as yet. Written requests for a public hearing are due on March 30, 1983.

ADDRESS: Comments and requests for hearing must be filed with the Office of the Secretary, 825 North Capitol Street, NE., Washington, D.C. 20426

FOR FURTHER INFORMATION CONTACT: Leslie Lawner, (202) 357-8511, or Walter W. Lawson, (202) 357-8556

SUPPLEMENTARY INFORMATION:

I. Background

On December 23, 1982, the Railroad Commission of Texas (Texas) submitted to the Commission a recommendation, in accordance with § 271.703 of the Commission's regulations (45 FR 56034, August 22, 1980), that an additional area of the Travis Peak Formation located in Nacogdoches County, Texas, be designated as a tight formation. The Commission previously adopted recommendations that portions of the Travis Peak Formation in The Sym-Jac, West (Hosston) Field (Order No. 154 issued June 10, 1981, in Docket No. RM79-76 (Texas-9)) and the Bear Grass Area of east Texas (Order No. 180 issued October 8, 1981, in Docket No. RM79-76 (Texas-9 Addition)) be designated as tight formations. There is currently under consideration a recommendation that an additional area of the Travis Peak Formation underlying all of Texas Railroad Commission Districts 5 and 6 be designated a tight formation (Docket No. RM79-76 (Texas-9 Addition II), Notice of Proposed Rulemaking issued December 15, 1981). Pursuant to § 271.703(c)(4) of the regulations, this Notice of Proposed Rulemaking is hereby issued to determine whether Texas' recommendation that the Travis Peak be designated a tight formation should be adopted. Texas' recommendation and supporting data are on file with the Commission and are available for public inspection.

II. Description of Recommendation

Texas' recommended addition to the Travis Peak Formation is located in the Melrose, South (Travis Peak) Field, four miles south of the city of Melrose in southeastern Nacogdoches County, Texas, Railroad Commission District 6. The recommended area is within a 2.5 mile radius of the Texlan Oil Company, Inc. T. W. Baker No. 1 well. The field is located on the southwest flank of the Sabine uplift and the regional dip of the formation is to the south and southwest at about 100 feet per mile. The above named well is the only well producing from the formation; however, one other well in the recommended area penetrated the formation but was abandoned.

In the Texlan Oil Company, Inc. T. W. Baker No. 1 well, the top of the Travis Peak Formation is encountered at 8,920 feet and the base of the formation at 9,940 feet (log depths).

III. Discussion of Recommendation

Texas claims in its submission that evidence gathered through information and testimony presented at a public hearing on September 21, 1982, convened by Texas on this matter demonstrates that:

(1) The average *in situ* gas permeability throughout the pay section of the proposed area is not expected to exceed 0.1 millidarcy;

(2) The stabilized production rate, against atmospheric pressure, of wells completed for production from the recommended formation, without stimulation, is not expected to exceed the maximum allowable production rate set out in § 271.703(c)(2)(i)(B); and

(3) No well drilled into the recommended formation is expected to produce more than five (5) barrels of oil per day.

Texas further asserts that existing State and Federal regulations assure that development of the formation will not adversely affect any fresh water aquifers that are or are expected to be used as a domestic or agricultural water supply.

Accordingly, pursuant to the authority delegated to the Director of the Office of Pipeline and Producer Regulation by Commission Order No. 97, issued in Docket No. RM80-68 (45 FR 53456, August 12, 1980), notice is hereby given of the proposal submitted by Texas that the Travis Peak Formation as described

and delineated in Texas' recommendation as filed with the Commission, be designated as a tight formation pursuant to § 271.703.

IV. Public Comment Procedures

Interested persons may comment on this proposed rulemaking by submitting written data, views or arguments to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, on or before April 29, 1983. Each person submitting a comment should indicate that the comment is being submitted in Docket No. RM79-76-171 (Texas-9 Addition III) and should give reasons including supporting data for any recommendation. Comments should include the name, title, mailing address, and telephone number of one person to whom communications concerning the proposal may be addressed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Written comments will be available for public inspection at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C., during business hours.

Any person wishing to present testimony, views, data, or otherwise participate at a public hearing should notify the Commission in writing of a desire to make an oral presentation and therefore request a public hearing. Such request shall specify the amount of time requested at the hearing. Requests should be filed with the Secretary of the Commission no later than March 30, 1983.

List of Subjects in 18 CFR Part 271

Natural gas, Incentive price, Tight formations.

(Natural Gas Policy Act of 1978, 15 U.S.C. 3301-3432))

Accordingly, the Commission proposes to amend the regulations in Part 271, Subchapter H, Chapter I, Title 18, *Code of Federal Regulations*, as set forth below, in the event Texas' recommendation is adopted.

Kenneth A. Williams,

Director, Office of Pipeline and Producer Regulation.

PART 271—[AMENDED]

Section 271.703 is amended by adding paragraph (d)(36)(iii) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.*

* * * * *

(36) *Travis Peak Formation in Texas.* RM79-76 (Texas-9)

* * * * *

(iii) *Melrose, South (Travis Peak) Field.*

(A) *Delineation of formation.* The Travis Peak Formation in the Melrose, South (Travis Peak) Field is located four miles south of the city of Melrose, southeastern Nacogdoches County, Texas Railroad Commission District 6 and is within a 2.5 mile radius around the Texlan Oil Company, Inc., T.W. Baker No. 1 well.

(B) *Depth.* The top of the Travis Peak Formation is encountered at 8,920 feet and the base of the formation is at 9,940 feet (log depths).

BILLING CODE 6717-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 100

(CGD1 83-01)

Marine Parade; the Great Kennebec River Whatever Race

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rule making.

SUMMARY: The Coast Guard is considering a proposal to restrict the navigation of vessels not involved as participants or safety patrols on the Kennebec River during the 1983 Great Kennebec River Whatever Race, to be held on July 3, 1983. The regulations are needed to provide for the safety of life on navigable waters during the event.

DATES: Comments must be received on or before May 1, 1983.

ADDRESSES: Comments should be mailed to Commander (b), First Coast Guard District, 150 Causeway Street, Boston, MA 02114. The comments will be available for inspection and copying at 150 Causeway Street, Room 1102, Boston, MA. Normal office hours are between 7:00 am and 4:30 pm, Monday through Friday, except holidays. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: LT M. J. Chaplain, USCG, Chief, Boating Standards/Affairs Branch (bc), Room 1102, First Coast Guard District, 150 Causeway Street, Boston, MA 02114 (617) 223-3607.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this rule making by submitting written views, data, or arguments. Persons submitting comments should include their names and addresses, identify this notice (CGD1 83-01) and the specific section of the proposal to which their comments apply, and give reasons for each comment. Receipt of comments will be acknowledged if a stamped self-addressed postcard or envelope is enclosed. The rules may be changed in light of comments received. All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rulemaking process.

Drafting Information:

The drafters of this regulation are LT M. J. Chaplain, USCG, project officer, First Coast Guard District Boating Standards/Affairs Branch and LCDR S. C. Ploszaj, project attorney, First Coast Guard District Legal Office.

Discussion of Proposed Regulations

(1) Information received from the sponsor of this event has indicated that incidents between event participants and non-participants have resulted in people being thrown into the water, and vessels being capsized due to the wakes of power driven vessels in the area of the parade. The purpose of this regulation is to insure the safety of life on the Kennebec River from Augusta, Maine to Gardner, Maine, during this marine parade by restricting the speed at which vessels may operate while in this area.

(2) A special local regulation was issued on 20 May 1982 in support of the 1982 Great Kennebec River Whatever Race. This regulation restricted all spectator craft and other vessels in the area of the marine parade to a maximum speed of five (5) mph, or "No Wake Speed", whichever was less. Additionally, it cautioned spectators to be alert for disabled craft, persons falling overboard, and to exercise caution in congested areas. Information received has indicated that these precautions were sufficient to insure the safety of life of the participants in this event in 1982.

(3) Information concerning the need for this regulation has been solicited from the Maine Department of Inland Fisheries.

Economic Assessment and Certification

This proposed regulation is considered to be nonsignificant in accordance with DOT Policies and

Procedures for Simplification, Analysis, and Review of Regulations (DOT Order 2100.5). Its economic impact is expected to be minimal since the restriction to navigation is for only a short period of time, and only affects a small portion of the river. Additionally, since this regulation supports an area promotional activity sponsored by the Kennebec Valley Chamber of Commerce, an increase in area business due to this marine parade is anticipated. Based upon this assessment, it is certified in accordance with section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that this regulation, if promulgated, will not have a significant economic impact on a substantial number of small entities. Also, the regulation has been reviewed in accordance with Executive Order 12291 of February 17, 1981, on Federal Regulation and has been determined not to be a major rule under the terms of that order.

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water).

PART 100—[AMENDED]

Proposed Regulation:

In consideration of the foregoing, the Coast Guard proposes to amend Part 100 of Title 33, Code of Federal Regulations, by adding § 100.35–1–01 to read as follows:

§ 100.35–1–01 The Great Kennebec River Whatever Race, Regatta.

(a) Regulated Area: Kennebec River, bank to bank, between the State of Maine Route 126 Highway Bridge connecting Randolph, Maine, and Gardner, Maine, and the U.S. Route 201–202 Highway Bridge at Augusta, Maine.

(b) Effective Period: 6:00 am, July 3, 1983 until 6:00 pm, July 3, 1983 or completion of the Great Kennebec River Whatever Race, whichever is earlier.

(c) Special Local Regulations: Vessels not participating in, or operating as a safety patrol in support of, the Great Kennebec River Whatever Race shall:

(1) Observe a maximum speed limit of five (5) mph or "No Wake Speed", whichever is less.

(2) Be alert for disabled craft and persons falling overboard.

(3) Exercise extreme caution when operating in the area of this marine parade.

(46 U.S.C. 454; 49 U.S.C. 1655(b); 49 CFR 1.46; and 33 CFR 100.35)

Dated: March 8, 1983.

L. L. Zumstein, RAdm, USCG,

First Coast Guard District.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 123

[SW-7-FRL-2324-5]

Missouri Application for Interim Authorization, Phase I and II, Components A and B Hazardous Waste Management Program; Public Hearing and Comment Period

AGENCY: Environmental Protection Agency, Region VII.

ACTION: Notice of public hearing and public comment period.

SUMMARY: EPA regulations to protect human health and the environment from the improper management of hazardous waste were published in the **Federal Register** on May 19, 1980 (45 FR 33063). Subsequent amendments and additions to this promulgation have occurred since that date. These regulations include provisions for authorization of State programs to operate in lieu of the Federal program. Today EPA is announcing the availability for public review of the Missouri application for Phase I and II, Components A and B interim authorization, inviting public comment, and giving notice of a public hearing to be held on the application.

DATES: Comments on the Missouri interim authorization application must be received by April 19, 1983.

Public Hearing: EPA will conduct a public hearing on the Missouri interim authorization application at 1:00 p.m. on April 19, 1983. An evening session of the hearing shall also be conducted on April 19, 1983 at 7 p.m. if a written request to hold such a session is received by Mr. Robert L. Morby of EPA at the address below no later than April 14, 1983. If an evening session is held, notification shall be provided through news releases. The Environmental Protection Agency reserves the right to cancel the public hearing if significant public interest in a hearing is not expressed. If you are interested in participating in the public hearing, please notify Mr. Morby at the address below no later than April 14, 1983. The State of Missouri will participate in any public hearing held by EPA on this subject.

ADDRESSES: Copies of the Missouri interim authorization application are available during business hours at the following locations for inspection and copying by the public:

U.S. E.P.A., Region VII, Library—16th Floor, 324 East 11th Street, Kansas City, Missouri 64106

Waste Management Program, Missouri Department of Natural Resources, 1915 Southridge Drive, Jefferson City, Missouri 65101

Regional Office, M.D.N.R., 8460 Watson Road, Suite 217, St. Louis, Missouri 63199

U.S. Environmental Protection Agency, 324 East 11th Street, Kansas City, Missouri 64106, 816/374–6534. Business Hours: 7:30–5. $0.20 per page copying charge

U.S. Environmental Protection Agency, Office of Solid Waste, 401 M Street, SW., Washington, D.C. 20460, 202/382–2210. Business Hours: 7:30–4:30.

the public hearing will be held at: The Roanoke Room Ramada Inn, 1510 Jefferson, Jefferson City, MO 65101:

Submit written comments to: Robert L. Morby, U.S. Environmental Protection Agency, 324 East 11th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Robert L. Morby, 816/374–6534.

SUPPLEMENTARY INFORMATION: In the May 19, 1980, **Federal Register** (45 FR 33063) the Environmental Protection Agency promulgated regulations, pursuant to Subtitle C of the Resource Conservation and Recovery Act of 1976 (as amended), to protect human health

and the environment from the improper management of hazardous waste. These regulations include provisions under which EPA can authorize qualified state hazardous waste management programs to operate in lieu of the Federal program. The regulations provide for a transitional stage in which qualified state programs can be granted interim authorization. The interim authorization program is being implemented in two phases corresponding to the two stages in which the underlying Federal program will take effect. In order to qualify for issuance of interim authorization, the State hazardous waste program must:

(1) have had enabling authority in existence prior to August 17, 1980, and

(2) be substantially equivalent to the Federal program. A full description of the requirements and procedures for State interim authorization is included in 40 CFR Part 123 Subpart F (45 FR 33479). As noted in the May 19, 1980, **Federal Register**, copies of complete State submittals for interim authorization are to be made available for public inspection and comments. In addition, a public hearing is to be held on the submittal, unless significant public interest is not expressed.

Regulatory Analysis: The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

40 CFR Part 158

[OPP 30063A; PH-FRL 2324-1]

Data Requirements for Pesticide Registration; Reopening of Public Comment Period

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule; reopening of public comment period.

SUMMARY: The public comment period on the EPA's proposed data requirements which were published in the **Federal Register** of November 24, 1982 (47 FR 53192), closed on February 22, 1983. Industry and environmental groups have requested that the Agency reopen the public comment period to provide more time to review and evaluate the proposed regulation. Therefore, the comment period is being reopened for an additional 60 days to give the public opportunity for further comment.

DATE: Written comments on the proposed data requirements rule, identified by the document control number "[OPP-30063A]" must be received on or before May 16, 1983.

ADDRESS: Comments should be submitted to and are available for review at: Program Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 236, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: Frederick S. Betz, Hazard Evaluation Division (TS-769C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 821A, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202 (703-577-7351).

SUPPLEMENTARY INFORMATION: In the **Federal Register** of November 24, 1982 (47 FR 53192), the EPA issued proposed data requirements at 40 CFR Part 158 specifying the kinds of data and information that must be submitted to EPA to support the registration of each pesticide under the Federal Insecticide, Fungicide and Rodenticide Act. The standards for conducting acceptable tests, guidance on evaluation and reporting of data, further guidance on when data are required, and examples of protocols are not specified in 40 CFR Part 158. This information (i.e., Pesticide Assessment Guidelines) is available as an advisory document through the National Technical Service (NTIS) as specified elsewhere in today's **Federal Register**. The Pesticide Assessment Guidelines are also being made available for inspection at EPA headquarters, at each of EPA's ten regional offices, and at each lead state agency responsible for administering its state pesticide program. The address and contact person for each regional office and state agency can be obtained from the EPA contact cited previously in this notice. EPA is also making available complimentary copies of the Pesticide Assessment Guidelines to those industry and environmental groups that have been active in reviewing and commenting on the pesticide registration data requirements and guidelines.

Therefore, in response to requests from industry and environmental groups, EPA has reopened the public comment period on 40 CFR Part 158 in order to allow the public an opportunity to make further comment on the proposed regulation.

Dated: March 10, 1983.

Edwin L. Johnson,

Director, Office of Pesticide Programs.

Notice of Proposed Rule Making

In the matter of amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations. (Dillingham, Alaska); MM Docket No. 83-125, RM-4326.

Adopted: February 10, 1983.

Released: March 4, 1983.

By the Chief, Policy and Rules Division.

1. The Commission herein considers a petition for rule making filed January 10, 1983, by the State of Alaska ("petitioner") seeking the assignment of VHF Channel No. 2 to Dillingham, Alaska, reserved for educational use, as its second television assignment. Petitioner expressed its interest in applying for the channel, if assigned.

2. Dillingham (population 1,563)[1] is located in southwest Alaska, approximately 570 kilometers (350 miles) southwest of Anchorage.

3. Petitioner stated that it intends to operate an educational translator station to provide programming from its educational project, the Learn/Alaska network. In order to operate its proposed 100 watt translator station on a VHF channel, a TV assignment is necessary.

4. In view of the fact that Dillingham could receive a 100 watt educational translator television service, we shall seek comments on the proposal to amend the Television Table of Assignments (§ 73.606(b) of the Commission's Rules), with respect to the following city:

City	Channel No.	
	Present	Proposed
Dillingham, Alaska	10	*2, 10

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

6. Interested parties may file comments on or before April 18, 1983, and reply comments on or before May 3, 1983, and are advised to read the Appendix for the proper procedures.

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

8. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all ex parte contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An ex parte contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an ex parte presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed contitutes an ex parte presentation and shall not be considered in the proceeding.

[1] Population figures are taken from the 1980 U.S. Census, Advance Report.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All findings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

BILLING CODE 1505-01-M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. 82-21; Notice 2]

Evaluation Report on Federal Motor Vehicle Safety Standard No. 301, Fuel System Integrity; Passenger Cars

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Extension of comment period.

SUMMARY: On January 10, 1983 (48 FR 1089), the Agency announced the publication of an Evaluation Report on Federal Motor Vehicle Safety Standard No. 301, Fuel System Integrity:

Passenger Cars (49 CFR Part 571.301). The announcement requested public review and comment on the evaluation report which assessed the safety effectiveness and costs of Standard 301. The standard sets performance requirements for fuel systems in new passenger cars. The report was developed in response to Executive Order 12291 and is part of the Department of Transportation priority review process for existing regulations. The January notice set March 11, 1983, as the closing date for receiving comments on the evaluation report.

On February 28, 1983, the Motor Vehicle Manufacturers Association of the United States, Inc., (MVMA) petitioned for a 60-day extension, to May 10, 1983, for submitting comments on the evaluation report. MVMA stated that it did not receive a copy of the evaluation report until February 14, 1983, or slightly more than one month after the beginning of the comment period. Additionally, MVMA stated that staff who would review the report had just completed review of a second NHTSA evaluation report on FMVSS 214, Side Door Strength, which had been published a few weeks earlier (November 23, 1982).

In order to provide MVMA and other parties who may have had similar problems with additional time to thoroughly review and analyze the report, the Agency has decided to grant the 60-day extension as requested.

DATE: Deadline for receipt of comments is extended to May 10, 1983.

ADDRESSES: All comments should refer to the docket and notice number of this notice and be submitted to: Docket Section, Room 5109, Nassif Building, 400 Seventh Street, SW., Washington, D.C. 20590. [Docket hours, 8:00 a.m.–4:00 p.m., Monday through Friday].

FOR FURTHER INFORMATION CONTACT: Mr. Frank G. Ephraim (202) 426–1574.

(Secs. 103, 112, 119, Pub. L. 89–563, 80 Stat. 718 (15 U.S.C. 1392, 1401, 1407); delegation of authority at 49 CFR 1.50 and 501.8))

Issued on March 10, 1983.

Barry Felrice,

Associate Administrator for Plans and Programs.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 630

Swordfish Fishery Management Plan; Hearings

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Additional notice of public hearings.

SUMMARY: In reference to a notice published March 2, 1983, (48 FR 8826), the New England Fishery Management Council, Mid-Atlantic Fishery Management Council, and Caribbean Fishery Management Council have set the locations for their public hearings to receive public input on the Swordfish Fishery Mangement Plan.

DATES AND ADDRESSES: The scheduled public hearings in the Mid-Atlantic, New England, and Caribbean areas are as follows:

Date	Mid-Atlantic
Mar. 28	Quality Inn Lake Wright, 6280 Northhampton Blvd., Norfolk, VA 23502
Apr. 6	Conference Room, Federal Building, St. Thomas, U.S. Virgin Islands, 7:30 p.m.
Mar. 29	Carousel Hotel, On the Beach at 118th Street, Ocean City, MD 21872
Apr. 8	Department of Marine Science, University of Puerto Rico, Isla Magueyez, La Jas, PR, 10:00 a.m.
Mar. 30	Stockton State College, C Building, Room CC103, Pomona, NJ 08240
Mar. 31	Holiday Inn, Route 25 and Long Island Expressway (Exit 72 Long Island Expressway), Riverhead, NY 11901

Date	Caribbean
Apr. 6	Conference Room, Federal Building, St. Thomas, U.S. Virgin Islands, 7:30 p.m.
Apr. 8	Department of Marine Science, University of Puerto Rico, Isla Magueyez, La Jas, PR, 10:00 a.m.

Date	New England
Apr. 9	Governor Carver Motor Inn, 25 Summer Street, Plymouth, MA 02360
Apr. 11	White's Restaurant, 66 State Road, Westport, MA 02790
Apr. 12	Dutch Inn, Great Island Road, Galilee, RI 02882
Apr. 13	Ramada Inn, 1230 Congress Street, Portland, ME 04102

The hearings will be held from 7:30 to 10:00 p.m. in New England, from 7:00 to 10:00 p.m. in the Mid-Atlantic, and as noted in the Caribbean. Other information contained in the referenced notice remains unchanged.

Dated: March 11, 1983.

Carmen J. Blondin,

Deputy Assistant Administrator for Fisheries Resources Management, National Marine Fisheries Service.

Thursday, March 17, 1983

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

CIVIL RIGHTS COMMISSION

Illinois Advisory Committee; Agenda and Notice of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Illinois Advisory Committee to the Commission will convene at 2:00 p.m. and will end at 10:00 p.m., on April 7, 1983, at the Ambassador Motor Inn, 141 South Main, Decatur, Illinois 62523. The purpose of this meeting is to discuss rechartering of the Committee and plans for future meetings in the southern section of the State.

Persons desiring additional information or planning a presentation to the Committee, should contact the Chairperson, Thomas J. Pugh, 500 West Melbourne Avenue, Peoria, Illinois 61604; (309) 671–7475 or the Midwestern Regional Office, 230 South Dearborn Street, 32nd Floor, Chicago, Illinois 60604; (312) 353–7479.

The meeting will be conducted pursuant to the provisions of the Rules and Regulations of the Commission.

Dated at Washington, D.C., March 14, 1983.

John I. Binkley,

Advisory Committee Management Officer.

BILLING CODE 6335-01-M

DEPARTMENT OF COMMERCE

International Trade Administration

Final Negative Countervailing Duty Determination; Fireplace Mesh Panels From Taiwan

AGENCY: International Trade Administration, Commerce.

ACTION: Final negative countervailing duty determination.

SUMMARY: We determine that no benefits which constitute subsidies within the meaning of the countervailing duty law are being provided to manufacturers, producers, or exporters in Taiwan of fireplace mesh panels, as described in the "Scope of Investigation" section of this notice. Although we found that the fireplace mesh panel industry did receive benefits under the income tax program, we found that the value of the benefit amounted to 0.012 percent of the f.o.b. value of the imported merchandise, which is *de minimis*. Therefore, our final determination is negative.

Based on this final determination, the countervailing duty investigation involving fireplace mesh panels from Taiwan is terminated.

In accordance with section 705(d) of the Act, we will notify the U.S. International Trade Commission (ITC) of our determination.

EFFECTIVE DATE: March 17, 1983.

FOR FURTHER INFORMATION CONTACT: Paul Nichols, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230, telephone (202) 377–5497.

SUPPLEMENTARY INFORMATION:

Final Determination

Based upon our investigation, we determine that no benefits which constitute subsidies within the meaning of section 701 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers, or exporters in Taiwan of fireplace mesh panels, as described in the "Scope of Investigation" section of this notice. The Taiwanese fireplace mesh panel industry did receive benefits under a preferential income tax program. However, the value of this benefit is 0.012 percent of the f.o.b. value of the

import merchandise, which is *de minima*.

Case History

On July 22, 1982, we received a petition from counsel for Justesen Industries, Inc., Pacific Fireplace Furnishings, Inc., and Fall River Fireplace Co., Inc., on behalf of the U.S. industry producing fireplace mesh panels. The petition alleged that manufacturers, producers, or exporters in Taiwan of fireplace mesh panels receive benefits which constitute subsidies within the meaning of the countervailing duty law. We found the petition sufficient, and on August 11, 1982, we initiated a countervailing duty investigation (47 FR 36005). We stated that we would make our preliminary determination by October 15, 1982. However, pursuant to section 703(c)(1)(A) of the Act, we extended the period for the preliminary determination to no later than December 20, 1982.

Since Taiwan is a "country under the Agreement" within the meaning of section 701(b) the Act, Title VII of the Act applies to this investigation, and an injury determination is required. Therefore, we notified the ITC of our initiation. On September 15, 1982, the ITC determined that there is a reasonable indication that these imports are materially injuring, or threatening to materially injure, a U.S. industry (47 FR 40728).

We presented questionnaires concerning the allegations in the petition to a representative of the American Institute in Taiwan, in Washington, on August 31, 1982, for transmission to the Taiwanese authorities and the panel producers. On October 22, 1982, we received the responses to the questionnaires. On October 28, 1982, we verified the questionnaire responses submitted by the Taiwanese authorities and the panel producers.

On December 23, 1982, we published in the **Federal Register** our preliminary negative determination that there was no reason to believe or suspect that benefits which constituted subsidies within the meaning of section 701 of the Act, were being provided to manufacturers, producers, or exporters in Taiwan of fireplace mesh panels (47 FR 57310).

Our notice of preliminary determination gave interested parties an opportunity to submit written and oral views. A hearing was held on February 3, 1983. The oral and written views submitted by the petitioners and the respondents have been considered in reaching our final determination.

An earlier antidumping investigation involving this merchandise has resulted in an antidumping order (47 FR 24616).

Scope of Investigation

For the purpose of this investigation, fireplace mesh panels are defined as precut, flexible mesh panels, both finished and unfinished, which are constructed of interlocking spirals of steel wire. Fireplace mesh panels are currently provided for either in item 642.87 or item 654.00 of the *Tariff Schedules of the United States* depending on their stage of processing.

Fuan Da Industrial Co., Ltd. (Fuan Da) and Yue Sheng Wire Mesh & Screen Co., Ltd. (Yue Sheng) are the only known producers in Taiwan of the fireplace mesh panels exported to the United States during the period for which subsidization is being measured.

Analysis of Programs

The period for which subsidization is being measured is January 1, 1982 to June 30, 1982. In its response to our questionnaire, the Taiwanese authorities provided data for the applicable period. Additionally, we received information from Fuan Da and Yue Sheng for the period January 1, 1981 to June 30, 1982.

Based upon our analysis of the petition, questionnaire responses, verification, and comments received, we determine the following.

I. *Programs Determined Not To Confer Countervailable Benefits to Manufacturers, Producers, or Exporters of Fireplace Mesh Panels.* We determine that a countervailable benefit within the meaning of the Act is not being provided to manufacturers, producers, or exporters in Taiwan of fireplace mesh panels under the program listed below:

Preferential Income Tax Rates

Article 10 of the Statute for Encouragement of Investment (SEI) was amended in 1980 and renumbered Article 15. The regulations issued to implement this article were also amended at that time. Under Article 15, certain productive enterprises which are organized as "companies limited by shares" in accordance with the law are eligible for reduced income tax rates. Currently, a company limited by shares must have a minimum of seven shareholders and be registered as a "share issuing corporation." Yue Sheng was not eligible for benefits under this program as it is not organized as a company limited by shares. Its tax rate is the normal 35 percent. Fuan Da does qualify for Article 15 benefits. Therefore, its tax rate is 25 percent.

Under the amended law and regulations, limitations which previously existed, restricting benefits to corporations existing or expanding before a certain date, have been removed, and the categories of industries eligible for encouragement have been broadend by removing some restrictive criteria. Normally, any domestic subsidy program which does not target benefits or otherwise effectively predetermine the provision of benefits to an industry or a limited group of industries is determined to be generally available and, thus, not countervailable. However, the remaining eligibility criteria in the SEI regulations have not been clarified to the satisfaction of the Department and still appear to limit the availability of the benefits to certain industries or groups of industries and appear to target certain categories of industries for encouragement. Based on the information currently available on the program, we determine that Article 15 of the SEI does provide a benefit that is potentially countervailable under the Act.

As Article 15 is an incentive program for increased general investment in eligible industries and, for this product, does not appear to be tied to export performance, we treated the program as a domestic subsidy and allocated the tax savings over total sales revenue.

For programs involving income tax benefits, the Department generally determines the value of the benefit when it is known and accounted for. In Fuan Da's case, the measure of the benefit is the difference in the tax due under the normal 35 percent tax rate and the SEI 25 percent tax rate for 1981, which is known and accounted for in 1982. This figure is then divided by total sales for 1981. This results in a benefit of 0.012 percent *ad valorem*. This rate is *de minimis*. Therefore, we determine that, in this case, this program does not confer a benefit which is countervailable under the Act.

II. *Programs Determined Not To Be Used By Manufacturers, Producers, or Exporters of Fireplace Mesh Panels.*

Vocational Training Centers

We determine that manufacturers, producers, or exporters in Taiwan of fireplace mesh panels did not use the vocational training centers during the period for which subsidization is being measured or since that time.

Petitioners' Comments

Comment: The petitioners argue that the period for which we are measuring subsidization is too restrictive and does not adequately address the issue of Vocational Training Centers (VTC).

DOC Response: The Act provides no time period for which the Department is

to determine the existence of a subsidy. the standard is, rather, one of current subsidization. Section 701 of the Act states that if a government "*is providing*" a subsidy, countervailing duties will be imposed, equal to the amount of the net subsidy. "Net subsidy" is defined as the amount of the gross subsidy adjusted for allowable offsets.

A six-month period for measuring subsidization is an acceptable period in countervailing duty investigations. The Department has investigated the VTC's and verified all the information used in this determination. The Department is satisfied that the period for which subsidization is being measured is correct and allows adequate time in which to determine the countervailability of the VTC's, were we to determine that the VTC's were currently used and that such use conferred a benefit.

Comment: The petitioners commented on additional issues concerning the VTC's, including the scope of our questions to the Taiwanese authorities, their responses, and the theoretical methods for calculating a value of the alleged benefit.

DOC Response: the Department found that the VTC's are not currently used. therefore, the issues are moot and we will not address them further.

Verification

In accordance with section 776(a) of the Act, we have verified all the information relied upon for our determination. We used standard verification procedures, including examination of accounting records and randomly selected documents.

Administrative Procedures

The Department has afforded interested parties an opportunity to present oral views in accordance with section 355.35 of the Commerce Regulations. The hearing was held on February 3, 1983.

This determination does not affect the antidumping order currently in effect on this merchandise.

This notice is published pursuant to section 705 of the Act and § 355.33 of the Commerce Regulations.

Dated: March 8, 1983.

Lawrence J. Brady,

Assistant Secretary for Trade Administration.

[FR Doc. 83-6990 Filed 3-16-83; 8:45 am]

BILLING CODE 3510-25-M

Float Glass From Belgium; Revocation of Countervailing Duty Order

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of revocation of countervailing duty order.

SUMMARY: As a result of a request by the Delegation of the Commission of the European Communities, the International Trade Commission conducted an investigation and determined that revocation of the countervailing duty order on float glass from Belgium would not cause injury to an industry in the United States. The Department of Commerce consequently is revoking the countervailing duty order. All entries of this merchandise made on or after February 20, 1981, shall be liquidated without regard to countervailing duties.

EFFECTIVE DATE: March 17, 1983.

FOR FURTHER INFORMATION CONTACT: Susan Silver or Joseph Black, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230; telephone: (202) 377–2786.

SUPPLEMENTARY INFORMATION: On February 5, 1981, the Department of Commerce ("the Department"); published in the **Federal Register** (46 FR 10905) a countervailing duty order on float glass from Belgium.

On February 20, 1981, the International Trade Commission ("the ITC") notified the Department that the Delegation of the European Communities had requested an injury determination for this order under section 104(b) of the Trade Agreements Act of 1979 ("the TAA"). Therefore, following the requirements of that section, liquidation was suspended on February 20, 1981, on all shipments of Belgian float glass entered, or withdrawn from warehouse, for consumption on or after that date.

On February 15, 1983, the ITC published its determination that an industry in the United States would not be materially injured, or threatened with material injury, by reason of imports of Belgian float glass if the order were revoked (48 FR 6794). As a result, the Department is revoking the countervailing duty order concerning float glass from Belgium with respect to all merchandise entered, or withdrawn from warehouse, for consumption on or after February 20, 1981, the date the Department received notification of the request for an injury determination.

The Department will instruct Customs officers to proceed with liquidation of all unliquidated entries of this merchandise entered, or withdrawn from warehouse, for consumption on or after February 20, 1981 without regard to countervailing duties and to refund any estimated countervailing duties collected with respect to these entries.

This revocation and notice are in accordance with section 104(b)(4)(B) of the TAA (19 U.S.C. 1671 note).

Dated: March 11, 1983.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

[FR Doc. 83-6994 Filed 3-16-83; 8:45 am]

BILLING CODE 3510-25-M

New Statistical Profiles To Help U.S. Exporters Market Their Products Overseas

AGENCY: International Trade Administration, Commerce.

ACTION: Notice and request for comments.

SUMMARY: The Department of Commerce is proposing a new series of worldwide export profiles for various industries. These profiles will contain specially formatted statistical tables and analysis to help U.S. firms assess their export potential and pinpoint the best export markets for their products. The Department is soliciting public comments to assist in the development of these profiles.

DATE: Comments must be submitted by April 25, 1983.

ADDRESS: Comments may be mailed to the Office of Trade Information Services, U.S. Department of Commerce, ITA/TIA/OTIS-Room 1837, 14th and Constitution Ave., NW., Washington, DC. 20230.

FOR FURTHER INFORMATION CONTACT: Donald Huber (202) 377–4992.

SUPPLEMENTARY INFORMATION: In order to help meet the growing needs of U.S. exporters for precise international marketing data, the International Trade Administration is developing a new series of profiles of export statistics for various industries. Previously, statistics pinpointing international sales of specific products the world over have been difficult to extract and summarize in a form useful for formulating sales and marketing strategies. By consolidating appropriate official Departmental trade data, and using newly developed computer programs, Commerce is now planning the production of specialized profiles of detailed marketing-oriented export data. This data has been logically ordered into tables and profiles which can

provide highly pertinent and meaningful sales intelligence.

Each profile will include a brief overview of the market for the subject industry, along with statistical tables tracking export trends for the industry as a whole and for specific products within the industry. The data cover the latest 5-year period through 1982 and month to date in 1983. Growth rates and percentage shares will also be provided in some tables. All the information will be conveniently tabulated and placed in easy-to-read packages.

Three levels of profiles, representing progressively more specific and inclusive coverage, are being developed. Since the Commerce Department maintains export data on all industries, profiles could be developed for most products, groups of products, or an entire industry. These profiles should be of special value to manufacturers, industry trade associations, export management or trading companies and to marketing service or consulting firms.

It is expected that the Level I Profile will consist of:

(1) A narrative *Export Market Brief* of the industry's export performance and prospects. The brief is a statistical summary which outlines such key information as industry growth, leading export products, fastest growing products and markets, significant changes in sales trends, the primary foreign competition, and the best 10 future markets.

(2) *Statistical Tables* showing total exports for the overall industry and individual product subgroups over the last 5 years to major marketing regions and to the top 75 export markets (countries) in rank order. Data is in both dollar values and percentages for each item. Also tabulated are changes in total export sales to the world for each product exported by the industry over the latest five years, with the percentage of change over the last two years for each product.

(3) A listing of *Related Commerce Services for the Industry*, including market research reports; trade contact lists of foreign buyers, agents and distributors; trade opportunities; and other services available from Commerce to the industry to help penetrate foreign markets.

Level 2 and 3 provide much more detailed information covering individual products exported by the industry on a country-by-country basis, with additional breakouts in terms of units, percentages and unit values. Individual product data is also shown for each U.S. Customs District by destination countries.

Levels 2 and 3 may also include a *Trade Lead Frequency Report* showing the actual number of sales orders for the industry's products received by Commerce (through its Trade Opportunities Program) during the last year and over a three-year period, on country-by-country basis.

It is Commerce's desire to develop and provide these packages for a fee. We encourage comments on the content, value, usefulness, organization and method of distribution for these profiles. Sample extracts of each table or piece of information have been put together for evaluation. Please write the office listed if you wish a copy of the evaluation profile to review.

Saul Padwo,

Acting Deputy Assistant Secretary for Trade Information and Analysis.

BILLING CODE 3510-25-M

Sugar Content of Certain Articles From Australia; Preliminary Results of Administrative Review of Countervailing Duty Order

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of preliminary results of administrative review of countervailing duty order.

SUMMARY: The Department of Commerce has conducted an administrative review of the countervailing duty order on the sugar content of certain articles from Australia. The review covers the period January 1, 1982 through December 31, 1982. As a result of the review, the Department has preliminarily determined the amounts of net subsidy for 1982 to be Aus. $63.98 per metric ton of sugar content for "approved fruit products," and Aus. $74.15 per metric ton for "other approved products." Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: March 17, 1983.

FOR FURTHER INFORMATION CONTACT: Josephine Russo or Joseph Black, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230; telephone (202) 377-2786.

SUPPLEMENTARY INFORMATION:

Background

On December 15, 1982, the Department of Commerce ("the Department") published in the **Federal Register** (47 FR 56164) the final results of its last administrative review of the countervailing duty order on the sugar content of certain articles from Australia (T.D. 38541, March 24, 1923) and announced its intent to conduct the next administrative review. As required by section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department has now conducted that administrative review.

Scope of the Review

Imports covered by the review are "approved fruit products" and "other approved products" produced in Australia. The current list of "approved fruit products" includes the following items: Jams, canned fruits, citrus peel, crystallized (or glace) fruits, certain fruit cordials and fruit juices containing not less that 25 percent pure Australian fruit juice. The list of "other approved products" currently includes: alcoholic beverages, biscuits, cakes, puddings, pastries and similar mixtures and ingredients used to make them, chemicals derived from cane sugar by hydrolysis, chemical preparations used as inhibitors or stabilizers, condiments, confectionary, desserts and ingredients used to make them, drink powders and crystals, essences and flavorings, ice block mixtures, leather, maple syrup, medicines and drugs, mixtures used to make icings, fillings, dressings and other foods, processed cereal foods or vegetables, processed egg products, processed milk products, quick frozen fruits, soft drinks, soups, spreads, sweetened fruit pulp and other fruit products which are not "approved fruit products." Exceptions to the above are pure sugar and pure icing sugar (that is, not mixed with other manufacturing ingredients), golden syrup, treacle and molasses. these are regarded as sugar and sugar syrups.

The review covers the period January 1, 1982 through December 31, 1982 and is limited to the program of rebate payments made through the Export Sugar Rebate System.

Analysis of the Program

Export sugar rebates are fixed and published by the Export Sugar Committee on a monthly basis and are granted when the world ("parity") price of sugar is lower than the price of sugar in Australia. The average rates for the period of review are set out under the *Preliminary Results*.

Verification

We verified this information through a review of public documents published by the Export Sugar Committee and through the Government of Australia.

Preliminary Results of the Review

As a result of our review, we preliminarily determine that the sugar content of certain articles from Australia benefitted from average net subsidies of Aus. $63.98 per metric ton of sugar content for approved fruit products and Aus. $74.15 per metric ton of sugar content for other approved products during 1982.

Accordingly, the Department intends to instruct the Customs Service to assess countervailing duties of Aus. $63.98 per metric ton of sugar content for approved fruit products and Aus. $74.15 for other approved products on shipments exported on or after January 1, 1982 and entered, or withdrawn from warehouse, for consumption on or before September 9, 1982. On September 10, 1982, the International Trade Commission ("the ITC") notified the Department that the Australian government had requested an injury determination for this order under section 104(b) of the Trade agreements Act of 1979. Should the ITC find that there is material injury or likelihood of material injury to an industry in the United States, the Department will instruct the Customs Service to assess countervailing duties at the prevailing deposit rates at the time of entry on all unliquidated entries of this merchandise entered, or withdrawn from warehouse, for consumption on or after September 10, 1982 and exported on or before December 31 1982.

Further, as provided by section 751(a)(1) of the Tariff Act, the Department intends to instruct the Customs Service to collect a cash deposit of estimated countervailing duties of Aus. $63.98 per metric ton of sugar content on approved fruit products and Aus. $74.15 on other approved products on all shipments entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review. This deposit requirement shall remain in effect until publication of the final results of the next administrative review.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 45 days after the date of publication or the first workday thereafter. The Department will publish the final results of this administrative review including the results of its analysis of issues raised in such written comments or at a hearing.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 355.41 of the Commerce Regulations (19 CFR 355.41).

Dated: March 11, 1983.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-25-M

National Bureau of Standards

Advisory Committee for International Legal Metrology; Notice of Open Meeting

The Advisory Committee for International Legal Metrology will meet from 9:30 a.m. to 5:00 p.m. on Tuesday, April 5, 1983, and from 9:00 a.m. to 12:00 noon on Wednesday, April 6, 1983. The meeting will be held in Lecture Room B, Administration Building, National Bureau of Standards, Gaithersburg, Maryland.

The Committee, initially established in March 1974 advises the Department of Commerce, through the Director, National Bureau of Standards (NBS), on technical and policy matters relating to NBS' assigned general responsibilities for the development of U.S. positions on technical issues arising in the International Organization of Legal Metrology (OIML). The Committee consists of approximately 40 members selected to ensure balanced representation among government, professional metrologists, national standards bodies, industry and trade associations, and consumers.

The purpose of the April meeting of the Committee is to establish U.S. positions for the 19th Meeting of the International Committee of Legal Metrology (CIML) to be held May 3–5, 1983, in Copenhagen, Denmark. The agenda includes the following items:

1. Update of OIML activities since last meeting of the Committee:
   (a) OIML Presidential Council Meeting.
   (b) Highlights of OIML Technical Program.
   (c) JT, BIPM, ISO, IEC, OIML International Measurement Vocabulary.
2. 19th CIML agenda and OIML issues:
   (a) Membership in OIML.
   (b) Financial situation.
   (c) Bureau personnel.
   (d) Long-term policies and plans.
   (e) Work of the Pilot and Reporting Secretariats.
   (f) OIML certification system.
   (g) Relations with other International Institutions.
   (h) Developing countries.
   (i) BIML activities.
   (j) 7th International Conference of Legal Metrology.
3. U.S. priorities in OIML for 1983–1984.
4. Guidelines for U.S. delegations to OIML meetings.

The meeting will be open to public observation, and a period will be set aside for oral comments or questions by the public which do not exceed ten minutes each. More extensive questions or comments should be submitted in writing before March 30, 1983. Other public statements regarding committee affairs may be submitted at any time before or after the meeting. Approximately 20 seats will be available for the public on a first-come first-served basis.

Copies of the minutes will be available on request 30 days after the meeting.

Inquiries may be addressed to the Committee Control Officer, Mr. David E. Edgerly, Standards Management Program, Office of Product Standards Policy, National Bureau of Standards, Washington, D.C. 20234, telephone: 301–921–3307.

Dated: March 14, 1983.

Ernest Ambler,

Director, National Bureau of Standards.

BILLING CODE 3510-13-M

National Oceanic and Atmospheric Administration

National Marine Fisheries Service; Modification No. 1 to Permit No. 381

Notice is hereby given that pursuant to the provisions of § 216.33 (d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216), and § 222.25 of the Regulations Governing Endangered Species Permits (50 CFR Part 222), Permit No. 381 issued to Southwest Fisheries Center, National Marine Fisheries Service on June 11, 1982, is modified to extend the period of authorized taking for one year.

Section B–6 is deleted and replaced by:

"6. This permit is valid with respect to the taking authorized herein until December 31, 1984.

This modification becomes effective upon publication in the Federal Register.

The Permit as modified and documentation pertaining to the modification are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, N.W., Washington, D.C. and

Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731.

Dated: March 7, 1983.

Richard B. Roe,

Acting Director, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service.

[FR Doc. 83-6888 Filed 3-16-83; 8:45 am]

BILLING CODE 3510-22-M

National Marine Fisheries Service; Issuance of Permit To Take Marine Mammals

On January 21, 1983, Notice was published in the **Federal Register** (48 FR 2814), that an application had been filed with the National Marine Fisheries Service by Mr. Dennis Kelly, Orange Coast College, 2701 Fairview Road, Costa Mesa, California, for a Scientific Research Permit to take up to 200 bottlenose dolphins by harassment over a period of two years.

Notice is hereby given that on March 9, 1983, the National Marine Fisheries Service issued a Scientific Research Permit as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), to Mr. Dennis Kelly subject to certain conditions set forth therein.

The Permit is available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C.; and Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731.

Dated: March 9, 1983.

Richard B. Roe,

Acting Director, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service.

[FR Doc. 83-6889 Filed 3-16-83; 8:45 am]

BILLING CODE 3510-22-M

National Marine Fisheries Service; Receipt of Application for Permit

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

1. Applicant: Sea World, Inc. (P2M), 1720 South Shores Road, San Diego, California 92109.

2. Type of Permit: Scientific Research and Public Display.

3. Name and Number of Animals: Killer whales (Orcinus orca), 100.

4. Type of Take: To take a total of 100 killer whales in order to study the biology, reproduction, and population dynamics of this species. Up to 10 will be permanently maintained; and up to 90 will be captured, some maintained up to three weeks, sampled, marked and/or tagged and released. Of these 90, 10 may also be radio tagged and tracked. Animals may be recaptured and reexamined.

5. Location of Activitiy: Waters off Alaska and California.

6. Period of Activity: 5 years.

The arrangements and facilities for transporting and maintaining the marine mammals requested in the above described application have been inspected by a licensed veterinarian, who has certified that such arrangements and facilities are adequate to provide for the well-being of the marine mammals involved.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, D.C. 20235, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

all statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, N.W., Washington, D.C.;

Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731; and

Regional Director, National Marine Fisheries Service, Alaska Region, P.O. Box 1668, Juneau, Alaska 99802.

Dated: March 10, 1983.

R. B. Brumsted,

Acting Chief, Protected Species Division, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service.

BILLING CODE 3510-22-M

National Technical Information Service

Intent To Grant Exclusive Patent License

The National Technical Information Service (NTIS), U.S. Department of Commerce, intends to grant to Evergreen Scientific Company, having a place of business at Los Angeles, California, an exclusive right in the United States to manufacture, use and sell products embodied in the invention, "Fecalator, An Apparatus and Method for Concentration of Parasite Eggs and Larvae," U.S. Patent 4,081,356 (dated March 28, 1978). The patent rights in this invention have been assigned to the United States of America, as represented by the Secretary of Commerce.

The proposed exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 41 CFR 101–4.1. the proposed license may be granted unless, within sixty days from the date of this Notice, NTIS receives written evidence and argument which establishes that the grant of the proposed license would not serve the public interest.

Inquiries, comments and other materials relating to the proposed license must be submitted to the Office of Government Inventions and Patents, NTIS, Box 1423, Springfield, VA 22151.

Dated: March 10, 1983.

George Kudlavetz,

Acting Program Coordinator, Office of Government Inventions and Patents, National Technical Information Service, U.S. Department of Commerce.

BILLING CODE 3510-04-M

CONSUMER PRODUCT SAFETY COMMISSION

Notification of Proposed Collection of Information

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1981 (44 U.S.C. 3501 *et seq.*), the Consumer Product Safety Commission has submitted to the Office of Management and Budget a request for extension of approval, through February 28, 1986, of information collection requirements in a regulation applicable to non-full-size baby cribs. The regulation, published at 16 CFR 1500.18(a)(14) and Part 1509, is intended to reduce or eliminate unreasonable risks of death or injury to children from mechanical hazards. The regulation bans from sale and distribution non-full-size cribs that fail to meet established criteria and requires certain labeling, under provisions of the Federal Hazardous Substances Act (15 U.S.C. 1261 *et seq.*). Additionally, § 1509.11 of this regulation requires manufacturers and importers of the cribs subject to its provisions to make and maintain records of sale and distribution, for 3 years after production or importation of each lot or other identifying unit of non-full-size baby cribs.

Information about the Proposed Collection of Information.

Agency address: Consumer Product Safety Commission, 1111 18th Street, NW., Washington, D.C. 20207.

Title of information collection: Non-full-size baby cribs, 16 CFR 1500.18(a)(14) and Part 1509.

Type of request: Extension of approval.

Frequency of collection: Varies depending upon volume of products manufactured, imported, or sold.

General description of respondents: manufacturers and importers of non-full-size baby cribs.

Estimated number of respondents: 29.

Estimated average number of hours per response: 4.

Comments: Comments on this proposed collection of information should be addressed to Gwen Pla, Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503, telephone: (202) 395–7313, not later than April 1, 1983. Copies of the proposed collection of information are available from Francine Shacter, Office of Budget and Program Implementation, Consumer Product Safety Commission, Washington, D.C. 20207, telephone: (301) 492–6529.

This is not a proposal to which 44 U.S.C. 3504(h) is applicable.

Dated: March 11, 1983.

Sheldon D. Butts,

Acting Secretary, Consumer Product Safety Commission.

[Docket No. ERA-FC-83-005]

Powerplant and Industrial Fuel Use Act of 1978: Electric Utility Conservation Plans

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of approval of conservation plans.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) has received a number of electric utility conservation plans developed and submitted for DOE approval pursuant to section 808 of the Powerplant and Industrial Fuel Use Act of 1978, as amended, 42 U.S.C. 8301 *et seq.* ("FUA" or "the Act"). Pursuant to 10 CFR 506.5(b) (47 FR 25729, June 15, 1982), DOE hereby gives Notice of Approval of Conservation Plans submitted by the electric utility owners or operators listed in the **SUPPLEMENTARY INFORMATION** section below.

The public file for each of the listed electric utility owners or operators containing this Notice of Approval of Conservation Plans and all other pertinent documents is available for insepction at the Department of Energy, Freedom of Information Reading Room, 1000 Independence Avenue, SW., Room 1E-190, Washington, D.C. 20585, telephone (202) 252-6020. Approval of each conservation plan is based on ERA's consideration of the entire record of the proceeding, including any comments received during the public comment period for each plan.

DATE: In accordance with 10 CFR 506.5(b), this Notice shall take effect on March 17, 1983.

FOR FURTHER INFORMATION CONTACT:

Edward J. Peters, Jr., Office of Fuels Program, Economic Regulatory Administration, Forrestal Building, Room GA-073 G, 1000 Independence Avenue, SW., Washington, D.C. 20585, (202) 252-6162

Allan Stein, Esq., Office of the General Counsel Forrestal Building, Room 6B-222, 1000 Independence Avenue, SW., Washington, D.C. 20585, (202) 252-2967

SUPPLEMENTARY INFORMATION: Section 1023 of the Omnibus Budget Reconciliation Act of 1981, Pub. L. 97-35 (OBRA) amended FUA by adding a new section 808, entitled "Electric Utility Conservation Plan.".

Section 808 requires utilities which own or operate any existing electric powerplant which used natural gas as a primary energy source between August 14, 1980 and August 13, 1981, and which

also plan to use natural gas in any electric powerplant, to develop and submit to DOE for approval a conservation plan to conserve electric energy. The plan must set forth the means to achieve the conservation of electric energy at a level equal to 10 percent of the electric energy output of the utility sold within its own system which was attributable to natural gas during the four calendar quarters ending on June 30, 1981. Approved plans must be fully implemented during the five year period following DOE approval.

Notices of Receipt of the proposed conservation plans described below, providing for a thirty (30) day public comment period during which interested persons were invited to submit written comments concerning the content of any such proposed conservation plan, were published in the Federal Register on November 4, 1982 and January 25, 1983 (47 FR 50083 and 48 FR 3403, respectively). No comments on these proposed plans were received.

Based upon the entire record of this proceeding, ERA has determined that the conservation plans of each of the following utilities meet the requirements for approval contained in 10 CFR 508.8. ERA is restricted by the 120 day time limitation imposed by the Act of the plan approval process as to the amount of information which can be analyzed in order to ascertain the environmental; significance of approval of these plans. However, based on the information contained in each utility's submittal, ERA has determined, pursuant to 10 CFR 508.5, that the conservation programs contained in the plan of each utility listed below should not produce environmental consequences significant enough to warrant detailed documentation pursuant to the National Environmental Policy Act or its implementing regulations (40 CFR Part 1500 *et seq.*). Thus this action clearly does not represent a major Federal action significantly affecting the quality of the human environment. Pursuant to 10 CFR 508.5 and section 808(d)(1) of FUA, DOE hereby approves the electric utility conservation plans submitted by the utilities listed below.

Each of the electric utilities whose plans are approved herein shall annually submit a report to ERA pursuant to 10 CFR 508.7 (47 FR 25733, June 15, 1982) identifying the steps taken during the preceding year to implement its approved plan. Each such report shall be submitted within thirty (30) days after the close of a calendar year, beginning with the close of calendar year 1983. The report shall be sent to: Steven E. Ferguson, Director, Fuels Conversion Division, Office of Fuels Programs, Economic Regulatory Administration, Forrestal Building, Room GA–093, 1000 Independence Avenue, SW., Washington, D.C. 20585.

The following utilities' conservation plans are approved:

Utilities	FC Case No.
Central Illinois Light Co., Peoria, Ill.	50485-9998-59-49
City of Denton, Denton, Tex.	50775-9998-39-49
City of Garland, Garland, Tex.	51081-9998-89-49

Issued in Washington, D.C., on March 10, 1983.

Robert L. Davies,

Deputy Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Energy Information Administration

Agency Forms Under Review by the Office of Management and Budget

AGENCY: Energy Information Administration, DOE.

ACTION: Notice of submission of request for clearance to the Office of Management and Budget.

SUMMARY: Under provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), Department of Energy (DOE) notices of proposed collections under review will be published in the Federal Register on the Thursday of the week following their submission to the Office of Management and Budget (OMB). Following this notice is a list of the DOE proposals sent to OMB for approval since Thursday, March 10, 1983. The listing does not contain information collection requirements contained in regulations which are to be submitted under 3504(h) of the Paperwork Reduction Act.

Each entry contains the following information and is listed by the DOE sponsoring office: (1) The form number; (2) Form title; (3) Type of request, e.g., new, revision, or extension; (4) Frequency of collection; (5) Response obligation, i.e., mandatory, voluntary, or required to obtain or retain benefit; (6) Type of respondent; (7) An estimate of the number of respondents; (8) Annual respondent burden, i.e., an estimate of the total number of hours needed to fill out the form; and (9) A brief abstract describing the proposed collection.

DATE: Last Notice published Thursday, March 10, 1983.

FOR FURTHER INFORMATION CONTACT:

John Gross, Director, Forms Clearance amd Burden Control Division, Energy Information Administration, M.S. 1H–023, Forrestal Building, 1000 Independence Ave., NW., Washington, D.C. 20585

Jefferson B. Hill, Department of Energy Desk Officer, Office of Management and Budget, 726 Jackson Place, NW., Washington, D.C. 20503

Vartkes Broussalian, Federal Energy Regulatory Commission Desk Officer, Office of Management and Budget, 726 Jackson Place, NW., Washington, D.C. 20503

SUPPLEMENTARY INFORMATION: Copies of proposed collections and supporting documents may be obtained from Mr. Gross. Comments and questions about the items on this list should be directed to the OMB reviewer; comments should also be provided Mr. Gross. If you anticipate commenting on a form, but find that time to prepare these comments will prevent you from submitting comments promptly, you should advise the OMB reviewer of your intent as early as possible.

Issued in Washington, D.C., March 10, 1983.

Yvonne M. Bishop,

Director, Statistical Standards, Energy Information Administration.

Federal Energy Regulatory Commission

[Docket No. ER83-369-000]

Alabama Power Co.; Filing

March 11, 1983.

Take notice that Alabama Power Company on March 7, 1983, tendered for filing proposed changes in its FERC Electric Tariff, Original Volume No. 1. The proposed changes would increase revenues from jurisdictional sales and service by $6,614,071 based on the calendar year 1983.

The Company states that the rate increase is necessary to cover the increased cost of providing service to its distribution cooperative and municipal customers. The Company cites increased expenses and additional utility plant investment as the major reasons for the requested increase.

Copies of the filing were served upon the affected distribution cooperatives and municipalities, the Alabama Public Service Commission and Southeastern Power Administration.

Any person desiring to be heard or to protest said application should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 28, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

[Docket No. QF83-190-000]

Boone Valley Cooperative Processing Assn.; Application for Commission Certification of Qualifying Status of a Cogeneration Facility

March 11, 1983.

On February 14, 1983, Boone Valley Cooperative Processing Assn., (Applicant), 406 North Commercial, P.O. Box 85, Eagle Grove, Iowa 50533, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's rules.

The topping cycle cogeneration facility is located at the Applicant's address. The facility consists of two boilers and an extraction condensing steam turbine generator. The primary energy source to the facility is coal. The electric power production capacity of the facility is 10 megawatts. Extracted steam is available for use in the soybean processing operation. Installation of the facility began in October 1980. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

[Docket No. ID-2034-000]

C. Frederick Sears; Application

March 11, 1983.

Take notice that on March 4, 1983, C. Frederick Sears filed an application for authorization under section 305(b) of the Federal Power Act to hold the following positions:

Vice President—The Connecticut Light & Power Company
Vice President—Western Massachusetts Electric Company
Vice President—Holyoke Water Power Company
Vice President—Holyoke Power and Electric Company
Vice President—Connecticut Yankee Atomic Power Company

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825

North Capital Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 29, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER83-365-000]

The Cleveland Electric Illuminating Co.; Filing

March 11, 1983.

Take notice that on March 2, 1983, The Cleveland Electric Illuminating Company (CEI) tendered for filing an executed Service Agreement and Exhibits A and B thereto, providing for transmission by CEI of approximately 40 MW of power from the 345 kv interconnection point on CEI's Juniper—Canton Line with the Ohio Power Company to the City of Cleveland, Ohio (City) in accordance with the terms and conditions of CEI's FERC Transmission Service Tariff.

CEI has requested waiver of the FERC's 60-day notice requirement in order to permit commencement of transmission service on March 11, 1983.

Any person desiring to be heard or to protest said application should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before March 28, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. ER83-364-000]

Empire District Electric Co.; Filing

March 11, 1983.

Take notice that on March 2, 1983, Empire District Electric Company (Empire) tendered for filing FERC Electric Tariff 1st Revised Volume No. 1, Section 2, 2nd Revised Sheet No. 3, Map of System; Section 6, 8th Revised Sheet No. 22, Index of Purchasers; and an executed service agreement with the City of Lockwood, Missouri.

Empire states that the filing is being made to add Lockwood as a customer to be served on Empire's existing W-1 rate schedule.

Empire requests an effective date of April 1, 1983, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 28, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER83-367-000]

Empire District Electric Co.; Filing

March 11, 1983.

Take notice that The Empire District Electric Company (Empire), on March 3, 1983, tendered for filing a proposed Amendment to Schedule L, Peaking Power Service, a part of that agreement for interchange of power and interconnected operation between Empire and Kansas Gas and Electric Company (KG&E) designated rate schedule, FERC 69.

The amendment will change the capacity charge from $0.27 per kw per month to $0.46 per kw per month. Empire requests an effective date of April 1, 1983.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 28, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the

Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Project No. 6805-000]

Glenn-Colusa Irrigation District; Approval by Operation of Law

March 11, 1983.

Take notice that the Director, Office of Electric Power Regulation, the Commission's Delegee on this matter pursuant to Section 375.308 of the Commission's regulations, has taken no action on the application for exemption from licensing of a small conduit hydroelectric project (Stoval #1 Hydroelectric Project No. 6805) filed on October 28, 1982, by the Glenn-Colusa Irrigation District. The project is described in the attached public notice.

Accordingly, the exemption is deemed granted by operation of law on February 21, 1983, under § 4.93(d) of the Commission's regulations, subject to the standard terms and conditions set forth in § 4.94 of the Commission's regulations (18 CFR 4.94), and subject to the condition that the Commission may accept a license application by any qualified license applicant and revoke this exemption if actual construction or development of the proposed generating facilities has not begun within 18 months, or been completed within four years, from the date on which the exemption went into effect. If an exemption is revoked, the Commission will not accept a subsequent application for exemption within two years of the revocation.

Lawrence R. Anderson,

Director, Office of Electric Power Regulation.

a. Type of Application: Exemption of a Small Conduit Hydroelectric Facility.
b. Project No: 6805-000.
c. Date Filed: October 28, 1982.
d. Applicant: Glenn-Colusa Irrigation District.
e. Name of Project: Stovall No. 1 Hydroelectric Project.
f. Location: On the Glenn-Colusa Canal owned and operated by the Applicant (water leaving the powerhouse will discharge directly into an irrigation canal) near the town of Williams, in Colusa County, California.
g. Filed Pursuant to: Federal Power Act, 16 U.S.C. § 823(a).
h. Contact Person: Mr. Robert D. Clark, Manager and Secretary, Glenn-Colusa Irrigation District, 344 East Laurel Street, Willows, California 95988.
i. Comment Date: January 15, 1983.
j. Description of Project: The proposed project would consist of: (1) Two existing inlet structures; (2) two 4-foot-diameter, 47-foot-lone pipeline-penstock systems; (3) two outdoor generating units with a combined rated capacity of 120 kW, operating under a head of 14 feet; and (4) appurtenant facilities. The estimated average annual energy output is 433,000 kWh.
k. This notice also consists of the following standard paragraphs: B and D3b.

1. *Filing and Service of Responsive Documents*—Any filings must bear in all capital letters the title "COMMENTS", "PROTEST", or "MOTION TO INTERVENE", as applicable, and the Project Number of this notice. Any of the above named documents must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Room 208 RB at the above address. A copy of any motion to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

[FR Doc. 83-6890 Filed 3-16-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-241-000]

Idaho Power Co., Order Requiring Modification of Average System Cost Rates and Noting Interventions

Issued: March 11, 1983.

Pursuant to § 35.13(a)(5)(i) of the Commission's regulations, Idaho Power Company (Idaho), on January 10, 1983, filed a revised Average System Cost (ASC) rate in purported compliance with the Commission's Interim Rule procedures for exchanges of power under section 5(b) of the Pacific Northwest Electric Power Planning and Conservation Act (Regional Act or Act). Under the terms of the Act, participating electric utility systems may sell to the Bonneville Power Administration (BPA) at "average system cost," amounts of energy equivalent to their residential customers' loads and then repurchase such energy from BPA at BPA's lower preference rate.

In order to effectuate these transactions, the Commission, on October 1, 1981, issued an Interim Rule governing these exchanges.[1] Under the interim procedures (18 CFR 35.13a), jurisdictional utilities are to file an ASC rate proposal with BPA, which is then to be reviewed by BPA within 180 days. If BPA's review results in an ASC determination different from that developed by the utility, BPA is to issue a report of its findings together with the ASC rate to be used by the utility. The utility's proposed ASC rate, BPA's report, and BPS's adjusted ASC rate, if any, is then filed with the Commission for review. If the Commission's review results in a finding that the ASC rate is not in accordance with the Interim Rule procedures, the Commission may order the ASC rate to be changed. The revised rate, however, would still be collected

[1] Docket No. RM81-41-000, *Sales of Electric Power to the Bonneville Power Administration—Methodologly and Filing Requirements.*

subject to refund pending approval of a final rule by the Commission.

Idaho has submitted in the present case a revised ASC rate for its exchange sales in the State of Idaho covering the period August 20, 1982, through October 31, 1982. Idaho's filing includes BPA's written report and redetermination of Idaho's ASC rate proposal. Idaho's filing also includes its objection to a number of the adjustments made by BPA, including BPA's modification of Idaho's method for functionalizing general plant and administrative and general expenses.[2]

Notice of the filing was published in the **Federal Register**, with comments, protests, or interventions due on or before February 3, 1983. On February 1, 1983, a group of BPA's direct service industrial customers (DSIs) filed a motion to intervene. DSIs state that they wish to raise a number of issues in subsequent comments. These issues include: functionalization of regulatory fees and expenses; exclusion from the ASC rates of the Black Butte coal deferral charges; and functionalization of income taxes.

Discussion

Under Rule 214(c)(1) of the Commission's Rules of Practice and Procedure (18 CFR 385.214), the unopposed motion to intervene of the DSIs serves to make them parties to this proceeding.

Upon review, the Commission finds that BPA's revision to Idaho's method of functionalizing general plant investment and administrative and general expenses is inconsistent with our Interim Rule procedures. BPA states that its revised functionalization method, which is consistent with the method used by the Idaho Public Utilities Commission, is required because the changed methodology results in a lower ASC rate. The Commission's Interim Rule, however, provides clear instruction for the acceptable functionalization of general plant and A&G expenses.[3] The instructions were intended to assure uniform functionalization for all utilities. BPA has not properly followed the Commission's instructions.[4] The functionalization method originally used by Idaho, on the other hand, correctly reflects our Interim Rule procedures. Accordingly, the Commission will order Idaho to revise its ASC rate to reflect its originally proposed functionalization procedures. With respect to all other issues raised, we find that BPA's determinations are in substantial compliance with the ASC methodology established by the Interim Rule.

As we noted in a September 23, 1982 order which involved contested ASC filings,[5] the ASC rates are interim in nature pending final action by the Commission in Docket No. RM81-41-000. Our findings are therefore without prejudice to the parties' right to raise, after issuance of a final rule in Docket No. RM81-41-000, those issues which they believe have not been resolved by the final rule. Accordingly, until a final rule is approved, Idaho's ASC rate as revised consistent with this order will remain subject to refund or further adjustment pending the outcome of the final rule.

The Commission orders:

(A) Idaho shall revise its ASC rate to reflect functionalization of general plant and A&G expenses as prescribed by footnote 2 of the Interim Rule with refunds to be made as required by the Interim Rule (18 CFR 35.13a).

(B) This order is without predjudice to the remaining objections raised by Idaho and DSIs pending issuance of a final rule in Docket No. RM81-41-000.

(C) The Secretary shall promptly publish this order in the **Federal Register**.

By the Commission.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-6901 Filed 3-16-83; 8:45 am]

BILLING CODE 6717-01-M

[3]The remaining adjustments challenged by Idaho relate to: (1) Functionalization of unclassified materials and supplies; (2) functionalization of intangible plant; (3) functionalization of regulatory expenses; (4) exclusion of Black Butte coal deferral charges; and (5) adjustments to and functionalization of income taxes.

[3]Under the Interim Rule procedures, general plant and A&G expenses are to be functionalized consistent with instructions in footnote 2 to the ASC formula. That footnote requires that the items to be functionalized be directly assigned, if possible, to the appropriate operating function; otherwise, the location of the plant item is to be used as the basis for functionalization. In the event that general plant items or A&G expenses cannot be functionalized on these bases, footnote 2 requires that those items be functionalized in accordance with footnote 24 instructions. Footnote 24 requires items to be functionalized on two bases: one-half on the basis of gross plant ratios and one-half on the basis of O&M expense ratios.

[4]The functionalization procedure adopted by BPA is based on wage and salary ratios.

[5]*Puget Sound Power & Light Co., et al.*, Docket Nos. ER82-448-000, *et al.*, 20 FERC ¶61,355.

[Docket No. ER83-370-000]

Idaho Power Co.; Filing

March 11, 1983.

Take notice that on March 7, 1983, Idaho Power Company (Idaho) tendered for filing in compliance with the Federal Energy Regulatory Commission's Order of October 7, 1978, a summary of sales made under the Company's 1st Revised FERC Electric Tariff, Volume No. 1 (Supersedes Original Volume No. 1) during January, 1983, along with cost justification for the rate charged. This filing includes the following supplements:

Utah Power & Light Company, Supplement 15
Montana Power Company, Supplement 13
Sierra Pacific Power Company, Supplement 13
Southern California Edison Company, Supplement 12
San Diego Gas and Electric Company, Supplement 9
Los Angeles Dept of Water and Power, Supplement 11
City of Glendale, Supplement 11
City of Burbank, Supplement 11
City of Pasadena, Supplement 11

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 29, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. QF83-202-000]

Pacific Wind Systems; Application for Commission Certification of Qualifying Status of a Small Power Production Facility

March 11, 1983.

On February 25, 1983, Pacific Wind Systems of 2822 Fifth Avenue, San Diego, California 92103, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's rules.

The facility will be located in Tehachapi, California on the Tehachapi/Willow Springs Road. The primary energy source will be wind. The electric

power production capacity of the facility will be 800 kilowatts, which will be expanded to 2,400 kilowatts. There are no other small power production facilities located within one mile of the facility which use the same energy source, and which are owned by the applicant. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP79-28]

Public Service Commission of New York, Offshore Construction Costs of Natural Gas Pipelines; Filing of Joint Petition for Approval of Accounting and Rate Treatment In Conjunction With Settlement of Civil Actions

Issued: March 11, 1983.

Take notice that on December 2, 1982, several interstate pipeline companies [1] (Joint Petitioners) filed a Joint Petition For Approval of Accounting And Rate Treatment In Conjunction With Settlement of Civil Actions requesting the Federal Energy Regulatory Commission (Commission) to review the basis upon which private civil antitrust actions brought against Brown & Root Inc., and McDermott Incorporated (formerly J. Ray McDermott & Co., Inc.), *et al.*, (Construction Firms) are being settled, and to approve the proposed settlement agreement attached to the Joint Petition, providing for the rate and accounting treatment of the sum of approximately $24 million to be recovered from the Construction Firms through such settlement. The Joint Petitioners further requested that the Commission terminate the subject proceeding and any other investigation involving the sum subject matter with respect to the Joint Petitioners on their compliance with the conditions applicable to the rate and accounting treatment proposed in the draft settlement agreement.

In 1976 a federal grand jury in the United States District Court for the Eastern District of Louisiana began considering information regarding alleged collusive practices in connection with bids and contracts for the construction of offshore natural gas and oil pipelines and platforms. Subsequently, on December 14, 1978, the United States Department of Justice (Government) filed antitrust indictments against Brown & Root, Inc., J. Ray McDermott & Co., Inc. and certain officers of the two companies in *United States of America v. J. Ray McDermott & Co., Inc., et. al.*, Cr. Docket 78-422 (E.D.La.).

The antitrust count in the indictment charged the Construction Firms with unlawful practices in connection with bids for the construction of facilities in the Gulf of Mexico and in other geographic areas during the period from approximately 1960 through 1975. In addition to general allegations, the indictment specified particular offshore projects as subjects of the practices complained of. On December 14, 1978, the Construction Firms pleaded *nolo contendere* to the single antitrust count for which they were indicted, and each paid $1 million fines.

On January 5, 1979, the Public Service Commission of the State of New York (NYPSC) filed a Petition For Investigation invoking Sections 4, 5, 14, and 16 of the Natural Gas Act requesting the Commission to initiate an investigation into the possibility that interstate pipelines may have been overcharged for pipeline or other construction in the Gulf of Mexico. Pointing out that the proceedings to obtain civil recoveries from the Construction Firms would undoubtedly be time-consuming, the NYPSC indicated its belief that the natural gas pipelines affected by the practices of the Construction Firms should be placed on notice that they would be held accountable in the event they failed to pursue available legal remedies for the recovery of excessive charges.

Notice of the NYPSC Petition was issued by the Commission on February 2, 1979. Numerous parties, including many of the Joint Petitioners, intervened.

In light of the NYPSC Petition, the first civil antitrust action by the Joint Petitioners was filed by Natural Gas Pipeline Company of America, Inc., on June 27, 1979, in the United States District Court for the Northern District of Illinois. By December 14, 1979, all of the Joint Petitioners had filed similar actions against the Construction Firms in the United States District Courts of the Sourthern District of Texas, Eastern District of Louisiana, and Northern District of Illinois. Other companies, principally the owners of oil pipelines and platforms, also filed suit against the Construction Firms. By year-end 1979, 66 private actions were pending in federal district courts of Texas, Louisiana, Illinois, and New York.

On April 10, 1980, shortly after discovery proceedings were commenced in various jurisdictions, an Opinion and Order was issued by the Judicial Panel on Multidistrict Litigation transferring all of the civil antitrust proceedings in a case formally designated as *Marine Construction Antitrust Litigation*, M.D.L. Docket No. 417 (E.D. La.). These proceedings continue to remain in the discovery stage.

On April 12, 1979, the Government furnished a Voluntary Bill of Particulars, which was filed with the District Court. This filing described the Government's view of the operation of the bidding practices of the Construction Firms, identified persons believed to have participated in such arrangements, and set forth a partial list of marine construction projects that the Government alleged were subject to collusive bidding.

---

[1] The Joint Petitioners include the following interstate natural gas companies:
Columbia Gulf Transmission Company
Consolidated Gas Supply Corporation
High Island Offshore System
(American Natural Offshore Company, Texam Offshore Gas Transmission Inc., Transco Offshore Pipeline Company, Texas Offshore Pipeline System Inc., and NATOCO, INC.)
Michigan Wisconsin Pipe Line Company
Natural Gas Pipeline Company of America, Inc.
Southern Natural Gas Company
Stingray Pipeline Company
(Trunkline Offshore Company and MCN Offshore Company)
Tennessee Gas Pipe Line Company, Division of Tenneco, Inc.
Texas Eastern Transmission Corporation
Texas Gas Transmission Corporation
Transcontinental Gas Pipe Line Corporation
Trunkline Gas Company
United Gas Pipe Line Company, Inc.
Sea Robin Pipeline Company
U-T Offshore System
(Transco Hydrocarbons Company, Unitex Offshore Transmission Company and NALOCO, Inc. (Del.))

The Voluntary Bill of Particulars listed 42 such projects owned by gas pipeline companies and oil compaines. All of the Joint Petitioners that were in operation in 1975 except Transcontinental Gas Pipe Line Corporation were listed in the Voluntary Bill of Particulars with respect to at least one construction project. Inasmuch as the list was limited to projects with bid dates between 1970 and 1975, two other Joint Petitioners, High Island Offshore System and U–T Offshore System, were also not included.

Based upon the information obtained from the Construction Firms, the files of the Offshore Pipelines, and other pertinent data, the Joint Petitioners reached a proposed settlement agreement with the Construction Firms after extensive negotiations. At no time however has any member of the Commission Staff participated in any of the negotiations with Joint Petitioners or the Construction Firms, or in the development of the proposed settlement agreement. The proposed settlement agreement, although stated in a dollar amount without identification of the particular projects, nevertheless identifies the companies and amounts recoverable under the settlement. These amounts are not limited to the companies or projects contained in the Government's Voluntary Bill of Particulars.

The proposed settlement agreement sets forth the settlement sum to be paid by Brown & Root and the settlement sum to be paid by McDermott to each of the 14 Joint Petitioners. These amounts are set forth in Annex "B" of the proposed settlement agreement. The total amount payable by Brown & Root is $12, 862,769.42 and the amount payable by McDermott is $11,184,167.13. The total recovery for Joint Petitioners, if approved by the Commission, would be in excess of $24,000,000.

In addition to approval of the proposed settlement by the Joint Petitioners in accordance with the August 17, 1982, agreement with the Construction Firms, paragraph (2) thereof would also require Commission approval of the accounting and rate treatment proposed by each of the Joint Petitioners with respect to individual settlement sums. In this regard, Joint Petitioners seek accounting and rate treatment equivalent to that reflected in Federal Power Commission Accounting Release Number AR–1.[3] With respect to each Joint Petitioner's settlement sum, the net of unrecovered expenses and taxes would be applied to reduce the cost of its FERC Plant or other accounts, and an appropriate prospective reduction would be made in its FERC rates to reflect the amount of such reduction in plant or other accounts.

Any person who wishes to be heard and who questions or protests the level of the proposed recovery set forth in Joint Petitioner's draft settlement agreement, or the method which Joint Petitioners propose for the accounting and rate treatment of such sums recovered, should file a petition to intervene with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitioners or protests should be filed on or before April 11, 1983. Protests will not be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[3] Accounting Release number AR–1, Office of the Chief Accountant, Federal Power Commission, effective December 30, 1964.

[Docket No. ER83-344-000]

Public Service Co. of Indiana; Termination

March 11, 1983.

Take notice that on February 22, 1983, Public Service Company of Indiana (PSI) tendered for filing a Notice of Termination with regard to the Service Agreement, dated December 1, 1973, between the Town of Patoka, Indiana and PSI. The Agreement was approved under PSI's FERC Electric Tariff Original Volume No. 1. Service under the Agreement was terminated on December 15, 1977.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before March 28, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER83-360-000]

Sierra Pacific Power Co.; Filing

March 11, 1983.

Take notice that on February 28, 1983, Sierra Pacific Power Company (Sierra) tendered for filing its second energy charge revision to reflect increases in the cost of power purchased from Pacific Gas and Electric Company (PG&E).

Sierra proposes to increase its base rates effective January 1, 1983 to reflect the increased purchased power fixed costs represented by the revised rates included in PG&E's letter dated February 8, 1983. The revised PG&E rates will increase customer and demand charges to $19,533 per month and $9.150 per KW, respectively, as compared to the $18,333 per month and $8.588 per KW included in the present purchased power costs and represented by $.00912 per KWH applicable to Sierra's resale rate schedules R–1 and R–2 authorized in Docket No. ER82–105–000. This results in an increase of $.00471 per KWH which increases the energy rate of $.0293 per KWH granted in Docket No. ER82–105–000 to .03464 per KWH. The revised rate will become effective for service on or after January 1, 1983, concurrent with the rate increase from PG&E. Sierra's rates, as proposed herein, will be subject to adjustment as required by the Commission's action upon PG&E's proposed rates filed February 8, 1983.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before March 28, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must fule a motion to intervene. Copies of this filing are on file with the

Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Volume 847]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: March 11, 1983.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the Federal Register.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 Mile rule)
102–3: New well (1000 Ft rule)
102–4: New onshore reservoir
102–5: New reservoir on ole OCS lease
Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal Seams
107–DV: Devonian Shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation
Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Source data for this notice is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487–4808, 5285 Port Royal Rd., Springfield, VA 22161, or Sandra Spear (FERC) (202) 357–8681.

BILLING CODE 6717-01-C

[Volume 848]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: March 11, 1983.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic fet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the Federal Register.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 Mile rule)
102–3: New well (1000 FT rule)
102–4: New onshore reservoir
102–5: New reservoir on ole OCS lease
Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal Seams
107–DV: Devonian Shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation
Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Source data for this notice is available on magnetic tape from the National Technical Information Service (NTIS). For information contact Stuart Weisman (NTIS) at (703) 487–4806, 5285 Port Royal Rd., Springfield, VA 22161, or Sandra Spear (FERC) (202) 357–8681.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-C

[Docket No. RP83-58-000]

Southern Natural Gas Co.; Application for Waiver of Commission's Regulations

March 11, 1983.

Take notice that on March 1, 1983, Southern Natural Gas Company (Southern) filed an application for a waiver of the test period prescribed in § 154.63(e)(2)(i) of the Commission's Regulations.

Southern states its intention of making a rate change filing with the Commission on or after March 31, 1983. For purposes of this rate change filing Southern intends to utilize a base period extending from January 1, 1982 to December 31, 1982. With regard to Southern's computation of working capital allowance for its estimated gas prepayments, Southern proposes to utilize the projected average cumulative total for the thirteen month period ending September 30, 1984 by requesting a waiver of the test period prescribed in § 154.63(e)(2)(i) of the Commission's Regulations.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with the Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before March 24, 1983. Protests will be considered by the Commission in determining to the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-6887 Filed 3-16-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP75-23-013 and CP75-120-006]

Tennessee Gas Pipeline Co. a Division of Tenneco Inc.; Notice of Petition To Amend

March 11, 1983.

Take notice that on February 14, 1983, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Petitioner), P.O. Box 2511, Houston, Texas 77001, filed in Docket Nos. CP75-23-013 and CP75-120-006 a petition to amend the order issued March 7, 1977, as amended, in Docket Nos. CP75-23 and CP75-120 [1] pursuant to Section 7(c) of the Natural Gas Act so as to authorize the transportation of natural gas from an additional receipt point from Tenneco Oil Company (TOC), all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioner states that it was authorized in Docket No. CP75-23 to transport natural gas for TOC from specified receipt points to a point of interconnection with Creole Gas Pipeline Corporation (Creole) at Ysclosky, Louisiana, for delivery to Air Products and Chemicals, Inc., and that in Docket No. CP75-120 it was authorized to transport natural gas for TOC from specified receipt points to Ysclosky, Louisiana, for delivery to Creole for transportation by Creole to TOC's Chalmette refinery.

Petitioner proposes herein to receive gas from TOC at an additional onshore receipt point in the Lake Decade Field, Terrebonne Parish, Louisiana. Deliveries of gas from the Lake Decade source would be made by TOC to Transcontinental Gas Pipe Line Corporation (Transco) for the account of Tennessee at a point of interconnection between Transco and TOC or TOC's agent on Transco's Southeast Louisiana Gathering System in Terrebonne Parish, Louisiana. Transco would transport and deliver the subject gas to Tennessee at existing points of interconnection located at Louise, Texas, and Crowley and Kinder, Louisiana, for transportation and delivery by Tennessee to the Ysclosky delivery point.

The amendments dated February 7, 1983, to the transportation agreement between TOC and Tennessee provide that the amount of gas delivered at Ysclosky would be thermally equivalent to the amount received by Transco from TOC for Tennessee's account subject to certain reductions but in no event would the total volume delivered from all sources exceed the maximum volume authorized to be transported by the order issued March 7, 1977.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before April 1, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-6888 Filed 3-16-83; 8:45 am]

BILLING CODE 6717-01-M

[1] This proceeding was commenced before the FPC. By joint regulation of October 1, 1977 (10 CFR 1000.1), it was transferred to the Commission.

[Docket No. RP83-53-000]

United Gas Pipe Line Co.; Notice of Proposed Changes in FERC Gas Tariff

March 11, 1983.

Take notice that United Gas Pipe Line Company (United), on March 1, 1983, tendered for filing proposed changes in its FERC Gas Tariff, First Revised Volume No. 1, to become effective April 1, 1983.

United states that the proposed tariff sheet include proposed Sections 25 and 26 to United's FERC Gas Tariff First Revised Volume No. 1. The proposed Section 26 will permit semi-annual rate adjustments to track increases or decreases in the costs incurred by United under agreements for the transportation of gas by others [excluding charges by the Northern Border Pipeline Company (Northern Border)] as well as adjustments to reflect any net increase in transportation revenue credits. The proposed Section 25, Gas Prepayment Adjustment, is a provision to reflect semi-annual costs incurred by United as a result of prepayments made to gas suppliers under gas purchase contracts.

Copies of the filing will be served upon United's jurisdictional customers and the public service commissions of the states of Alabama, Florida, Louisiana and Mississippi, and the Texas Railroad Commission.

Any person desiring to be heard or to protect said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capital Street, N.E., Washington, D.C. 20426, in accordance with Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, and 385.214). All such petitions or protests should be filed on or before March 17, 1983. Protests will be

considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-6889 Filed 3-16-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-366-000]

The Upper Peninsula Power Co.; Notice of Filing

March 11, 1983.

The filing Company submits the following:

Take notice that on March 7, 1983, the Upper Peninsula Power Company (UPPCO) tendered for filing proposed changes in the rate schedules for service to the Alger-Delta Cooperative Electric Association, The Ontonagon County Rural Electrification Association, Village of Baraga, City of Escanaba, City of Gladstone, Village of L'Anse, City of Negaunee, and to the Wisconsin Electric Power Company.

UPPCO states that the schedule in the rate filed will supersede the schedule presently on file with this Commission.

The proposed changes would increase revenues for these jurisdictional sales based on the Period II test period ended December 31, 1983. UPPCO proposes that the rate increase become effective in two phases; Phase I in the amount of $566,146 to take effect 60 days after the filing, on May 6, 1983, and Phase II in the amount of $785,502 to take effect at the latest 61 days after the filing, on May 7, 1983. However, should the entire amount of the increase fall within the limits established in *West Texas Utilities*, Docket No. ER82-23-000, Order issued February 20, 1982, UPPCO respectfully requests that the full amount of the two-step increase be allowed to become effective 60 days after filing, on or May 6, 1983.

The reason stated by UPPCO for the increase is to overcome the revenue deficiency from this type of service occasioned by the continued inflationary impact on its costs.

Copies of the filing were served upon UPPCO's affected jurisdictional customers, and the Michigan Public Service Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 28, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER83-361-000]

Washington Water Power Co.; Notice of Filing

March 11, 1983.

The filing Company submits the following:

Take notice that on February 25, 1983, the Washington Water Power Company (WWPC) tendered for filing a report issued by the Bonneville Power Administration (Bonneville) containing their final determination of average system cost for WWPC's Idaho jurisdiction for the 1981 test period.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before March 29, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Secretary.

[FR Doc. 83-6891 Filed 3-16-83; 8:45 am]

BILLING CODE 6717-01-M

Office of Hearings and Appeals

Issuance of Decisions and Orders; Week of January 17 Through January 21, 1983

During the week of January 17 through January 21, 1983, the decisions and orders summarized below were issued with respect to appeals and applications for exception or other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Appeal

Akin, Gump, Strauss, Hauer and Feld, 3/20/83, HFA-0104

Akin, Gump, Strauss, Hauer and Feld filed an Appeal from a denial by the Director of the Office of Oil and Gas, Energy Information Administration of a Request for Information which the firm had submitted under the Freedom of Information Act. In considering the Appeal, the DOE found that information concerning the prices of liquified petroleim gas and natural gas liquid products, filed on Form FEA-P302-M-1, which was initially withheld under Exemption 4 should be released to the public. The DOE determined that in view of the age and the limited nature of the requested information contained on the form, the submitters of the information would not suffer any competitive harm as a result of its release.

Requests for Exception

Champlin Petroleum Company, 1/18/83, BEE-1677

Champlin Petroleum Company filed an Application for Exception from the provisions of 10 C.F.R. § 211.69, which prohibited it from filing amended entitlements reports (Form ERA-49) for the period February 1976 through September 1980. The DOE pointd out that in light of the magnitude of the firms recent profits, Champlin's purchase of excess entitlements did not cause a significant adverse impact on the firm. Accordingly, exception relief was denied. The important issues discussed in the Decision and Order were (i) the sufficiency of public notice before promulgation of the final clean-up rule and (ii) proper application of the clean-up rule to reports filed prior to the rule's August 1, 1981 effective date.

Deiter Bros. Fuel Co., Inc., 1/17/83, HEE-0038

Dieter Bros. Fuel Co., Inc. (Dieter Bros.) filed an Aplication for Exception from the provisions of EIA filing requirements. The firm sought to be relieved of the obligation to file Forms EIA-764A, Petroleum Product Sales Identification Survey, and EIA-172, Sales Report of Fuel Oil and Kerosene. The DOE onsidered the firm's argument that since it had participated in the EIA survey program for over a year, it should be relieved of any further obligation to participate. The DOE found that the forms would require little time to complete and that the firm would not suffer an unfair burden if required to file the forms. Accordingly, exception relief was denied

Lake Charles Refining Company, 1/17/83, BEE-0715

Lake Charles Refining Company filed an Application for Exception from the provisions of 10 CFR section 211.67 in which the firm sought to be issued entitlements for its

alleged inventory of crude oil at its new refinery. In considering the request, the DOE found that the firm had not shown that it had actually acquired a crude oil inventory for the new refinery. Accordingly, exception relief was denied. Lake Charles also requested that the DOE rescind its referral to the Office of Enforcement of discrepancy between the firm's reported runs-to-stills and crude oil receipts. In spite of the fact that Lake Charles contended that it had corrected the discrepancy by filing amended forms, the DOE found that the Office of Enforcement should be permitted to pursue an investigation and determine whether the firm had in fact violated DOE regulations.

Thompson Oil Company, Inc., 1/18/83, HEE–0017

Thompson Oil Company, Inc. (Thompson) filed an Application for Exception from the provisions of EIA filing requirements, in which the firm sought to be relieved of any further obligation to file Form EIA–0A, No. 2 Distillate Price Monitoring Report. In considering the request, the DOE found that Thompson did not show that in comparison to similar reporting firms, it was unfairly burdened by the reporting requirement. Accordingly, exception relief was denied.

Request for Modification and/or Rescission

Economic Regulatory Administration/ Olympia Exploration Company, 1/19/83 HRR–0028

The Economic Regulatory Administration filed a Motion for Modification of a Remedial Order issued to Olympia Exploration Company. In the RO, Olympia was found to have overcharged Diamond Shamrock in crude oil sales and was ordered to refund the overcharges directly to Diamond Shamrock. In its Motion, the ERA requested that the RO be modified to provide that the refund be deposited in an escrow account for ultimate disposition by the DOE. In considering the motion, the DOE found that decontrol of crude oil prices had caused a significant change in circumstances since the issuance of the Olympia RO in 1979. Specifically, the DOE found that as a result of decontrol, there was no longer any way to ensure that refunds received by Diamond Shamrock would be channeled through to ultimately injured customers. Diamond Shamrock argued that many of the refined products it sold at the time that the RO was issued were already decontrolled, and that the firm would thus not have been obliged to pass through refunds with respect to these products. The DOE rejected this argument, stating that as a participant in the Entitlements Program, Diamond Shamrock's entitlements benefits would have been reduced by any refund it had received from Olympia. Accordingly, the ERA Motion for Modification was granted.

Motion for Discovery

Atlantic Richfield Company, Office of Special Counsel, 1/18/83, BRD–1452, BRH–1452, HRD–0015, HRD–0001

Atlantic Richfield Company (Arco) filed Motions for Discovery and Evidentiary Hearing in connection with a Proposed Remedial Order (PRO) issued to the firm by the Economic Regulatory Administration's Office of Special Counsel (OSC). In connection with that PRO, OSC filed a Motion for Discovery and a Motion for Protective Order. The PRO concerns Arco's reporting of its May 1973 costs of foreign equity crude oil in its Refiners' Monthly Cost Allocation Reports. Pursuant to the customary accounting procedures standards of the September 1973 amendments to the refiner price rule, Arco had originally reported its May 1973 as its tax reference prices. In 1976, Arco restated its May 1973 costs as its internal transfer prices, arguing that the arms-length standard of the October 1974 amendments to the refiner prices rule permitted the restatement of May 1973 costs in accordance with that standard.

In considering Arco's Motion for Discovery, the DOE found that the firm's requests for administrative record and contemporaneous construction discovery of the September 1973 and October 1974 amendments and other remaining requests for discovery did not seek relevant evidence. The DOE further found, however, that since Arco had already received some of the requested information in another OHA proceeding and since the submission of supplemental comments based on such information would not delay the proceeding, Arco should be permitted to file such comments. Accordingly, Arco's Motion for Discovery was granted in part. In considering Arco's Motion for Evidentiary Hearing, the DOE found that Arco's presentation of documentary evidence and testimony concerning certain aspects of its tax reference and internal transfer accounting methods would, at this stage of the proceeding, result in a clearer and more efficient particularization of relevant disputed issues than would the submission of documents. Accordingly, the Motion for Evidentiary Hearing was granted in part. In considering OSC's Motion for Discovery, the DOE found that some of the information requested by OSC, *i.e.*, information concerning Arco's accounting procedures, was relevant and material evidence. Accordingly, OSC's Motion for Discovery was granted in part. In considering OSC's Motion for Protective Order, the DOE noted that OSC's request for an order relieving OSC of the obligation to provide to Arco any information already furnished to Arco in the related OHA proceeding, was premised on an OHA grant of discovery against OSC. The DOE that since such an order had not been issued, the Motion should be dismissed.

An important principle set forth in the Decision and Order is that there is no ambiguity in the regulations concerning whether the October 1974 amendments permit the restatement of May 1973 costs of foreign equity crude oil and, therefore, contemporaneous construction discovery on that issue is not permitted. Specifically, the Decision and Order held that the October 1974 amendments do not apply to May 1973 costs and, therefore, do not provide a regulatory basis for the restatement of those costs.

Refund Applications

Nordstrom Oil Company/Pacific Intermountain Express Company, 1/17/83, RF22–1

Pacific Intermountain Express Company (PIE) filed an Application for Refund in which the firm sought a portion of the funds obtained by the DOE through a consent order entered into with the Nordstrom Oil Company. After analyzing PIE's claim, OHA found that the firm demonstrated that it made purchases of less than an average of 50,000 gallons a month from Nordstrom during the consent order period and that PIE therefore qualified for a refund under the procedures set forth for small firms and individuals in *Office of Enforcement (Nordstrom)*, 10 DOE ¶85,021 (1982).

Standard Oil Company (Indiana) Tel-Maple Car Care, Inc. et al., 1/19/83, RF21–1 et al.

Thirty-seven branded retailers of Amoco motor gasoline filed Applications for Refund in which they sought a portion of the funds obtained by the DOE through a consent order entered into with the Standard Oil Company (Indiana) (Amoco). All of these firms elected to apply for a refund based upon the presumption of injury and the formulae set forth in *Office of Special Counsel*, 10 DOE ¶85,048 (1982). Each retailer therefore submitted detailed information concerning its Amoco purchase volumes. After analyzing this information, the DOE concluded that each applicant should receive a refund based upon the total volume its Amoco motor gasoline purchases. Accordingly, these applications were granted in full.

Vickers Energy Corporation/B. Ethridge Oil Co., 1/17/83, RF1–156

B. Ethridge, a motor gasoline reseller, filed an Application for Refund in which the firm sought a portion of the funds obtained by the DOE through a consent order entered into with Vickers Energy Corporation. Because Ethridge's purchases from Vickers exceeded the 50,000 gallon per month small claims threshold, the DOE required the firm to establish that it had not passed through any alleged Vickers overcharges to its own customers. After considering detailed data submitted by Ethridge concerning its Vickers purchase volumes, acquisition costs, selling prices and banks of unrecouped increased product costs, the DOE found that the firm did experience an injury in some months as a result, of Vickers' pricing practices. Accordingly, the Application for Refund was granted in part.

Remedial Order

In the following case involving a Proposed Remedial Order, no Statement of Objections was filed. The DOE therefore issued the order in final form.

Company Name and Case No.

ERA/Kimco Petroleum, Inc., HRW–0019

Protective Order

The following firms filed an Application for Protective Order. The application, if granted, would result in the issuance by the DOE of the proposed Protective Order submitted by

the firms. The DOE granted the following application and issued the requested Protective Order as an Order of the Department of Energy.

Name and Case No.

Cities Service Co., Little America Refining Co., HEJ–0030

Dismissals

The following submissions were dismissed:

Name and Case No.

Gas Company of New Mexico, HEE–0047
Wilshire Oil Co., DRO–0225

Copies of the full text of these decisions and orders are available in the Public Docket Room of the Office of Hearings and Appeals, Room 1111, New Post Office Building, 12th and Pennsylvania Ave., NW., Washington, D.C. 20461, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except federal holidays. They are also available in *Energy Management: Federal Energy Guidelines,* a commercially published loose leaf reporter system.

Thomas L. Wieker,
Acting Director, Office of Hearings and Appeals.

March 9, 1983.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPTS–59115A TSH–FRL 2322–5]

Certain Chemicals; Approval of Test Marketing Exemptions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's approval of TM–83–20 and TM–83–21, two applications for test marketing exemptions (TME) under section 5(h)(6) of the Toxic Substances Control Act (TSCA). The test marketing conditions are described below.

EFFECTIVE DATE: March 9, 1983.

FOR FURTHER INFORMATION CONTACT: Theodore Jones, Acting Chief, Notice Review Branch, Chemical Control Division (TS–794), Office of Toxic Substances, Environmental Protection Agency, Rm. E–204, 401 M St. SW., Washington, DC. 20460, (202–382–3725).

SUPPLEMENTARY INFORMATION: Section 5(h)(1) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and to permit them to manufacture or import new chemical substances for test marketing purposes if the Agency finds that the manufacture, processing, distribution in commerce, use and disposal of the substances for test marketing purposes will not present any unreasonable risk of injury to health or the environment. EPA may impose restrictions on test marketing activities.

EPA has determined that test marketing of the new chemical substances described below, under the conditions set out in the applications, and for the time periods specified below, will not present any unreasonable risk of injury to health or the environment. Production volume, number of workers exposed to the new chemical, and the levels and duration of exposure must not exceed that specified in the applications. All other conditions described in the applications must be met. The following additional restrictions apply:

1. The applicant must maintain records of the date(s) of shipment(s) to each customer and the quantities supplied in each shipment, and must make these records available to EPA upon request.

2. A bill of lading accompanying each shipment must state that use of the substance is restricted to that approved in the TME.

TME 83–20

Date of Receipt: January 24, 1983.
Notice of Receipt: February 11, 1983 (47 FR 6395).
Applicant: Celanese Specialty Resins, a division of Celanese Corporation.
Chemical: Epoxy resin ester (Generic).
Use: Intermediate (Generic).
Import Volume: Confidential.
Number of Customers: 1.
Worker Exposure: Potential exposure to workers will be by the dermal route. A maximum of 15 workers will be potentially exposed for 8 hours/day for no more than 15 days.
Test Marketing Period: 45 days.
Commencing on: March 9, 1983.
Risk Assessment: Based on the type of polymer, molecular weight, and that the test market substance is not designed to be water soluble, no significant health or environmental concerns were identified. Therefore, the Agency finds that the test marketing activity will not result in an unreasonable risk.
Public Comments: None.

TME 83–21

Date of Receipt: January 25, 1983.
Notice of Receipt: February 11, 1983 (47 FR 6395).
Applicant: Confidential.
Chemical: Acrylate of polybutadiene (Generic).
Use: Confidential.
Import Volume: Confidential.
Exposure Information: The confidential use will have the potential for 10 workers to be exposed dermally per day with the potential for less than 10 kg/yr released to the air or land. No release to water is expected.
Test Marketing Period: 291 days.
Commencing on: March 9, 1983.
Risk Assessment: Based on its molecular weight and low solubility in water, the Agency has low health and environmental concerns for the test market substance. The test market substance may be a mild skin and eye irritant based on test data. The submitter recommends protective equipment when handling including chemical splash goggles and/or face mask and gloves, aprons, boots and face protection. The Agency expects the potential for such exposure to be low based on the automated nature of handling the test market substance.
Public Comments: None.

The Agency reserves the right to rescind approval of an exemption should any new information come to its attention which casts significant doubt on its finding that the test marketing activities will not present an unreasonable risk to health or the environment.

Dated: March 9, 1983.

Don R. Clay,
Director, Office of Toxic Substances.

[FR Doc. 83-6939 Filed 3-16-83; 8:45 am]
BILLING CODE 6560-50-M

[OPP 30070; PH–FRL 2324–2]

Pesticide Registration; Availability of Guidelines Documents

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: The nonregulatory pesticide registration guidelines are available to the public and can be purchased through the National Technical Information Service (NTIS). The NTIS order number and price for each guideline document is provided.

ADDRESS: Address orders to: National Technical Information Service, Att: Order Desk, 5285 Port Royal Rd., Springfield, VA 22161, (703–487–4650).

Orders for guidelines documents may be placed by telephone to the NTIS order desk and charged against a deposit account or American Express, VISA or MasterCard or sent by mail with check, money order or account number.

FOR FURTHER INFORMATION CONTACT: Frederick S. Betz, Hazard Evaluation Division (TS-769C), Office of Pesticides Programs, Environmental Protection Agency, Room 821, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703-557-7351).

SUPPLEMENTARY INFORMATION: The nonregulatory pesticide registration guidelines contain the standards for conducting acceptable tests, guidance on evaluation and reporting of data, detailed guidance on when data are required, and examples of acceptable protocols. Each of the guidelines documents, except Subdivisions H (Labeling) and K (Reentry Protection), is available to the public and can be purchased through the National Technical Information Service (NTIS). The Agency will publish a Notice of Availability when Subdivisions H and K are available.

For each guideline document desired, your order should specify the title of the guidelines document, the corresponding NTIS order number, and whether hard copy or microfiche is desired. The NTIS order number is the same for both microfiche and hard copy, but the price differs in hard copy.

Document titles, prices, and order numbers and prices are as follows:

Document title	NTIS order No.	Price (hard copy)	Price (microfiche)
Subdivision D—Product Chemistry	PB83-153880	$11.50	$4.50
Subdivision E—Hazard Evaluation: Wildlife and Aquatic Organisms	PB83-153906	11.50	4.50
Subdivision F—Hazard Evaluation: Humans and Domestic Animals	PB83-153916	16.00	4.50
Subdivision G—Product Performance	PB83-153924	12.50	4.50
Subdivision H—Labeling	(Not available at this time)		
Subdivision I—Experimental Use Permits	PB83-153932	10.00	4.50
Subdivision J—Hazard Evaluation: Nontarget Plants	PB83-153940	10.00	4.50
Subdivision K—Reentry Protection	(Not available at this time)		
Subdivision L—Hazard Evaluation: Nontarget Insects	PB83-153957	8.50	4.50
Subdivision M—Biorational Pesticides	PB83-153965	25.00	4.50
Subdivision N—Environmental Fate	PB83-153973	13.00	4.50
Subdivision O—Residue Chemistry	PB83-153981	10.00	4.50

Dated: March 3, 1983.

Edwin L. Johnson,

Director, Office of Pesticide Programs.

BILLING CODE 6560-50-M

FEDERAL MARITIME COMMISSION

[Docket No. 83-14]

Prudential Lines, Inc. v. Farrell Lines, Inc., Zim Container Service and Zim Israel Navigation Co., Ltd.; Filing of Complaint and Assignment

Notice is given that a complaint filed by Prudential Lines, Inc. against Farrell Lines, Inc., Zim Container Service and Zim Israel Navigation Co., Ltd. was served March 9, 1983. Complainant alleges that respondents have entered into a transshipment agreement for carriage of cargo from U.S. ports to ports in the Mediterranean via Haifa, Israel without prior approval by the Commission in violation of section 15 of the Shipping Act, 1916.

This proceeding has been assigned to Administrative Law Judge Norman D. Kline. Hearing in this matter, if any is held, shall commence within the time limitations prescribed in 46 CFR 502.61. The hearing shall include oral testimony and cross-examination in the discretion of the presiding officer only upon proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record.

Francis C. Hurney,

Secretary.

[FR Doc. 83-6963 Filed 3-16-83; 8:45 am]

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Acquisition of Bank Shares by a Bank Holding Company; Middle States Bancorporation, Inc.

The company listed in this notice has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire voting shares or assets of a bank. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated. With respect to the application, interested persons may express their views in writing to the address indicated. Any comment on the application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. Federal Reserve Bank of Chicago (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Middle States Bancorporation, Inc.*, East Moline, Illinois; to acquire 55.6 percent of the voting shares of Colona Avenue State Bank, East Moline, Illinois. Comments on this application must be received not later than April 11, 1983.

Board of Governors of the Federal Reserve System, March 11, 1983.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 83-6970 Filed 3-16-83; 8:45 am]

BILLING CODE 6210-01-M

Bank Holding Companies, Proposed de Novo Nonbank Activities; Northwest Bancorporation, et al.

The organizations identified in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to these applications, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any comment that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

The applications may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated. Comments and requests for hearing

should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than the date indicated.

A. **Federal Reserve Bank of Minneapolis** (Bruce J. Hedblom, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Northwest Bancorporation,* Minneapolis, Minnesota (investment advisory activities; the continental United States): To engage, through its proposed wholly-owned subsidiary, NWB Venture Capital Co., in investment advisory activities. These activities would be conducted from offices in Minneapolis, Minnesota; Portland, Oregon; and Lakewood, Colorado, serving the continental United States. Comments on this application must be received not later than April 11, 1983.

B. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *First Oklahoma Bancorporation, Inc.,* Oklahoma City, Oklahoma (financial advice; southwestern United States): To engage, through a subsidiary, First Invescorp, Inc., in providing financial advice to State and local governments and other tax-exempt organizations and entities, including research and development of financing programs tailored to match the financial resources of the customer with its financial needs in the most effective and cost-efficient manner in accordance with the Board's Regulation Y. These activities would be conducted from an office in Oklahoma City, Oklahoma, serving Oklahoma, Kansas, Arkansas, Missouri, Colorado, New Mexico and Texas. Comments on this application must be received not later than April 11, 1983.

Board of Governors of the Federal Reserve System, March 11, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

FEDERAL TRADE COMMISSION

Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register.**

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period:

Transaction	Waiting period terminated effective
(1) Transaction Number 83-027, Hampshire Investments, Inc.'s (Lee Garrett, UPE) proposed acquisition of voting securities of Stater Brothers Markets, (Petroleane Incorporated, UPE).	Feb. 15, 1983.
(2) Transaction Number 83-0102, Huntsman Chemical Corporation's (Jon M. Huntsman, UPE) proposed acquisition of certain assets of Royal Dutch Petroleum Company, (Shell Oil).	Feb. 25, 1983.
(3) Transaction Number 83-0107, Enserch Corporation's proposed acquisition of certain voting securities of Lesinger A.G.	Feb. 28, 1983.
(4) Transaction Number 83-0109, Gulf and Western Industries, Inc.'s proposed acquisition of certain voting securities of Brunswick Corporation.	Mar. 7, 1983.
(5) Transaction Number 83-0133, BRAE Corporation's proposed acquisition of all voting securities of American Sign and Indicator Corporation.	Do.
(6) Transaction Number 83-0124, Mesa Petroleum Company's proposed acquisition of substantially all assets of Corona Oil Company.	Do.
(7) Transaction Number 83-0131, AEA Investors, Inc.'s proposed acquisition of all voting securities of Niagra Frontier Services, Inc.	Do.
(8) Transaction Number 83-0139, Union Carbide Corporation's proposed acquisition of certain assets of RWA Family Trust 1982-1.	Do.
(9) Bell Industries, Inc.'s proposed acquisition of certain voting securities of Graham Electronics Supply, Inc.	Mar. 9, 1983.
(10) Tyson Food, Inc.'s proposed acquisition of certain voting securities of Valmac Industries, Inc., (Clifford C. & Dorothy P. Lane, UPE).	Do.
(11) Sandoz Ltd.'s proposed acquisition of all assets of the Sodyeco Division of Martin Marietta Corporation.	Do.

FOR FURTHER INFORMATION CONTACT: Patricia A. Foster, Compliance Specalist, Premerger Notification Office, Bureau of Competition, Room 301, Federal Trade Commission, Washington, D.C. 20580 (202) 523-3894.

By direction of the Commission.

Benjamin I. Berman,

Acting Secretary.

BILLING CODE 6750-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Alcohol, Drug Abuse, and Mental Health Administration

Life Course and Prevention Research Review Committee, NIMH, Reestablishment; Alcohol Psychosocial Research Review Committee, NIAAA, Reestablishment; Board of Scientific Counselors, NIAAA, Establishment

Pursuant to the Federal Advisory Committee Act of October 6, 1972 (5 U.S.C. Appendix I), the Alcohol, Drug Abuse, and Mental Health Administration announces approval and certification by the Secretary of Health

and Human Services, with the concurrence of the General Services Administration Committee Management Secretariat, of the following advisory committees:

Designation: *Life Course and Prevention Research Review Committee, NIMH.*

Purpose: The Committee shall advise the Secretary and the Director, National Institute of Mental Health, on the scientific and technical merit of applications for research grants, cooperative agreements, individual and institutional National Research Service Awards, and research and development contract projects relating to developmental life crisis; acute life crises and catastrophic events; the assessment of risk for mental illness and emotional disorders; the development and assessment of interventions to prevent the development of or reduce the incidence of mental disorders, serious behavioral deficits and significant emotional distress of persons and populations at risk; the etiology, diagnosis, course, treatment and prevention of mental disorders in mid and later life; stress and stress reduction; the assessment of cognitive, affective, social and family functioning or impairment in mid and later life. The Committee shall make recommendations on applications also to the National Advisory Mental Health Council. The members of this Review Committee shall survey, as scientific and professional leaders, the status of research and research education in their fields.

Expiration Date: Authority for the Life Course and Prevention Research Review Committee will expire November 30, 1984, unless the Secretary formally determines that continuance is in the public interest.

Designation: *Alcohol Psychosocial Research Review Committee, NIAAA.*

Purpose: The Committee shall advise the Secretary and the Director, National Institute on Alcohol Abuse and Alcoholism, on the scientific and technical merit of applications for research projects and cooperative agreements, research center grants, Research Scientist Awards, fellowships, institutional research training grants, and research contract projects. The applications include research on epidemiological, behavioral, psychological, genetic, clinical psychopharmacology, neurochemical, clinical and psychosocial factors related to alcohol abuse and alcoholism, and the prevention, diagnosis and treatment of alcoholism.

The Committee shall make recommendations on applications also to the National Advisory Council on Alcohol Abuse and Alcoholism. The members of this Committee shall survey, as scientific leaders, the status of research and research training in their field.

Expiration Date: Authority for the Alcohol Psychosocial Research Review Committee will expire December 31, 1984, unless the Secretary formally determines that continuance is in the public interest.

Effective with this reestablishment, the following committee was established:

Designation: *Board of Scientific Counselors, NIAAA.*

Purpose: The Committee shall advise the Secretary, the Administrator, ADAMHA, and the Director, NIAAA, through periodic visits to the intramural laboratories for assessment of the research in progress and evaluation of the productivity and performance of staff scientists.

Expiration Date: Authority for the Board of Scientific Counselors, NIAAA will expire January 28, 1985, unless the Secretary formally determines that continuance is in the public interest.

Dated: March 11, 1983.

William Mayer,

Administrator, Alcohol, Drug Abuse and Mental Health Administration.

BILLING CODE 4160-15-M

In the Subject Health Resources and Services Administration; Section 212 of the Immigration and Nationality Act; Delegation of Authority

Notice is hereby given that in furtherance of the delegation of authority by the Secretary of Health and Human Services to the Assistant Secretary for Health (48 FR 6782), the Assistant Secretary for Health has delegated to the Administrator, Health Resources and Services Administration, with authority to redelegate, the authorities delegated to the Assistant Secretary for Health under sections 212(a)(32) and 212(j) of the Immigration and Nationality Act (8 U.S.C. 1182(a)), as amended, providing for limitations on the entry of foreign medical graduates into the United States as immigrants or exchange visitors.

The June 20, 1977 delegation made by the Assistant Secretary for Health to the Administrator, Health Resources Administration, of authority pertaining to sections 212(a)(32) and 212(j) of the Immigration and Nationality Act has been superseded. Provision has been made for redelegations made to Health Resources Administration officials under sections 212(a)(32) and 212(j) of the Immigration and Nationality Act to continue in effect for no more than 90 days from the effective date of the delegation to the Administrator, Health Resources and Services Administration, provided they are consistent with the delegation to the Administrator, Health Resources and Services Administration.

The delegation to the Administrator, Health Resources and Services Administration, became effective on March 4, 1983.

Dated: March 4, 1983.

Edward N. Brandt, Jr.,

Assistant Secretary for Health.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Casper District Advisory Council; Meeting

Notice is hereby given in accordance with Pub. L. 92–463 that a meeting of the Casper District Advisory Council will be held on April 27, 1983.

The meeting will convene at 9:00 a.m. in the conference room of the Casper District Office, Bureau of Land Management, 951 Rancho Road, Casper, Wyoming, 82601.

The agenda will include: election of a chairman and reports on the minerals program, asset management, coal tracts for the 1984 sale, mid year budget review, the Buffalo Resource Area Wilderness Environmental Statement, and the Platte River Resource Management Plan.

The meeting is open to the public. Interested persons may make oral statements or file written statements for the board's consideration. Anyone wishing to make an oral statement should notify the Casper District Manager at the above address by April 25, 1983. Depending on the number of persons wishing to make oral statements, a per person time limit may be established by the District Manager.

Summary minutes of the meeting will be available for public inspection within 30 days following the meeting.

Dated: March 11, 1983.

Robert V. Abbey,

Acting District Manager.

BILLING CODE 4310-84-M

Eugene District Advisory Council; Meetings

Notice is hereby given in accordance with Section 309 of the Federal Land Policy and Management Act of 1976 that the first meeting of the newly appointed Eugene District Advisory Council will be held on April 19, 1983. A second meeting of the Eugene District Advisory Council will occur on May 3, 1983.

Both meetings will be held at 9:00 a.m. Pacific Standard Time in Room 227 in the Federal Building at 211 E. 7th, Eugene, Oregon.

The agenda for the April 19, 1983 meeting is: (1) Orientation to the Eugene District—areas, resources, staffing, etc.; (2) discussion of the district's current issues, including timber sales, vegetation management and resource conflicts; (3) the Eugene District's comprehensive planning system, its status and schedule; and (4) the organization of the Council and topics for future meetings.

The May 3, 1983 meeting will be devoted entirely to the comprehensive land-use planning process.

The meetings are open to the public. Interested persons may make oral statements to the Council between 11:30 a.m. and 11:45 a.m. on April 19, 1983 and May 3, 1983 or file written statements for the Council's consideration. Anyone wanting to make an oral statement must notify the District Manager, Bureau of Land Management, 1255 Pearl Street, Eugene, Oregon 97401, by April 12, 1983 for the April 19, 1983 meeting, and by April 27, 1983, for the May 3, 1983 meeting. Depending on the number of persons wanting to make oral statements, a per person time limit may be established by the District Manager.

Summary minutes of the Council meetings will be maintained in the District Office and be available for public inspection and reproduction during regular business hours within 30 days following the meetings.

Dated: March 8, 1983.

Dwight L. Patton,

District Manager.

BILLING CODE 4310-84-M

Bernalillo County New Mexico, Disposal of Public Lands; Notice of Realty Action

March 9, 1983.

AGENCY: Bureau of Land Management, Albuquerque District Office, Interior.

ACTION: Notice of Realty Action on proposed land disposal.

SUMMARY: This notice is to advise the public that the Albuquerque District, of the Bureau of Land Management (BLM) is proposing to dispose of approximately 481 acres of public land in the South

Valley of Albuquerque, Bernalillo County, New Mexico.

SUPPLEMENTARY INFORMATION: The BLM has determined that the 481 acres of public land described below are suitable for disposal under the Color-of-Title Acts of 1928 (45 Stat. 1069) and 1932 (47 Stat. 53; 43 U.S.C. 178), the Recreation and Public Purposes Act (43 U.S.C. 869 et seq).

Albuquerque, South Valley, Public Land Disposal Block

T. 9N., R. 2E., NMPM, Section 12: Lots 1, 2, and 3.
Sec. 13: Lots 1, 2, 3, 4, 5, and 6.
Sec. 24: Lots 2, 4, and 5.
Sec. 25: Lot 1, Section 25: Lots 1, 2, 3, and 4.
Sec. 26: Lot 1.
T. 9N., R. 3E., NMPM, Section 7: Lots 1, 2, and 3.
Comprising approximately 481 acres.

Disposal of these lands is consistent with: (1) The approved Land Use Recommendations of the BLM's 1979 Rio Grande, Management Framework Plan. (2) Their location as well as the physical characteristics and the private ownership of adjoining lands, make them difficult and uneconomical to manage as public lands. Consequently, disposal would best serve the public interest. (3) Various public meetings were held throughout the area during the land use planning process. An additional public meeting was held by the City of Albuquerque and BLM in 1982 to provide public review of proposed City park. (4) This Notice of Realty Action will be published once a week for three weeks in a newspaper of general circulation and will be sent to the New Mexico Congressional delegation and the relevant congressional committees by BLM.

The specific parcels of public land will be disposed of using the following "Tract Disposal Criteria" in descending order of priority:

1. *Color-of-Title.* Color-of-Title disposals will be made to any applicant within the disposal block who qualified under the Color-of-Title Acts.

2. *Public Purposes.* If unoccupied lands within the disposal block are identified for recreational or other public purposes by state or local governments or other qualified public purposes applicants, they will be considered for disposal under the R&PP Act.

Terms and Conditions of the disposals are: (1) All disposals will be made subject to prior valid existing rights. (2) All the minerals in the public lands covered by this Notice of Realty Action, along with the rights to explore, prospect for, mine and remove the minerals will be reserved to the United States. (3) Tracts which lie within the 100 years floodplain of the Rio Grande will be subject to EO 11988 which precludes the seeking of compensation from the U.S. or its agencies in the event existing or future facilities on those tracts are damaged by flood.

Additional information pertaining to this disposal including the environmental documents are available for review in the Rio Puerco Resource Area Office, 3540 Pan American Freeway, NE, Albuquerque, New Mexico 87107 or telephone 505–766–3114. For a period of 45 days from the date of this notice, interested parties may submit written comments to the Rio Puerco Resource Area Manager. Any adverse comments will be evaluated by the New Mexico State Director, Bureau of Land Management who may vacate or modify this realty action and issue a final determination.

In the absence of any action by the State Director, this realty action will become the final determination of the Department of the Interior.

Mathew N. Millenbach,
Associate District Manager.

[ES 31916, Survey Group 149]

Minnesota; Notice of Filing of Plat of Survey

1. On July 22, 1982, the plat representing the survey of an island in Borden Lake, T. 44 N., R. 28 W., Fourth Principal Meridian, Minnesota, which was omitted from the original survey, was accepted. It will be officially filed in the Eastern States Office, Alexandria, Virginia, at 7:30 a.m. June 15, 1983.

Fourth Principal Meridian, Minnesota

T. 44 N., R. 28 W.,
Tract No. 37.

2. The character of Tract No. 37 is similar in all respects to that of the adjacent surveyed lands.

Elevation on the island Tract No. 37 ranges up to approximately 50 feet above the ordinary high water mark of Borden Lake. Timber consists of ash, elm, basswood, oak, fir, and birch. A birch, 30 inches in diameter, was aged at approximately 120 years.

The elevation of the island, age of timber, presence of large tree stumps, similarity of timber succession on the island and mainland, composition of the soil and character of the channel, show conclusively that this body of land existed as an island in 1858 when Minnesota was admitted into the Union, and at all subsequent dates.

3. The island described above was found to be over 50 percent upland in character within the purview of the Swamp Lands Act of September 28, 1850 (9 Stat. 519). It is, therefore, held to be public land.

4. All inquiries relating to this island should be sent to the Deputy State Director for Lands and Minerals Operations, Bureau of Land Management, 350 South Pickett Street, Alexandria, Virginia 22304 by June 15, 1983.

Jeff O. Holdren,
Deputy State Director for Lands and Minerals Operations.

[ES 31917, Survey Group 145]

Minnesota; Filing of Plat of Survey

1. On July 21, 1982, the plat representing the survey of an island in Arrow Lake, T. 138 N., R. 42 W., Fifth Principal Meridian, Minnesota, which was omitted from the original survey, was accepted. It will be officially filed in the Eastern States Office, Alexandria, Virginia, at 7:30 a.m., June 15, 1983.

Fifth Principal Meridian, Minnesota

T. 138 N., R. 42 W.,
Tract No. 37.

2. The character of Tract No. 37 is similar in all respects to that of the adjacent surveyed lands.

Elevation on the island Tract No. 37 ranges up to approximately 5 feet above the ordinary high water mark of Arrow Lake. Timber consists of aspen, elm, ash, and basswood. The ground cover

consists of sumac. Tree stumps found on the island Tract No. 37 are not to be found in the channel where land would first be exposed by lowering of the lake level.

The elevation of the island, presence of large tree stumps, similarity of timber succession on the island and mainland, composition of the soil and character of the channel, show conclusively that this body of land existed as an island in 1858 when Minnesota was admitted into the Union, and at all subsequent dates.

3. The island described above was found to be over 50% upland in character within the purview of the Swamp Lands Act of September 28, 1850 (9 Stat. 519). It is, therefore, held to be public land.

4. All inquiries relating to this island should be sent to the Deputy State Director for Lands and Minerals Operations, Bureau of Land Management, 350 South Pickett Street, Alexandria, Virginia 22304, by June 15, 1983.

Jeff O. Holdren,

Deputy State Director for Lands and Minerals Operations.

BILLING CODE 4310-84-M

[M-57972]

Montana; Realty Action—Land Use Lease

AGENCY: Bureau of Land Management, Miles City District Office, Interior.

ACTION: Notice of Realty Action M-57972, lease of public lands for sanitary land fill purposes in Custer County.

SUMMARY: The Bureau of Land Management, Miles City District, is proposing to lease approximately 30 acres within the following described lands to Custer County for a sanitary land fill, under Section 302 of the Federal Land Policy and Management Act of 1976 [43 U.S.C. 1732]: T. 9 N., R. 47 E., Section 28: E½SW¼, SW¼SE¼.

For a period of 45 days from the date of this notice, interested parties may submit comments to the Bureau of Land Management, Miles City District, P.O. Box 940, Miles City, Montana. Any comments will be evaluated by the Montana State Director, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this realty action will become the final determination of the Department of the Interior.

FOR FURTHER INFORMATION CONTACT: Information related to the proposed action, including the preliminary environmental assessment and land report, is available for review at the Miles City District Office, west of Miles City, Montana.

SUPPLEMENTARY INFORMATION: The purpose of this notice is to allow for public comment prior to processing Custer County's application. All environmental consequences anticipated by this action have been analyzed and there does not appear to be any reason to reject this proposal. The proposed site has suitable soils and the hydrology on the site will not be adversely affected. Custer County will pay the fair market rental value as determined by a formal appraisal.

Dated: March 11, 1983.

Ray Brubaker,

District Manager.

Sec. 29, W½SW¼;
Sec. 32, N½NW¼, (less R/W);
Sec. 36, NW¼, S½.

Comprising 20,884.60 acres of State Land of which 3,730.05 acres are in Crook County; 6,440.84 acres are in Deschutes County; 84.00 acres are in Gilliam County; 3,823.47 acres in Harney County; 4,480.00 acres are in Lake County; 156.00 acres are in Sherman County; 400.00 acres are in Wasco County; and 1,500.30 acres are in Wheeler County.

The Federal lands selected by the State of Oregon were not identified for exchange in the BLM land use plan. Notice is hereby given that the land use plans are amended to allow for the disposal of these lands through a land exchange with the State of Oregon.

One purpose of the exchange is in keeping with the Good Neighbor Policy of the Department of the Interior in providing for the needs of State and local governments. The State or Oregon will benefit by trading many small scattered parcels of land lying within larger blocks of Federal land in return for large blocks of good range land in a manageable unit. The Federal government will be in a position to provide more efficient management to the smaller parcels acquired from the State through the formation of a compact unit. The public interest will therefore be served by completing the exchange.

The value of the lands exchanged are approximately equal and the acreage will be adjusted or money will be used to equalize the values upon completion of the final appraisal of the lands.

The terms and conditions applicable to the exchange are:

1. Valid, existing rights including any right-of-way, easement or lease of record.

2. A reservation to the United States for rights-of-way for ditches and canals under the Act of August 30, 1980.

3. Access over existing roads which lead to other Federal lands.

4. A 10 foot wide easement will be retained for an existing and future stockwater pipelines. The existing line originates at Juniper Springs in the NE¼SE¼, Section 6, T. 22 S., R. 24 E., W.M., and extends in a western direction through Sections 1,2,3, and part of 4, T. 22 S., R. 23 E., W.M. In addition, the easement will continue westerly through Section 4 and two lateral lines will extend in a northerly direction through Sections 3 and 4, T. 22 S., R. 23 E., W.M.

Publication of this notice has the effect of segregating all of the above described Federal lands from appropriation under the public land laws and are further segregated from appropriation under the mining laws, but not from exchange pursuant to Section 206 of the Federal Land Policy and Management Act of 1976. The segregative effect of this notice will terminate upon issuance of patent or in two years, whichever occurs first.

Detailed information concerning the exchange , is available for review at the Prineville District Office of the Bureau of Land Management, 185 East 4th Street, Prineville, Oregon 97754.

for a period of 45 days interested parties may submit comments to the Prineville District Manager at the above address. Any adverse comments will be evaluated by the Oregon State Director, Bureau of Land Management, who may vocate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this realty action will become the final determination of the Department of the Interior.

Gerald E. Magnuson,

District Manager.

BILLING CODE 4310-84-M

[OR 34942 (A, B, C, and D)]

Oregon: Notice of Realty Action, Competitive Sale of Public Lands in Grant County, Oregon

March 9, 1983.

The following described four twenty-acre parcels have been examined and identified for a proposed disposal by sale under Section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750; 43 U.S.C. 1713), at no less than the appraised fair market value of $1,000 an acre ($20,000 a parcel).

Willamette Meridian

T. 13S., R. 31E.
Sec. 28: N1/2SW1/4SW1/4 (Parcel A)
Sec. 18: S1/2SW1/4SW1/4 (Parcel B)
Sec. 28: N1/2SE1/4SW1/4 (Parcel C)
Sec. 28: S1/2SE1/4SW1/4 (Parcel D)

The above described parcels, each comprising 20.00 acres, will be offered for competitive sale at the public land sale scheduled for June 1, 1983 at 10:00 A.M. The sale will be held in the Grant County Court House Building, Canyon City, Oregon.

The lands have been identified as unneeded in that they have not been used and are not required for any Federal purpose, the land's public values have been identified, and it has been determined that disposal would best serve the public interest. The sale is consistent with the Bureau's planning system and the proposed disposal of these lands has undergone public review and discussion. The land will not be offered for sale for at least 60 days after the date of this notice. Access to the tracts is not guaranteed.

Patent, when issued, will contain the following reservations in the United States:

1. A right-of-way thereon for ditches and canals constructed by the authority of the United States Act of August 30, 1890, 26 Stat. 391; 43 U.S.C. 945.

2. A right-of-way, OR 016812 dated May 3, 1966, for a 50 foot transmission line.

3. All mineral deposits in the lands so patented, and to it, or persons authorized by it, the right to prospect, mine, and remove such deposits from the same under applicable law and such regulations as the Secretary of the Interior may prescribe.

The following terms and conditions are also applicable to the sale.

1. Said property is located within the duly adopted Urban Growth Boundary area of the City of John Day and any use or development of such parcels is subject to approval in accordance with land use regulations applicable thereto.

2. The absence of guaranteed access to any such parcel could preclude the approval by the County of any use or development of the effected parcel.

3. Any use or development of a specific parcel would require prior approval from the County for subsurface sewage disposal.

4. If the boundaries of a subject parcel are not monumented, a survey would probably be required by the County prior to any development approval.

5. The sale of these lands will be subject to all prior existing valid rights.

6. No preference right will be given to adjoining private landowners. No bids will be accepted for less than the appraised price. Federal law requires that bidders be U.S. citizens or, in the case of a corporation, subject to the laws of any State of the United States. Proof of citizenship shall accompany the bid.

7. Upon disqualification of the apparent high bidder, the next high bid will be honored.

8. Those parcels not sold pursuant to this Notice of Realty Action shall remain available for sale on a continuing basis until sold, or withdrawn from sale. Subsequent purchases may be transacted at the Burns District Office in person during regular business hours.

The sale will be conducted by sealed and oral bid. Bids must be made by the principal or his agent at, or before, the time of the sale.

The highest bid will establish the sale price. The apparent high bidder will be required to submit a nonrefundable deposit of one-fifth of the full bid price immediately at the sale. The remainder of the full bid price shall be paid within 30 days of the sale. Failure to pay price within 30 days shall disqualify the apparent high bidder and the deposit shall be forfeited and disposed of as other receipts of sale.

All bids will be either returned, accepted, or rejected within 30 days of the sale date.

For a period of 45 days from the date of this Notice, interested parties may submit comments to the District Manager, Burns District Office. Any adverse comments will be evaluated by the District Manager, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the District Manager, this realty action will become the final determination of the Department of the Interior.

Detailed information concerning the sale is available for review at the Burns District Office, 74 South Alvord, Burns, Oregon 97720.

Dated: March 9, 1983.

Joshua L. Warburton,

District Manager.

BILLING CODE 4310-84-M

[U-49183]

Exchange of Public and State Lands Washington and Iron Counties, Utah; Realty Action

The following described lands have been determined to be suitable for disposal by exchange under Section 206 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716.

T. 34 S., R. 9 W.,
sec. 29, NE¼NE¼, SW¼NE¼, SE¼NW¼, SW¼SW¼, E½SW¼, W½SE¼
sec. 30, SE¼SE¼
sec. 31, Lots 2 and 3

T. 35 S., R. 10 W.,
sec. 1, Lots 1, 2, 4, 5, 6, SW¼NE¼, S½NW¼, W½SW¼, NE¼SW¼, NW¼SE¼
sec. 3, Lots 5, 6, 7, 8, N½SE¼
sec. 10, Lots 2, 3, 4, S½SE¼NE¼, SW¼NE¼, S½NW¼, E½SW¼, SE¼
sec. 11, Lots 1, 2, 3, 4, S½N½
sec. 15, N½NE¼, W½SW¼
Total 2,268.15 acres

In exchange, the Federal Government will acquire the following tracts of non-Federal land in Washington County from the Utah Division of Wildlife Resources.

T. 39 S., R. 16 W.,
sec. 16, NW¼NW¼, S½N½, S½
T. 40 S., R. 16 W.,
sec. 16, All
T. 40 S., R. 16 W.,
sec. 20, SE¼NW¼, E½SW¼, W½SE¼
sec. 21, S½SE¼
sec. 28, N½N½, SE¼NE¼, NE¼SE¼
sec. 29, N½, N½SW¼, SE¼SW¼, W½SE¼
sec. 30, E½NE¼, SW¼NE¼, SE¼NW¼, N½SE¼
Total 2,440 acres.

Upon publication of this notice these lands will be segregated from appropriation under the public land laws, including the mining laws.

The exchange would be subject to the following terms and conditions:

Exceptions:

1. A right-of-way for the existing road site situated in lots 1, 2, and 4, sec. 1, T. 35 S., R. 10 W., SLM, Utah for public access and use.

Reservations:

1. Rights-of-way SL-063114 and U-0149116 for State and Federal highways; U-1962 and EP-014 for powerlines; U-43865 for an access road; and U-422676 for a material site for highway purposes.

2. A right-of-way thereon for ditches and canals constructed by the authority of the United States.

3. All minerals including leasable, locatable, and salable (sand, gravel, borrow, etc.) in the lands above described, with the right to prospect for, mine, and remove the same, including the right of ingress and egress for such activities, under applicable law and such regulations as the Secretary may prescribe.

Detailed information concerning the exchange is available for review at the Dixie Resource Area Office, 24 E. St. George Blvd., St. George, Utah 84770. Interested parties may submit comments or protests to the District Manager, Cedar City District Office, 1579 North Main, P.O. Box 724, Cedar City, Utah 84720. Deadline for comments is May 6, 1983. Any adverse comments or protests will be evaluated by the District Manager who may vacate or modify this realty action. In the absence of any protest, this realty action will become the final determination of the Department.

March 9, 1983.

J. Kent Giles,

Acting District Manager.

BILLING CODE 4310-84-M

[W-61324]

Proposed Sale of Public Lands in Laramie County, Wyoming; Realty Action

March 9, 1983.

The following described lands have been found suitable for disposal and are proposed for sale pursuant to Section 203 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1713) at no less than fair market value.

Parcel	Legal description	Acreage	Value
1	T. 12 N., R. 60 W., 6th P.M., Wyo.: Sec. 20: Lots 1, 2, and 3.	1.33	$100
2	T. 13 N., R. 60 W., 6th P.M., Wyo.: Sec. 2: Lots 5 and 6.	14.82	1,700
3	T. 12 N., R. 62 W., 6th P.M., Wyo.: Sec. 2: Lots 1 and 2.	4.51	450
4	T. 12 N., R. 63 W., 6th P.M., Wyo.: Sec. 20: Lot 1.	0.36	100

Parcels 1 and 4 are very narrow strips of land on the Colorado border. These lands have potential for very limited agricultural use. Parcels 2 and 3 are larger tracts that have potential for agricultural or residential development.

The lands are being proposed for sale in order to facilitate land-use planning in the area and to enhance land-use compatibility with adjoining lands. These lots are small and irregularly shaped isolated parcels which are difficult to manage as part of the public lands. They are unsuitable for management by another federal agency. There are no significant resource values which would be affected by this disposal. The proposed sale is consistent with Bureau Planning and is compatible with County Plans. The public interest would be well served by making these lands available for public sale.

Patent for each parcel, if issued, would contain the following reservations to the United States:

1. A right-of-way thereon for ditches and canals constructed by the authority of the United States, Act of August 30, 1890, 26 Stat. 391; 43 U.S.C. 945.

2. All minerals with the right to explore, prospect for, mine, and remove under applicable law, and such regulations as the Secretary may prescribe. "All minerals" is defined as, but not limited to, metaliferous and non-metaliferous locatable minerals, leasable minerals such as oil gas, coal, sodium, potassium, and geothermal resources, and salable minerals such as sand and gravel. However, upon filing of an application under 43 CFR 2720, the State Director may convey the mineral interest if all requirements of the law are met.

3. The land would be sold subject to valid existing rights of record on the date of conveyance.

4. The sale of parcel 4 would be subject to oil and gas lease W–79434.

The lands, if sold, would remain subject to Laramie County planning and zoning. All lands have legal access except parcel 1. The successful bidder on parcel 1 would need to obtain legal access across approximately one-half mile of private land.

The proposed public land sale would be held on Wednesday, June 1, 1983, at the Wyoming State Office of the Bureau of Land Management, 2515 Warren Avenue, Cheyenne, Wyoming. Registration of bidders would begin at 1:00 p.m. and the proposed sale would start upon completion of registration.

Detailed information concerning the proposed sale, including the planning documents, and the land report/environmental assessment, is available for review at the Bureau of Land Management, Rawlins District Office, 1300 North Third Street, Rawlins, Wyoming 82301. No bid would be accepted for less than the appraised value and bids for a parcel must include all the land in the parcel. Federal law requires that bidders be U.S. citizens or, in case of corporations, subject to the laws of any state of the United States. We recommend the lands be inspected by prospective bidders prior to submitting a bid.

Bids must be made by a principal or his agent, either by sealed bid mailed or delivered to the Bureau of Land Management, Rawlins District Office, or oral bidding at the sale, if held. Bids delivered or sent by mail would be considered only if received at the Bureau of Land Management, Rawlins District Office, 1300 North Third Street, P.O. Box 670, Rawlins, Wyoming 82301, prior to 12:00 noon on Tuesday, May 31, 1983. Each bid must be in a sealed envelope accompanied by a certified check, money order, bank draft, or cashier's check, made payable to the Bureau of Land Management for the full amount of the bid. The envelopes must be marked in the lower left-hand corner as follows: "Bid Parcel No. ——, W–81324, Sale to be Held June 1, 1983."

The highest sealed bid on the parcel would determine the base of the oral bidding conducted the day of the sale. If two or more envelopes containing valid bids of the same amount are received, the determination of which is to be considered the highest bid shall be by drawing. The drawing shall be held by the authorized officer immediately following the opening of the sealed bids. The highest qualifying bid would be publicly declared on the day of the sale and oral bids would then be invited. After oral bids, if any are received, the highest qualifying bid would be declared by the authorized officer. The person declared to have entered the highest qualifying oral bid shall submit payment by cash, personal check, bank draft, money order, cashier's check, certified check, or any combination for the full bid price immediately following the close of the sale.

All bids would be either returned, accepted, or rejected in writing within 30 days of the sale date.

If any or all parcels do not sell at the June 1, 1983, sale, the sale will be adjourned and the unsold parcels would be reoffered on the last Wednesday of each month at the Rawlin District Office, 1300 North Third Street, Rawlins, Wyoming, until the parcel is sold or the sale is otherwise terminated. Please contact the Rawlins District Office of the Bureau of Land Management, P.O. Box 670, Rawlins, Wyoming 82301 (Phone: 307/324–7171) for further details.

For a period of 45 days from the date of this notice, interested parties may submit comments to the Rawlins District Manager, Bureau of Land Management, Rawlins District Office, 1300 Third Street, P.O. Box 670, Rawlins, Wyoming 82301. Any adverse comments will be evaluated by the District Manager, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the District Manager, this realty action will become the final determination of the Department of the Interior.

Jack Kelly,

Acting District Manager.

BILLING CODE 4310-84-M

[W-80207]

March 10, 1983.

Wyoming; Application

Notice is hereby given that pursuant to the Act of May 24, 1928 (49 U.S.C. 211–214), the county of Uinta, Wyoming, has applied for an airport lease for the following land for expansion of the Fort Bridger Airport:

Sixth Principal Meridian, Wyoming

T. 16 N., R. 115 W.,
Sec. 5, lots 3 and 4;
Sec. 6, lots 1 and 14, and NE¼SE¼;
Sec. 7, NE¼.
Containing 270.06 acres.

The purpose of this notice is to inform the public that the filing of this application segregates the described land from all other forms of use or disposal under the public land laws.

Interested persons desiring to express their views should promptly send their comments together with their name and address to the District Manager, Bureau of Land Management, P.O. Box 1869,

Highway 187 North, Rock Springs, Wyoming 82901.

David Pomerinke,

Acting Chief, Branch of Land Resources.

BILLING CODE 4310-84-M

Bakersfield District Advisory Council; Meeting

The Bakersfield District Advisory Council will convene at the Hilton Inn in Bakersfield. The agenda includes discussion of urgent District programs and concerns. These concerns include the District's FY 83 asset management program and organizational changes resulting from the recent BLM–MMS merger.

Dates and Time: The meeting will begin Monday, April 4 at 9:00 a.m. and conclude Tuesday, April 5 by 2:00 p.m. Members of the public wishing to make oral comments may do so Tuesday at 10:00 a.m.

Supplementary Information: This meeting is held in accordance with Pub. L. 92–463. The agenda will include: State Director introduction and comments; District administrative reorganization resulting from the BLM–MMS merger; presentation of the District's FY 83 asset management program; other resource management concerns; council organizational needs; and receiving public comments.

The meeting is open to the public. The public may make oral statements Tuesday, April 5 beginning at 10:00 a.m. If written comments will be presented for the councils consideration, they must be submitted before the close of the meeting.

Summary minutes of the meeting will be maintained in the District Office and available for public inspection and reproduction (during regular business hours) within 30 days following the meeting.

For further information, contact District Manager, Bakersfield District, Bureau of Land Management, 800 Truxton Avenue, Room 302, Bakersfield, California 93301.

Dated: March 11, 1983.

Glenn A. Carpenter,

Acting District Manager.

BILLING CODE 4310-84-M

California Desert District; Off Highway Vehicle Designation Decisions in the Kelso, Yucca Valley and Imperial Valley South Map Areas

AGENCY: Bureau of Land Management, Interior.

ACTION: Off highway vehicle designation decisions to open, close and limit use of routes of travel in the Kelso, Yucca Valley and Imperial Valley South map areas.

SUMMARY: Off highway vehicle designation decisions have been made to protect the resources of the area, to promote safe use of the lands and to minimize conflicts among users. The designations were prepared following the criteria defined in 43 CFR 8342.1 and with the authority of 43 CFR 8000.0–6, 8340, 8341, 8342 and 8364. The California Desert District Conservation Area had been previously mapped using a 21 series map set called the Motorized Vehicle Interim Access Guides. These guides provided the interim vehicle designations as made in the California Desert Conservation Area Plan until such a time as each map area could be more carefully examined. This notice serves to increase public awareness that proposed designation decisions have been completed on the following three map areas:

1. The Kelso map area, located in central Kern County containing approximately 165,000 acres of BLM administered land.

2. The Yucca Valley map area, located in southern San Bernardino County containing approximately 160,000 acres of BLM administered land.

3. The Imperial Valley South map area, located in southern Imperial County containing approximately 420,000 acres.

These designations supersede the Interim Critical Management Plan (ICMP) designations for these areas. The designation decisions were prepared with extensive public involvement. Public meetings were held in El Centro (July 8, 1982), Ridgecrest (August 30, 1982) and in Yucca Valley (August 12, 1982). Ad hoc citizen groups composed of interested members assisted. These groups represented the spectrum of public concerns and were involved in the preparation of the decisions.

DATES: These designations are effective upon publication and will remain in effect until rescinded (or modified by the authorized officer. Enforcement of these route designations will be implemented as routes are signed or as maps are printed and become available to the public.

ADDRESSES: Send inquiries to District Manager, California Desert District, 1695 Spruce Street, Riverside, California 92507. Route designations decision records and maps showing vehicle designations will be available for public review at the above address from 7:45 a.m. to 4:15 p.m. on regular work days.

FOR FURTHER INFORMATION CONTACT: Pamela M. Elliott (714) 351–6369.

SUPPLEMENTARY INFORMATION: Under the authority provided in the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.), the Endangered Species Act (16 U.S.C. 1531 et seq.), EO 11644 (Use of Off Road Vehicles on the Public Lands), and 3 CFR 74.332 as amended by EO 11989, 42 FR 26959 (May 25, 1977). Any person who violates or fails to comply with the vehicle route designations as governed by 43 CFR 8341 is subject to arrest, conviction and punishment pursuant to appropriate laws and regulations. Such punishment may be a fine of not more than $1000 or imprisonment for not longer than 12 months, or both.

Gerald E. Hillier,

District Manager.

[FR Doc. 83-6823 Filed 3-16-83; 8:45 am]

BILLING CODE 4310-84-M

[ES 31918, Survey Group 145]

Minnesota; Filing of Plat of Survey

1. On July 21, 1982, the plat representing the survey of an island in Little Toad Lake, T. 139 N., R. 39 W., Fifth Principal Meridian, Minnesota, which was omitted form the original survey, was accepted. It will be officially filed in the Eastern States Office, Alexandria, Virginia, at 7:30 a.m. June 15, 1983.

Fifth Principal Meridian, Minnesota

T. 139 N., R. 39 W.,
Tract No. 37.

2. The character of Tract No. 37 is similar in all respects to that of the adjacent surveyed lands.

Elevation on the islant Tract No. 37 ranges up to approximately 20 feet above the ordinary high water mark of Little Toad Lake. Timber consists of elm, oak, ash, basswood, birch, balsam fir, and white pine. The ground cover consists of hazel, dogwood, and cranberry. A white pine, 30 inches in diameter, was aged at approximately 150 years of age.

The elevation of the island, age of timber, presence of large tree stumps, similarity of timber succession on the island and mainland, composition of the soil and character of the channel, show conclusively that this body of land existed as an island in 1858 when Minnesota was admitted into the Union, and at all subsequent dates.

3. The island described above was found to be over 50% upland in character within the purview of the Swamp Lands Act of September 28, 1850

(9 Stat. 519). It is, therefore, held to be public land.

4. All inquiries relating to this island should be sent to the Deputy State Director for Lands and Minerals Operations, Bureau of Land Management, 350 South Pickett Street, Alexandria, Virginia 22304 June 15, 1983.

Jeff O. Holdren,

Deputy State Director for Lands and Minerals Operations.

[ES 31919, Survey Group 145]

Minnesota; Filing of Plat of Survey

1. On July 21, 1982 the plat representing the survey of an island in Stinking Lake, T. 140 N., R. 43 W., Fifth Principal Meridian, Minnesota, which was omitted from the original survey, was accepted. It will be officially filed in the Eastern States Office, Alexandria, Virginia, at 7:30 a.m. June 15, 1983.

Fifth Principal Meridian, Minnesota

T. 140 N., R. 43 W.,
Tract No. 37.

2. The character of Tract No. 37 is similar in all respects to that of the adjacent surveyed lands.

Elevation on the island Tract No. 37 ranges up to approximately 10 feet above the ordinary high water mark of Stinking Lake. Timber consists of elm, oak, ash, basswood, and box elder. The ground cover consists of cherry and hazel. An elm tree was found on the island measuring 45 inches in diameter, aged at approximately 140 years.

The elevation of the island, age of timber, presence of large tree stumps similarity of timber succession on the island and mainland, composition of the soil and character of the channel, show conclusively that this body of land existed as an island in 1858 when Minnesota was admitted into the Union, and at all subsequent dates.

3. The island decribed above was found to be over 50% upland in character within the purview of the Swamp Lands Act of September 28, 1850 (9 Stat. 519). It is, therefore, held to be public land.

4. All inquiries relating to this island should be sent to the Deputy State Director for Lands and Minerals Operations, Bureau of Land Management, 350 South Pickett Street, Alexandria, Virginia 2204 June 15, 1983.

Jeff O. Holdren,

Deputy State Director for Lands and Minerals Operation.

Minnesota; Filing of Plat of Survey

1. On July 22, 1982, the plat representing the survey of an island in Clearwater Lake, T. 149 N., R. 36 W., Fifth Principal Meridian, Minnesota, which was omitted from the original survey, was accepted. It will be officially filed in the Eastern States Office, Alexandria, Virginia, at 7:30 a.m., June 15, 1983.

Fifth Principal Meridian, Minnesota

T. 149 N., R. 36 W.,
Tract No. 37.

2. The character of Tract No. 37 is similar in all respects to that of the adjacent surveyed lands.

Elevation on the island Tract No. 37 ranges up to approximately 15 feet above the ordinary high water mark of Clearwater Lake. Timber consists of spruce, cedar, birch, oak, ash, elm, and fir. The ground cover consists of dogwood, willow and alder. An 18 inch diameter spruce was aged at approximately 90 years.

The elevation of the island, age of timber, presence of large tree stumps, similarity of timber succession on the island and mainland, composition of the soil and character of the channel, show conclusively that this body of land existed as an island in 1858 when Minnesota was admitted into the Union, and at all subsequent dates.

3. The island described above was found to be over 50 percent upland in character within the purview of the Swamp Lands Act of September 28, 1850 (9 Stat. 519). It is, therefore, held to be public land.

BILLING CODE 4310-84-M

Formal Designation of Open and Closed Areas; California Desert Conservation Area (CDCA)

AGENCY: Bureau of Land Management, Interior.

ACTION: Formal designation of areas open or closed to vehicle use in the California Desert Conservation Area (CDCA).

SUMMARY: The CDCA Plan was completed in 1980. One of the goals of the plan was to provide for appropriate areas for vehicle free play (open areas). These open areas were selected to ensure the protection of sensitive resources, to promote safe use of the public land and to minimize conflicts among users. A second goal of the plan was to minimize damage or degradation of the natural, cultural and aesthetic values of the desert; this necessitated closure of certain areas to off-highway vehicle use.

Approval of the CDCA Plan constituted the off-highway vehicle use designation of all lands in the CDCA. All open and closed areas became immediately designated when the plan was signed. However, formal designation in the **Federal Register** never occurred. This notice serves to give public notice for designating the 503,000 acres open to vehicle use and the 2,089,000 acres closed to vehicle use as approved in the CDCA Plan. The remaining 9,220,000 acres in the CDCA were designated as limited in the CDCA Plan; these areas will be further analyzed under a separate process that will designate individual routes of travel within the limited area as open, closed or limited to vehicle use.

The decision of the CDCA Plan to open and close the following areas was prepared following the criteria defined in 43 CFR 8342.1 and with the authority of 43 CFR 8000.0–6, 8340, 8341, 8342, and 8364.

DATES: Effective immediately upon publication.

ADDRESSES: Send inquiries to District Manager, California Desert District, 1695 Spruce Street, Riverside, California 92507. Maps showing the open and closed areas in the CDCA are available for public review at the above address from 7:45 a.m. to 4:15 p.m. on regular work days.

FOR FURTHER INFORMATION CONTACT: Pamela M. Elliott (714) 351–6369.

SUPPLEMENTARY INFORMATION: Under the authority provided in the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.), the Endangered Species Act (16 U.S.C. 1531 et seq.), EO 11644 (Use of Off Road Vehicles on the Public Lands), and 3 CFR 74.332 as amended by EO 11989 42 FR 26959 (May 25, 1977).

Any person who violates or fails to comply with the vehicle designations as governed by 43 CFR 8341 is subject to arrest, conviction and punishment pursuant to appropriate laws and regulations. Such punishment may be a fine of not more than $1,000 or imprisonment for not longer than 12 months, or both.

Area Designations

The following areas are identifed on the BLM map series entitled "Motorized Vehicle Interim Access Guides." The maps are available for review at the address listed above and from the Area Offices in Barstow, Ridgecrest, Needles, and El Centro.

Designated Open Areas

Designation applies to Bureau of Land Management Administered Lands:

Arroyo Salada
Razor Area
Dove Springs
Jawbone Canyon
Silurian Dry Lake
Ford Dry Lake
Panamint Dry Lake (South of Hwy 190)
Rice Valley Dunes
Mammoth Wash Area
Plaster City
Spangler Hills
Olancha Dunes
Dumont Dunes
Glamis/Gecko
El Mirage Dry Lake
Stoddard Valley
Johnson Valley
Buttercup Valley

Designated Closed Areas

Designation applies to Bureau of Land Management Administered Lands:

Desert Tortoise Natural Area
Darwin Falls
Mecca Hills (NW Half)
Squaw Spring
Salt Dry Lake
Mesquite Dry Lake
Ivanpah Dry Lake[1]
Soda Dry Lake[2,3]
Panamint Dry Lake (North of Hwy 190)
Silver Dry Lake[2,3]
Coyote Dry Lake [2,3]
Saline Dunes
Fish Creek Mountains
Pilot Knob
Turtle Mountain[5]
Orocopia Mountains[5]
Area West of Davies Valley (Skull Valley, Pinto Canyon Drainage)
Crucifixtion Thorn[5]
Panamint Dunes
Cadiz Dunes
Eureka Dunes
Superior Dry Lake[1,4]
Harper Dry Lake[1,4]
North Saline Valley[5]
Owens Peak[5]
El Paso Mountain[5]
Amargosa Canyon[5]
Clark Mountain[5]
Kelso Dunes[5]
Whipple Mountain[5]
Coyote Mountains
Greenwater Canyon
Desert Lily[5]
San Sebastian Marsh[5]
North Imperial San Dunes[5] (South of Mammoth Wash Open Area to State Route 78)

[1] Open to Non-Motorized Vehicle Access.
[2] Except by Permit.
[3] Except for Approved Route(s) of Travel.
[4] Limited Passage of Vehicles Across Area, No Motorized Free Play.
[5] Areas Designated Closed Under the Interim Critical Management Plan (ICMP) Which Remain Closed Under the CDCA Plan.

Gerald E. Hillier,
District Manager.

Bureau of Mines

Bureau Survey Form Submitted for Review

The extension for the collection of information listed below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Copies of the proposed information collection requirement and related forms and explanatory material may be obtained by contacting the Bureau's clearance officer at the phone number listed below. Comments and suggestions on the requirement should be made directly to the Bureau clearance officer and the Office of Management and Budget Interior Desk Officer at 202–395–7340.

Title: Helium Purchase Contract Application.
Bureau Form Number: 6–1504–X.
Frequency: On Occasion.
Description of Respondents: Purchasers of Government Helium.
Annual Responses: 19.
Annual Burden Hours: 5.
Bureau Clearance Officer: Robert L. Miller, 202–634–1125.

Dated: March 3, 1983.

Robert C. Horton,
Director.

Minerals Management Service

Oil and Gas and Sulphur Operations in the Outer Continental Shelf

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the receipt of a proposed development and production plan.

SUMMARY: Notice is hereby given that The Superior Oil Company has submitted a Development and Production Plan describing the activities it proposes to conduct on Lease OCS–G 3235, Block 139, High Island Area, offshore Texas.

The purpose of this Notice is to inform the public, pursuant to Section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service

is considering approval of the Plan and that it is available for public review at the Office of the Regional Manager, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana 70002.

FOR FURTHER INFORMATION CONTACT: Minerals Management Service, Public Records, Room 147, open weekdays 9 a.m. to 3:30 p.m., 3301 North Causeway Blvd., Metairie, Louisiana 70002, Phone (504) 837–4720, Ext. 226.

SUPPLEMENTARY INFORMATION: Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in Development and Production Plans available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979, (44 FR 53685). Those practices and procedures are set out in a revised § 250.34 of Title 30 of the Code of Federal Regulations.

Dated: March 10, 1983.

John L. Rankin,

Acting Regional Manager, Gulf of Mexico OCS Region.

BILLING CODE 4310-MR-M

Office of the Secretary

Colorado; Amendment of Wilderness Inventory Decisions

AGENCY: Department of the Interior.

ACTION: Amendment of Wilderness Inventory Decisions.

SUMMARY: This notice designates 16 areas totaling 44,730 acres for wilderness consideration pursuant to Section 202 of the Federal Land Policy and Management Act of 1976 (FLPMA) or for consideration for other forms of protective management. This notice also amends previous wilderness inventory decisions by the Bureau of Land Management for lands in Colorado, eliminating all or part of 12 wilderness study areas (WSA). The total area eliminated from WSA status under Section 603 of FLPMA is 17,876 acres. As noted above, part of that acreage will continue to be studied for wilderness consideration under Section 202 of FLPMA. The total area returned to the full range of multiple uses other than wilderness is 9,910 acres.

EFFECTIVE DATE: March 17, 1983. (Date of publication)

FOR FURTHER INFORMATION CONTACT: Colorado State Director, Bureau of Land Management, 1037 20th Street, Denver, Colorado 80202, telephone (303) 837–3393.

SUPPLEMENTARY INFORMATION:

Amendment of Wilderness Inventory Decisions

This notice completes the action necessary with respect to Bureau of Land Management (BLM) wilderness study areas in Colorado to bring the BLM wilderness review into compliance with recent decisions of the Interior Board of Land Appeals. Previous action on this subject was published in the **Federal Register** on December 30, 1982 (47 FR 58372).

Section 1. Consideration for Protective Management

The sixteen areas listed in Table 1 have been designated for wilderness consideration pursuant to Section 202 of the Federal Land Policy Management Act of 1976 (FLPMA) or for consideration for other forms of protective management. These areas were formerly identified as wilderness

study areas under Section 603 of FLPMA. They were either eliminated from that category on December 30, 1982, or they are being eliminated by Sections 2 and 3 of this decision.

Section 2. Split-Estate Lands

The lands listed as "split estate" in Table 2 are deleted from wilderness study area status, effective upon publication of this decision in the **Federal Register**. These are lands that were improperly identified for wilderness study under Section 603 of FLPMA. They consist of scattered tracts where the Federal Government owns the surface but where the subsurface mineral estate is nonfederally owned (referred to hereafter as split estate). In the wilderness study area (WSA) listed in Table 2, only the indicated acreage of split-estate lands is eliminated from wilderness study; the remainder of the WSA remains under wilderness study, and the boundary of the WSA has not been changed. The deletions do not affect the BLM's previously adopted conclusions as to the presence of wilderness characteristics.

The boundaries of the wilderness study areas listed in Table 3 are modified, effective upon publication of this decision in the **Federal Register**, to delete split-estate lands. Only the indicated acreage is eliminated from wilderness study. The remainder of the WSA remains under wilderness study, and the boundary change does not affect the BLM's previously adopted conclusions as to the presence of wilderness characteristics in the remaining WSA.

Section 3. Contiguous Areas

The areas listed in Table 4 are deleted from the status of wilderness study areas, effective upon publication of this decision in the **Federal Register**. These are lands that were improperly identified for wilderness study under Section 603 of FLPMA. These areas were found not to have wilderness characteristics by themselves, but were found to have those characteristics in association with contiguous wilderness candidate areas administered by the National Park Service.

Section 4. Management of Deleted Lands

All lands in Colorado deleted from wilderness study status by this decision in Tables 2, 3 and 4 or by the decision issued on December 30, 1982, (47 FR 58372) and not designated for further wilderness consideration in Table 1 of this notice are hereby released from management restrictions to protect their wilderness suitability. Of these lands, 636 acres (Bull Gulch) are being considered for Area of Critical Environmental Concern designation and will be managed to protect the identified scenic values. The remaining 9,910 acres will be managed for the full range of multiple uses other than wilderness and in conformance with existing land use plans and regulations for those areas.

This is a final decision of the Department of the Interior and is not subject to appeal under 43 CFR Part 4.

Garrey E. Carruthers,

Assistant Secretary.

March 14, 1983.

INTERSTATE COMMERCE COMMISSION

Motor Carriers; Permanent Authority Decisions; Restriction Removals; Decisions-Notice

The following restriction removal applications, are governed by 49 CFR Part 1165. Part 1165 was published in the Federal Register of December 31, 1980, at 45 FR 86747 and redesignated at 47 FR 49590, November 1, 1982.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1165.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the restriction removal applications are not allowed.

Some of the applications may have been modified prior to publication to conform to the special provisions applicable to restriction removal.

Findings

We find, preliminarily, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent with the criteria set forth in 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal statutory and regulatory requirements for common and contract carriers.

Please direct status inquiries to Team 2, at (202) 275-7030.

Volume No. OP2-109

Decided: March 9, 1983.

By the Commission, Review Board No. 3, Members Krock, Joyce and Dowell.

MC 139983 (Sub-No. 2)X, filed February, 24, 1983. Applicant: CAHOON FARMS TRUCKING, INC., P.O. Box 295 North Rose, NY 14516. Representative: Michael A. Wargula, 128 Sherburn Dr., Hamburg, NY 14075 (716) 648-0481. Sub-No. 1, to (1) change all one-way territorial movements to "between points in the U.S. (except AK and HI), under continuing contract(s) with named shippers"; and (2) broaden the commodity description from frozen prepared apples, frozen prepared cherries, and frozen foods, to "food and related products.

Please direct status inquiries to Team 5 at (202) 275-7289.

Volume No. OP5-115

Decided: March 11, 1983.

By the Commission, Review Board No. 2, Members Carleton, Williams and Ewing.

MC 128409 (Sub-14)X, filed February 10, 1983. Applicant: HAROLD MILLER TRUCKING, INC., P.O. Box 623, 2312 South 29th, Moorhead, MN 56560. Representative: Richard P. Anderson, Federal Square, 112 Roberts Street, P.O. Box 2581, Fargo, ND 58108. Lead and Subs 2, 5F and 7F permits: (A) Broaden from: (1) Lead (a) fertilizer, chemicals and twine (except liquids in bulk), to "chemicals and related products and textile mill products", and (b) plywood, millwork, and materials and supplies to "lumber and wood products", (2) Sub 2, steel storage tanks to "metal products", (3) Sub 5F, (a) sugar (except inedible sugar), in bulk, in tank vehicles and (b) materials and supplies used by sugar beet processing plants (except liquid commodities in bulk, in tank vehicles) to "food and related products", (4) Sub 7F, soda ash to "chemicals and related products", and (5) broaden all of the above listed permits to "between points in the U.S., under continuing contract(s) with named shippers."

MC 140168 (Sub-8)X, filed February 3, 1983. Applicant: FANETTI TRANSPORT, INC., Route 2, Bloomer, WI 54724. Representative: James A. Spiegel, Olde Towne Office Park, 6333 Odana Rd., Madison, WI 53719 (608) 273-1003. Sub Nos. 2, 5F, 6F, and 7F Certificates: Broaden (1)(a) and Subs 2 and 7F to "food and related products" from fresh inedible meats and dairy products (except in bulk), (b) Sub 6F to "chemicals and related products" from chemicals and solvents (except in bulk), and (c) Sub 5F to "building materials and materials, equipment and supplies used in the manufacture and sale of building materials" from building insulation and materials, equipment, and supplies used in the manufacture and sale of building insulation (except in bulk); (2) city points to countywide authority: Sub 2 to Clark and Barron Counties, WI (Greenwood and Cameron, WI), Leigh and Columbia Counties, PA (Allentown and Bloomsburg, PA), Cleveland and Mahoning Counties, OH (Cleveland and Sebring, OH), and Elkhart County, IN (New Paris, IN), Sub 5 to Chippewa County, WI (Bloomer, WI), Sub 6F to Marathon County, WI (Wausau, WI), and Sub 7F to Chippewa County, WI (Bloomer, WI); (3) expand one-way to radial authority in all subs; and (4) remove plantsite restriction in Sub 6F.

Agatha L. Mergenovich,

Secretary.

[Volume No. 26]

Motor Carriers; Applications, Alternate Route Deviations, and Intrastate Applications

Motor Carrier Intrastate Application(s)

The following application(s) for motor common carrier authority to operate in intrastate commerce seek concurrent motor carrier authorization in interstate or foreign commerce within the limits of the intrastate authority sought, pursuant to Section 10931 (formerly Section 206(a)(6)) of the Interstate Commerce Act. These applications are governed by 49 CFR Part 1161 of the Commission's Rules of Practice which provide, among other things, that protests and requests for information concerning the time and place of State Commission hearings or other proceedings, any subsequent changes therein, and any other related matters shall be directed to the State Commission with which the application is filed and shall *not* be addressed to or filed with the Interstate Commerce Commission.

By the Commission.

Agatha L. Mergenovich,

Secretary.

New York Docket No. T-10135, filed February 1, 1983. Applicant: DONALD K. BLAIR, d.b.a. A-1 GOUVERNEUR MOTOR SALES, R.F.D. 58, Box 339A, Gouverneur, NY 13642.

Certificate of Public Convenience and Necessity sought to operate a freight service, as follows: Transportation of: *Mobile Homes*, between all points in Jefferson and St. Lawrence Counties. Intrastate, interstate and foreign commerce authority sought. Hearing: date, time and place not yet fixed. Request for procedural information should be addressed to the New York State Department of Transportation, 1220 Washington Ave., State Campus, Albany, NY 12232, and should not be directed to the Interstate Commerce Commission.

New York Docket No. T-10145, filed February 22, 1983. Applicant: FUTURE TRANSPORT INC., 6 Lamb Place, Dix Hills, NY 11746. Representative: Peter B. Clerer, Esq., 275 Broad Hollow Rd., Melville, NY 11747.

Certificate of Public Convenience and Necessity sought to operate a freight service, as follows: Transportation of: *General commodities*, between all points in Nassau and Suffolk Counties and New York City. Intrastate, interstate and foreign commerce authority sought. Hearing: date, time and place not yet fixed. Request for procedural information should be addressed to the New York State Department of Transportation, 1220 Washington Avenue, State Campus, Albany, NY 12232, and should not be directed to the Interstate Commerce Commission.

New York Docket No. T-6110, filed February 22, 1983. Applicant: HAROLD'S EXPRESS, INC., 25 Liberty Street, Binghamton, NY 13901.

Certificate of Public Convenience and Necessity sought to operate a freight service, as follows: Transportation of: *General commodities*, between the Counties of Broome, Cayuga, Chemung, Chenango, Cortland, Delaware, Madison, Oneida, Onondago, Otsego, Steben, Tioga and Tompkins. Intrastate, interstate and foreign commerce authority sought. Hearing: date, time and place not yet fixed. Request for procedural information should be addressed to the New York State Department of Transportation, 1220 Washington Avenue, State Campus, Albany, NY 12232, and should not be directed to the Interstate Commerce Commission.

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property-that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier-that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker-that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly noted.

Please direct status inquiries about the following to Team 3 at (202) 275-5223.

Volume No. OP3-93

Decided: March 8, 1983.

By the Commission, Review Board No. 1, Members Parker, Chandler and Fortier.

MC 2934 (Sub-136), filed February 15, 1983. Applicant: AERO MAYFLOWER TRANSIT COMPANY, INC., 9998 North Michigan Rd., Carmel, IN 46032. Representative: W. G. Lowry (same address as applicant), (317) 875-1142. Transporting *general commodities* (except commodities in bulk and classes A and B explosives), between points in the U.S. (except AK and HI), under continuing contract(s) with GTE Corporation, of Stamford, CT.

BILLING CODE 7035-01-M

[Ex Parte No. 422]

Motor Carriers; Removal of Extraordinary (Financial) Conditions Imposed Upon Carrier and Noncarrier Holding Companies and Their Motor Carrier Subsidiaries and Removal of Jurisdiction

AGENCY: Interstate Commerce Commission.

ACTION: Final policy statement.

SUMMARY: The Commission is removing all extraordinary financial conditions previously imposed on carrier and noncarrier holding companies of motor carriers and their motor carrier subsidiaries and canceling regulation of noncarrier holding companies of motor carriers previously exercised under 49 U.S.C. 11348. The public interest in protecting individual motor carriers

from financial mismanagement has lessened as a result of the enactment of the Motor Carrier Act of 1980 (Pub. L. No. 96–296) and the Bus Regulatory Reform Act of 1982 (Pub. L. No. 97–261).

EFFECTIVE DATE: May 16, 1983.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275–7245 or Gloria E. Blazsik, (202) 275–6048.

SUPPLEMENTARY INFORMATION: A proposed policy statement was published at 47 FR 44521, October 7, 1982, notifying the public that the Commission was considering removing all extraordinary financial conditions previously imposed on carrier and noncarrier holding companies and their motor carrier subsidiaries, and canceling the Commission's regulation of noncarrier holding companies of motor carriers previously exercised under 49 U.S.C. 11348.

In the past, the Commission imposed conditions [1] in connection with the acquisition of a regulated carrier by a carrier or noncarrier holding company if the evidence demonstrated that the financial condition of the motor carrier was marginal, or past intercorporate practices of the carrier and noncarrier firm suggested that the assets of the carrier might be drained by the corporate parent. See *Am. Exp. Industries, Inc.-Invest. of Control,* 116 M.C.C. 851 (1974). We also discouraged commingling of carrier assets with those of noncarrier affiliates for the protection of the carrier. *See California Parlor Car Tours Co.-Pur.-Greyhound,* 127 M.C.C. 605 (1979). In addition, when we found that approval of the control transaction would significantly influence the national transportation system, the noncarrier holding companies were designated as carriers, subject to the provisions of 49 U.S.C. 11348. This required a holding company to comply with the accounting, reporting, and securities issuance provisions of 49 U.S.C. Subtitle IV to the extent specified in the individual case. *See, International Util.-Control-Pacific Intermountain,* 127 M.C.C. 752, 753 (1981).

The American Bus Association and The Greyhound Corporation filed comments supporting the proposal.

We conclude that there is no further need for imposing extraordinary financial conditions on carrier and noncarrier holding companies of motor carriers and their motor carrier subsidiaries, or subjecting noncarrier holding companies of motor carriers to our regulation under 49 U.S.C. 11348. In recent years there has been a marked change in the regulatory climate exemplified by the enactment of the Motor Carrier Act of 1980 (MCA) and the Bus Regulatory Reform Act of 1982 (Bus Act). Historically, we imposed regulation to prevent carrier failures due to financial mismanagement by a parent holding company of its motor carrier subsidiaries. We were concerned that carrier failures would adversely impact the shipping public. However, ease of entry fostered by the MCA eliminates this concern because any effect of financial mismanagement falls primarily on a carrier's stockholders, rather than on the shipping public. Second, repeal of our motor carrier securities jurisdiction in the Bus Act and the Commission's authority to exempt mergers, consolidation and acquisition of control transactions involving motor carriers of property from regulation (also mandated by the Bus Act) are further indications of congressional intent that the Commission should reduce its regulation in this area. Lastly, the complete support and lack of opposition in the comments is additional justification for eliminating this unnecessary regulation.

We will allow persons 30 days from publication to petition for continuation of the conditions in specific cases where they were imposed in the past, or for the continuation of our regulation over particular noncarrier holding companies which have been previously subjected to our jurisdiction. Parties seeking this relief will have the burden of proof, and will be required to demonstrate that the need to continue the conditions or regulation is in the public interest, and outweighs the need to remove regulatory restraints and the benefits associated with the removal.

This action will not significantly affect either the quality of the human environment or the conservation of energy resources.

This action is taken under the authority of 5 U.S.C. 553 and 49 U.S.C. 10101, 11301, and 11348.

Decided: March 10, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre, Simmons, and Gradison. Commissioner Simmons did not participate.

Agatha L. Mergenovich,

Secretary.

[FR Doc. 83–6936 Filed 3–16–83; 8:45 am]

BILLING CODE 7035–01–M

[1] The conditions prohibited, essentially, (1) Payment of cash dividends in excess of 50 percent of earnings in the dividend period, (2) making any advances, whether in cash or property, to affiliates, (3) encumbering any assets for noncarrier purposes, and (4) engaging in any other monetary or property transactions, except as necessary in the course of motor carrier operations.

[Ex Parte No. 387]

Exemptions for Contract Tariffs; Norfolk & Western Railway Co., et al.

AGENCY: Interstate Commerce Commission.

ACTION: Notices of provisional exemptions.

SUMMARY: Provisional exemptions are granted under 49 U.S.C. 10505 from the notice requirements of 49 U.S.C. 10713(e), and the below-listed contract tariffs may become effective on one day's notice. These exemptions may be revoked if protests are filed.

DATES: Protests are due within 15 days of publication in the Federal Register.

ADDRESS: An original and 6 copies should be mailed to: Office of the Secretary, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Douglas Galloway (202) 275–7278, or Tom Smerdon (202) 275–7277.

SUPPLEMENTARY INFORMATION: The 30-day notice requirement is not necessary in these instances to carry out the transportation policy of 49 U.S.C. 10101a or to protect shippers from abuse of market power; moreover, the transaction is of limited scope. Therefore, we find that the exemption requests meet the requirements of 49 U.S.C. 10505(a) and are granted subject to the following conditions:

These grants neither shall be construed to mean that the Commission has approved the contracts for purposes of 49 U.S.C. 10713(e) not that the Commission is deprived of jurisdiction to institute a proceeding on its own initiative or on complaint, to review these contracts and to determine their lawfulness.

Sub-No.	Name of railroad, contract No., and specifics	Review Board	Decided date
856	Norfolk and Western Railway Co., ICC–NW–C–5023, Supplement 1, (Bituminous coal) via Port of Lamberts Point, VA	[3]	3–9–83
857	Soo Line Railroad Co., ICC–SOO–C–0111, Supplement 6, (Starch, sulphuric acid, caustic soda, sodium silicate)	[1]	3–8–83

DEPARTMENT OF JUSTICE

Agency Forms Under Review

March 15, 1983.

OMB has been sent for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. The list has all the entries grouped into new forms, revisions, or extensions. Each entry contains the following information:

(1) The name and telephone number of the Agency Clearance Officer (from whom a copy of the form and supporting documents is available); (2) The office of the agency issuing this form; (3) The title of the form; (4) The agency form number, if applicable; (5) How often the form must be filled out; (6) who will be required or asked to report; (7) An estimate of the number of responses; (8) An estimate of the total number of hours needed to fill out the form; (9) An indication of whether Section 3504(H) of Pub. L. 96-511 applies; (10) The name and telephone number of the person or office responsible for OMB review.

Copies of the proposed forms and supporting documents may be obtained from the Agency Clearance Officer whose name and telephone number appear under the agency name. Comments and questions about the items on this list should be directed to the reviewer listed at the end of each entry and to the Agency Clearance Officer. If you anticipate commenting on a form but find that time to prepare will prevent you from submitting comments promptly, you should advise the reviewer and the Agency Clearance Officer of your intent as early as possible.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 83-24]

NASA Advisory Council, Aeronautics Advisory Committee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Aeronautics Advisory Committee, Informal Advisory Subcommittee on Aeronautical Propulsion Technology.

DATES: April 12, 1983, 8:30 a.m. to 5 p.m.; April 13, 1983, 8:30 a.m. to 5 p.m.

ADDRESS: National Aeronautics and Space Administration, Lewis Research Center, 21000 Brookpark Rd., Administration Building, Room 215, Cleveland, OH.

FOR FURTHER INFORMATION CONTACT: Mr. Cecil C. Rosen, III, National Aeronautics and Space Administration, Code RT–6, Washington, DC 20546; (202/755–3280).

SUPPLEMENTARY INFORMATION: The Informal Advisory Subcommittee on Aeronautical Propulsion Technology was established to assist the NASA in identifying and examining advanced propulsion technology requirements for future aeronautical vehicles and to recommend program additions, deletions, or changes in scope or emphasis that may be found necessary to support the overall NASA aeronautical research and technology objectives. The Chairperson is Dr. Montgomerie C. Steele and there are eleven members on the Subcommittee. The meeting will be open to the public up to the seating capacity of the room (approximately 40 persons including the Subcommittee members and participants).

Type of Meeting: Open

Agenda

April 12, 1983:

8:30 a.m.—FY 1984 Budget Review.
10 a.m.—Review of Turbofan Component Research.
11 a.m.—Review of Stall Recovery Research.
1 p.m.—Review of Noise Research Programs.
2:30 p.m.—Review of Alternative Fuels Program.
4 p.m.—Review of Proposed Altitude Wind Tunnel Rehabilitation.
5 p.m.—Adjourn.

April 13, 1983:

8:30 a.m.—Review of Materials Program for Propulsion.
9:30 a.m.—Review of Structures Program for Propulsion.
10:30 a.m.—Advanced Turboprop Program Update.
1:30 p.m.—Subcommittee Discussion and Formulation of Recommendations.
5 p.m.—Adjourn.

Dated: March 10, 1983.

Richard L. Daniels,

Director, Management Support Office, Office of Management.

BILLING CODE 7537-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–213]

Connecticut Yankee Atomic Power Co.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 54 to Facility Operating License No. DPR–61 to Connecticut Yankee Atomic Power Company (the licensee), which revised the Technical Specifications for operation of the Haddam Neck Plant (facility) located in Middlesex County, Connecticut. This amendment is effective as of its date of issuance.

This amendment deletes the Appendix B Environmental Technical Specifications (ETS) which pertain to non-radiological water quality-related requirements, as required by the Federal

Water Pollution Control Act Amendment of 1972.

The application for amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) The application for amendment dated February 15, 1983, (2) Amendment No. 54 to License No. DPR-61, and (3) the Commission's related letter of transmittal. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Russell Library, 119 Broad Street, Middletown, Connecticut 16457. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 11th day of March 1983.

For the Nuclear Regulatory Commission.

Dennis M. Crutchfield,

Chief, Operating Reactors Branch No. 5, Division of Licensing.

[FR Doc. 83-7000 Filed 3-16-83; 8:45 am]

BILLING CODE 7590-01-M

Consumers Power Co.; Hearings

March 11, 1983.

In the matter of Consumers Power Company (Midland Plant, Units 1 and 2); ASLBP Nos. 78-389-03 OL, 80-429-02 SP; Docket Nos. 50-329 OL, 50-330 OL; Dockets Nos. 50-329 OM, 50-330 OM; additional evidentiary hearings.

Notice is hereby given that an evidentiary hearing on operating license issues will be held on Monday, March 28, 1983, beginning at 9:30 a.m. As set forth in our notice dated March 9, hearings will also be held on March 29-April 1, 1983, beginning at 9 a.m. each day. As also set forth in the March 9 notice, oral limited appearance statements will be heard on Tuesday morning, March 29, 1983.

All of the above hearings will be held in Room E, Quality Inn Central, 1815 S. Saginaw Road, Midland, Michigan.

For the Atomic Safety and Licensing Board.

Charles Bechhoefer,

Chairman, Administrative Judge.

BILLING CODE 7590-01-M

[Docket No. 50-387]

Pennsylvania Power & Light Co., et al.; Issuance of Amendment To Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 12 to Facility Operating License No. NPF-14, issued to Pennsylvania Power & Light Company and Allegheny Electric Cooperative, Inc., for Susquehanna Steam Electric Station, Unit 1 (the Facility) located in Luzerne County, Pennsylvania. This amendment modifies license condition 2.C.(5) to clarify blocking or maintenance of valves in the closed position as only being required in operational conditions other than cold shutdown or refueling, and requires the licensee to maintain each containment purge and vent isolation valve greater than 3-in. nominal diameter in one of the following conditions: (1) Closed and electrically prohibited from opening, (2) blocked so as not to permit opening by more than 50 degrees, or (3) operated to permit opening by more than 50 degrees after demonstrating that the valves are qualified to close from the full open position against peak LOCA pressure, and are also qualified per the criteria of Branch Technical Position CSB 6-4. This amendment is effective as of the date of issuance.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) The application for the amendment dated September 14, 1982 as amended by licensee letter dated October 29, 1982; (2) Amendment No. 12 to License NPF-14, dated March 9, 1983; and (3) the Commission's evaluation dated March 9, 1983. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555, and at the Osterhout Free Library, Reference Department, 71 South Franklin Street, Wilkes-Barre, Pennsylvania 18701. A copy of items (1), (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 9th day of March 1983.

For the Nuclear Regulatory Commission.

A. Schwencer,

Chief, Licensing Branch No. 2, Division of Licensing.

BILLING CODE 7590-01-M

[Docket 50-267]

Public Service Company of Colorado; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 33 to Facility Operating License DPR-34 issued to the Public Service Company of Colorado, which revised Technical Specifications for operation of the Fort St. Vrain Generating Station (the facility) located in Platteville, Colorado. The amendment is effective as of the date of issuance.

The amendment revises the Technical Specifications to update various surveillance requirements related to the In-Service Inspection and Testing Program.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since this amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of this amendment.

For further details with respect to this action, see (1) The application for amendment dated October 15, 1982, as superseded by letter dated February 22, 1983, (2) Amendment No. 33 to Facility Operating License DPR-34; and (3) the Commission's related Safety Evaluation. These items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC 20555, and at the Greeley Public Library, City Complex Building, Greeley, Colorado. A copy of items (2) and (3) may be obtained upon request to the U.S. Nuclear Regulatory Commission, Regional Administrator, Region IV, 611 Ryan Plaza Drive, Suite 1000, Arlington, Texas 76011, Attention: Director, Division of Resident, Reactor Projects and Engineering Programs.

Dated at Arlington, Texas, this 8th day of March 1983.

For the Nuclear Regulatory Commission.

T. F. Westerman,
Acting Chief, Reactor Project Branch 1.

[Docket No. 50-206]

Southern California Edison Co. et al.; Issuance of Amendment to Provisional Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 67 to Provisional Operating License No. DPR-13, issued to Southern California Edison Company and San Diego Gas and Electric Company (the licensees), which revised the Technical Specifications for operation of the San Onofre Nuclear Generating Station, Unit No. 1 (the facility) located in San Diego County, California. The amendment is effective as of its date of issuance.

The amendment deletes Section 2.0 of the Appendix B Environmental Technical Specifications (ETS) which pertain to the non-radiological water quality-related requirements, as required by the Federal Water Pollution Control Act Amendments of 1972.

The application for amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4), an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) The application for amendment dated January 7, 1983, (2) Amendment No. 67 to Provisional Operating License No. DPR-13, and (3) the Commission's related letter of transmittal. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the San Clemente Branch Library, 242 Avenida Del Mar, San Clemente, California. A single copy of items (2)

and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director of Licensing.

Dated at Bethesda, Maryland, this 11th day of March 1983.

For the Nuclear Regulatory Commission.

Dennis M. Crutchfield,

Chief, Operating Reactors Branch No. 5, Division of Licensing.

BILLING CODE 7590-01-M

Applications for Licenses To Export Nuclear Facilities or Materials

Pursuant to 10 CFR 110.70(b) "Public notice of receipt of an application," please take notice that the Nuclear Regulatory Commission has received the following applications for export licenses. A copy of each application is on file in the Nuclear Regulatory Commission's Public Document Room located at 1717 H Street, NW., Washington, D.C.

A request for a hearing or a petition for leave to intervene may be filed within 30 days after publication of this notice in the **Federal Register**. Any request for hearing or petition for leave to intervene shall be served by the requestor or petitioner upon the applicant, the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, The Secretary, U.S. Nuclear Regulatory Commission and the Executive Secretary, Department of State, Washington, D.C. 20520.

In its review of applications for licenses to export production or utilization facilities, special nuclear material or source material, noticed herein, the Commission does not evaluate the health, safety or environmental effects in the recipient nation of the facility or material to be exported. The table below lists all new major applications.

Dated this 10th day of March at Bethesda, Maryland.

For the Nuclear Regulatory Commission.

Marvin R. Peterson,

Acting Assistant Director, Export/Import and International Safeguards, Office of International Programs.

FEDERAL REGISTER (EXPORTS)

Name of applicant, date of application, date received, application number	Material type	Material in kilograms		End-use	Country of destination
		Total element (additional)	Total isotope (additional)		
Exxon Nuclear Co., Feb. 23, 1983–Feb. 28, 1983, XSNM01903(01).	3.5 Percent enriched uranium	2,650	93	Increased quantity of material authorized for export for use as fuel in Oskarshamn, Unit I.	Sweden.
Edlow Int'L, Feb. 23, 1983–Feb. 28, 1983, XSNM02021.	3.45 Percent enriched uranium	8,601	297	Routine reload of fuel for Genkai Unit I	Japan.
Mitsui & Co., Feb. 28, 1983–Mar. 2, 1983, XSNM02032.	3.95 Percent enriched uranium	13,418	463	Routine reload of fuel for Fukushima I, Unit 5	Japan.
Edlow Int'L, Feb. 28, 1983–Mar. 2, 1983, XSNM02033.	2.95 Percent enriched uranium	14,410	382	Routine reload of fuel for Mihama Unit 2	Japan.
Marubeni America, Feb. 28, 1982–Mar. 7, 1983 XSNM02027.	3.95 Percent enriched uranium.	23,714	885	Reload of fuel for Shimane Unit No. 1	Japan.
Transnuclear, Inc., Mar. 7, 1983–Mar. 7, 1983, XSNM02029.	4.00 Percent enriched uranium.	19,750,000	593,200	Reload fuel for Forsmark I	Sweden.
	4.05 Percent enriched uranium.	[1]6,000	[1]243		

[1]Sample quantity.

Regulatory Guide; Issuance and Availability

The Nuclear Regulatory Commission has issued a revision to a guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Regulatory Guide 5.59, Revision 1, "Standard Format and Content for a Licensee Physical Security Plan for the Protection of Special Nuclear Material of Moderate or Low Strategic Significance," describes the information needed in the physical security plan required as part of an application for certain licenses to possess, use, or transport special nuclear material of moderate or low strategic significance and recommends a format for its presentation.

Comments and suggestions in connection with: (1) Items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time. Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Copies of active guides may be purchased at the current Government Printing Office price. A subscription service for future guides in specific divisions is available through the Government Printing Office. Information on the subscription service and current prices may be obtained by writing to the U.S. Nuclear Regulatory Commission, Washingon, D.C. 20555, Attention: Publications Sales Manager.

(5 U.S.C. 552(a))

Dated at Silver Spring, Maryland this 9th day of March 1983.

For the Nuclear Regulatory Commission.

Robert B. Minogue,

Director, Office of Nuclear Regulatory Research.

BILLING CODE 7590-01-M

NATIONAL TRANSPORTATION SAFETY BOARD

Investigation Authority, and Availability of Reports and Responses

Investigation Authority

Pursuant to the provisions of Section 304(b)(1) of the Independent Safety Board Act of 1974 (49 U.S.C. 1903(b)(1)), Edwin R. Butler, Investigator-in-Charge, is hereby designated

and authorized to administer oaths, issue and serve subpoenas, and require by such subpoenas the attendance and testimony of witnesses, and the production of such evidence as may be deemed advisable and necessary in the matter of investigation of a Missouri Pacific Railroad Company side collision of two freight trains at Possum Grape, Arkansas, on October 3, 1982 (Docket ATL–83–A–R001), conducted pursuant to Section 304(a) of the Independent Safety Board Act of 1974 (49 U.S.C. 1903(a)).

Dated: March 2, 1983.

Jim Burnett,

Chairman.

Reports Issued

Railroad Accident Report: Derailment of Southern Pacific Transportation Company Train No. 01–BSMFF–05 Carrying Radioactive Material, Thermal, California, January 7, 1982 (NTSB–RAR–83–1).

Highway Accident Report: Pattison Head Start Center School Van Run-Off Bridge and Fire, near Hermanville, Mississippi, December 17, 1981 (NTSB–HAR–82–5).

Recommendation Responses From

Aviation—*Federal Aviation Administration: Jan. 24: A–82–62 and –63:* Agrees that the United Control Corporation (Sundstrand) V–557 cockpit voice recorder (CVR) has a history of occasional poor performance, some of which has been attributed to maintenance. However, preliminary information does not dictate that a costly random sampling check of the V–557 CVR operators' units and their associated maintenance programs is necessary. Issued Maintenance Bulletin No. 23–17 on Oct. 22, 1982, regarding Scheduled Preventive Maintenance Requirements. The recommended requirement for removal of the V–557 CVR after 2 years would be extremely costly without apparent offsetting safety benefit. Is reevaluating all CVR/flight data recorder devices. *Jan. 28: A–81–36 through –38:* Review of these recommendations regarding rolled thread lift strut forks on Piper aircraft is taking longer than anticipated. *Jan. 28:A–81–67:* Will issue an operations bulletin to alert field inspectors to discuss the hazards associated with a poorly planned approach and emphasizing the longer landing distances that may be required (decreased performance) when landing on wet or icy runways. *Jan. 28: A–82–145:* Believes that existing regulatory requirements under 14 CFR 135 provide significantly enhanced safety measures compared to rules governing nonrevenue single-pilot IFR operations, and in conjunction with existing airplane certification requirements, appropriately addresses human engineering aspects as a basis for certification of single-pilot IFR operations. *Jan. 28: CY–70–42, Part 4; A–77–70; and A–80–125 through –131:* Review of recommendations regarding adequacy of occupant protection in general aviation aircraft is taking longer than expected. *Jan. 28: A–82–53:* Issued Airworthiness Directive 82–23–07 on Oct. 28, 1982, requiring a one-time inspection of deicing boots on the Ratier-Figeac model FH 146 propellers. *A–82–54:* The propeller manufacturer will conduct experiments on the development of insulation resistance versus temperature and time on a blade with an overheated area. *A–82–55:* Is monitoring the activities between representatives of Aerospatiale and Ratier-Figeac, under cognizance of the French authorities, in reviewing the design of the Ratier-Figeac model 146 propellers for compatible composition of the deicing boot, its adhesive material, and the propeller blade material in the event it is exposed to excessive heat. *Jan. 31: A–80–90 through –92:* Established a regulatory project regarding flexible, crash-resistant fuel lines, self-sealing frangible fuel line couplings, and light-weight, flexible, crash-resistant fuel cells. *A–80–94:* Is reviewing the recommendation to assess the feasibility of requiring the installation of selected crash-resistant fuel system components, made available in kit form from manufacturers, in existing general aviation aircraft on a retrofit basis. *Jan. 31: A–82–14:* Issued Air Traffic Service Bulletin No. 82–2, dated Dec. 1982, pertaining to winter operations, including aircraft icing. *Feb. 2: A–79–76 through –78:* Issued Change 34 to FAA Order 8430.17, Air Carrier Operations Bulletins (ACOB), which transmits ACOB No. 1–76–23, Brace for Impact Positions. *Feb. 7: A–82–94;* Will issue an advisory circular regarding external opening instructions/identification on airplanes equipped with external openable emergency exits. *Feb. 7: A–823–146:* Cancellation at this time of the waiver of the FAA Handbook "Air Traffic Training," 3120.4F, Chapter 3, Section 2, Paragraph 100.C(3), regarding instructor techniques training prior to being assigned to conduct on-the-job training would not enhance the safety of flight or the training of new controllers, but in certain critical facilities would constrain the rebuilding of the air traffic control system and would not add to the safety of control operations. *A–82–147:* Notice 3120.72, transmitted to the field on Jan. 4, 1983, provides guidance to air traffic control facility managers for the assignment of on-the-job training instructors. *A–82–148:* Provided written instructions to regional air traffic division and facility managers concerning guidance on the time and workload characteristics for utilizing newly trained OJT instructors. *A–82–149:* The team-assigned Evaluations, Proficiency and Procedures Specialist concept has not proven to be cost-effective, particularly at larger ATC facilities. An effective training program should be standardized and managed by a responsible assistant facility manager or the manager himself. *Feb. 8: A–81–75 and –76:* Developing an Advisory Circular to provide guidance on cockpit noise measurement, noise levels above which communication aids would be desirable, and remedies that can be used in the event that high noise levels are encountered. *Feb. 9: A–80–115:* Deliveries of color weather radar displays to center weather service units at air route traffic control centers are expected to begin in February 1983 and continue through May 1983. *Feb. 10: A–80–36 and –37:* A National Institutes of Health study on the applicability and validity of the "age 60 rule" for pilot retirement stated that there is a lack of precise, reliable, longitudinal, medical, and performance data on older pilots concerning the validity, with respect to piloting, of currently tests of perceptual cognitive function. FAA has issued an Advance Notice of Proposed Rulemaking to solicit information to be used in determining the feasibility of a program to gather data regarding the use of older pilots in air carrier operations. FAA study will be limited to crewmembers operating under 14 CFR Part 121. FAA does not, at this time, expect to impose age restrictions under other CFR operating rules. *Feb. 10: A–81–2:* Believes that the special Quality Assurance Systems Analysis Review Team Audit Report on the B.F. Goodrich Company, dated Jan. 22, 1981, satisfactorily covered the manufacturer's compliance with current regualtory requirements governing production certification and specifically the issuance and approval of service bulletins, investigation and reporting of service difficulties, maintenance of appropriate production and inspection records, and coordination of service difficulties with primary airframe manufacturers. *A–81–4:* Believes that issuing an advisory circular on nondestructive testing techniques for air carrier inspection programs is unnecessary since FAA previously issued five maintenance bulletins which alterted field inspectors and the aviation industry to potential wheel and tire problems. *Feb. 18: A–82–68:* Issued Airworthiness Directive 82–27–02 on Dec. 10, 1982, requiring a one-time dye penetrant inspection of all the suspect Model 90–DHB propeller blades within 10 hours time in service from December 30, 1982. *Feb. 24: A–81–15:* Does not believe that an Airworthiness Directive requiring inspection of Cessna airplanes for seat interference and relocation of the forward seat stops is justifiable. *A–81–18:* Believes that the recommended procedure for locking the pilot's seat in position before the engine is started, contained in the Cessna Pilot's Operating Handbook, is adequate and that inclusion of an adjustment and locking check of front seats, belts, and shoulder harnesses on the "before takeoff" checklist is unnecessary. *Feb. 28: A–82–90:* Will issue a Notice of Proposed Rulemaking to require the installation of inboard stall strips to the wing leading edge of applicable Piper PA–36–112 airplanes. *Feb. 28: A–82–97:* Issued Notice of Proposed Rulemaking Docket No. 82–CE–40–AD on Dec. 30, 1982, regarding the Cessna Model 172 right-hand control yoke assembly problem. *Mar. 1: A–82–48 and –49:* Issued Docket No. 79–ASW–19 Amendment 39–4552 to Airworthiness Directive 68–04–04 on Jan. 19, 1983, applicable to Brantly Models B–2, B–2A, and B–2B helicopters requiring permanent marking of tail rotor blades to assist in identification of proper blades and prevent confusion during inspections and requiring that the tail rotor blade spar retention area exterior surface be left unpainted to facilitate daily visual inspections by maintenance personnel and daily checks by pilots. *Mar. 3: A–78–73:* Issued Advisory Circular 145–4 on Sept. 27, 1982, regarding inspection, retread, repair, and alterations of aircraft tires. *A–78–74:* Establishment of an uppper limit on the number of retread cycles allowed each model tire is not being considered at this time. *Mar.*

4: A–83–170: Will issue a General Aviation Airworthiness Alert (AC–43–16) regarding the engine control cable seizure on Cessna 300 and 400 series airplanes and the availability of Cessna Information Letter ME80–45 and its revisions which provides information to correct the problem. *Mar. 4: A–82–64 and –65:* Initiated a flight data recorder study to identify the available technology for, and associated cost and safety impact of requiring under 14 CFR 121.343, the installation on turbojet aircraft of digital flight data recorder systems capable of recording more extensive parameters. *Mar. 4: A–79–16 through –18:* Expects to issue Technical Standard Order C69A entitled, "Emergency Evacuation Slides, Ramps, and Slide/Raft Combinations," which would upgrade requirements of airplane evacuation slides pertaining to fire resistance, girt strength, and critical angle testing. Issuance of an Airworthiness Directive is not necessary. *A–79–20:* Considers that the redundancy required by the regulations for emergency evacuation systems and the requirement that deflated slides be usable for emergency evacuation provides an acceptable level of safety. *Mar. 4: A–82–61:* Will publish an Air Carrier Operations Bulletin to require Principal Operations Inspectors to require that air carrier training programs adequately cover the effects of aircraft leading edge contamination on aerodynamic performance. *A–82–62:* Will review taxi and takeoff checklists of all air carrier aircraft to ensure that all action items required for a successful takeoff are included. *A–82–63:* Will not issue an airworthiness directive either to require the installation and use of the ground operable wing thermal anti-ice system or to require increased takeoff speeds for the Boeing Model 737 operating in adverse weather because such action would imply that use of the system or increased takeoff speeds are an acceptable alternate means of complying with the operating rules. FAA actions to date have been aimed at increasing crew awareness of adverse weather operating problems and the need for strict compliance with operating rules. A revised Boeing 737 Operations Manual, with information for improved stall margins, when excess runway is available, by use of improved climb (takeoff overspeed) procedures for selected flap positions, has been sent to all B–737 operators. A revised Boeing 737 FAA-approved Airplane Flight Manual with similar information will be sent to all operators. Associated with the FAA's approval of the B–737 ground thermal anti-icing system on Jan. 14, 1983, is a revision to the FAA-approved Airplane Flight Manual which stipulates that the system is not to be used as a substitute for ground deicing/anti-icing and inspection procedures which are necessary to comply with operating rules. *A–82–64:* The provisions of Order 7210.7C, paragraph 3.b.(2), Flow Control Procedures, and Handbook 7210.3F, paragraph 1232, Gate Hold Procedures, are adequately meeting the objectives of minimizing aircraft departure delays at the runway. Gate hold procedures were discussed in the Dec. 1982 Air Traffic Service Bulletin, No. 82–2, Winter Operations. A future bulletin will emphasize the requirements of Order 7210.7C regarding notification of the Cental Flow Control Facility of anticipated or actual delays. *A–82–65:* Handbook 7110.65C will be amended to state that separation of aircraft is determined "at the time the departing aircraft commences takeoff roll," not at the time the departing aircraft is cleared to take off. When applied correctly, the procedures contained in Handbook 7110.65C, paragraph 743, remain a safe and viable method of separating arriving and departing aircraft in instrument weather conditions. *A–82–67:* Washington National Airport has acquired one 40-foot surplus Coast Guard cutter with modest icebreaking capability, one 22-foot Boston Whaler, and two air boats. Other equipment such as rafts and inflatable lines has been placed on land-based equipment as well as on the boats. Continuing to seek a mutual aid agreement with the District of Columbia concerning rescue response. *A–82–68:* Completing a field survey of water rescue capabilities at designated airports. *A–82–69:* Will issue a Notice of Proposed Rulemaking concerning 14 CFR Part 139 which will address water rescue capability.

Railroad—*Southeastern Pennsylvania Transportation Authority: Feb. 7: R–80–1:* By Dec. 1980, the 600-volt d.c. power cables had been relocated on the exteriors of all Brill Electric Cars, and all interior control wires were insulated. *Feb. 14: R–82–21:* Planning a grade crossing/railroad safety program to enhance the operating safety of all regional high-speed lines (commuter rail) which will include audiovisual aids and literature and be strategically directed to both hazardous material carriers and schools. *R–82–110:* All active automatic crossing protection on the Fox Chase Rapid Transit Line has been modified so that once a train initially shunts the circuit, a timing feature holds the shunt for 3 seconds. *R–82–111:* Modifying the inward opening passenger doors in the existing diesel rail cars to facilitate passenger evacuation in emergency situations is neither economically feasible nor does it facilitate egress during an emergency. *R–82–112:* The Transportation Operational Training Section will enhance its training and education program by emphasizing grade crossing hazards.

District of Columbia: Feb. 7: R–82–78: Fire Department plans to hire and train sufficient personnel to restore full-time, full-service rescue squad capability for two squad units by June 1983 and for the remaining two squad units by September 1983. *R–82–79:* Fire Department has written or rewritten, tested and revised two major emergency procedures for the management of large-scale incidents—"Standard Operating Procedures for Metrorail Incidents" and "Mass Casualty Incident Plan of Operations." *R–82–80:* Funding to expand the Fire Department Communication's Division computer storage capability to include all the information needed by the Fire Dispatcher for automatic assignment and response of units to multiple incidents has yet to be identified. *R–82–81:* In Nov. 1982, Fire Department conducted a comprehensive disaster simulation in conjunction with the Washington Metropolitan Area Transit Authority. Fire and rescue units from Maryland and Virginia participated, as well as seven District of Columbia and three Virginia hospitals.

Massachusetts Department of Public Utilities: Oct. 28: R–82–33, which recommended reevaluation of that part of paragraph 154, chapter 160, of the Massachusetts General Laws Annotated which requires, ". . . one brakeman for the last car in every freight train to be stationed thereon . . ." to determine the advisability and necessity of having a brakeman so positioned, and that if it is found necessary, specify the accommodations that shall be provided: Believes that Section 711 of the Regional Rail Reorganization Act of 1973 would prohibit Massachusetts from issuing the type of regulation the recommendation refers to.

Seaboard System Railroad: Feb. 3: R–81–99 through –101: In addition to an intensive review with employees of the various SCL Signal Instruction Letters applicable to compliance with Federal Signal Regulations and testing procedures after equipment is repaired or replaced, additional Signal Instruction Letters 11 and 12 were issued in connection with tilting or inverting relays.

Norfolk Southern: Feb. 16: R–81–37: The practice on the Norfolk and Western, as well as on most other railroads in the United States, is to install an advance approach signal only when the existing approach signal cannot be relocated and there is insufficient stopping distance between the existing approach signal and the positive home signal. *R–81–38:* The Norfolk and Western has a procedure at crew-change terminals whereby crews reporting for duty are spot-checked to see that they are physically fit. It would be completely impractical to have a supervisor check every crew going on duty because many are at outlying points, such as terminals in the coal mining districts.

Missouri Pacific Railroad Co.: Jan. 24: R–81–83: There are not enough channels on conventional train radios to communicate with all carriers that might operate over portions of a given railroad's track.

State of New York: Feb. 17: R–81–116: The Counsel to the Governor and the Dept. of Transportation is considering the recommendation to initiate the legislative and/or executive action to authorize a new or existing independent agency to properly oversee and regulate the safety of the New York City Transit Authority.

International Association of Fire Chiefs: Feb. 22: R–81–23 through –25: Will assist and cooperate with the Urban Mass Transportation Administration and the United States Fire Administration in developing rail rapid transit system training program guidelines which address fire safety concerns, such as tunnel rescue in a smoke and/or fire environment, in developing a national training curriculum for fire service personnel involved in the administration of fire protection on rail rapid transit systems, and in determining minimum fire safety equipment needs of rail rapid transit systems.

New York City Transit Authority: Feb. 17: R–82–105: On Nov. 12, 1982, the Maintenance of Way Signal Division issued Directive #82–68 to require Signal Supervision to issue priority work orders, which are generally completed within 30 days, for permanent changes and/or repairs that are beyond the

scope of the maintenance forces. *R–82–106:* The Maintenance of Way Signal Division provides refresher training for employees to ensure that they are cognizant of operating rules and regulations, standards, tests, instructions, and procedures through positive compliance directives issued monthly.

Southern Pacific Transportation Company: Feb. 28: R–83–1: Rules M971 and M972 require an inspector to remove a known or evident defect. Shallow shells are not considered dangerous, because most do not develop into detail fractures, and do not justify removing the rail. The rail defect inspection of Apr. 27, 1981, found 10 defects in 15 miles for a 0.667 failure per mile rate. The average of 0.675 failures per track mile in the past 5 years on this track segment is less than the general industry standard for the end of first position rail life of 3.0 failures per track mile. *R–83–2:* Changes have been made to show the two-letter DOT label on the train graph of Trailer-On-Flat-Car (TOFC)/Container-On-Flat-Car (COFC) loads as well as carloads. *R–83–3:* Instructions have been reissued to remind waybilling locations to properly describe TOFC/COFC shipments containing hazardous materials. Procedural instructions are in place at ramps for railroad clerks to record placard information on the company's Form 2678. If the truck driver does not have proper documents describing the hazardous material or if such documents are not available at the gate, the unit is set aside and refused until such documents are furnished in order to properly prepare the waybill. *R–83–4:* Reissued instructions to train crews to insure that conductors clearly understand that they are to review documents covering their train and know whether their train contains hazardous material or other loads requiring special handling.

The American Short Line Railroad Association: Feb. 28: R–83–10 and –11: Informed its membership of the facts, conditions, and circumstances of the accident which occurred at Thermal, California, on Jan. 7, 1982, and recommended that its member railroads (1) review, and modify if necessary, their evaluation process concerning track inspection defect data for tracks carrying passenger trains or trains with hazardous materials to better assure that rails having defects which might result in catastrophic failure be replaced and (2) assess their procedures to make certain that train crews of trains carrying hazardous materials have in their possession accurate documentation of, and emergency response information for, all hazardous materials being carried.

Marine—*Delta Steamship Lines, Inc.: Feb. 16: M–82–57 and –58:* Instructed all masters and relief masters to encourage the use of VHF radiotelephones by the bridge watch to assist in establishing meeting arrangements on waters not covered by the U.S. Vessel Bridge-to-Bridge Radiotelephone Act and to emphasize the necessity of complying with the International Regulations for Preventing Collisions At Sea, 1972, with particular regard to the requirements for effective radar plotting and for proceeding at a safe speed in areas of restricted visibility.

Federal Communications Commission: Feb. 10: M–82–10: Initiated a high-priority VHF Marine education/monitoring enforcement effort to determine the necessity of amending FCC Rules Section 83.251(c) to require a power-limiting device on bridge-to-bridge transmitters. *M–82–11:* Anticipates completion soon of a memorandum of understanding with the U.S. Coast Guard concerning the enforcement of bridge-to-bridge radiotelephone regulations.

Federal Highway Administration: Feb. 25: M–81–18 and –19: Issued on Feb. 11, 1983, technical advisory T 5140.19, "Pier Protection and Warning Systems for Bridges Subject to Ship Collisions," providing information on types of bridge span failure detection and warning systems, the design of bridge span detection warning systems, and the need for such systems on Federal-aid highway projects. *M–81–20 through –22:* Is reviewing recommendations to develop, in cooperation with the U.S. Coast Guard, standards for the design, performance, and location of structural bridge pier protection systems which consider that the impact from an off-course vessel can occur significantly above as well as below the water surface; to conduct, in cooperation with the U.S. Coast Guard, a study to determine which existing bridges over the navigable waterways of U.S. ports and harbors are not equipped with adequate structural pier protection; and to use the results of the study to advise appropriate bridge authorities of the benefits of installing additional pier protection systems.

Note.—Reports may be ordered from the National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161, for a fee covering the cost of printing, mailing, handling, and maintenance. For information on reports call 703–487–4650 and to order subscriptions to reports call 703–487–4630. Single copies of response letters are free on written request to: Public Inquiries Section, National Transportation Safety Board, Washington, D.C. 20594.

H. Ray Smith, Jr.,

Federal Register Liaison Officer.

BILLING CODE 4910–58–M

RAILROAD RETIREMENT BOARD

Report Under Section 22 of the Railroad Retirement Act

AGENCY: Railroad Retirement Board.

ACTION: Notice of a report submitted to the President, the Speaker of the House, and the President of the Senate.

SUMMARY: Section 22(a) of the Railroad Retirement Act (45 U.S.C. 231u(a)) requires the Railroad Retirement Board (Board) to submit a report to the President and the Congress with respect to the condition of the railroad retirement system in any fiscal year in which the Board determines it must exercise fifty percent or more of its general fund borrowing authority. Section 22(a) further provides for publication of the report in the **Federal Register.** The Board has determined that it will use more than fifty percent of its general fund borrowing authority in Fiscal Year 1983, and on February 18, 1983, submitted the required report to the President and the Congress.

DATE: March 17, 1983. This date must be no earlier than 20 days nor more than 30 days after submission of the report to the President and the Congress (February 18, 1983); thus, publication should occur no earlier than March 10, nor later than March 18, 1983.

Report Required by Section 22 of the Railroad Retirement Act

The 1981 amendments to the Railroad Retirement Act gave the Railroad Retirement Board the authority to borrow money from the general fund of the Treasury. The amount that can be borrowed at any time is equal to the excess of annuity payments due in the following month over the balance in the Railroad Retirement Account. The borrowing authority, however, is limited. The law states that the total outstanding loan from the general fund at any time during a fiscal year shall not exceed the total amount estimated to be transferred from the Social Security Trust Funds to the Railroad Retirement Account with respect to that fiscal year. The transfer, made pursuant to section 7(c)(2) of the Railroad Retirement Act, is known as the financial interchange transfer.

The 1981 amendments also added Section 22 to the Railroad Retirement Act. Section 22(a) states:

In any fiscal year in which the Board determines that general revenue borrowing authority available under this Act will be used to borrow an amount equal to or greater than fifty percent of the total amount available under such borrowing authority for that fiscal year, the Board shall, on or before April 1 of that year, report to the President, the Speaker of the House, and the President of the Senate, in writing—

(1) The aggregate amount it will need to borrow for that fiscal year and the aggregate amount it is authorized to borrow for that fiscal year;

(2) The first fiscal year during which benefits under this Act must be reduced, in the absence of any adjustments, because insufficient funds (including any general revenue borrowing authority under this Act) would preclude payment of full benefits (other than benefits payable from the Dual Benefits Payments Account) for every month in such fiscal year;

(3) The first fiscal year during which the Board would recommend suspension of the authority to borrow contained in

section 10(d) of the Railroad Unemployment Insurance Act, in order to prevent depletion of the Railroad Retirement Account; and

(4) The amount, if any, of adjustments (stated in terms of percentage of taxable payroll), and any other changes such as cash flow adjustments, necessary to preserve the financial solvency of the Railroad Retirement Account, if such adjustments were effective at the beginning of the next succeeding fiscal year.

The Board shall, not less than 20 nor more than 30 days after the submission of a written report under this subsection, publish such report in the Federal Register.

This is the report of the Board required by Section 22(a).

Discussion of Methodology. It is clear that the four specific items which Section 22 requires be included in this report, especially items (1), (2) and (4), can only be estimates. These estimates must be based on assumptions as to the behavior of all factors which will affect the balance of the Railroad Retirement Account during the next several years. There are many such factors, such as rates of mortality, rates of retirement, the level of wage and price inflation, and the level of railroad employment. Some of these factors are subject to reasonaby accurate prediction and some are not. Unfortunately, the factor to which the estimates are most sensitive, the level of railroad employment, is the most volatile and difficult to predict.

The main source of income to the Railroad Retirement Account is a payroll tax. The amount of revenue produced by the tax depends on the number of railroad employees covered by the tax. A reliable response to item (4) therefore depends on how accurate the employment assumption turns out to be.

The history of railroad employment over the last ten years is shown in the table below.

Period	Average number of workers (in thousands)
1973	564
1974	592
1975	548
1976	540
1977	546
1978	542
1979	554
1980	537
1981	505
1982	440

After holding fairly steady for a few years, employment dropped sharply during the 1974–75 recession, declining by 44,000 jobs between 1974 and 1975. After the recession ended, employment did not again approach its pre-recession level. It held relatively steady until the next recession, when it dropped sharply again. From 1980 to 1982, railroad employment dropped by 92,000 jobs, or about 17 percent of the 1980 work force.

The volatility of railroad employment causes an assumption as to its future behavior to be little more than an educated guess. Individuals may differ as to whether a particular assumption is valid or invalid. This report shows estimates of the items required by Section 22 based on two sets of employment assumptions. The two employment assumptions are as follows:

Calendar year	Employment assumption (in thousands)	
	A	B
1983	385	370
1984	370	350
1985	360	335
1986	355	325
1987	350	320
1988	345	315
1982–92	340	310

No claim is made that A represents a best case or that B represents a worst case. Actual experience may turn out to be better than A or worse than B. The intent is to show the sensitivity of estimates of hypothetical levels of railroad employment. The assumptions as to all factors other than the level of employment are identical for the two sets of estimates. The estimates are relatively insensitive to reasonable changes in these other factors.

Results. The estimates in the table below are based on employment assumptions A and B, as indicated. An explanation of the column headings follows. All figures in the table are in millions of dollars.

"Balance I" represents the balance in the Railroad Retirement Account on May 1 of the indicated year, assuming that the Railroad Unemployment Insurance Account after September 30, 1983. A negative balance indicates that the Railroad Retirement Account is in debt to the general fund; the magnitude of the negative number is the amount of the outstanding loan.

Note.—The financial interchange with social security currently represents a substantial portion of the railroad retirement system's income. The transfer of funds is made once a year in June and covers the preceding fiscal year. In addition, because of the due dates of railroad retirement taxes set forth under IRS regulations, the Railroad Retirement Account receives very little taxes in the first month of a calendar quarter, almost two months of taxes in the second month, and one month of taxes in the third month. The effect of these two factors on cash flow is to make May 1 the time at which the balance of the Railroad Retirement Account is at its minimum for the fiscal year.

"Borrowing Authority" represents the financial interchange transfer with respect to the fiscal year and is the maximum amount that the Railroad Retirement Account may owe to the general fund.

Note.—The Railroad Retirement Account may not borrow more than the "borrowing authority" amount. Under the provisions of Section 22(c), the Board will have to issue and put into effect regulations which will cut back benefits to the extent necessary so that payments do not exceed the funds available, unless some other corrective action is taken. Thus, the magnitude of an actual negative balance will never be greater than the borrowing authority. The balances shown in the table, however, are based on the assumption that the Board borrows whatever is needed to pay full benefits. These calculations are necessary in order to respond to item (4) of Section 22(a).

"Excess I" represents the excess of the amount that must be borrowed in order to pay full benefits over the amount that the Board is authorized to borrow, assuming that the Railroad Unemployment Insurance Account is allowed to continue borrowing from the retirement account. It is equal to the excess, if any, of the loan represented in Balance I over the amount for the corresponding year in Borrowing Authority.

"Excess II" is the same as Excess I except that it is based on the assumption that no loans are made from the Railroad Retirement Account to the Railroad Unemployment Insurance Account after September 30, 1983.

Estimates Based on Employment Assumptions A and B (millions of dollars)

Fiscal year	Balance I	Balance II	Borrowing authority	Excess I	Excess II
Employment Assumption A					
1983	−$1,177	−$1,177	$1,867		
1984	−2,421	−2,280	2,109	$312	$171
1985	−3,627	−3,270	2,254	1,373	1,016
1986	−4,809	−4,287	2,300	2,509	1,987
1987	−6,082	−5,436	2,355	3,727	3,081
1988	−7,487	−6,752	2,456	5,031	4,296
1989	−8,992	−8,188	2,560	6,432	5,628
1990	−10,576	−9,707	2,672	7,904	7,035
1991	−12,112	−11,177	2,650	9,462	8,527
1992	−13,832	−12,827	2,684	11,148	10,143

	Employment Assumption B				
1983	−$1,255	−$1,255	$1,867		
1984	−2,707	−2,527	2,159	$548	$366
1985	−4,128	−3,659	2,306	1,702	1,333
1986	−5,566	−4,847	2,413	3,183	2,454
1987	−7,096	−6,194	2,503	4,693	3,691
1988	−8,713	−7,697,	2,618	6,065	5,079
1989	−10,428	−9,329	2,730	7,698	6,599
1990	−,12,235	−11,058	2,851	9,384	8,207
1991	−14,022	−12,765	2,648	11,174	9,917
1992	−16,005	−14,663	2,695	13,110	11,768

In the following discussion of the estimates, the numbering corresponds to the four numbered items which Section 22(a) requires in the report.

1. Under both sets of employment assumptions, the aggregate amount that the Board is authorized to borrow in fiscal year 1983 is $1,867 million. Under assumption A the Board will need to borrow $1,177 million; under assumption B it will need to borrow $1,255 million. Both amounts exceed 50 percent of the borrowing authority.

2. For both assumptions, the magnitude of the negative Balance I is first greater than the Borrowing Authority in fiscal year 1984. This indicates that, in the absence of corrective action, the first fiscal year in which insufficient funds will preclude payment of full benefits will be 1984.

3. The "Excess II" column of both sets of estimates shows that, even if the Railroad Unemployment Insurance Account is prohibited from borrowing from the Railroad Retirement account after September 30, 1983, the Railroad Retirement Account would still become depleted. In a sense, therefore, it is not possible to make a meaningful recommendation under item (3).

Loans to the unemployment insurance system intensify the financial problems of the Railroad Retirement Account to a significant degree. From the point of view of the retirement account, loans to the unemployment insurance system should be disallowed after September 30, 1983. Such a prohibition would require an increase in unemployment insurance taxes, a reduction in benefits, or another source from which to borrow.

4. The table below shows the adjustments (stated in terms of additional percentages of tier 2 taxable payroll) needed, beginning October 1, 1983, to preserve the financial solvency of the Railroad Retirement Account (prevent the Account from exceeding its borrowing authority) through the year indicated.

Fiscal year	Employment assumption A		Employment assumption B	
	RUIA borrowing continued (percent)	RUIA borrowing discontinued (percent)	RUIA borrowing continued (percent)	RUIA borrowing discontinued (percent)
1984	6.3	3.5	11.6	7.0
1985	8.8	6.5	12.2	9.0
1986	9.3	7.4	12.4	9.8
1987	9.4	7.8	12.4	10.0
1988	9.4	8.1	12.4	10.2
1989	9.4	8.2	12.4	10.4
1990	9.4	8.3	12.4	10.4
1991	9.4	8.3	12.4	10.4
1992	9.4	8.3	12.4	10.4

For example, if Railroad Unemployment Insurance Account borrowing is allowed to continue, an additional 12.4 percent of tier 2 taxable payroll, starting October 1, 1983, is needed under employment assumption B to preserve the solvency of the Railroad Account through fiscal year 1987. If the Railroad Unemployment Insurance Account borrowing is discontinued after September 30, 1983, an additional 8.1 percent of tier 2 taxable payroll, starting October 1, 1983, is needed under employment assumption A to preserve the solvency of the Railroad Retirement Account through fiscal year 1988.

Dated: March 9, 1983.

By Authority of the Board.

James T. Brown,

Chief Executive Officer, Railroad Retirement Board.

BILLING CODE 7905-01-M

DEPARTMENT OF TRANSPORTATION
Coast Guard
DEPARTMENT OF LABOR
Occupational Safety and Health Administration

Authority To Prescribe and Enforce Standards or Regulations Affecting Occupational Safety and Health of Seamen Aboard Vessels Inspected and Certificated by the United States Coast Guard; Memorandum of Understanding

Purpose

It is the purpose of this memorandum of understanding (MOU) to set forth clearly the boundaries of the authority of the United States Coast Guard (Coast Guard) of the U.S. Department of Transportation and the Occupational Safety and Health Administration (OSHA) of the U.S. Department of Labor in prescribing and enforcing standards or regulations affecting the occupational safety and health of seamen aboard vessels inspected and certificated by the Coast Guard (hereinafter "inspected vessels"). This MOU is intended to eliminate confusion among members of the public with regard to the relative authorities of the two agencies. Nothing in this MOU pertains to uninspected vessels. The Coast Guard and OSHA agree to work together to fulfill their respective authorities.

Authority of the Coast Guard

The Coast Guard is the dominant federal agency with the statutory authority to prescribe and enforce standards or regulations affecting the occupational safety and health of seamen aboard inspected vessels. Under the Vessel Inspection Laws of the United States, the Coast Guard has issued comprehensive standards and regulations concerning the working conditions of seamen aboard inspected vessels.

These comprehensive standards and regulations include extensive specific regulations governing the working conditions of seamen aboard inspected vessels as well as ample general authority regulations to cover these seamen with respect to all other working conditions that are not addressed by the specific regulations. These standards and regulations are generally set forth at 46 CFR Chapter I, and in the Coast

Guard's Marine Safety Manual and its Navigation and Vessel Inspection Circulars.

Authority of OSHA

OSHA has a general statutory authority to assure safe and healthful working conditions for working men and women under the Occupational Safety and Health (OSH) Act of 1970. Section 4(b)(1) of the OSH Act defines the relationship between OSHA and the other federal agencies whose exercise of statutory responsibilities may affect occupational safety and health. Based on OSHA's interpretation of section 4(b)(1), and as a result of the Coast Guard's exercise of its authority, described above, OSHA has concluded that it may not enforce the OSH Act with respect to the working conditions of seamen aboard inspected vessels. Nonetheless, OSHA retains the following responsibilities.

OSHA retains its authority under section 11(c) of the OSH Act, which forbids discrimination in any manner against employees who have exercised any right afforded them under the OSH Act. Pursuant to this provision, OSHA has the authority to require vessel owners to post a notice that informs employees of their right to complain about working conditions to the Coast Guard, OSHA, or the employer and to be free from retaliatory discrimination. OSHA has concluded that its exercise of authority under section 11(c) if not precluded by the scope of section 4(b)(1) of the OSH Act.

OSHA agrees to refer to the Coast Guard, for its consideration, any complaints, other than section 11(c) discrimination complaints, OSHA receives from seamen working aboard inspected vessels. However, the Coast Guard, consistent with the statement of its authority above, has the sole discretion to determine, under its applicable standards and regulations, whether the events complained of constitute hazardous conditions and the extent of any remedy that may be required.

Recordkeeping

OSHA and the Coast Guard will continue to discuss the extent of their respective jurisdictions to require owners of inspected vessels to keep records concerning occupational injuries and illnesses. This MOU does not resolve any issues concerning recordkeeping obligations.

Effective Date and Publication

This MOU shall take effect upon signature by the parties. It shall be promptly published in the **Federal Register**.

Dated: March 8, 1983.

James S. Gracey,

Commandant, United States Coast Guard, Department of Transportation.

Dated: March 4, 1983.

Thorne G. Auchter,

Assistant Secretary for Occupational Safety and Health, Department of Labor.

BILLING CODE 4910-14-M

Coast Guard

[CGD 83-010]

Chemical Transportation Advisory Committee

AGENCY: Coast Guard, DOT.

ACTION: Request for applications.

SUMMARY: The U.S. Coast Guard is seeking applicants for appointment to membership on the Chemical Transportation Advisory Committee. This committee advises the Coast Guard Marine Safety Council on regulatory requirements for promoting safety in the transportation of hazardous materials on vessels and the transfer of these materials between vessels and waterfront facilities. Fourteen (14) members will be appointed to the committee.

To ahcieve the balance of membership required by the Federal Advisory Committee Act, the Coast Guard is especially interested in applications from minorities and women.

The committee usually meets at least once a year in Washington, D.C., with subcommittee meetings for specific problems on an as-required basis. Members serve at no cost to the Federal Government and receive neither travel nor per diem allowances.

DATE: Requests for applications should be received no later than May 20, 1983.

ADDRESS: Persons interested in applying should write to Commandant (G-CMC), U.S. Coast Guard Headquarters, Washington, D.C. 20593.

FOR FURTHER INFORMATION CONTACT: Captain C. M. Holland, Executive Secretary, Chemical Transportation Advisory Committee (G-CMC), Room 4402, U.S. Coast Guard Headquarters, 2100 Second St. S.W., Washington, D.C. 20593; (202) 426-1477.

Dated: March 14, 1983.

C. M. Holland,

Captain, U.S. Coast Guard, Executive Secretary, Marine Safety Council.

[FR Doc. 83-6866 Filed 3-16-83; 8:45 am]

BILLING CODE 4910-14-M

Federal Highway Administration

Environmental Impact Statement; Travis and Williamson Counties, Texas

AGENCY: Federal Highwey Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway project in Travis and Williamson Counties, Texas.

FOR FURTHER INFORMATION CONTACT: W. L. Hall, Jr., P.E., District Engineer, Federal Highway Administration, 826 Federal Office Bldg., Austin, Texas 78701, Phone (512) 482-5986.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Texas Department of Highways and Public Transportation, will prepare an environmental impact statement (EIS) on a proposal to construct Farm-to-Market Highway 734 (F.M. 734), locally known as Parmer Lane, in Travis and Williamson Counties, Texas. The proposed improvement would involve the new construction of F.M. 734 from F.M. 1325 northwest 5.1 miles to Ranch to Market Road 620 (R.M. 620). The proposed project area is developing rapidly, primarily with residential subdivisions. Many of these subdivisions are presently completed. The proposed facility will provide an arterial for the anticipated traffic in this area and be an alternate route for nearby U.S. Highway 183. It is planned for this proposed construction to ultimately include two separated grade interchanges at F.M. 1325 and R.M. 620. Also included would be an overpass at the Missouri Pacific railroad tracks and a bridge at Lake Creek.

Alternatives under consideration include: (1) No build; (2) constructing a four-lane farm-to-market highway; (3) constructing a six-lane divided facility and (4) constructing a four-lane freeway with frontage roads to control access. Incorporated into and studied with all the build alternatives will be design variations of grade and alignment.

Letters describing the proposed action and soliciting comments have been sent to appropriate Federal, State and local agnecies, who have previously expressed an interest in this proposal. A public meeting will be held in the project area between March and May of 1983. At least an opportunity will be offorded

for anyone wanting a public hearing sometime after the draft environmental impact statement is circulated for comments. Public notices will be placed in all local newspapers advertising a time and place of the meeting or hearing. The draft E.I.S. will be available for public and agency review and comment. No formal scoping meeting is planned at this time.

To ensure that the full range of issues related to this proposed project are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the E.I.S. should be directed to the FHWA at the address provided above:

W. L. Hall, Jr., P.E.,
District Engineer, Austin, Texas.

BILLING CODE 4910-22-M

Research and Special Programs Administration

Grants and Denials of Applications for Exemptions

AGENCY: Materials Transportation Bureau, D.O.T.
ACTION: Notice of grants and denials of applications for exemptions.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given of the exemptions granted in February 1983. The modes of transportation involved are identified by a number in the "Nature of Exemption Thereof" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo-only aircraft, 5—Passenger-carrying aircraft. Application numbers prefixed by the letters EE represent applications for Emergency Exemption.

RENEWAL AND PARTY TO EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
1479-X	DOT-E 1479	Jet Propulsion Laboratory, Pasadena, CA	49 CFR 173.315(a)(1)	To authorize use of non-DOT specification cargo tanks for transportation of liquefied fluorine and mixture of liquefied fluorine and liquefied oxygen. (Mode 1).
2000-X	DOT-E 2000	Union Carbide Corporation, Danbury, CT	49 CFR 172.101, 173.304(a), 173.316 (a)(2).	To authorize use of a non-DOT specification portable tank or a DOT Specification 4L cylinder, for shipment of flammable liquefied compressed gases. (Mode 1.)
3128-X	DOT-E 3128	Walter Kidde, Belleville, NJ	49 CFR 173.304, 175.3	To authorize use of non-DOT specification cylinders, for transportation of a Class C explosive and a liquefied nonflammable gas. (Modes 1, 2, 3, and 4.)
3330-X	DOT-E 3330	Babcock and Wilcox Co., Lynchburg, VA	49 CFR 173.214(d)	To authorize use of containers not presently prescribed in Hazardous Materials Regulations, for transportation of certain flammable solid material. (Modes 1 and 2.)
3498-X	DOT-E 3498	U.S. Department of Defense, Washington, DC.	49 CFR 146.02-22, 146.05-15, 146.29-45, 146.29-47, 146.29-58, 146.29-99, 176.83 Table 1, 176.905(c)(d), (1), Part 172 Subpart E, Part 172 Subpart F, Parts 107, Parts 173, 174, 176, Parts 177.	To authorize transport on open top vehicles military combat & tactical vehicles loaded w/their combat supply of accessory ammunition up to 6000 lbs. & not to exceed 18% of net weight of vehicle. (Modes 1, 2, and 3.)
4177-X	DOT-E 4177	Hydrodyne Industries, Inc., Hauppauge, L.I., NY.	49 CFR 173.302(a)(1), 175.3	To renew and to authorize additional design accumulators. (Modes 1, 2, 3, and 4).
4262-X	DOT-E 4262	Schlumberger Well Services, Houston, TX	49 CFR 172.101, 173.53(u), 173.80	To authorize private offshore oil well supply cargo vessels as an additional mode of transportation. (Mode 1.)
4262-P	DOT-E 4262	Schlumberger Offshore Services, Houston, TX.	49 CFR 172.101, 173.53(u), 173.80	To become a party to Exemption 4262. (Mode 1.)
5022-P	DOT-E 5022	Thiokol Corporation, Elkton, MD	49 CFR 174.101(L), 174.104(d), 174.112(a), 174.66, 177.834(L)(1).	To become a party to Exemption 5022. (Modes 1 and 2.)
5403-P	DOT-E 5403	Halliburton Industrial Services, Inc., Duncan, OK.	49 CFR 173.245(a)(31), 173.248(a)(6), 173.249(a)(6), 173.263(a)(10), 173.264(a)(14), 173.266(b)(3), 173.272(i)(21), 173.289(a)(4), 176.343-2(b), 176.343-5(b)(1)(i), 176.343-5(b)(2)(i).	To become a party to Exemption 5403. (Modes 1 and 3.)
6215-X	DOT-E 6215	E. I. du Pont de Nemours & Company, Inc., Wilmington, DE.	49 CFR 173.315(a)	To authorize use of insulated non-DOT specification cargo tanks, for shipment of a nonflammable gas. (Mode 1.)
6218-X	DOT-E 6218	Liquid Carbonic Corporation, Chicago, IL	49 CFR 173.315(a)	To authorize shipment of argon or nitrogen pressurized liquid in insulated non-DOT specification cargo tanks. (Mode 1.)
6232-X	DOT-E 6232	U.S. Department of Defense, Washington, DC.	49 CFR 172.101, 173.102, 173.108, 173.176, 173.87, 175.3.	To authorize an additional survival kit containing an oxygen cylinder, carbon dioxide cylinder and signal flares. (Modes 1, 3, and 4.)
6267-X	DOT-E 6267	Alden Leeds, Inc., South Kearny, NJ	49 CFR 173.217(a)	To authorize the transportation of certain oxidizers in non-DOT specification double-faced fiberboard boxes. (Modes 1, 2, and 3.)
6517-X	DOT-E 6517	Coyne Cylinder Company, Huntsville, AL	49 CFR 173.303(a)	To authorize use of non-DOT specification steel cylinders comparable to DOT Specification 4BW, for shipment of acetylene. (Modes 1, 2, and 3.)
6518-P	DOT-E 6518	Syntex Chemicals Inc., Boulder, CO	49 CFR 172.101, 172.302, 173.119, 173-134, 173.154.	To become a party to Exemption 6518. (Modes 1 and 3.)
6545-X	DOT-E 6545	San Diego Gas & Electric Company, San Diego, CA.	49 CFR 172.101, 173.315(a)	To authorize use of non-DOT specification cargo tanks, for shipment of a flammable gas. (Mode 1.)
6583-X	DOT-E 6583	Phillips Petroleum Company, Bartlesville, OK.	49 CFR 173.249(a)(7)	To authorize shipment of a corrosive material in a DOT Specification 51 portable tank. (Mode 1.)
6626-X	DOT-E 6626	Airco Welding Products, Murray Hall, NJ	49 CFR 173.34(e)(15)(i), 173.34(e)(15)(v), 175.3.	To authorize use of DOT Specification 3A or 3AA cylinders and cylinders marked ICC-3, 3A, or 3AA, for shipment of certain compressed gases. (Modes 1, 2, 3, 4, and 5.)
6752-X	DOT-E 6752	Pennwalt Corporation, Philadelphia, PA	49 CFR 173.301(d)(3), 173.304(a)(2)	To authorize DOT Specification 3AAX and 3T cylinders containing difluoroethylene manifolded in an ISO frame as an additional container configuration. (Modes 1, 2, and 3.)

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
6800-P	DOT-E 6800	Petro-Chem Drum Corporation, Houston, TX	49 CFR 173.119(a), 173.119(b), 173.245(a)(26), 173.245b(a)(6), 173.249(a)(1), 173.250a(a)(1), 173.257(a)(1), 173.263(a)(26), 173.265(d)(6), 173.266(b)(9), 173.271, 173.272(i)(9), 173.277(a)(6), 173.287(c)(1), 173.289(a)(1), 173.292(a)(1), 173.357(b), 178.19.	To become a party to Exemption 6800. (Modes 1, 2, and 3.)
6834-X	DOT-E 6834	FMC Corporation, Philadelphia, PA	49 CFR 173.245(a)(4)	To authorize use of DOT Specification 5 drums, for shipment of a certain corrosive liquid. (Mode 1.)
6874-X	DOT-E 6874	Twain Incorporated, Denver, CO	49 CFR 172.101, 173.370(a)(13)	To authorize transport of sodium and potassium cyanides in non-DOT specification wooden boxes. (Modes 1, 2, and 3.)
6874-X	DOT-E 6874	Degussa Corporation, Teterboro, NJ	49 CFR 172.101, 173.370(a)(13)	To authorize transport of sodium and potassium cyanides in non-DOT specification wooden boxes. (Modes 1, 2, and 3.)
7024-P	DOT-E 7024	Avondale Mills, Sylacauga, AL	49 CFR 173.249(a)(7)	To become a party to Exemption 7024. (Mode 1.)
7026-P	DOT-E 7026	Walter Kidde, Division of Kidde, Inc., Wilson, NC.	49 CFR 173.304(a)(1), 175.3, 178.47	To become a party to Exemption 7026. (Modes 1, 2, 4, and 5.)
7074-X	DOT-E 7074	Allied Chemical, Morristown, NJ	49 CFR 173.273	To authorize a one-time shipment of sulfur trioxide, stabilized, in non-DOT specification steel tank. (Mode 1.)
7277-X	DOT-E 7277	Structural Composites Industries, Inc., Pomona, CA.	49 CFR 173.302(a)(1), 173.304(a), 173.304(d), 175.3.	To authorize various nonflammable gases and certain flammable gases as additional commodities for shipment in non-DOT specification cylinders. (Modes 1, 2, 3, 4, and 5.)
7767-P	DOT-E 7767	Walter Kidde, Division of Kidde, Inc., Wilson, NC.	49 CFR 173.304(a)(1), 175.3, 178.47	To become a party to Exemption 7767. (Modes 1, 2, 3, 4, and 5.)
7811-P	DOT-E 7811	J. T. Baker Chemical Company, Phillipsburg, NJ.	49 CFR 173.119(a)(23), 173.245(a)(18), 173.346(a)(21), 173.347(a)(8), 175.3, 176.210.	To become a party to Exemption 7811. (Modes 1, 2, 3, and 4.)
7811-X	DOT-E 7811	EM Science, Cincinnati, OH	49 CFR 173.119(a)(23), 173.245(a)(18), 173.346(a)(21), 173.347(a)(8), 175.3, 176.210.	To authorize certain Class B poisons as additional commodities. (Modes 1, 2, 3, and 4.)
7811-P	DOT-E 7811	U.S. Department of Energy, Richland, WA	49 CFR 173.119(a)(23), 173.245(a)(18), 173.346(a)(21), 173.347(a)(8), 175.3, 176.210.	To become a party to Exemptidn 7811. (Modes 1, 2, 3, and 4.)
7834-X	DOT-E 7834	U.S. Department of Defense, Washington, DC.	49 CFR 173.306(b)(4), 175.3	To authorize transport of nonliquefied sulfur hexafluoride in certain X-ray machines overpacked in strong wooden or fiberboard boxes. (Modes 1, 2, 3, 4, and 5.)
7835-P	DOT-E 7835	Suburban Welders Supply Co., Inc., Ashland, MA.	49 CFR 177.848, Part 107 Appen. B(1)	To become a party to Exemption 7835. (Mode 1.)
7838-X	DOT-E 7838	Sea Containers Atlantic Ltd., Hamilton, Bermuda.	49 CFR 173.118a, 173.119, 173.125, 173.128, 173.131, 173.132, 173.144, 173.245(a)(30), 173.346, 173.630.	To authorize use of non-DOT specification portable tanks for transportation of certain hazardous materials. (Modes 1, 2, and 3.)
7952-X	DOT-E 7952	Albright & Wilson Inc., Norwood, NJ	49 CFR 173.270, 178.87	To authorize shipment of phosphorus tribromide in non-DOT specification lead-lined drums. (Modes 1, 2, and 3.)
8080-X	DOT-E 8080	Diamond Shamrock Corporation Pasadena, TX.	49 CFR 173.184	To authorize transport of dry chromic acid in a DOT Specification 106A300W tank car which has been converted to DOT Specification 111A100W. (Mode 2.)
8086-X	DOT-E 8086	U.S. Department of Defense, Washington, DC.	49 CFR 172.101, 172.102, 173.118(a), 173.119, 173.206, 173.87.	To authorize transport of a cruise missile containing hazardous materials. (Mode 1.)
8094-X	DOT-E 8094	Mitport Chemical Company, Milwaukee, WI.	49 CFR 173.245, 173.249, 173.263, 173.266, 173.272.	To authorize shipment of corrosive materials in a DOT Specification 56 tank where a DOT Specification 60 tank is permitted in the regulations. (Mode 1.)
8115-X	DOT-E 8115	Acurex Corporation, Mountain View, CA	49 CFR 173.302(a)(1), 173.304(a), 173.304(d), 175.3.	To authorize manufacture, marking and sale of non-DOT specification fiber reinforced plastic hoop wrapped cylinder, for transportation of certain nonflammable compressed gases. (Modes 1, 2, 3, 4, and 5.)
8125-X	DOT-E 8125	SLEMI, Paris, France	49 CFR 173.123, 173.315	To authorize use of non-DOT specification portable tanks for transportation of certain liquefied petroleum gases and other gases classed as flammable gases and a flammable liquid. (Modes 1, 2, and 3.)
8126-X	DOT-E 8126	Fauvet-Girel, Paris, France	49 CFR 173.123, 173.315	To authorize use of non-DOT specification portable tanks for transportation of certain liquefied petroleum gases and other gases classed as flammable gases and a flammable liquid. (Modes 1, 2, and 3.)
8144-X	DOT-E 8144	Hercules, Incorporated, Wilmington, DE	49 CFR 173.133, 175.3, 176.3	To authorize transport of 10 percent nitroglycerine in propylene glycol or ethyl alcohol, in DOT Specification 2E polyethylene bottles or DOT Specification 2U containers overpacked in DOT Specification 12A or 12B fiberboard boxes, or DOT Specification 21C fiber drums. (Modes 1, 3, and 4.)
8144-X	DOT-E 8144	Atlas Powder Company, Dallas, TX	49 CFR 173.133, 175.3, 176.3	To increase quantity limit for DOT Specification 2U inside containers, from 5 quarts to 5 gallons, for shipment of spirits of nitroglycerin (nitroglycerin-propylene glycol mix). (Modes 1, 3, and 4.)
8144-X	DOT-E 8144	Atlas Powder Company, Dallas, TX	49 CFR 173.133, 175.3, 176.3	To authorize transport of 10 percent nitroglycerine in propylene glycol or ethyl alcohol, in DOT Specification 2E polyethylene bottles or DOT Specification 2U containers overpacked in DOT Specification 12A or 12B fiberboard boxes, or DOT Specification 21C fiber drums. (Modes 1, 3, and 4.)
8144-X	DOT-E 8144	ICI Americas Inc., Wilmington, DE	49 CFR 173.133, 175.3, 176.3	To authorize transport of 10 percent nitroglycerine in propylene glycol or ethyl alcohol, in DOT Specification 2E polyethylene bottles or DOT Specification 2U containers overpacked in DOT Specification 12A or 12B fiberboard boxes, or DOT Specification 21C fiber drums. (Modes 1, 3, and 4.)
8227-X	DOT-E 8227	Sanders Associates, Inc., Nashua, NH	49 CFR 172.101, 173.302(a)(2), 175.3	To authorize an additional device containing lithium batteries. (Modes 1 and 4.)
8251-X	DOT-E 8251	Sea Containers Atlantic Ltd., Hamilton, Bermuda.	49 CFR 173.119, 173.245, 173.346	To authorize use of non-DOT specification intermodal portable tanks, for transportation of certain flammable, combustible, corrosive and poisonous liquids. (Modes 1, 2, and 3.)
8269-X	DOT-E 8269	Dow Chemical Company, Midland, MI	49 CFR 173.389–173.398, Part 172, Part 177.	To transport within plant over public highway via private carriage, radioactive materials (radioisotopes) as essentially non-regulated materials when contained in sealed source instruments for in-house processing. (Mode 1.)

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
8390-P	DOT-E 8390	Corco Chemical Corporation, Fairless Hills, PA.	49 CFR 173.272, 178.210, 178.24a	To become a party to Exemption 8390. (Mode 1.)
8401-X	DOT-E 8401	ERA Helicopters, Inc., Anchorage, AK	49 CFR 175.3, 175.310(c)(3), 175.310(d)	To authorize carriage of fuel in Canadien 5B drums loaded in cargo compartments of passenger-carrying helicopters. (Mode 5.)
8439-P	DOT-E 8439	Walter Kidde, Division of Kidde, Inc., [illegible], NC.	49 CFR 173.302, 173.304, 175.3, 178.53	To become a party to Exemption 8439. (Modes 1, 2, 3, 4, and 5.)
8445-P	DOT-E 8445	FMC Corporation, Princeton, NJ	49 CFR Part 173, Subpart D, E, F, & H	To become a party to Exemption 8445. (Mode 1.)
8494-X	DOT-E 8494	Fruehauf Corporation, Omaha, NB	49 CFR 178.342-6(a)	To authorize manufacture, marking and sale of DOT Specification MC-307 aluminum cargo tanks equipped with glass sight gauges in lieu of the acceptable gauging devices, for transportation of flammable gases. (Mode 1.)
8507-X	DOT-E 8507	U.S. Department of Energy, Washington, D.C.	49 CFR 173.302, 175.3	To authorize use of non-DOT specification stainless steel welded conical pressure vessel, for shipment of a compressed gas. (Modes 1, 2, 4, and 5.)
8510-X	DOT-E 8510	Dow Chemical Company, Freeport, TX	49 CFR 173.178	To authorize shipment of salt-coated magnesium granules in a non-DOT specification wax-impregnated, intermediate bulk, fiberboard box with an inside polyethylene bag. (Modes 1, 2, and 3.)
8519-P	DOT-E 8519	Polish Ocean Lines, Gdynia, Poland	49 CFR 176.906(L)	To become a party to Exemption 8519. (Mode 3.)
8536-X	DOT-E 8536	Hercules, Incorporated, Wilmington, DE	49 CFR 173.62, 178.177	To authorize transport of liquid high explosives in DOT Specification 15M containers in which the inner copper containers and the rubber boots have been replaced with polyethylene containers. (Mode 1.)
8539-X	DOT-E 8539	Aero Taxi-Rockford, Inc., Rockford, IL	49 CFR 172.101, 172.204(c)(3), 173.27, 175.30(a)(1), 175.320(b), Part 107 Appendix B.	To authorize carriage of certain Class A, B and C explosives that are not permitted for shipment by air, or are in quantities greater than those prescribed for shipment by air. (Mode 4.)
8545-X	DOT-E 8545	Hercules Incorporated, Wilmington, DE	49 CFR 173.62	To authorize transport of limited quantities of liquid high explosives in polyethylene bottles packed in a DOT Specification 37A drum, overpacked in a DOT Specification 16A wooden box. (Mode 1.)
8554-X	DOT-E 8554	E. I. du Pont de Nemours & Company, Inc., Wilmington, DE.	49 CFR 173.114a, 173.93	To authorize transport of propellent explosives and blasting agents, in a DOT Specification MC-306, MC-307 and MC-312 cargo tanks. (Mode 1.)
8561-X	DOT-E 8561	HTL Industries, Incorporated, Duarte, CA	49 CFR 173.304(a)(1), 175.3, 178.44	To authorize manufacture, making and sale of non-DOT specification girth welded stainless steel cylinders, for transportation of a compressed gas. (Modes 1, 2, and 4.)
8564-X	DOR-E 8564	Altus Corporation, San Jose, CA	49 CFR 173.206, 173.247	To authorize shipment of lithiumthionyl chloride batteries in DOT Specification 19 wooden boxes. (Mode 1.)
8565-X	DOT-E 8565	Olin Corporation, Stamford, CT	49 CFR 173.217(a)(3), 178.224	To authorize shipment of calcium hypochlorite mixture, dry, classed as oxidizer, in a DOT Specification 21C drum having an inner ply consisting of a lamination of polyester film mounted on aluminum foil.
8627-P	DOT-E 8627	Omega Treating Chemicals, Inc., Midland, MI.	49 CFR 173.119, 173.245, 178.253	To become a party to Exemption 8627. (Mode 1.)
8646-X	DOT-E 8646	Marshall Hyde Incorporated, Port Huron, MI.	49 CFR 172.101, 173.100, 173.86	To authorize transport of an explosive pest repellent device in limited quantities, in non-DOT specification inner fiberboard cartons. (Modes 1, and 2.)
8725-X	DOT-E 8725	CNG Fuel Cylinder Corporation, Long Beach, CA.	49 CFR 173.302(a)	To authorize an alternate bend test; and increase water capacity to 500 pounds and to authorize use of a ring specimen for bend and tensile tests. (Mode 1.)
8752-X	DOT-E 8752	Thiokol Corporation, Elkton, MD	49 CFR 173.92	To authorize shipment of fifteen rocket motors in a specially designed packaging configuration. (Mode 1.)
8862-P	DOT-E 8862	Union Carbide Corporation, Danbury, CT	49 CFR 173.119, 173.305	To become a party to Exemption 8862. (Mode 1.)
8871-P	DOT-E 8871	Bulk LIR International Inc., Carpentersville, IL	49 CFR 173.154, 173.182, 173.245(b)	To become a party to Exemption 8871. (Modes 1, and 2.)

RENEWAL AND PARTY TO EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
		Note.—Inadvertently omitted from the 48 FR 38 publication of Exemptions issued during January 1983 are as follows:		
7052-P	DOT-E 7052	AVCO, Wilmington, DE	49 CFR 172.101, 175.3	To become a party to Exemption 7052. (Modes 1, 2, 3, and 4.)
7052-P	DOT-E 7052	The Bendix Corporation, Kansas City, MO	49 CFR 172.101, 175.3	To become a party to Exemption 7052. (Modes 1, 2, 3, and 4.)

NEW EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
1982-N	DOT-E 8959	Green Hydraulics, Inc., City of Commerce, CA.	49 CFR 173.302(a)(1), 173.304(a), 173.304(d), 175.3.	To authorize shipment of nitrogen or nitrogen mixtures in steel hydraulic accumulators. (Modes 1, 2, 3, and 4.)
8966-N	DOT-E 8966	Norcliff Thayer, Inc., Saint Louis, MO	49 CFR Part 100-199	To authorize shipment of safety book matches packed with an inert, non-hazardous material in a rigid, open-top, paperboard caddy. (Modes 1, 2, 3, 4, and 5.)
8910-N	DOT-E 8910	Canber Products Limited, Waterloo, Ontario, Canada.	49 CFR 178.19, 178.253, Part 173 Subpart F.	To authorize use of non-DOT specification rotationally molded, linear low density polyethylene portable tank enclosed in a steel cage, for shipment of corrosive liquids. (Modes 1 and 2.)
8930-N	DOT-E 8930	General Aviation, Inc., Greenville, TN	49 CFR 172.101, 172.204(c)(3), 173.27, 175.30(a)(1), 175.320(b), Part 107, Appendix B.	To authorize carriage of Class A, B and C explosives not permitted for air shipment, or in quantities greater than those prescribed for shipment by air. (Mode 4.)
8937-N	DOT-E 8937	Amax Specialty Metals Corporation, Salt Lake City, UT.	49 CFR 173.178	To authorize shipment of coated magnesium granules in non-DOT specification collapsible flexible bag, disposable bulk container. (Modes 1 and 2.)
8950-N	DOT-E 8950	Structural Composites Industries, Inc., Pomona, CA.	49 CFR 173.302(a)(1), 173.304(a), (d), 175.3.	To authorize manufacture, marking and sale of non-DOT specification fiber reinforced plastic hoop wrapped cylinders, for transportation of certain flammable and non/flammable compressed gases. (Modes 1, 2, 3, 4, and 5.)

NEW EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
8955-N	DOT-E [illegible]	Foseco, Inc., Brook Park, OH	49 CFR 173.206	To authorize shipment of metallic sodium, fused solid, in a non-DOT specification aluminum can, overpacked in a non-DOT specification removable head, single trip steel drum. (Mode 1.)
8961-N	DOT-E [illegible]	Geosource Inc., Corpus Christi, TX	49 CFR 173.119, 173.304, 173.315	To authorize manufacture, marking and sale of non-DOT specification containers, for transportation of flammable liquids and flammable gases. (Mode 1.)
8963-N	DOT-E [illegible]	Atlantic Research Corporation, Gainesville, VA.	49 CFR 173.86(e)(2)(ii)	To authorize transport of a rocket motor in a propulsive state, in a DOT Specification 15A wooden box. (Mode 1.)

EMERGENCY EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
EE 8956-N	DOT-E 8960	Florida Aircraft leasing Corporation, Fort Lauderdale, FL.	49 CFR 172.101, 175.320(a)	To authorize transport of Class A explosives loaded on the same aircraft with Class C explosives; no other cargo permitted. (Mode 4).
EE 8000-N	DOT-E 9000	Global International Airways, Kansas City, MO.	49 CFR, 172.101 Column 8(b)	To authorize air transport of rocket ammunition with explosive projectile, Class A explosive. (Mode 4).

DENIALS

8963-N	Request by Union Carbide Corporation, Danbury, CT to authorize shipment of certain etching materials, classed as corrosive material in non-authorized DOT Specification packaging denied February 1, 1983.
8934-N	Request by Korean Air Lines, Inc., Los Angeles, CA to authorize carriage of various Class A, B and C explosives, radioactive devices and magnetized materials aboard aircraft when not permitted by the Department's Hazardous Material Regulations denied February 22, 1983.

Issued in Washington, DC, on March 7, 1983.

J. R. Grothe,

Chief, Exemptions Branch, Office of Hazardous Materials Regulation, Materials Transportation Bureau.

FEDERAL DEPOSIT INSURANCE CORPORATION

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at its open meeting held at 2:00 p.m. on Monday, March 14, 1983, the Corporation's Board of Directors determined, on motion of Chairman William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Director C. T. Conover (Comptroller of the Currency), that Corporation business required the addition to the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matter:

Recommendation regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 45,625–L (Amended)—Wilcox County Bank, Camden, Alabama

By the same majority vote, the Board further determined that no earlier notice of this change in the subject matter of the meeting was practicable.

By the same majority vote, the Board also voted to withdraw from the agenda for consideration in open session and to add to the agenda for consideration at the Board's closed meeting held at 2:30 p.m. the same day, the following matter:

Application of West Olympia Bank, Los Angeles, California, for consent to establish a branch at 901 South Western Avenue, Los Angeles, California.

In voting to move this matter from open session to closed session, the Board further determined, by the same majority vote, that the public interest did not require consideration of the matter in a meeting open to public observation; that the matter could be considered in a closed meeting by authority of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), and (c)(9)(A)(ii)); and that no earlier notice of this change in the subject matter of the meeting was practicable.

Dated: March 15, 1983.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

2

FEDERAL DEPOSIT INSURANCE CORPORATION

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 10:10 p.m. on Friday, March 11, 1983, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to: (1) Receive bids for the purchase of certain assets of and the assumption of the liability to pay deposits made in Newport Harbour National Bank, Newport Beach, California, which was closed by the Comptroller of the Currency on March 11, 1983; (2) accept the bid for the transaction submitted by Trans American National Bank, Monterey Park, California; and (3) provide such financial assistance, pursuant to section 13(c)(2)), of the Federal Deposit Insurance Act (12 U.S.C. 1832(c)(2)), as was necessary to effect the purchase and assumption transaction.

In calling the meeting, the Board determined, on motion of Chairman William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Director C. T. Conover (Comptroller of the Currency), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting pursuant to subsections (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

Dated: March 14, 1983.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

3

FEDERAL DEPOSIT INSURANCE CORPORATION

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at its closed meeting held at 2:30 p.m. on Monday, March 14, 1983, the Corporation's Board of Directors determined, on motion of Chairman William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Director C. T. Conover (Comptroller of the Currency), that Corporation business required the withdrawal from the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matter:

Request for reconsideration of a previous denial of a request for consent to retire a subordinated note prior to maturity: Name and location of bank authorized to exempt from disclosure pursuant to the provisions of subsections (c)(8) and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(8) and (c)(9)(A)(ii)).

The Board further determined, by the same majority vote, that Corporation business required the addition to the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matters:

Application for assistance under section 13(c) of the Federal Deposit Insurance Act: Name and location of bank authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(4), (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(4), (c)(6), (c)(8), and (c)(9)(A)(ii).

Application of Diablo State Bank, Danville, California, for consent to relocate its main office from 355 N. Hartz Avenue to 156 Diablo Road, Danville California.

The Board further determined, by the same majority vote, that no earlier notice of the changes in the subject matter of the meeting was practicable; that the public interest did not require consideration of the matters added to

the agenda in a meeting open to public observation; and that the matters added to the agenda could be considered in a closed meeting by authority of subsections (c)(4), (c)(6), (c)(8), and (c)(9)(A)(ii), of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(4), (c)(6), (c)(8) and (c)(9)(A)(ii).

Dated: March 15, 1983.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary

4

FEDERAL DEPOSIT INSURANCE CORPORATION

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 4:00 p.m. on Tuesday, March 22, 1983, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previous meetings.

Request for reconsideration of a previous denial of an application for Federal deposit insurance:

Metropolitan Bank, Phoenix, Arizona, a proposed new bank to be located at 320 North Central Avenue, Phoenix, Arizona, for reconsideration of a previous denial of its application for Federal deposit insurance.

Application for consent to merge and establish one branch:

The Trenton Saving Fund Society, Trenton, New Jersey, an insured mutual savings bank, for consent to merge, under its charter and title, with Burlington Savings Bank, Burlington, New Jersey, and for consent to establish the sole office of Burlington Savings Bank as a branch of the resultant bank.

Recommendations regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 45,605-L—Franklin National Bank, New York, New York

Case No. 45,619-NR—Penn Square Bank, National Association, Oklahoma City, Oklahoma

Memorandum and Resolution re:—United States National Bank, San Diego, California

Memorandum and Resolution re:—Bank of Enville, Enville, Tennessee

Memorandum and Resolution re:—Hohenwald Bank & Trust Co., Hohenwald, Tennessee

Memorandum and Resolution re:—City and County Bank of Campbell County, Jellico, Tennessee

Recommendations with respect to payment for legal services rendered and expenses incurred in connection with receivership and liquidation activities:

Bronson, Bronson & McKinnon, San Francisco, California, in connection with the receivership of United States National Bank, San Diego, California (two memorandums).

Memorandum re: Automation Committee Recommendation for Replacement of FDIC's Amdahl V/6–II Computer.

Reports of committees and officers:

Minutes of actions approved by the standing committees of the Corporation pursuant to authority delegated by the Board of Directors.

Reports of the Division of Bank Supervision with respect to applications or requests approved by the Director or Associate Director of the Division and the various Regional Directors pursuant to authority delegated by the Board of Directors.

Report of the General Counsel:

Memorandum re: The Mission State Bank & Trust Company, Mission, Kansas, Mission State Bank/FDIC v. Arthur Lohrey, et al.

Discussion Agenda:

No matters scheduled.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street, NW., Washington, D.C.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 389–4425.

Dated: March 15, 1983.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

BILLING CODE 6714-01-M

5

FEDERAL DEPOSIT INSURANCE CORPORATION

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 4:30 p.m. on Tuesday, March 22, 1983, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, by vote of the Board of Directors, pursuant to sections 522b(c)(2), (c)(6), (c)(8), and (c)(9)(A)(ii) of Title 5, United States Code, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings (cease-and-desist proceedings, termination-of-insurance proceedings, suspension or removal proceedings, or assessment of civil money penalties) against certain insured banks or officers, directors, employees, agents or other persons participating in the conduct of the affairs thereof:

Names of persons and names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), and (c)(9)(A)(ii)).

Note.—Some matters falling within this category may be placed on the discussion agenda without further public notice if it becomes likely that substantive discussion of those matters will occur at the meeting.

Discussion Agenda:

Application for consent to merge and establish one branch:

Marine Bank, Warren, Pennsylvania, an insured State nonmember bank, for consent to merge, under its charter and title, with The Ridgway National Bank, Ridgway, Pennsylvania, and to establish the sole office of The Ridgway National Bank as a branch of the resultant bank.

Application for consent to retire a subordinated note prior to maturity:

Name and location of bank authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(8) and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(8) and (c)(9)(A) (ii)).

Request for reconsideration of a previous denial of a request for consent to retire a subordinated note prior to maturity:

Name and location of bank authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(8) and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(8) and (c)(9)(A)(ii)).

Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, separations, removals, etc.:

Names of employees authorized to be exempt from disclosure pursuant to provisions of subsections (c)(2) and (c)(6) of the

"Government in the Sunshine Act" [5 U.S.C. 552b(c)(2) and (c)(6)).

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street, N.W., Washington, D.C.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 389–4425.

Dated: March 15, 1983.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

Part II

Department of Transportation

Federal Aviation Administration

Location and Size of Registration Marks on Rotorcraft

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 45

[Docket No. 17528; Amdt. No. 45-15]

Location and Size of Registration Marks on Rotorcraft

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment requires the display of registration marks, N-numbers, at least 12 inches high, or as high as practicable, on rotorcraft sides in place of the dual markings that consist of an N-number at least 20 inches high on the bottom surface and an N-number at least 2 inches high on each of the fuselage side surfaces near the cabin. The rule will provide economic relief, maintain ease of positive identification, and standardize identification marking of aircraft. To avoid undue cost of compliance to rotorcraft owners and manufacturers, a rotorcraft displaying the dual 20-inch bottom surface and small side surface markings before the effective date of the amendment and a rotorcraft manufactured after April 18, 1983, but before December 31, 1983, will be allowed to continue the display of those marks until the rotorcraft is repainted or the marks are restored, repainted, or changed.

EFFECTIVE DATE: April 18, 1983.

FOR FURTHER INFORMATION CONTACT: Joseph J. Gwiazdowski, Aircraft Manufacturing Division (AWS-204), Office of Airworthiness, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591, telephone (202) 426-8361.

SUPPLEMENTARY INFORMATION:

Background

This amendment, which establishes new requirements for the location and size of N-numbers on rotorcraft, is adopted for essentially the reasons outlined in Notice of Proposed Rulemaking (NPRM) No. 82-6 (47 FR 14128; April 2, 1982). That action responded to the Robinson Helicopter Company, Torrance California petition for rulemaking to delete N-numbers from the bottom surface of rotorcraft and to the Bell Helicopter Textron, Fort Worth, Texas, petition for exemption from § 45.29(b)(3)(i) to avoid the existing burden of compliance when attaching equipment that interferes with the display of 20-inch N-numbers on the bottom of a rotorcraft.

Also, as part of the FAA Rotorcraft Regulatory Review Program, a similar proposal was made in December 1979 on behalf of the Helicopter Association International (HAI) and the Aerospace Industries Association (AIA) to eliminate the 20-inch bottom surface markings on rotorcraft. The proposal reflected the Sikorsky Aircraft petition of February 22, 1977, for exemption from § 45.27, which contended that bottom surface marks should not be required on rotorcraft for the same reasons the marks are not required on the underwing surfaces of fixed-wing aircraft. Since the trend in rotorcraft design has resulted in fuselage shapes approaching those of airplanes, the markings should be similar to facilitate identification. It was noted also that the elimination of the requirement for bottom markings would reduce the cost of rotorcraft marking, a savings which would be passed on the rotorcraft owners.

Because of these concerns, the FAA is adopting only side fuselage N-numbers 12 inches high in place of the dual N-numbers consisting of 20-inch bottom surface marks and the small (2- to 6-inch) side fuselage marks.

Interested persons were given an opportunity to participate in the making of the rule, and due consideration was given to all information submitted. Except as discussed in this preamble, the revisions adopted by this amendment and the reasons for them are the same as those in NPRM No. 82-6.

Need for Amendments

Costly underwing marking requirements imposed on fixed-wing airplanes were eliminated in 1961 by Amendment 1-4 to Civil Air Regulation Part 1. The bottom surface marking requirements for rotorcraft identification were not changed at that time because they suited the early commercial rotorcraft configurations. Those configurations usually had been adopted from military rotorcraft that had no need for the vertical tail surfaces or other design considerations applicable to small fixed-wing aircraft. Because the low-speed and stability design of these rotorcraft necessitated tail configurations having exposed metal tubular construction, there remained insufficient display area for adequate identification markings.

The new rotorcraft configurations, which have been designed for faster flight and more stability than the early designs, now have compact, low-drag fuselage and tail surfaces that closely resemble those of fixed-wing aircraft. This enables the marking requirements to be standardized.

The concerns of the aviation community regarding visual identification that resulted in the display of larger side fuselage N-numbers on fixed-wing aircraft also apply to rotorcraft. Citizens, law enforcement agencies, and the Department of Defense have complained that aircraft displaying small marks cannot be positively identified because the marks are too small to see; consequently, appropriate action cannot be taken against violators of regulations, particularly low-flying aircraft that cause hazardous conditions and excessive noise in the community.

FAA field offices also stressed the need to standardize aircraft markings and improve the ability to positively identify rotorcraft. Agreement has been expressed regarding the elimination of the large 20-inch bottom surface marks, and adoption of the 12-inch side fuselage numbers has been recommended to provide for positive aircraft identification.

In view of the foregoing, the FAA has determined that it is in the public interest to change the identification requirements on rotorcraft from the display of dual markings now required to standard 12-inch-high fuselage side marks only.

Discussion of Comments

Twenty-eight commenters, who represent the views of rotorcraft manufacturers, associations, and individual owners, submitted responses to NPRM No. 82-6. Generally, the comments favor the elimination of the 20-inch-high bottom surface marks; however, the majority note as unacceptable the requirement to display 12-inch-high N-numbers on the fuselage sides. About 20 commenters object to 12-inch N-numbers because of aesthetics, cost, or insufficient space or question the need for the change at this time. Some commenters recommend withdrawal of the proposed action or the optional use of 12-inch N-numbers in lieu of the dual markings.

Rotorcraft Aesthetics

Approximately 14 commenters object that 12-inch N-numbers would adversely affect the aesthetics of rotorcraft. The FAA recognizes that this may be true in some cases; however, rotorcraft manufacturers and owners, in most cases, could modify the paint scheme to minimize any adverse effect on aesthetics. The effect of the 12-inch N-number requirement would be no greater on rotorcraft than on fixed-wing aircraft. Furthermore, the FAA must give prime consideration to the factors most

affecting the public interest and safety such as positive aircraft identification.

Cost of Compliance

Eleven commenters object to the cost that would be imposed by the proposed 12-inch N-numbers and contend that the FAA evaluation does not reflect the additional costs required to redesign the paint schemes around the proposed large numbers.

The FAA evaluation, as noted in NPRM 82–6, primarily reflected the difference in the costs of applying the dual marks now required as compared to applying only the 12-inch side fuselage marks proposed. The FAA agrees with the commenters that the additional costs may be incurred by those rotorcraft operators desiring to modify paint schemes to accommodate the 12-inch N-numbers. Accordingly, the FAA conducted an additional survey of fixed-base operators (FBO's) before issuing this final rule. These costs are included in the final regulatory evaluation.

Further, to avoid any undue cost burden on rotorcraft owners and manufacturers, the rule, as adopted, allows rotorcraft displaying the dual marks before the effective date of the amendment and new rotorcraft manufactured after April 18, 1983, but before December 31, 1983, to display those marks until the rotorcraft is repainted or the N-numbers are restored, repainted, or changed. It is apparent that many failed to note that the amendment would relieve the marking burden on manufacturers and owners by extending the time period for compliance in this manner.

Lack of Space

Approximately 12 commenters contend that many small rotorcraft models have insufficient space to display full-size 12-inch N-numbers.

The FAA recognizes that certain rotorcraft configurations may lack sufficient space to display full-size N-numbers. However, when a rotorcraft to be marked in accordance with § 45.27(a) lacks sufficient space to display full-size marks on either the cabin, fuselage, boom, or tail, then § 45.29(f) allows marks as large as practicable to be displayed on both sides of the largest outside surfaces of the cabin, fuselage, boom, or tail side surfaces.

Alternatives

Some commenters recommend that the present dual-marking requirements be retained. In those cases where attached equipments would obscure the bottom-surface marks, the commenters recommend that the proposed marking requirements could be made optional or handled by the exemption process. The FAA does not consider this a viable alternative since it would perpetuate the use of the ineffective dual markings.

Additionally, FAA experience indicates that those marks are of limited value for aircraft identification. The large bottom surface marks and the small side surface marks were found to be of little value in air-to-air identification. The bottom surface marks may, in some instances, serve as a means of identifying violators of noise abatement programs. However, those marks are of little value unless the aircraft is flying at an appropriate altitude, attitude, and speed; the observer is situated directly below the flight path; and favorable light and weather conditions prevail.

Further, the FAA agrees that retaining the dual-marking requirements would impose an undue economic burden on rotorcraft owners, particularly those who attach equipment that would obscure the bottom surface marks. In those cases, numbers as large as practicable would have to be displayed; however, should the equipment be removed, 20-inch marks would have to be displayed, as required.

Accordingly, the only viable solution to reconcile the identification and marking problems on rotorcraft is to eliminate the ineffective dual marks and adopt the 12-inch side surface marks. The effectiveness of 12-inch marks has been confirmed under actual operating conditions on fixed-wing aircraft and recommended by the DOD and enforcement agencies to enhance rotorcraft identification.

Regulatory Evaluation

The FAA conducted a detailed regulatory evaluation, which is included in the regulatory docket.

The FAA first determined the number of rotorcraft that would be impacted during the 10-year period starting from 1983, the assumed earliest year that the rule change could take effect. Based on a review of the *Census of U.S. Civil Aircraft* for calendar years 1970–1980, an annual increase factor of 10 percent was applied to determine the forecast number of new rotorcraft for the period 1983–1992. The FAA's analysis indicates that these new rotorcraft and existing rotorcraft (manufactured before 1983) require repainting and thus new registration marks, on the average, every 5 years.

The FAA conducted a new survey of FBO's, which is in addition to the survey conducted for the NPRM No. 82–6. Conversations with the FBO's revealed that by rescinding the current registration marking requirement (standard fuselage bottom and side), the average 1982 dollar cost savings to rotorcraft manufacturers and owners is $444. The proposed larger side markings would cost an average $220. Additionally, certain rotorcraft manufacturers and owners will incur costs to modify or develop new paint schemes because larger side marks may not coincide aesthetically with existing paint schemes. Based on conversations with the FBO's, the average weighted distributed cost to modify paint schemes per rotorcraft is $196. Modification of paint schemes is a one-time cost and applies only to the initial painting of rotorcraft manufactured after the effective date of the rule and the first repainting of existing rotorcraft that occurs after the effective date of the rule. Furthermore, the FAA does not agree that larger side markings will result in a loss of business because customers would not be able to readily identify rotorcraft with modified or new paint schemes as suggested by two commenters to NPRM No. 82–6. Based on conversations with the FBO's, the FAA has determined that these manufacturers and owners in most cases should be able to work out a modified paint scheme to minimize the amount of change from the current design.

To determine the benefits and cost of the proposal over the period 1983–1992, FAA inflated the unit dollar values for the current and proposed registration mark requirements and aesthetic-related costs to 1983 values, multiplied the unit costs by the affected number of rotorcraft for each year, and discounted the totals to 1983.

Based on the above methodology, the discounted value of the expected benefits over the period 1983 to 1992 is approximately $14.0 million, whereas the discounted value of the costs over the same period is approximately $11.2 million, for a benefit/cost ratio of 1.25.

The actual cost savings may be larger than determined above because under current regulations owners of rotorcraft who install or remove kits or parts that mount on the bottom of the rotorcraft often have to replace the marks on the fuselage bottom to maintain compliance. Therefore, owners of such rotorcraft would receive benefits from the elimination of the bottom marking requirement since the rotorcraft would not need to be marked each time such kits are installed and removed. These rotorcraft are still included, however, in the estimates of those that will have to be repainted with new marks every 5 years. Additionally, larger side marks

may make rotorcraft easier to identify and aid in law enforcement by not only helping to identify alleged violators but also acting as a deterrent to potential violators.

Regulatory Flexibility Analysis and Determinations

The Regulatory Flexibility Act of 1980 (RFA) was enacted by Congress to ensure, among other things, that small entities are not disproportionately affected by Government regulations. The RFA requires agencies to review rules which may have a "significant economic impact on a substantial number of small entities."

As detailed in the preceding review, this rule provides a small net benefit to rotorcraft manufacturers and owners. Therefore, the FAA has determined that the rule will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 14 CFR Part 45

Nationality, Air safety, Safety, Aviation safety, Air transporation, Transportation, Airplanes, Helicopters, and Rotorcraft.

Adoption of the Amendment

Accordingly, Part 45 of the Federal Aviation Regulations (14 CFR Part 45) is amended as follows, effective April 18, 1983:

PART 45—IDENTIFICATION AND REGISTRATION MARKING

1. By revising § 45.27(a) to read as follows:

§ 45.27 Location of marks; nonfixed-wing aircraft.

(a) *Rotorcraft.* Each operator of a rotorcraft shall display on that rotorcraft horizontally on both surfaces of the cabin, fuselage, boom, or tail the marks required by § 45.23.

* * * * *

2. By revising § 45.29 (b)(3) and (f) to read as follows:

§ 45.29 Size of marks.

* * * * *

(b) * * *

(3) Rotorcraft, must be at least 12 inches high, except that rotorcraft displaying before April 18, 1983, marks required by § 45.29(b)(3) in effect on April 17, 1983, and rotorcraft manufactured on or after April 18, 1983, but before December 31, 1983, may display those marks until the aircraft is repainted or the marks are repainted, restored, or changed.

* * * * *

(f) If either one of the surfaces authorized for displaying required marks under § 45.25 is large enough for display of marks meeting the size requirements of this section and the other is not, full-size marks shall be placed on the larger surface. If neither surface is large enough for full-size marks, marks as large as practicable shall be displayed on the larger of the two surfaces. If any surface authorized to be marked by § 45.27 is not large enough for full-size marks, marks as large as practicable shall be placed on the largest of the authorized surfaces.

* * * * *

(Secs. 307(c), 313(a), 501, and 601(a), Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(c), 1354(a), 1401, and 1421(a)); and sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c))

Note.—This amendment will have a net beneficial cost impact because it will reduce the economic burden on rotorcraft owners and manufacturers. Specifically, the elimination of the costly 20-inch bottom surface marks will more than offset the increase of the fuselage side marks to 12 inches. Further, rotorcraft displaying bottom surface marks before the effective date will be allowed to display those marks until the rotorcraft is repainted or the marks are repainted, restored, or changed. The FAA has determined this document does not involve requirements that will result in any significant burden on owners or manufacturers. Accordingly, it has been determined that this final rule is not major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). For these reasons and because this rule will only result in a small economic benefit to individual rotorcraft owners, I certify that, under the criteria of the Regulatory Flexibility Act, this rule will not have a significant economic impact on a substantial number of small entities.

A copy of the regulatory evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained by contacting the person identified under the caption **"FOR FURTHER INFORMATION CONTACT."**

Issued in Washington, D.C., on February 14, 1983.

J. Lynn Helms,

Administrator.

AGENCY: Office of Human Development Services, HHS.

ACTION: Announcement of availability of financial assistance—centers for runaway and homeless youth.

SUMMARY: The Administration for Children, Youth and Families (ACYF), Youth Development Bureau (YDB), announces the availability of Fiscal Year 1983 funds for Runaway and Homeless Youth Center Program Grants. These Grants are authorized by the Runaway and Homeless Youth Act, 42 U.S.C. 5701 et seq. This Act was enacted by Title III of the Juvenile Justice and Delinquency Prevention Act of 1974 (Pub. L. 93–415), as amended by the Juvenile Justice Amendments of 1977 (Pub. L. 95–115), and the Juvenile Justice Amendments of 1980 (Pub. L. 96–509).

DATE: The closing date for receipt of applications is May 16, 1983.

A. Scope of This Announcement

This Program Announcement describes the application process for the Center Grants Program to be awarded during Fiscal Year 1983. Competition for other grant awards in this and other ACYF program areas will be announced separately in the **Federal Register.**

B. Program Purpose

The purpose of the National Runaway and Homeless Youth Program is to provide financial assistance to establish or strengthen community-based centers designed to address the needs (e.g., outreach, detached youth work, temporary shelter, counseling, family counseling and aftercare services) for runaway and homeless youth and their families. Additional purposes of this program are to provide financial assistance to establish new programs in unserved communities, and to strengthen many of the existing centers.

Programs receiving funding under the Runaway and Homeless Youth Act are required to be knowledgeable of and to adhere to the requirements of 45 Code of Federal Regulations (CFR), Part 1351, Runaway and Homeless Youth Program, and other applicable Federal regulations (copies of the regulations pertaining to this program are included in the application kit available at the respective regional offices shown at the end of this Program Announcement). Applicants must develop their application in accordance with those regulations and the supplementary instructions which are also included in the kit. Under this Program Announcement, State agencies should pay particular attention to Section D, wherein their participation is urged.

C. Program Goals and Objectives

The program goals and objectives are to assist Runaway and Homeless Youth Centers to: (a) Alleviate the problems of runaway and homeless youth; (b) reunite youth with their families and to encourage the resolution of intrafamily problems through counseling and other services; (c) strengthen family relationships and to encourage stable living conditions for youth; and (d) help youth decide upon a future course of action.

The centers funded under this program are required to provide outreach, temporary shelter, counseling, family counseling and aftercare services which address the immediate needs of youth while they are away from home, and to provide individual and family counseling and other assistance needed to resolve intrafamily problems, and to strengthen family relationships. Additionally, both directly and through linkages with other social services agencies, the centers are required to furnish other assistance such as health, education, legal, and employment services geared to the needs of the individual clients and families served.

A special emphasis will be placed on strengthening approximately 100 existing grant programs. The 42 grantees who are being awarded non-competitive continuation basic center grants and the grantees who are awarded competing continuation basic center grants will be eligible to apply for additional funds to strengthen their programs. Strengthening priorities shall include the development/improvement of outreach components; the development/improvement of aftercare services and the improvement of administrative management capabilities.

D. Eligible Applicants

States, localities, private nonprofit agencies, and coordinated networks of such agencies are eligible to apply for a Runaway and Homeless Youth Center grant unless they are part of the law enforcement structure or the juvenile justice system. States are defined to include any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Trust Territories of the Pacific Islands, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands. (See 42 U.S.C. 5603(7) as amended by Sec. 5(c) of Pub. L. 96–509). Indian tribes and Indian organizations which are not Federally recognized are eligible to apply for grants as private nonprofit agencies. Federally recognized Indian tribes are eligible to apply for grants as local units of government.

A coordinated network of agencies is an association of two or more private nonprofit, public or any combination of such agencies providing services to runaway or homeless youth and their families.

To stimulate the interactions between State agencies and private nonprofit agencies, and coordinated networks of such agencies serving runaway and homeless youth, States are encouraged to apply.

E. Available Funds

The Administration for Children, Youth and Families expects to award approximately $17,000,000 in grants to an estimated 201 centers for runaway and homeless youth in Fiscal Year 1983. Of that amount, an estimated $2,200,000 will be available for the 42 non-competing continuations that were funded for the first time in Fiscal Year 1981 for a four-year project period. It is anticipated that approximately $3,000,000 will be available to fund about 35 new programs in unserved communities that did not receive funding under the Runaway and Homeless Youth Act, Title III, Pub. L. 96–509, during the previous center grants competition held in Fiscal Year 1981. An estimated $8,000,000 will be used to competitively fund up to 124 center grants whose project periods end in Fiscal Year 1983. Further, it is expected that $3,800,000 will be available for strengthening approximately 100 of the 166 center grantees currently funded (which includes the 42 non-competing continuations).

It is anticipated that the project period (and budget period) for the new center grants in unserved communities will be one-time grants and will be from 12 to 17 months. It is expected that these awards will range from $80,000 to $100,000.

The project period (and budget period) for the 124 current grantees competitively applying for Title III funds will be for 12 months. These awards will range from $10,000 to $100,000 for the project period.

Grants to strengthen approximately 100 currently funded centers (i.e., of the existing 166 grantees) will be for one

time and will be for a comparable project period (and budget period) of 12 months. These awards will be in addition to the basic center award and will range from $10,000 to $50,000.

The number of grants awarded within each State will depend upon the State's allocation and the number of acceptable applications. The dollar amounts given in this announcement are subject to change depending on the number of applications received within each State. Also, all applicants under this announcement will compete with other applicants in the State in which their services will be provided.

Under Section 313 of this Act, as amended (42 U.S.C. 5713), DHHS gives priority in considering grant applications to organizations which have a demonstrated experience in the provision of services to runaway and homeless youth and their families and to organizations requesting grants of less than $150,000. In negotiating the final budgets for successful applicants, consideration will be given to the need expressed in the application which identifies the number of runaway or homeless youth in the community in which the center will be located; the existing availability of services designed to meet the immediate needs of runaway and homeless youth and their families; and the range and types of services to be provided under the proposed project within the requirements of the Act, as shown in criterion number three, Section H, of this announcement.

The project period will be for twelve months for currently funded Title III grantees. In the event that agencies within any State jurisdiction either submit applications which fail to meet the minimum criteria for funding, or agencies within the respective State jurisdictions do not submit applications, the Department of Health and Human Services will reallocate, at the discretion of the Secretary, any unused funds for one-time efforts pursuant to Sec. 311 of Pub. L. 96–509.

The following table indicates the Fiscal Year 1983 allocations for each State jurisdiction.

RUNAWAY AND HOMELESS YOUTH CENTERS
ALLOCATIONS BY STATE

[Total 57 States—Fiscal Year 1983]

Alabama	[illegible]
Alaska	39,100
Arizona	199,750
Arkansas	170,000
American Samoa	3,400
California	1,848,100
Colorado	212,330
Connecticut	217,600
Delaware	44,200
District of Columbia	44,200
Florida	[illegible]
Georgia	408,000
Guam	15,300
Hawaii	73,100

RUNAWAY AND HOMELESS YOUTH CENTERS
ALLOCATIONS BY STATE—Continued

[Total 57 States—Fiscal Year 1983]

Idaho	78,200
Illinois	858,500
Indiana	425,000
Iowa	217,600
Kansas	171,700
Kentucky	277,100
Louisiana	342,400
Maine	86,000
Maryland	304,300
Massachusetts	402,900
Michigan	725,900
Minnesota	309,400
Mississippi	214,200
Missouri	357,000
Montana	62,900
Nebraska	119,500
Nevada	54,400
New Hampshire	68,000
New Jersey	530,400
New Mexico	107,100
New York	1,276,160
North Carolina	428,400
North Dakota	51,000
Northern Marianas	1,700
Ohio	819,400
Oklahoma	215,900
Oregon	185,300
Pennsylvania	825,200
Puerto Rico	343,400
Rhode Island	64,600
South Carolina	238,180
South Dakota	54,400
Tennessee	331,500
Texas	1,098,300
Trust Territories	17,000
Utah	134,300
Vermont	37,400
Virginia	362,500
Virgin Islands	10,200
Washington	290,700
West Virginia	142,800
Wisconsin	357,000
Wyoming	37,400

F. Grantee Share of the Project

Section 316(a) provides for 90 percent of the costs of operating a center for runaway and homeless youth. The non-Federal portion may be for grantee incurred costs or in-kind contributions (including the facility, equipment or services) and must be project-related and allowable under the cost principles as provided in 45 CFR, Part 74, the Department's regulation on the Administration of Grants.

G. The Application Process

1. Basic Center Grants

All new applicants and applicants for competing continuation grants must clearly identify on the application form that they are applying for a basic center grant.

2. Strengthening Center Grants

All currently funded grantees are eligible to apply for funds to strengthen their centers. Since separate review criteria will be applied, the application and review process will be as follows:

- The grantees who are applying for competitive continuation grants and who wish to compete for funds to strengthen their programs should clearly state in their application that they are also applying for funds to strengthen their program. This will entail a separate budget and narrative breakout detailing the amount of funds required and how they will be used.
- The 42 grantees who are being awarded non-competitive continuation grants and who wish to compete for funds to strengthen their program, are required to submit a separate competitive application for these funds.

3. Information To Be Made Available—Submission of Applications

Information about the availability of Fiscal Year 1983 funds to support centers for runaway and homeless youth will be made available to the public through this announcement and to the extent feasible, through notices to appropriate public and private nonprofit organizations in each State. Agencies and organizations interested in applying for funds may request application kits from the cognizant ACYF regional offices (see addresses for the regional offices at the end of this announcement).

In order to be considered for a Runaway and Homeless Youth Center Grant, an application must be submitted on the forms and in the manner required by the Administration for Children, Youth and Families.

The application must be executed by an individual authorized to act for the applicant agency and to assume responsibility for the obligations imposed by the terms and conditions of the grant award. Applications must be prepared in accordance with the guidance provided in the announcement and the instructions in the application kit.

One signed original and two copies of the grant application, including all attachments, are required. ACYF encourages the submission of an additional five copies to facilitate the review panel process. Completed applications, including all copies, must be sent to the Director, Office of Fiscal Operations in the applicant's region. (Addresses for the Regional Offices of Fiscal Operations will be available from the ACYF regional offices.)

4. A–95 Notification Process

All applications, except those from federally recognized Indian tribes, are subject to the Project Notification and Review Procedures required by OMB Circular A–95, Part I. This circular requires applicants to notify State and Areawide A–95 Clearinghouses of the intention to apply for a grant and, if requested by a clearinghouse, to submit a copy of the application. Some State and area clearinghouses provide their own forms on which such information is to be submitted.

Applicants should immediately contact the appropriate State clearinghouse for information on the A–95 requirements. Applicants which are federally recognized Indian tribes are not subject to the requirements of the Project Notification and Review Procedures. Such applicants may voluntarily participate in this system and are encouraged to do so.

Instructions for meeting these requirements and the names and addresses of State and areawide clearinghouses will be provided in the application kit.

5. Application Consideration

All applications which are complete and conform to the requirements of this program announcement will be subject to a competitive review and evaluation process. This review will be conducted at the HHS/HDS regional office level by persons knowledgeable in the areas of youth development and/or human services programs who are outside and independent of the Administration for Children, Youth and Families. The consideration of applications by the competitive review panel may also take into account the comments of appropriate specialists inside and outside the Federal Government. The results of the competitive review will be reported to the ACYF Regional Program Director who will make the final selection of the successful applicants. Organizations whose applications have been disapproved will be notified in writing of that decision.

Successful applicants will be notified through the issuance of a Notice of Financial Assistance Awarded which sets forth the amount of funds granted, the terms and conditions of the grant, the effective date of the grant, the budget period for which support is given, the non-Federal share to be provided, and the total project period for which support is provided.

6. Priority for Funding

Section 313 of the Runaway and Homeless Youth Act requires that priority for funding be given to organizations with demonstrated experience in dealing with runaway and homeless youth, or organizations requesting grants with budgets of less than $150,000. As specified in 45 CFR 1351.12—"Past experience means that a major activity of the agency has been the provision of temporary shelter, counseling, and referral services to runaway or otherwise homeless youth and their families, either directly or through linkages established with other community agencies."

H. Criteria for Review of Applications

Part I. Criteria for All Center Grant Awards

New and competing continuation applications for financial assistance will be reviewed and evaluated against the following criteria:

1. The reasonableness of the proposed budget with a breakdown of costs, and whether a center grant request is less than $150,000	(5 points)
2. The extent to which the applicant has demonstrated the ability to access other resources which can strengthen support for the existing or proposed center's activities to remain a viable organization at the expiration of the Federal funding period	(20 points)
3. The extent to which the applicant documented the need for services for runaway and homeless youth, and proposed service areas (e.g., particular communities, districts, neighborhoods, etc.) on the basis of a comprehensive community needs assessment, and the extent to which the selection of these areas is based on the incidence of runaway and homeless youth: (Information to be provided by the applicant should include data on the incidence of runaway and homeless youth in the geographic area to be served, and an analysis of other resources and services available in the community to serve this target population, a discussion of the benefits to the community of a runaway and homeless youth center program, and a description of the precise location of the center)	(20 points)
4. The potential of the applicant to establish a center which can achieve the goals and requirements of this grant program as set forth in the Runaway and Homeless Youth Act, the Administrative Requirements (45 CFR 1351), and the Program Performance Standards	(30 points)
5. The extent to which the applicant organization has demonstrated prior experience in planning, organizing and/or providing information, temporary shelter, counseling, and referral services to runaway and homeless youth and their families	(15 points)
6. The capacity of the applicant to provide a statement of assurance that they will comply with the program requirements provided in the Code of Federal Regulations, Title 45, Part 1351	(5 points)

Part II. Strengthening Centers

Competing applications for financial assistance intended to strengthen the operation and the programs of centers for runaway and homeless youth will be reviewed and evaluated against the following criteria.

1. The extent to which the applicant documents the need for additional funds to strengthen on a one time basis one or more of the following center activities: management and operations; outreach services; or aftercare services. The applicant must specifically describe the proposed activities to be undertaken, the ability of the center to achieve the proposed objectives, and how the expected outcomes would significantly strengthen the center's capacity to address the goals of the Runaway and Homeless Youth Program	(30 points)
2. The reliability and soundness of the applicant's proposed activities and the approaches to be utilized in improving program management and operations, outreach or aftercare services	(20 points)
3. The potential replicability of the center's proposed activities in terms of suitability for use in other community-based centers serving runaway and homeless youth and their families and specific quantifiable outcomes or products, if applicable, to be achieved/developed	(20 points)
4. The capability and qualifications of proposed staff, or organizations that would be involved and the adequacy of the applicant's facilities and/or staff to achieve the proposed objectives	(15 points)
5. A reasonable proposed budget, including a justification of projected costs, and the ability of the applicant to complete all proposed activities within the estimated timeframes	(15 points)

Closing Date for Receipt of Applications

The closing date for the receipt of applications for activities identified under this announcement is May 16, 1983. Application kits are available from the appropriate Regional Program Director listed at the end of this program announcement. Applications may be mailed or hand delivered to the regional HDS Office of Fiscal Operations at their respective addresses as shown in the application kit.

Applications received after the closing date at 5:00 p.m. will be considered ineligible and will not be reviewed and evaluated. An application will be considered to be received on time if:

- The application was sent by registered or certified mail no later than the closing date, as evidenced by a U.S. Postal Service dated postmark, unless it arrives too late to be considered by the independent review panel. Applicants should be aware that not all post offices provide a dated postmark. Applicants are advised to check with their post office to determine this.
- The application is received on or before the closing date by the respective regional HDS Office of Fiscal Operations at their respective address as shown in the application kit. In establishing the date of receipt, consideration will be given to documentary evidence of receipt maintained by HHS.

Availability of Application Forms

Application packages which contain the prescribed application forms and information for the applicant may be obtained by writing to the appropriate Regional Program Director in the HHS region in which the program will be located. The addresses of the regional offices are listed below:

Region I, Mr. Richard Stirling, Regional Program Director, Office of Human Development Services, John F. Kennedy Federal Building, Room 2011, Boston, Massachusetts 02203 (VT, CT, ME, NH, RI, MA): Attention: Ms. Susan Selya (617–233–6450);

Region II, Mr. Dennis Coughlin, Acting Regional Program Director, Office of Human Development Services, 26 Federal Plaza, Room 4149, New York, New York 10278 (NY, NJ, PR, VI): Attention: Ms. Estelle Haferling (212–264–1329);

Region III, Mr. Alvin Pearis, Regional Program Director, Office of Human Development Services, 3535 Market Street, P.O. Box 13716, Philadelpia, Pennsylvania 19101 (DE, DC, MD, VA, WV, PA): Attention: Ms. Mary Williams (215–596–0391);

Region IV, Mr. John Jordan, Regional Program Director, Office of Human Development Services, 101 Marietta Towers suite 903, Atlanta, Georgia 30323 (AL, FL, GA, KY, MS, NC, SC, TN): Attention: Mr. James Shelton (404–221–2128);

Region V, Mr. German White, Regional Program Director, Office of Human Development Services, 300 South Wacker Drive, Chicago, Illinois 6066 (IL, IN, MN, OH, WI, MI): Attention: Ms. Katie Williams (312–353–6514);

Region VI, Mr. Tommy Sullivan, Regional Program Director, Office of Human Development Services, 1200 Main Tower, 20th Floor, Dallas, Texas 75202 (LA, NM, OK, TX, AR): Attention: Mr. Jerry Mabe (214–767–8596);

Region VII, Mr. Hilton Baines, Regional Program Director, Office of Human Development Services, Federal Office Building, Room 384, 601 East 12th Street, Kansas City, Missouri 64106 (IA, KS, MO, NE): Attention: Mr. Robert Mead (816–374–7342);

Region VIII, Mr. David Chapa, Regional Program Director, Office of Human Development Services, 1961 Stout Street, Federal Office Bldg., Ninth Floor, Denver, Colorado 80294 (CO, MT, ND, SD, UT, WY): Attention: Mr. Juan Cordova (303–837–3106);

Region IX, Mr. Roy Fleischer, Regional Program Director, Office of Human Development Services, 50 United Nations Plaza, San Francisco, California 94102 (AZ, CA, HI, NV, GU, AS, TT): Attention: Chief, Children's Bureau (415–556–6153); or

Region X, Mr. Frank Jones, Regional Program Director, Office of Human Development Services, 2901 Third Avenue, Mail Stop 503, Seattle, Washington 98121 (AK, ID, OR, WA): Attention: Mr. Ronald Mowry (206–442–0838).

(Catalog of Federal Domestic Assistance Program Number 13.623, Runaway and Homeless Youth Program)

Dated: March 4, 1983.

Keith A. Moon,

Acting Commissioner, Administration for Children, Youth and Families.

Approved: February 11, 1983.

Dorcas R. Hardy,

Assistant Secretary for Human Development Services.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.) Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/FHWA	USDA/SCS		DOT/FHWA	USDA/SCS
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/MA	LABOR		DOT/MA	LABOR
DOT/NHTSA	HHS/FDA		DOT/NHTSA	HHS/FDA
DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

List of Public Laws

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's List of Public Laws.

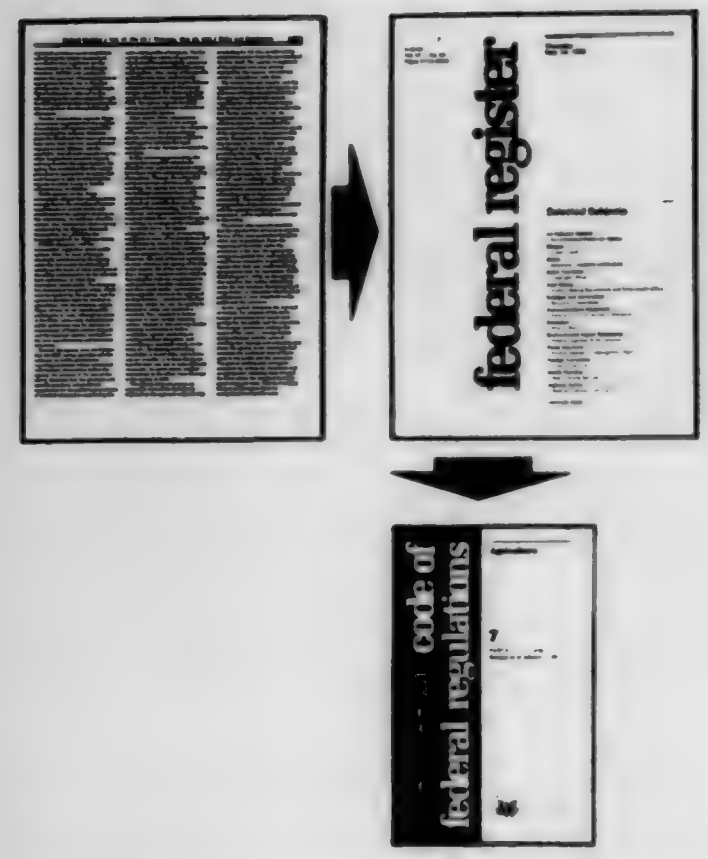
The Federal Register

Regulations appear as agency documents which are published daily in the **Federal Register** and codified annually in the **Code of Federal Regulations**



The **Federal Register**, published daily, is the official publication for notifying the public of proposed and final regulations. It is the tool to use to participate in the rulemaking process by commenting on the proposed regulations. And it keeps people up to date on the Federal regulations currently in effect.

Mailed monthly as part of a **Federal Register** subscription are: the LSA (List of CFR Sections Affected) which leads users of the **Code of Federal Regulations** to amendatory actions published in the daily **Federal Register**; and the cumulative **Federal Register Index**.

The **Code of Federal Regulations** (CFR) contains the annual codification of the final regulations printed in the **Federal Register**. Each of the 50 titles is updated annually.

Subscription Prices:

Federal Register
One year: $300 domestic; $375 foreign
Six months: $150 domestic; $187.50 foreign

Code of Federal Regulations
One year: $615 domestic; $768.75 foreign
Single volumes: Individually priced.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Rules and Regulations

Federal Register
Vol. 48, No. 54
Friday, March 18, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

MERIT SYSTEMS PROTECTION BOARD

5 CFR Part 1201

Appeals Arbitration

AGENCY: Merit Systems Protection Board.

ACTION: Interim rules; request for comments.

SUMMARY: The Merit Systems Protection Board is adopting a new appeals arbitration procedure for resolving matters subject to the appellate jurisdiction of the Board. It is being conducted on a pilot basis in four regional offices (San Francisco, Chicago, Seattle and Denver) and will be carefully evaluated in approximately one year to determine if it should be extended. The functions of the new rules are to provide an alternative procedure that will offer employees and agencies a faster, less costly means of resolving routine actions while also affording an impartial forum. The appellant may request that his or her petition be processed under appeals arbitration. The agency will be given the opportunity to concur in or decline the use of appeals arbitration. However, the Regional Director or designee retains final authority to grant or deny the request to use appeals arbitration. If granted, the regional director will appoint an arbitrator on a rotating basis from a panel of presiding officials who are designated for the new procedures; these officials will receive special training. The procedure will be informal with no discovery and will not be precedential. Settlement will be explored by the arbitrator with the parties. A decision will be issued within 30 days from the due date or receipt of the parties' joint arbitration record, whichever is earlier. The arbitrator's award will include a summary of the issues presented, findings of fact and conclusions of law, and decision on the merits. The award is final except a limited right is provided to petition the Board for review for demonstrated harmful procedural irregularity in the proceeding or a clear error of law. The board will issue a final decision within 15 days after the close of the published briefing schedule.

EFFECTIVE DATE: March 18, 1983.

ADDRESS: Comments should be submitted on or before July 1, 1983 to: Paul E. Trayers, Labor Counsel, Office of the General Counsel, Merit Systems Protection Board, 1120 Vermont Avenue, NW., Washington, D.C. 20419.

FOR FURTHER INFORMATION CONTACT: Paul E. Trayers, Labor Counsel, (202) 653–7171.

SUPPLEMENTARY INFORMATION:

Background

The Civil Service Reform Act of 1978 authorized the Board to establish regulations for the purpose of adjudicating employee appeals. The legislative history of the Act discloses Congress' major interest in expediting the resolution of personnel actions subject to the Board's appellate jurisdiction. Illustrative of this is commentary which urges the Board to develop efficient and effective alternative methods for resolving appealable matters by adoption of "suitable forms of conciliation, mediation, arbitration, and other methods mutually agreeable to the parties." (S. Rep. No. 969, 95th Cong. 2d Sess., 61 (1978)).

In accordance with 5 U.S.C. 7701(j), the Merit Systems Protection Board is establishing an appeals arbitration procedure as an alternative to the more formalized procedure now governing appeals before the Board. The Board's basic objectives are to establish a simplified system which will provide the parties with a faster, less costly process to resolve routine, non-precedential actions, and to preserve an impartial forum with full concern for fairness to the parties and the public.

In formulating the appeals arbitration procedure, the Board sought a system which will achieve the following goals:

—The system will not only be fair and fast, but also one which is recognized and accepted as such by employees and agency management.

—It will encourage the informal resolution of disputes in the proceeding, including settlement by agreement between the parties.

—It will cover as many kinds of appealable matters as are feasible for resolution through the more informal process.

—It will improve the timeliness and cost-effectiveness of the process leading to the resolution of disputed personnel actions.

—It will exclude sensitive cases requiring more intense adjudicative proceedings, based on the nature, gravity and complexity of the issues involved.

—It will preserve the parties' rights to limited Board review of major procedural and legal errors in the arbitration award.

After broad consultation and advice, the Board designed the procedures described below and detailed in the accompanying regulations to achieve these goals. The procedures are based on the arbitration process that is used in the private sector and increasingly in the public sector to resolve disputes. While the procedures are not exactly the same as other forms of arbitration, the essential elements are adapted for the administrative setting in which they will operate. Thus, the procedures draw from several aspects of administrative practice as well as traditional arbitration concepts to provide a practical alternative in the resolution of routine appeals.

Appeals Arbitration Procedure

By offering the benefits of reduced costs and an expedited time for the resolution of an appeal, the appeals arbitration procedure should present an attractive alternative to both appellants and agency management. As a primary characteristic, its goal will be the issuance of an arbitration award within 60 days from the appellant's election of appeals arbitration. The program is being conducted on a pilot basis in the San Francisco, Chicago, Denver and Seattle regional offices. The experience under the new procedure will be carefully evaluated during the year to determine whether it should be modified, terminated, or extended to other regions.

Filing requirements with respect to timeliness and content of the appeal are

the same as those provided by § 1201.22(b) of the Board's appellate regulations. In addition, the filing will include a statement by the appellant or representative specifically requesting that the matter be processed under appeals arbitration. The appeal and election will be filed with the appropriate regional office of the Merit Systems Protection Board. The appellant may, however, elect to use the appeals arbitration procedure anytime within 10 days of the date of the Board's order of acknowledgement.

The agency will have 15 days from the date of Board's order of acknowledgement to file its designation of representative and consent form or decline to utilize the appeals arbitration procedures. Included in the consent form will be a summary of the facts and legal issues. Following receipt of the designation of representative form, the regional director will then decide whether to accede to the request to use the appeals arbitration procedure. While the parties' request will be given great weight, factors influencing the decision are whether it appears likely that discovery will be needed for a fair resolution of the appeal, whether the petition presents novel questions of law, whether the issues are overly complex or whether the region's caseload and staffing prohibit further processing of cases under the expedited arbitration system. The regional director or his designee may at any time prior to the issuance of the arbitration award convert the appeal to the formal MSPB appeal process.

If the agency consents to use appeals arbitration, the parties will jointly prepare the arbitration record including, but not limited to, statements of issues, statements of positions with respect to those issues limited to three pages, requests for hearing, witness lists, the agency file required by § 1201.25 and two dates mutually agreed upon for the hearing. This record will be filed with the regional office within 30 days from the date of the Board's order of acknowledgement.

If the case is accepted for the appeals arbitration procedure, specially trained presiding officials from the Regional Office will be selected on a rotating basis. The hearing, if requested by the appellant, will be held at the employment site and be scheduled within a 15-day period following expiration of the time limit for the filing of the joint arbitration record; otherwise the record will close on a date specified by the arbitrator. In any event, the record will close within 15 days from expiration of the time limit for the filing of the Joint Arbitration Record.

The Director of the Office of Personnel Management and the Special Counsel may intervene as a matter of right in those appeals that meet the criteria of 5 U.S.C. 7701(d) and 1206(i), respectively.

Although formal rules of procedure may be used as a guide, formal rules as to admissibility of evidence, motions, filings of briefs, etc., will not apply to appeals arbitration. Rules of procedure are to be liberally construed to promote the ultimate goal of an expedited final resolution of the appeal with full disclosure of pertinent information by both parties in the presentation of their respective sides of the appealed action. While the burden of proof will remain with the agency, determinations as to relevance, reliability, and fairness shall be the primary consideration for admission of evidence. While discovery is not available under this procedure, the parties have the duty to include all known relevant materials with their submissions. Every Federal agency is obligated to make its employees available on official duty status to furnish sworn statements or to appear as witnesses when requested to do so. The arbitrator may request the production of additional information or witnesses if he or she has a reasonable basis to believe it will aid in the resolution of the matter. In the event a party fails to cooperate, the arbitrator may impose appropriate sanctions.

Appeals arbitration is intended to foster an environment conducive to the informal settlement of disputes prior to the issuance of an arbitrator's award. The arbitrator is authorized and expected to explore the possibility of a settlement agreement at any time up to the actual hearing. If a hearing is conducted, it will be informal in nature.

If a settlement agreement has been achieved, the parties may enter such agreement into the arbitration record, which will stand as the authoritative and binding resolution of the appeal. The Board will retain jurisdiction to ensure compliance. If the parties choose not to enter the settlement into the record, the Board does not have jurisdiction to enforce the settlement. The arbitrator will issue an order dismissing the appeal with prejudice when settlement occurs. If settlement is not achieved, the arbitrator will adjudicate the appeal and issue a final decision that summarizes the basic issues, findings of fact and conclusions of law, and upholds, sets aside, or modifies the appealed action. These decisions will be based on authoritative legal precedents, including Board decisions, but will not be precedential in and of themselves and, therefore, may not be cited as authority in subsequent cases.

The decision of the arbitrator is subject to limited review by the Board. The standards of review are demonstrated harmful procedural irregularity in the proceedings before the arbitrator or a clear error of law. Any party to the proceeding may file a petition for review under these standards. The petition for review must be filed and received by the Board within 35 days of the arbitrator's award and a supporting brief limited to no more than 15 pages must accompany the petition. Opposition briefs of no more than 10 pages may be filed within 15 days of the Board's forwarding of the petition for review. The Board will issue a final decision 15 days from the close of the briefing schedule.

The appellant retains the right of filing an appeal from the Board's decision in the Court of Appeals for the Federal Circuit.

The Board has found that good cause exists for publication of these regulations for interim effect in view of the public interest served by the immediate availability of an alternative appeals arbitration procedure. The Board invites public comments on these regulations through July 1, 1983.

Regulatory Flexibility Act

The Chairman, Merit Systems Protection Board, certifies that the Board is not required to prepare initial or final regulatory analysis of this proposed rule, pursuant to section 603 or 604 of the Regulatory Flexibility Act, because of his determination that this rule would not have a significant economic impact on a substantial number of small entities, including small business, small organizational units and small governmental jurisdictions.

List of Subjects in 5 CFR Part 1201

Government employees.

Accordingly, the Merit Systems Protection Board proposes to amend 5 CFR Part 1201 as follows:

Subpart B—[Amended]

Petitions for Review of Agency Action, Pleadings

1. Section 1201.21 is amended by adding paragraph (e) to read as follows:

§ 1201.21 Notice of Appeal rights.

* * * * *

(e) In regions offering the use of appeals arbitration, notice of the

opportunity to request such procedure set forth at § 1201.200 *et seq.*, including a description of the procedure.

2. Section 1201.24 is amended by adding paragraph (a)(10), and revising (b) and (c) to read as follows:

§ 1201.24 Content of petition for appeal, right to hearing.

(a) * * *

* * * * *

(10) A request that the matter be processed under the appeals arbitration procedure set forth at § 1201.200 *et seq.*, if such procedure is available.

(b) *Use of the form.* Completion of the form in Appendix I shall constitute compliance with paragraph (a) of this section and § 1201.31 if a representative is designated in the form. In regions allowing the use of appeals arbitration, the amended form in Appendix I–A containing an entry for the election of voluntary arbitration and an explanation thereof will be used.

(c) *Right to hearing.* Under 5 U.S.C. 7701, an appellant has a right to a hearing. Alternatively, the appellant may choose to have the determination based on the record. If the parties choose to utilize appeals arbitration, the procedures for a hearing shall be in accordance with § 1201.205.

3. In § 1201.25, paragraphs (a)(6) and (7) are revised to read as follows:

§ 1201.25 Content of agency response, request for hearing.

(a) * * *

* * * * *

(6) A declination by the agency, if appeals arbitration has been requested by the appellant and the agency declines to use the process;

(7) Designation of and signature by the authorized agency representative.

* * * * *

4. 5 CFR Part 1201 is amended by adding Subpart G, to read as follows:

Subpart G—Appeals Arbitration

General

Sec.
1201.200 Scope and policy.

Election of and Filing for Appeals Arbitration

1201.201 Election of appeals arbitration.
1201.202 Filing of request for appeals arbitration; contents; time limits.
1201.203 Procedures for cases involving allegations of discrimination.

Arbitrator and Hearing

1201.204 Selection and authority of arbitrator.
1201.205 Hearing.

Parties and Witnesses

1201.206 Witnesses.
1201.207 Intervenors.

Evidence

1201.208 Service of documents.
1201.209 Admissibility.
1201.210 Production of evidence or witnesses by request of arbitrator.
1201.211 Stipulations.
1201.212 Official notice.

Sanctions

1201.213 Sanctions.

Hearing Procedure; Settlement; Arbitration Award

1201.214 Burden of proof.
1201.215 Closing the record.
1201.216 Settlement.
1201.217 Arbitration award.

Petitions for Review

1201.218 Petitions for review.
1201.219 Standard of review.
1201.220 Final decision.
1201.221 Judicial review.

Authority: 5 U.S.C. 7701(j).

Subpart G—Appeals Arbitration

§ 1201.200 Scope and policy.

(a) The rules in this subpart apply to appeals arbitration procedures of the Board. It is the objective of the Board to establish a simplified alternative dispute resolution procedure which will provide employees and agencies with a faster, less costly process than Subpart B procedures to resolve appealed actions, while also assuring an impartial third-party forum with full concern for fairness and the rights of all parties.

(b) This pilot program will be conducted for one year and be available in four regional offices—San Francisco, Chicago, Denver and Seattle.

Election of and Filing for Appeals Arbitration

§ 1201.201 Election of appeals arbitration.

(a) The appellant may request appeals arbitration at the time of filing a petition for appeal. In the event the appellant has not elected appeals arbitration at the time of filing, appellant will be allowed 10 days from the date of the Board's order of acknowledgement to elect appeals arbitration. Such election must be in writing. The date of filing shall be determined by the date of mailing indicated by the postmark date.

(b) Notice of election of appeals arbitration will be served on the agency in the Board's order of acknowledgement. Within 15 days from the date of the Board's order, the agency will file either a consent to use the appeals arbitration process and a designation of representative form or a declination to use appeals arbitration. Included in the consent will be a summary of facts and legal issues raised in the appeal. In the event the agency declines to use appeals arbitration, it must timely file its response to the petition for appeal in accordance with § 1201.25 and note its declination of the process.

(c) The regional director or designee of the MSPB office having jurisdiction over the appeal retains final discretion to process the case under appeals arbitration or the formal MSPB procedure. Such decision will be made after receipt of the agency's consent and summary of the case. The regional director or designee also retains the right to convert the case to adjudication under Subpart B procedures in the event circumstances warrant, such as whenever it appears that discovery is required, novel questions of law are raised at the hearing or in briefs, or issues arise that do not lend themselves to resolution in appeals arbitration.

§ 1201.202 Filing of request for appeals arbitration; contents; time limits.

(a) The filing, time limits and content requirements of the petition for appeal processed under this subpart shall comply with the provisions of §§ 1201.22–1201.26 of Subpart B, unless these regulations expressly provide otherwise.

(b) Within 15 days from the date of the Board's order of acknowledgement, the agency will file a designation of representative and consent form, including a summary of facts and legal issues raised in the case or decline to use the process.

(c) Within 30 days from the date of the Board's order of acknowledgement, the parties will file a Joint Arbitration Record including, but not limited to:

(1) Statements of issues;

(2) Statements of position with respect to those issues limited to three pages;

(3) Request for hearing;

(4) Witness lists;

(5) The agency file required by § 1201.25; and

(6) Two dates, mutually agreed upon by the parties for the hearing, no later than 15 days beyond the day the Joint Arbitration Record is to be received by the Regional Office.

§ 1201.203 Procedures for cases involving allegations of discrimination.

The provisions for the processing of cases involving discrimination are not abridged by the use of the appeals arbitration procedure. Section 1201.152, however, does not apply to the adjudication of cases involving allegations of discrimination if they are processed under appeals arbitration.

Arbitrator and Hearing

§ 1201.204 Selection and authority of arbitrator.

(a) The regional director will appoint the arbitrator on a rotating basis, taking due account of scheduling difficulties, workload requirements or conflicts of interest.

(b) The arbitrator shall have the authority to rule on parties' procedural requests. However, the arbitrator shall issue the award no later than 30 days from the date the Joint Arbitration Record is received by the Board.

(c) The arbitrator shall have the authority to take all necessary action to avoid delay in the disposition of the proceeding and to conduct a fair and impartial hearing including the authority to regulate the hearing, maintain decorum and exclude from the hearing any disruptive person.

(d) Unless these regulations expressly provide otherwise, the arbitrator will follow the regulations under 5 CFR Part 1201, Subpart B.

§ 1201.205 Hearing.

(a) Either party may request a hearing. The arbitrator will determine in accordance with § 1201.24(c) and § 1201.25(b) whether a hearing is appropriate. The hearing will be scheduled within 15 days following the due date or receipt of the Joint Arbitration Record, whichever is earlier.

(b) The hearing will be informal. Election of appeals arbitration constitutes a waiver by the parties of a verbatim record.

(c) The hearing will be held at the employment site.

Parties and Witnesses

§ 1201.206 Witnesses.

(a) Every Federal agency will make its employees available to furnish sworn statements or to appear as witnesses at the hearing when requested by the arbitrator. Witnesses are on official duty status when providing such statements or testimony.

(b) The parties will exchange witness lists within the 30 day time limit for preparation of the Joint Arbitration Record. The parties will accompany each request with a statement of the anticipated testimony of the witness.

(c) Parties may object by oral motion at the hearing regarding the relevancy or availability of witnesses. However, the parties are requested to make every reasonable effort to make witnesses available. The arbitrator will rule on the objections at the hearing.

§ 1201.207 Intervenors.

(a) The Director of the Office of Personnel Management may intervene as a matter of right pursuant to 5 U.S.C. 7701(d)(1). Such intervention shall be made at the earliest practicable time.

(b) The Special Counsel may intervene as a matter of right pursuant to 5 U.S.C. 1206(i). Such intervention shall be made at the earliest practicable time.

Evidence

§ 1201.208 Service of documents.

Any documents submitted to the arbitrator shall be served upon all parties to the proceeding.

§ 1201.209 Admissibility.

Formal rules as to admissibility of evidence will not be applied although they will be used as guidance for the conduct of the proceeding. Rules of procedure shall be liberally construed to facilitate full and frank disclosure by both parties. Parties have the duty of including all known relevant materials in their submissions.

§ 1201.210 Production of evidence or witnesses by request of arbitrator.

The arbitrator may request the production of information or witnesses if he or she has a reasonable basis to believe that it will be germane to the case.

§ 1201.211 Stipulations.

The parties may stipulate to any matter of fact.

§ 1201.212 Official notice.

The arbitrator, on his or her own motion or on motion of a party, may take official notice of matters of common knowledge or matters that can be verified. Official notice taken of any fact satisfies a party's burden of proving the fact noticed.

Sanctions

§ 1201.213 Sanctions.

The arbitrator may impose sanctions upon the parties as necessary to serve the ends of justice, including but not limited to the instances set forth in paragraphs (a), (b), and (c) of this section.

(a) *Failure to comply with a request.* If a party fails to comply with an arbitrator's request for information or witnesses within the party's control which the arbitrator believes to be necessary to resolve the issues, or a party fails to cooperate or act in good faith, the arbitrator may:

(1) Draw an inference in favor of the requesting party with regard to the information sought;

(2) Prohibit the party failing to comply with such request from introducing evidence concerning or otherwise relying upon testimony relating to the information sought;

(3) Permit the requesting party to introduce secondary evidence concerning the information sought; or

(4) Strike any part of the submissions of the party failing to comply with such request dealing with the subject matter of the request.

(b) *Failure to prosecute or defend.* If a party fails to prosecute or defend an appeal, the arbitrator may dismiss the action with prejudice or rule for the appellant.

(c) *Failure to make timely filing.* The arbitrator may refuse to consider any information which is not filed in a timely fashion in compliance with this subpart or with the arbitrator's request.

Hearing Procedure; Settlement; Arbitration Award

§ 1201.214 Burden of Proof.

Section 1201.56 of Subpart B applies.

§ 1201.215 Closing the record.

(a) When a hearing is convened, the record will close at the conclusion of the hearing unless otherwise specified by the arbitrator.

(b) When a hearing is not convened, the record will close on the date set by the arbitrator as the final date for the receipt of submissions of the parties.

(c) In any event, the record will be closed no later than 15 days from the due date of the joint arbitration record.

(d) Once the record is closed, no additional evidence or argument will be accepted unless, in the arbitrator's discretion, he or she determines that the party seeking such admission has shown that new and material evidence has become available which was not readily available prior to the closing of the record.

§ 1201.216 Settlement.

(a) *Settlement discussion.* Informal settlement of the dispute will be explored by the arbitrator with the parties prior to the arbitration hearing or, if no hearing is requested, within 15 days after the filing of the Joint Arbitration Record. Prohibitions against ex parte communications during settlement discussions will be waived by the parties. If the matter cannot be settled informally the arbitrator will proceed with the hearing if one has been requested. At any time until the issuance of an arbitration award the parties may enter into a settlement agreement.

(b) *Agreement.* If the parties agree to resolve the dispute without an arbitration award, the settlement agreement will be the final and binding resolution of the appeal and the arbitrator will dismiss the appeal with prejudice.

(1) The terms of the settlement agreement may be recorded by the arbitrator, signed by both parties and made a part of the arbitration record, in which case the Board will retain jurisdiction to ensure compliance with the settlement agreement;

(2) If the agreement is not entered into the arbitration record, the Board will not retain jurisdiction to ensure compliance.

§ 1201.217 Arbitration award.

If settlement is not reached, the arbitrator will adjudicate the appeal and issue a written decision within 15 days after the record is closed. The award is binding on the parties. The decision will include a summary of the basic issues, findings of fact and conclusions of law, a holding affirming, reversing or modifying the appealed action and order appropriate relief.

Appeals arbitration decisions are not precedential.

The award will become final after 35 days if no petition for review is filed.

Petitions for review

§ 1201.218 Petitions for review.

(a) Any party may file a petition for review with the Board of the arbitrator's award.

(b) Petitions for review must be filed within 35 days from the date of the arbitration award. Supportive briefs must accompany the petitions for review and be limited to 15 pages. Opposition briefs must be received by the Board within 15 days from the date of the Board's forwarding of a copy of the petition for review to the opposing party and be limited to 10 pages.

§ 1201.219 Standard of review.

The Board will grant a petition for review which establishes:

(a) Demonstrated harmful procedural irregularity in the proceedings before the arbitrator, or

(b) Clear error of law.

§ 1201.220 Final Decision.

The Board will issue a final decision no later than 15 days from the close of the respondent's filing deadline.

§ 1201.221 Judicial review.

Any employee or applicant for employment adversely affected by a final order or decision of the Board may obtain judicial review under the provisions of 5 U.S.C. 7703.

Dated: March 10, 1983.

For the Board.

Herbert E. Ellingwood,

Chairman.

[FR Doc. 83-6873 Filed 3-17-83; 8:45 am]

BILLING CODE 7460-01-M

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Parts 1b and 1c

National Environmental Policy Act (NEPA) Policies and Procedures

AGENCY: Agriculture Department.

ACTION: Final rule.

SUMMARY: This rule prescribes the Department of Agriculture (USDA) policies and procedures for compliance with the National Environmental Policy Act (NEPA), as amended, and the Council on Environmental Quality (CEQ) implementing regulations (40 CFR Parts 1500–1508). It has been determined that effective NEPA implementation can best be achieved by reliance on individual USDA agency NEPA regulations for detailed implementation procedures. It has been further determined that a Departmental statement of policy regarding NEPA is an effective means of assisting agency implementation. This regulation sets forth this policy.

EFFECTIVE DATE: March 18, 1983.

FOR FURTHER INFORMATION CONTACT: Peter F. Smith, Executive Secretary of the Environmental Issues Working Group, Room 6154 South Building, U.S. Department of Agriculture, Washington, D.C. 20250. Telephone: (202) 447–5166.

SUPPLEMENTARY INFORMATION: On September 27, 1982, (47 FR 42364) the USDA proposed rules setting forth policies and procedures for compliance with NEPA and the CEQ implementing regulations (40 CFR Parts 1500–1508). This action constitutes final rulemaking stemming from that proposed rule. The final rule provides a USDA policy statement regarding NEPA and environmental matters, including responsibilities for environmental effects abroad; a list of USDA actions categorically excluded from the preparation of environmental assessments and environmental impact statements; and a list of USDA agencies which have been excluded from the requirements to prepare implementing procedures.

The final rule repeals and replaces the previous regulation, eliminating certain procedural requirements which were formerly performed by the Office of Environmental Quality.

This final rule has been reviewed under procedures established in Secretary's Memorandum 1512–1 and Executive Order 12291 and has been classified as nonmajor. The rule will not have—

(a) An annual effect on the economy of $100 million or more; or

(b) Any increased costs or prices to consumers; individual industries; Federal, State, or local government agencies; or geographic regions; or

(c) A significant adverse effect on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This action will not have a significant economic impact on a substantial number of small entities because it imposes no direct or indirect costs on small entities, it requires no paperwork or recordkeeping, it does not affect the competitive position of small entities in relation to large entities, it does not affect the cash flow or liquidity of small entities, it does not affect the ability of a small entity to stay in the market, and it does not require that small entities obtain professional assistance to meet regulatory requirements.

During the 60-day comment period, one comment was received; and it was considered in developing the final rule. The principal point raised in the comment was the suggestion that a distinction be made between compliance policies for NEPA and Executive Order 12114, "Environmental Effects Abroad of Major Federal Actions." This comment has been incorporated by establishing a new subsection to discuss separate policies for Executive Order 12114 compliance.

List of Subjects in 7 CFR Parts 1b and 1c

Environmental policy statements, Historic preservation, Foreign relations.

Accordingly, Title 7 of the Code of Federal Regulations, is amended as follows:

1. A new Part 1b, Subtitle A, is added to read as follows:

PART 1b—NATIONAL ENVIRONMENTAL POLICY ACT

Sec.

1b.1 Purpose.
1b.2 Policy.
1b.3 Categorical exclusions.
1b.4 Exclusion of agencies.

Authority. National Environmental Policy Act (NEPA), as amended, 42 U.S.C. 4321 et seq.; E.O. 11514, 34 FR 4247, as amended by

E.O. 11991, 42 FR 26927; E.O. 12114, 44 FR 1957; 5 U.S.C. 301; 40 CFR 1507.3.

§ 1b.1 Purpose.

(a) This subpart supplements the regulations for implementation of the National Environmental Policy Act (NEPA), for which regulations were published by the Council of Environmental Quality (CEQ) in 40 CFR Parts 1500 through 1508. The subpart incorporates and adopts those regulations.

(b) This subpart sets forth Departmental policy concerning NEPA, establishes categorical exclusions of actions carried out by the Department and its agencies, and sets forth those USDA agencies which are excluded from the requirement to prepare procedures implementing NEPA.

§ 1b.2 Policy.

(a) USDA agencies carry out programs for the purpose of encouraging sufficient and efficient production of food, fiber, and forest products; proper management and conservation of the Nation's natural resources; and the protection of consumers through inspection services. Programs to meet this mission are carried out through research; education; technical and financial assistance to landowners and operators, producers, and consumers; and management of the National Forest System.

(b) All policies and programs of the various USDA agencies shall be planned, developed, and implemented so as to achieve the goals and to follow the procedures declared by NEPA in order to assure responsible stewardship of the environment for present and future generations.

(c) Each USDA agency is responsible for compliance with the provisions of this subpart, the regulations of CEQ, and the provisions of NEPA. Compliance will include the preparation and implementation of specific procedures and processes relating to the programs and activities of the individual agency, as necessary.

(d) The Assistant Secretary, Natural Resources and Environment (NR&E), is responsible for ensuring that agency implementing procedures are consistent with CEQ's NEPA regulations and for coordinating NEPA compliance for the Department (7 CFR 2.19(b)). The Assistant Secretary, through the USDA Natural Resources and Environment Committee, will develop the necessary processes to be used by the Office of the Secretary in reviewing, implementing, and planning its NEPA activities, determinations, and policies.

(e) In connection with the policies and requirements set forth in this subpart, all USDA agencies are responsible for compliance with Executive Order 12114, "Environmental Effects Abroad of Major Federal Actions." Compliance will include the preparation and implementation of specific procedures and processes relative to the programs and activities of the individual agencies, as necessary. Agencies shall consult with the Department of State; the Council on Environmental Quality; and the Assistant Secretary, NR&E, prior to placing procedures and processes in effect.

§ 1b.3 Categorical exclusions.

(a) The following are categories of activities which have been determined not to have a significant individual or cumulative effect on the human environment and are excluded from the preparation of environmental assessment (EA's) or environmental impact statement (EIS's), unless individual agency procedures prescribed otherwise.

(1) Policy development, planning and implementation which relate to routine activities, such as personnel, organizational changes, or similar administrative functions;

(2) Activities which deal solely with the funding of programs, such as program budget proposals, disbursements, and transfer or reprogramming of funds;

(3) Inventories, research activities, and studies, such as resource inventories and routine data collection when such actions are clearly limited in context and intensity;

(4) Educational and informational programs and activities;

(5) Civil and criminal law enforcement and investigative activities;

(6) Activities which are advisory and consultative to other agencies and public and private entities, such as legal counselling and representation;

(7) Activities related to trade representation and market development activities abroad.

(b) Agencies will identify in their own procedures the activities which normally would not require an environmental assessment or environmental impact statement.

(c) Notwithstanding the exclusions listed above and in 1b.4, or identified in agency procedures, agency heads may determine that circumstances dictate the need for preparation of an EA or EIS for a particular action. Agencies shall continue to scrutinize their activities to determine continued eligibility for categorical exclusion.

§ 1b.4 Exclusions of agencies.

(a) The USDA agencies listed below carry out programs and activities which have been found to have no individual or cumulative effect on the human environment. These agencies are excluded from the requirements to prepare implementing procedures. Actions of these agencies are categorically excluded from the preparation of an EA or EIS unless the agency head determines that an action may have a significant environmental effect.

(1) Agricultural Cooperative Service,
(2) Agricultural Marketing Service,
(3) Extension Service,
(4) Economic Research Service,
(5) Federal Crop Insurance Corporation,
(6) Federal Grain Inspection Service,
(7) Food and Nutrition Service,
(8) Food Safety and Inspection Service,
(9) Foreign Agricultural Service,
(10) Office of Transportation,
(11) Packers and Stockyards Administration,
(12) Statistical Reporting Service,
(13) Office of General Counsel,
(14) Office of Inspector General,
(15) National Agricultural Library.

2. A new Part 1c, Subtitle A, is added and reserved to read as follows:

PART 1c—CULTURAL RESOURCES [RESERVED]

Subparts A and B—[Removed]

3. Subpart A—[Reserved] and Subpart B—National Environmental Policy Act of Part 3100, Subtitle B are revoked and removed.

John B. Crowel, Jr.,
Assistant Secretary, Natural Resources and Environment.
March 14, 1983.

7 CFR Part 10

Classification, Declassification, and Safeguarding of Classified Information

AGENCY: Department of Agriculture.

ACTION: Final rule.

SUMMARY: These regulations implement the provisions of Executive Order 12356 (April 6, 1982, 47 FR 14874) and the Information Security Oversight Office Directive (47 FR 27836, June 25, 1982) relating to national security information. The Executive Order prescribes a uniform information security system and establishes a monitoring system to

enhance its effectiveness. The Order also provides protection against unauthorized disclosure of information which requires protection in the interests of national security.

EFFECTIVE DATE: March 18, 1983.

FOR FURTHER INFORMATION CONTACT: William R. Nolan, Jr., Assistant Chief for Security, Office of Personnel, Department of Agriculture, Washington, D.C. 20250, (202) 447-7654.

SUPPLEMENTARY INFORMATION: Since this rule relates to internal agency management, in accordance with section 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect thereto are impractical and contrary to the public interest, and good cause is found for making this rule effective less than 30 days after publication in the **Federal Register**. This final rule is issued in conformance with Executive Order 12291 and has been determined not to be a "major rule." This action will not have a significant economic impact on a substantial number of small entities. These regulations have been submitted to the Information Security Oversight Office.

List of Subjects in 7 CFR Part 10

Administrative practice and procedure, Classified information.

Accordingly, 7 CFR Part 10 is revised to read as follows:

PART 10—CLASSIFICATION, DECLASSIFICATION, AND SAFEGUARDING OF CLASSIFIED INFORMATION

Sec.

10.1 Definitions.
10.2 Implementation, oversight, and safeguard responsibilities concerning classified information.
10.3 Classification levels.
10.4 Authority to classify.
10.5 Derivative classification.
10.6 Declassification.
10.7 Systematic review for declassification.
10.8 Mandatory review for USDA originally classified documents.
10.9 Mandatory review for derivatively classified documents.
10.10 Appeals.

Authority: Executive Order 12356 (47 FR 14874, April 2, 1982) as implemented by Information Security Oversight Office Directive No. 1 (47 FR 27836, June 25, 1982).

§ 10.1 Definitions

(a) "Order" means Executive Order 12356.

(b) "USDA Agency" means a major line or program unit of the Department headed by an Administrator or equivalent who reports to the Secretary, Deputy Secretary, Under Secretary, or Assistant Secretary.

(c) "Agency" includes any executive department, military department, intelligence Agency, Government corporation, Government controlled corporation, or other establishment in the executive branch of the Government (including the Executive Office of the President), or any independent regulatory Agency.

(d) "USDA Agency Head" means the Administrator or the Chief Executive Officer of a USDA Agency in the Department.

(e) "Original Classification" means the initial determination by a United States Government employee who has or had original classification authority pursuant to the Order or predecessor Orders, that information owned by, produced for or by, or under the control of the United States Government requires protection against unauthorized disclosure and is so designated.

(f) "Classification guide" means a document issued by an authorized original classifier that prescribes the level of classification and appropriate declassification instructions for specified information to be classified on a derivative basis.

(g) "Derivative classification" means that information used in a new document is in substance the same information currently classified in a source document. The extracted information used in the new doucment must be classified at the same level as in the source document.

(h) "Multiple sources" means the term used to indicate that a document is derivatively classified when it contains classified information derived from more than one source.

(i) "Intelligence activity" means an activity that an Agency within the Intelligence Community is authorized to conduct pursuant to Executive Order 12333.

(j) "Unauthorized disclosure" means a communication or physical transfer of classified information to an unauthorized recipient.

§ 10.2 Implementation, oversight, and safeguard responsibilities concerning classified information.

(a) *Department Responsibility.*—(1) The Order requires that each Agency originating or handling classified information shall designate a senior official to direct and administer its information security program. Within the Department, the Assistant Secretary for Administration has the responsibility for the information security program. As such, the Assistant Secretary for Administration has delegated primary responsibility for providing guidance, oversight, and developing procedures governing the Department information security program to the Department Security Officer.

(i) *Assistant Secretary for Administration.*—He/She has the following responsibilities:

(A) Establish and monitor policies and procedures within the Department to prevent unauthorized classification, as well as under derivative classification, to protect against unnauthorized disclosure of properly classified information, and to ensure timely declassification of Department documents which no longer require protection, in accordance with the provisions of the Order.

(B) Oversee that a security education program for employees handling classified information is implemented and maintained.

(C) Provide to the Secretary of Agriculture any necessary guidelines concerning derivative classification, originated information that may warrant classification, and declassification.

(D) Chair the Department Review Committee which shall have authority to act on all suggestions and complaints with respect to the Department's administration of the Order.

(ii) *Department Review Committee.*—(A) The Department Review Committee is responsible for the following functions:

(*1*) Provide assistance and advice to the Assistant Secretary for Administration in carrying out his/her responsibilities concerning implementation and administration of the Order, Information Security Oversight Office Directives.

(*2*) Review all appeals of requests for records under the provisions of Mandatory Review for Declassification (Section 3.4 of the Order) when the proposed denial is based on their continued classification under the Order.

(*3*) Recommend to the Secretary of Agriculture appropriate administrative sanctions to correct abuse or violation of any provision of the Order, Information Security Oversight Office Directives, or this regulation.

(B) Members of the Department Review Committee shall consist of:

(*1*) Assistant Secretary for Administration (chairperson)

(*2*) Director of Personnel

(*3*) Department Security Officer

(*4*) Appropriate USDA Agency Head having jurisdiction over the subject matter of the document

(*5*) Head of the unit subordinate to the USDA Agency Head, who has a working

knowledge of the subject matter or information under consideration.

§ 10.3 Classification levels.

(a) Only three (3) levels of classification are authorized: "Top Secret," "Secret," and "Confidential."

(1) *Top Secret.* Information may be classified "Top Secret" if its unauthorized disclosure could reasonably be expected to cause exceptionally grave damage to the national security.

(2) *Secret.* Information may be classified "Secret" if its unauthorized disclosure could reasonably be expected to cause serious damage to the national security.

(3) *Confidential.* Information may be classified "Confidential" if its unauthorized disclosure could reasonably be expected to cause damage to the national security.

§ 10.4 Authority to classify.

(a) USDA officials do not have original classification authority for information or material that is created within the Department.

(b) When a USDA employee originates information and has a reasonable doubt about the need to classify the information, the information shall be safeguarded as if it were "Confidential" pending a determination about its classification by an original classification authority. When there is reasonable doubt about the appropriate classification level, the information shall be safeguarded at the higher level pending determination of its classification level. In either case, the information shall be released to the Department Security Officer who shall transmit the document to the Agency which has appropriate subject matter interest and original classification authority. The Order provides that the Agency having original classification authority shall decide within thirty (30) days whether to classify the information. When it is unclear which Agency should receive the information, it shall be sent to the Director of the Information Security Oversight Office. The Director shall determine the Agency having primary subject matter interest and forward the information, with appropriate recommendations, to that Agency for a classification determination.

§ 10.5 Derivative classification.

(a) *Responsibility.*—(1) Derivative application of classification markings is the responsibility of those USDA employees who incorporate, paraphrase, restate, or generate in new form, information which is already classified or those who apply markings in accordance with guidance from an authorized classifier. If an employee who applies derivative classification markings believes that the paraphrasing, restating or summarizing of classified information has removed the basis for classification, the employee must consult an appropriate official of the originating Agency who has the authority to upgrade, downgrade or declassify the information for a determination. A sample marking of a derivatively classified document appears in the appendix section of these regulations.

(2) Employees who apply derivative classification markings shall:

(i) Respect original classification decisions;

(ii) Carry forward to any newly created documents the assigned dates or events for declassification or review and any additional authorized markings.

(b) *Marking derivatively classified documents.*—(1) Paper copies of derivatively classified documents shall be marked at the time of preparation as follows:

(i) *Overall marking.* The highest level of classification of information in a document shall be marked in such a way as to distinguish it clearly from the informational text. These markings shall appear at the top and bottom of the outside of the front cover (if any), on the title page (if any), on the first page, and on the outside of the back cover (if any).

(ii) *Page marking.* Each interior page of a derivatively classified document shall be marked at the top and bottom according to the highest classification of the content of the page, including the designation "unclassified" when applicable, or with the highest overall classification of the document.

(iii) *Portion marking.* Each portion of a document, including subjects and titles, shall be marked by placing a parenthetical designation immediately preceding or following the text to which it applies. The symbols "(TS)" for Top Secret "(S)" for Secret, "(C)" for Confidential and "(U)" for Unclassified shall be used for this purpose. If the application of parenthetical designations is not practicable, the document shall contain a statement sufficient to identify the information that is classified and the level of such classification, as well as the information that is not classified. If all portions of a document are classified at the same level, this fact may be indicated by a statement to that effect.

(iv) *Classification authority.* The authority for classification shall be shown on the bottom of the first page of the derivatively classified document as follows:

Derivatively Classified by (name of USDA employee)
USDA Agency _____
Derived from (Insert identity of original classification)
Declassify on (Date listed on source document)

If a document is classified on the basis of more than one source document or classification guide, the authority for classification shall be shown on the "derived from" line as "classified from multiple sources." In these cases, the derivative classifier shall maintain the identification of each source with the file or record copy of the derivatively classified document. A document derivatively classified on the bases of a source document that is marked "classified by multiple sources" shall cite the source document on its "derived from" line.

(v) *Declassification and downgrading instructions.* Dates or events for automatic downgrading or declassification, or the notation "originating Agency review required" to indicate that the document is not to be downgraded or declassified automatically, shall be carried forward from the source document, or as directed by a classification guide, and shown on the "declassify on" or an additional line "downgrade to".

(c) *Special markings.*—(1) Transmittal documents. A transmittal document shall indicate on its face the highest classification of any information transmitted by it. It shall also include the following instruction:

For an unclassified transmittal document, the marking "unclassified when classified enclosure is removed" shall be used on the bottom of the last page.

(2) Information marked "Restricted Data" or "Formerly Restricted Data" in accordance with regulations issued under the Atomic Energy Act of 1954, as amended, shall be handled, protected, classified, downgraded, and declassified in conformity with the provisions of the Atomic Energy Act of 1954, as amended.

(3) Derivatively classified documents that contain information from a source document relating to intelligence sources or methods shall include the marking "warning notice—intelligence sources or methods involved" on the bottom of the first and last pages unless otherwise prescribed by the Director of Central Intelligence.

(4) Foreign government information. Documents that contain foreign government information shall include the marking "foreign government

information" on the bottom of the first and last pages of the documents. If the fact that information is foreign government information must be concealed, the marking shall not be used and the derivatively classified document shall be marked as if it were wholly of U.S. origin.

(5) Information classified under predecessor Orders on source documents shall be considered as classified at that level of classification despite the omission of other required markings. The same classification shall be applied to the derivatively classified document.

(6) Change in classification marking. When the original classifier of a source document notifies the appropriate USDA employee, as the holder of a copy of the source document, that a change in the duration of the classified information and/or a change in the level of classification is being made, the USDA employee shall line through the old markings to conform to the change. The authority for the action and date shall be conspicuously marked on the bottom of the first page of the document to indicate the change.

(d) *Prohibitive markings or classification.* Markings such as "For Official Use Only" or "Limited Official Use" shall not be used to identify national security information. No other term or phrase shall be used in conjunction with these designations, such as "Secret Sensitive" or "Agency Confidential" to identify national security information.

§ 10.6 Declassification.

(a) Information shall remain classified for as long as is required by national security considerations. When it can be determined, a specific date or event for declassification shall be set by the original classification authority at the time the information is originally classified.

(b) Information classified under predecessor Orders that is not subject to automatic declassification or that is marked for review before declassification shall remain classified until reviewed for declassification.

(c) Automatic declassification determinations under predecessor Orders shall remain valid unless the classification is extended by an authorized official of the originating Agency. Authority to extend the classification of information subject to automatic declassification under predecessor Orders is limited to those officials who have original classification authority at the level of the information to remain classified or by the Director of the Information Security Oversight Office.

(d) Whenever the appropriate USDA employee is notified by an authorized official from the Agency with original classification authority that change has been made in the original classification or in the dates of downgrading or declassification of any classified information, the USDA employee shall promptly and conspicuously mark both the copy of the source document and any derivatively classified documents to reflect the change, the authority for the action, the date of the action, and the identity of the employee taking the action.

(e) Authority to declassify and downgrade. The authority to downgrade and declassify national security information originally classified within USDA shall be exercised as follows:

(1) By the Secretary of Agriculture; Deputy Secretary; Under Secretary for International Affairs and Commodity Programs; Under Secretary for Small Community and Rural Development; each Assistant Secretary; each Deputy Under Secretary; or each Deputy Assistant Secretary, with respect to all information over which their respective offices exercise jurisdiction.

(2) By the USDA official who authorized the original classification if that official is still serving in the same position, by a successor, or by a designated supervisory official of either.

(3) By the Department Security Officer or an official at the division chief level as a result of his/her professional knowledge of the subject matter as it relates to the national security.

§ 10.7 Systematic review for declassification.

(a) *Classified permanent records.* Systematic review is applicable only to those classified records and presidential papers or records that the Archivist of the United States, acting under the Paperwork Reduction Act of 1980, has determined to be of sufficient historical or other value to warrant permanent retention. Such records shall be reviewed for declassification as they become thirty (30) years old by the Archivist of the United States with the assistance of USDA personnel designated for the purpose.

(b) *Non-permanent classified records.* Non-permanent classified records shall be disposed of in accordance with schedules approved by the Administrator of General Services under the Records Disposal Act. Such records shall be retained during an ongoing mandatory review request or Freedom of Information Act request.

§ 10.8 Mandatory review for USDA originally classified documents.

(a) *Policy.*—(1) Except as provided by section 3.4(b) of the Order, all information originally classified by USDA under predecessor Orders shall be subject to declassification review by the Department Security Officer and the USDA Agency responsible for the original classification provided that (i) the requester is a United States citizen, permanent resident alien, a Federal Agency, or a state or local government; (ii) the request describes the information with sufficient specificity to enable the Department to locate it with a reasonable amount of effort.

(2) USDA Agencies shall process mandatory declassification review requests for classified records in accordance with § 10.8(e).

(3) In response to a request for information under the Freedom of Information Act, the Privacy Act of 1974, or the mandatory review provisions of the Order, USDA Agencies shall refuse to confirm or deny the existence or non-existence of requested information whenever the fact of its existence or non-existence is itself classifiable under the Order.

(4) When a USDA Agency receives a request for declassification of information in its custody which was originated by another Agency, the USDA Agency shall refer the request to the classifying Agency together with a copy of the document containing the information requested when practicable, and shall notify the requester of the referral and that a response will be sent to the requester by the Agency which was sent the referral.

(5) Information requested shall be declassified if it no longer requires protection under the provisions of the Order. The information will then be released to the requester unless withholding is otherwise authorized under applicable law, such as the Freedom of Information or Privacy Act. If the information requested cannot be declassified in its entirety, the USDA Agency will make reasonable efforts to release those declassified portions that are reasonably segregable. Upon denial of an initial request, the Department Security Officer shall inform the requester as to the reasons for the denial and a notice of the right to appeal the determination to the Department Review Committee. Such an appeal must be submitted in writing within sixty (60) days.

(6) If no determination has been made at the end of sixty (60) days from receipt of the initial request for review, the requester may appeal to the Assistant

Secretary for Administration for a determination.

(b) *Processing requirements.*—(1) Requests for mandatory declassification review may be directed to the Department Security Officer, Office of Personnel, Administration Building, U.S. Department of Agriculture, Washington, D.C. 20250. The Security Officer shall, in turn, refer the request to the appropriate USDA Agency Head for action.

(2) A valid request must be in writing and reasonably describe the information sought to enable the USDA Agency to identify it.

(3) The USDA Agency shall notify the requester if the request does not identify sufficiently the information sought. The requester shall then be given an opportunity to provide additional information to describe the information with particularity enabling identification of the requested material.

(4) If within thirty (30) days after the notification is mailed the requester does not describe the information sought with sufficient particularity, the USDA Agency shall notify the requester why no action will be taken on the request.

(5) Search and duplication fees will be charged pursuant to the provisions of the Department's Fee Schedule, Appendix A, to Part 1 of this Title. The requester shall be notified of the approximate cost of the search and duplication costs before the search is conducted.

(c) *Processing requests.* Requests that meet the foregoing requirements for processing shall be processed as follows:

(1) The USDA Agency shall immediately acknowledge receipt of the request in writing.

(2) The USDA Agency shall make a determination within ten (10) working days or shall explain to the requester why additional time is necessary. In no case shall the response time for a final determination exceed one (1) year from the date of receipt of the initial request.

(3) When another Agency forwards to the Department Security Officer a request for information in that Agency's custody that has been classified by USDA, the Department Security Officer shall process the request in accordance with the requirements of this section, respond directly to the requester and, if so requested, shall notify the referring Agency of the determination made on the request.

(4) Requests for classified information containing foreign government information may necessitate consultations with other agencies and/or with the foreign originator of the information prior to final action of the request.

§ 10.9 Mandatory review for derivatively classified documents.

(a) Requests for mandatory review for USDA derivatively classified documents shall be processed by the Department Security Officer under the following procedures:

(1) The Department Security Officer shall contact the Agency responsible for orginally classifying the source document for a declassification determination.

(2) If the Agency determines that the originally classified document has been declassified, the Department Security Officer shall so mark the USDA derivatively classified document and release it to the requester.

(3) If the originally classified document has not been declassified, the Department Security Officer shall so notify the requester.

§ 10.10 Appeals.

(a) Appeals from denial of declassification and release of information shall be directed to the Department Review Committee, Administration Building, U.S. Department of Agriculture, Washington, D.C. 20250.

(b) Appeals shall be reviewed and decided within thirty (30) working days of their receipt as follows:

(1) If the documents are declassified in their entirety, the Department Security Office shall forward the documents to the requester.

(2)(i) If the documents are not declassified and released in their entirety, the chairman, Department Review Committee, shall forward a letter of denial to the requester notifying the requester of the decision and a statement of justification for the denial.

(ii) If the decision of the committee is to declassify or release a portion of the documents, the chairman of the committee shall forward a letter of partial denial to the requester. The letter shall include a statement of justification for the partial denial. Those portions of the documents which have been declassified shall be forwarded to the requester.

Dated: March 14, 1983.

John R. Block,

Secretary of Agriculture.

[FR Doc. 83-7113 Filed 3-17-83; 8:45 am]

BILLING CODE 3410-01-M

Federal Crop Insurance Corporation

7 CFR Part 424

[Amendment No. 3]

Rice Crop Insurance Regulations

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Final rule.

SUMMARY: The Federal Crop Insurance Corporation (FCIC) hereby amends the Rice Crop Insurance Regulations (7 CFR Part 424), effective with the 1983 and succeeding crop years, by amending the provisions of the policy to provide (1) That insurance attaches to rice seeded on a continuous yearly basis in California only, (2) a clarification as to which "second crop" insurance will not attach, (3) a clarification of the quality adjustment provisions for rough rice, (4) a provision prescribing interest to be charged when premium payments are not made within a certain time, (5) for the addition of a provision to require the insured to file a notice of probable loss when the crop is damaged to the extent that a loss is probable and leave intact a representative sample of the unharvested crop, (6) for the addition of a provision to prescribe FCIC's liability in cases of loss by fire when the insured has other insurance against fire losses, (7) for the replacement of the present single-crop application by a multi-crop application to reduce the time and paperwork demands on the applicant, and (8) minor technical changes to language and format. The intended effect of this amendment is to restore a provision in the regulations regarding losses from fire, improve the debt management practices of FCIC, and revise the system of reporting damage or loss to crops to make the administration of the program more effective.

EFFECTIVE DATE: March 18, 1983.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C., 20250, telephone (202) 447-3325.

The Impact Statement describing the options considered in developing this rule and the impact of implementing each option is available upon request from Peter F. Cole.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established in Secretary's Memorandum No. 1512-1 (June 11, 1981).

Information collection requirements contained in these regulations (7 CFR Part 424) have been approved by the Office of Management and Budget

(OMB) under the provisions of 44 U.S.C. Chapter 35 and have been assigned OMB Nos. 0563–0003, and 0563–0007.

Merritt W. Sprague, Manager, FCIC, has determined that: (1) This action is not a major rule as defined by Executive Order No. 12291 (February 17, 1981), (2) this action does not increase the Federal paperwork burden for individuals, small businesses, or other persons, and (3) this action conforms to the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), and other applicable law.

The title and number of the Federal Assistance Programs to which this amendment applies are: Title-Crop Insurance; Number 10.450.

This action will not have a significant impact specifically upon area and community development; therefore, review as established in Executive Order No. 12372 (July 14, 1982), was not used to assure that units of local government are informed of this action.

It has been determined that this action is exempt from the provisions of the Regulatory Flexibility Act; therefore, no Regulatory Impact Statement was prepared.

It has also been determined that this action constitutes a review as to the need, currency, clarity, and effectiveness of these regulations under the provisions of Secretary's Memorandum No. 1512–1 (June 11, 1981). The sunset review date established for these regulations is October 15, 1987.

On Tuesday, August 17, 1982, FCIC published a notice of proposed rulemaking in the **Federal Register** (47 FR 35770) to amend the Rice Crop Insurance Regulations for the 1983 and succeeding crop years. The principal changes addressed in the notice were as follows:

1. The replacement of the single-crop application by a multi-crop application to reduce papework on the part of the applicant.

2. The addition of a provision that unpaid premium balances will bear interest at the rate of one and a half percent simple interest per calendar month or any part thereof starting on the first day of the month following the first premium billing date.

3. The addition of a provision to require the insured to give at least 15 days notice of loss if damage to the crop appears probable, and to leave a representative sample of the unharvested crop intact for 15 days after the date of the notice.

4. The addition of a provision to allow insurance to attach to rice seeded in three or more consecutive years in California only.

5. The addition of a provision to clarify the meaning of a subsequent crop on which insurance will not attach (i.e., a second rice crop following a rice crop harvested in the same calendar year).

6. The addition of a provision to clarify the quality adjustment provision relative to rough rice.

7. The addition of a provision to prescribe FCIC's liability in cases of loss by fire when the insured has other insurance against fire losses.

In addition of these changes, FCIC made minor changes to language and format to include correction of the table of contents, correction of the Appendix—Additional Terms and Conditions, to indicate the party responsible for securing the rights of the Corporation relative to subrogation, and redesignating Appendix B as Appendix A to list counties where rice crop insurance is otherwise authorized to be offered.

The public was given 60 days in which to submit written comments on the proposed rule, but none were received. Therefore, with the exception of minor corrections, the Amendment No. 3 to the Rice Crop Insurance Regulations is hereby published a final rule.

List of Subjects in 7 CFR Part 424

Crop insurance, Rice.

Final Rule

Accordingly, pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), the Federal Crop Insurance Corporation hereby amends the Rice Crop Insurance Regulations, effective with the 1983 and succeeding crop years, in the following instances:

PART 424—[AMENDED]

1. The authority citation for 7 CFR Part 424 reads as follows:

Authority: Secs. 506, 516, Pub. L. 75–430, 52 Stat. 72, as amended (7 U.S.C. 1506, 1516)

2. The Table of Contents is revised to read as follows:

Secs.
424.1 Availability of rice crop insurance.
424.2 Premium rates, production guarantees, coverage levels and prices at which indemnities shall be computed.
424.3 Reserved.
424.4 Creditors.
424.5 Good faith reliance on misrepresentation.
424.6 The contract.
424.7 The application and policy.

Appendix A, Counties designated for Rice Crop Insurance.

§ 424.7 [Amended]

3. 7 CFR 424.7(d) is amended by removing the introductory paragraph and the application that follows, and substituting the following:

* * * * *

(d) The application for the 1983 and succeeding crop years is found at Subpart D of Part 400–General Administrative Regulations (7 CFR 400.37; 400.38, first published at 48 FR 1023, January 10, 1983) and may be amended from time to time for subsequent crop years. The provisions of the Rice Insurance Policy are as follows:

* * * * *

4. Section 2(b) (2) and (5) of the Terms and Conditions section of the policy in paragraph (d) of § 424.7 are revised to read as follows:

§ 424.7 The application and policy.

* * * * *

(d)* * *

Rice Crop Insurance Policy

Terms and Conditions

* * * * *

2. * * *

(b) * * *

(2) seeded to rice for the two preceding crop years, except in California.

* * * * *

(5) of a rice crop following a rice crop harvested in the same calendar year.

* * * * *

5. Section 5(d) of the Terms and Conditions section of the policy as found in 7 CFR 424.7(d) is revised to read as follows:

§ 424.7 The application and policy.

* * * * *

(d) * * *

Rice Crop Insurance Policy

Terms and Conditions

* * * * *

5. * * *

(d) Interest will accrue at the rate of one and a half percent (1½%) simple interest per calendar month, or any part thereof, on any unpaid premium balance starting on the first day of the month following the first premium billing date.

* * * * *

6. Section 7 of the Terms and Conditions section of the policy as found in 7 CFR 424.7(d) is amended by revising item 7(c), redesignating 7 (d) and (e) as 7 (e) and (f) respectively, and adding a new 7(d) as follows:

§ 424.7 The application and policy.

* * * * *

(d) * * *

Terms and Conditions

* * * * *

7. *Notice of damage or loss.* * * *

(c) Written notice shall be given at least 15 days prior to the beginning of harvest if the rice on any unit is damaged to the extent that a loss is probable. If probable loss is not determined until less than 15 days prior to the beginning of harvest on a unit, notice shall be given immediately and a representative sample of the unharvested rice (at least 10 feet wide and the entire length of the field) shall remain intact for a period of 15 days from the date of the notice, unless the Corporation gives written consent to the insured to harvest the representative sample.

(d) In addition to the notices required in paragraphs (b) and (c) of this section, if a loss is to be claimed on any unit, the insured shall give written notice thereof to the Corporation at the service office for the county no later than *30 Days* after the earliest of: (1) The date the harvest is completed on the unit, (2) the calendar date for the end of the insurance period, or (3) the date the entire rice crop on the unit is destroyed, as determined by the Corporation.

* * * * *

7. Section 8(c)(1) of the Terms and Conditions section of the policy as found in 7 CFR 424.7(d) is revised to read as follows:

§ 424.7 The application and policy.

* * * * *

(d) * * *

Terms and Conditions

* * * * *

8. Claim for Indemnity.

* * * * *

(c) * * *

(1) Mature production quantity which grades No. 3 or better shall be reduced .12 percent for each .1 percentage point of moisture in excess of 14.0 percent and if, due to insurable causes, the value per pound of rough rice, as determined by the Corporation, is less than the market price for the same variety of rough rice grading U.S. No. 3 (determined in accordance with the Offical U.S. Grain Standards) with a milling yield per cwt. of 55 pounds of heads for the short and medium grain varieties and 48 pounds of heads for long grain varieties (whole kernels) and 66 pounds total milling yield (heads, second heads, screenings, and brewers), the number of pounds of such rice to be counted shall be adjusted by (i) dividing the value per pound of the damaged rice (as determined by the Corporation) by the market price per pound at the nearest mill center for the same variety of rough rice grading U.S. No. 3 with the milling yields as stated above, and (ii) multiplying the result thus obtained by the number of pounds of production of such damaged rice. The applicable price for No. 3 rice with the stated milling yields shall be the nearest mill center price on the earlier of the day the loss is adjusted or the date the damaged rice was sold.

* * * * *

8. The Appendix to the Rice Crop Insurance Policy (Additional Terms and Conditions) as found in 7 CFR 424.7(d), is amended by revising section 1.(g) in its entirety to read as follows:

§ 424.7 The application and policy.

* * * * *

(d) * * *

Appendix to the Rice Crop Insurance Policy (Additional Terms and Conditions)

* * *

1. Meaning of Terms. For the purposes of rice crop insurance:

* * * * *

(g) "Service office" means the office servicing your contract as shown on the application for insurance or such other approved office as may, be selected by you or designated by us.

9. The Appendix to the Rice Crop Insurance Policy (Additional Terms and Conditions) as found in the appendix to 7 CFR 424.7(d) is amended by revising section 6 in its entirety to read as follows:

§ 424.7 The application and policy.

* * * * *

(d) * * *

Appendix to the Rice Crop Insurance Policy (Additional Terms and Conditions)

* * * * *

6. *Subrogation.* You assign to us all rights of recovery against any person for loss or damage to the extent that payment hereunder is made by us. You shall execute all required documents and take appropriate action as may be necessary to secure such rights.

10. The Appendix to the Rice Crop Insurance Policy (Additional Terms and Conditions) as found in 7 CFR 424(d), is amended by adding a Section 11 to read as follows:

§ 424.7 The application and policy.

* * * * *

(d) * * *

Appendix to the Rice Crop Insurance Policy (Additional Terms and Conditions)

* * * * *

11. *Other Insurance Against Fire.* If the insured has other insurance against damage by fire during the insurance period, the Corporation shall be liable for loss due to fire only for the smaller of: (a) The amount of indemnity determined by the Corporation under the policy with the Corporation, or (b) the amount by which the loss from fire exceeds the indemnity paid or payable under such other insurance. For the purposes of this section, the amount of loss from fire shall be the difference between the fair market value of the production on the unit before the fire and after the fire, as determined by the Corporation from appraisals made by the Corporation.

Appendix B—[Redesignated as Appendix A]

12. Appendix B to 7 CFR Part 424 is redesignated as Appendix A.

Done in Washington, D.C., on March 9, 1983.

Peter F. Cole,

Secretary, Federal Crop Insurance Corporation.

Dated: March 9, 1983.

Approved by:

Robert H. Sindt,

Acting Manager.

BILLING CODE 3410-08-M

Food Safety and Inspection Service

9 CFR Parts 306, 317, and 381

[Docket No. 81-036F]

Prior Labeling Approval System

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule amends the Federal meat inspection regulations and the poultry products inspection regulations by expanding the authority of inspectors-in-charge (IIC's) of official establishments to approve certain labeling and by establishing limited types of generically approved labeling. The types of labels or other labeling which may be approved by the IIC include: (1) All final labeling having a sketch approval from the Standards and Labeling Division (SLD) in Washington when the final labeling is consistent with the approved sketch; (2) certain labeling not previously approved by SLD; and (3) certain modifications of previously approved labeling. The types of generically approved labeling include certain modifications of previously approved labeling. The specific types of labeling or labeling modifications included for IIC approval and generic approval, both on a voluntary basis, have been expanded and modified in this final rule reflecting the Department's analysis of the issues raised in the public comments.

Under the final rule, temporary approvals for the use of labeling that may be deficient in some manner may be granted only by SLD for a period not to exceed 180 days, provided certain specified criteria are met. Use of the procedures established by this final rule will provide a more rapid turnaround for labeling approvals and will make more efficient use of Department resources.

EFFECTIVE DATE: June 1, 1983.

FOR FURTHER INFORMATION CONTACT: Ms. Joan Moyer Schwing, Deputy Director, Standards and Labeling Division, Meat and Poultry Inspection Technical Services, Food Safety and

Inspection Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 447–4293.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

The Department has determined that the final rule is not a major rule under Executive Order 12291. The rule would provide greater flexibility to meat and poultry processors in obtaining label approvals. It would not result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies or geographic regions; or significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Effect of Small Entities

The Administrator has determined that this action will not have a significant economic impact on a substantial number of small entities as defined by the Regulatory Flexibility Act, Pub. L. 96–354 (5 U.S.C. 601), because this rule will impose no new requirements on industry. The implementation of this rule will provide establishments the option to use all, some, or none of the labeling approval authority delegated to the IIC or to use generic approval of certain types of labeling. Further, any application receiving a negative determination by an IIC may be resubmitted directly to SLD for a new review. Thus, each establishment will have the ability to obtain approvals for certain prescribed labeling changes at the plant or through prescribed regulations only to the extent these procedures provide benefits to that plant. As a result, the Department believes that the regulated industry will be provided greater flexibility, faster label review and processing, and consequently, a saving of time and money. Moreover, a labeling consulting firm which was generally critical of the document submitted information which indicates that this rule will not result in a significant economic impact to those firms which service the regulated industry by expediting label approvals in Washington, DC.

Background

The Federal Meat Inspection Act (FMIA) (21 U.S.C. 601 *et seq.*) and the Poultry Products Inspection Act (PPIA) (21 U.S.C. 451 *et seq.*) direct the Secretary of Agriculture to maintain meat and poultry inspection programs designed to assure consumers that meat and poultry products distributed to them are wholesome, not adulterated, and properly marked, labeled, and packaged. Consistent with this authority, regulations have been promulgated which provide that no labeling shall be used on any product bearing any official inspection mark until it has been approved in its final form by the Administrator (9 CFR 317.4 and 9 CFR 381.132). In order to assure that meat and poultry products are in compliance with the Acts and the regulations promulgated thereunder, the Food Safety and Inspection Service (FSIS) presently conducts a prior approval program as specified in 9 CFR 317.4, 317.5, 381.132, and 381.134 for labels and other labeling to be used on federally inspected meat and poultry products. This program is administered in Washington, DC, by the Standards and Labeling Division (SLD). Currently, the IIC also has the authority to approve labeling modifications under relatively limited circumstances as specified in the meat and poultry products inspection regulations (9 CFR 317.4(c), 317.4(d), 317.5, 381.134, and 381.135).

In an effort to streamline the label approval process, the Department decided in 1980 to explore the feasibility of delegating certain additional labeling approval authority to field personnel. A FSIS Task Force was organized to review the overall concept of field delegation, identify the various options available, explore the ramifications of such delegation of authority, and estimate its potential effect upon the truthfulness and accuracy of labeling. A pilot program was initiated upon the recommendation of this Task Force to test the feasibility and effectiveness of delegating limited labeling approval authority to the IIC. The IIC is the Federal meat and poultry inspection program employee in charge at an official establishment. The success of the pilot program demonstrated that an appropriate level of uniformity and regulatory control can be maintained in the labeling area by delegating limited labeling approval authority to the IIC.

Over the past few years, the current labeling approval program has been the subject of considerable analysis and discussion, both within and outside the Department. The Department has received a number of industry petitions requesting specific changes in or the elimination of the prior label approval program in order to improve its efficiency and reduce costs associated with its operation. These petitions from the American Meat Institute, the National Association of Margarine Manufacturers, the National Food Processors Association, and James V. Hurson Associates, Inc., were discussed in some detail in the May 21, 1982, proposal (47 FR 22101).

The Proposal

After careful consideration of the Task Force recommendations, as well as the comments and industry petitions received, the Department published a proposal in the **Federal Register** of May 21, 1982 (47 FR 22101) to expand the authority of the IIC of official establishments to approve certain labeling and labeling modifications and to establish limited categories of generically approved labeling. More specifically, the proposal would have created three categories of labeling. The first category—labeling which would have required SLD approval—would have been reserved for labeling involving complex issues or issues where consistency is both important to maintain and difficult to achieve if delegated to the local level. The second category—labeling which the IIC could have approved with a later audit by SLD—would have involved labeling or labeling modifications, which the IIC is fully capable of approving, but because of the nature of the change would have needed to be rechecked to detect possible errors, to assure that the Department policy is consistently applied, and to maintain a central labeling approval file. The third category—generic labeling approvals which the IIC simply could have kept on file for his or her records—would have involved labeling or labeling modifications for which prior approval by SLD or the IIC is believed to be unnecessary and/or labeling for which SLD is not in a position to audit meaningfully. Such generically approved labeling would not have been included as part of the central labeling file; however, the establishment would have been required to provide a copy of the labeling to the IIC prior to use.

The use of the IIC to approve labels or other labeling and the use of generically approved labeling, as proposed, would have been voluntary. Official establishments would have had the option of submitting applications for any and all labeling to SLD. Written authorization from the Department would have been required as a precondition to the use of any labeling except for generic approvals submitted to the IIC. Denial of a labeling application by the IIC would have precluded use of the labeling unless and until authorization had been obtained from SLD. Temporary approvals for the use of labeling that would have been deficient in some manner could have

been granted by SLD for a period not to exceed 180 days, provided certain specified criteria had been met.

Comments

In response to the proposed rule, the Department received 89 comments that were postmarked on or before August 19, 1982, the close of the comment period.

Eighty-one of these comments were submitted by meat and poultry industry members and groups including slaughterers, packers, processors, distributors, and their trade associations and representatives; ten of these comments endorsed the comments of several trade associations. The remaining eight comments were submitted by individuals, a State government official and agency, an ex-food inspector, and a labeling consulting firm. While the positions taken in the comments varied, almost all commmenters supported modifying the current labeling approval process. The issues raised by the commenters and the Department's response to each issue are as follows:

1. *IIC approved labeling.* Forty-eight comments addressed the provision to delegate limited labeling approval authority to the IIC. Almost all of these comments were submitted by industry members and trade associations. Three individuals also commented on this aspect of the proposal, as did a labeling consulting firm.

Numerous industry members and trade associations specifically supported the purpose and intent of the proposal; i.e., to streamline and simplify the labeling approval process. As such, the proposal was lauded as "a step in the right direction." Savings of time and money were cited as support for this position. Delegating labeling approval authority to the IIC was specifically commended for increasing efficiency and decreasing the time and expense involved in getting labeling approvals. A number of industry members noted their favorable experience with the pilot program as support for field delegation. In addition, one industry member supported the proposal for attempting to create greater uniformity between the meat and poultry regulations.

A number of commenters criticized the proposal as complicated, costly, unnecessary, unreasonable, and/or harmful to small businesses. Commenters argued that the proposal failed to address many of the concerns about and criticisms of the current system, with two trade associations who had petitioned the Department for specific changes in the current labeling approval system continuing to advocate their positions. These commenters suggested that the IIC's authority should be limited to monitoring products and product labeling to ensure compliance with USDA requirements, rather than involving the IIC in the approval process. Moreover, several trade associations and industry members suggested that eventually prior labeling approval should be abolished and/or replaced by a system which more closely resembles the approach taken by the Food and Drug Administration.

A number of commenters specifically took issue with the idea of decentralizing labeling approval authority and suggested that the Department abandon its plan to have the IIC review labeling. They argued that the current system basically was working well. These commenters, who mostly characterized themselves as small businesses, contended that decentralizing the labeling approval system would result in inconsistent labeling decisions which, in turn, would create unfair competitive advantages. A system which allows unequal treatment, it was further argued, encourages corruption. Several commenters also questioned the IIC's ability to assume additional responsibilities because of inexperience and time constraints. Field delegation was further criticized as more complicated than the present system, advantageous to establishments having resident IIC's, costly to implement, and inefficient.

One trade association stated that, in general, IIC review of labeling would be more expeditious than SLD review and felt that it would be preferable to current procedures for that reason. However, it contended that expansion of the IIC's role in this manner would create its own set of problems including a lack of uniformity and consistency in labeling decisions, the need for substantial financial resources to train the IIC's, and an increased workload for the IIC.

Th Administrator recognizes the concerns raised by those commenters who conceptually supported the proposal yet felt that the Department did not go far enough in its attempt to eliminate what were characterized as many other problems inherent in the current labeling approval system. Many of these commenters commended the Department for its proposal to eliminate SLD involvement in all labeling decisionmaking and further advocated either expanding the generic labeling category or abandoning the entire system. The Department also acknowledges the concerns voiced by that segment of the industry, particularly small businesses, who expressed serious reservations about changing a system which provides services to all users, regardless of size, in an equitable manner. A number of these commenters believe that a strong central labeling approval authority is needed. The Department believes that this final rule represents a reasonable balance of these two positions. In conjunction with the sentiments expresed by numerous commenters, the Department also sees this initiative as a progressive step towards simplifying and streamlining the labeling approval process while maintaining the high level of protection consumers have come to expect from the Department in this area.

Specifically, the types of labeling which the IIC could approve were selectively chosen because they are sufficiently simple or involve changes so minor that they present little risk of misbranding. Moreover, the Department believes that uniformity and consistency can be further controlled by having the IIC-approved labeling submitted to SLD for auditing. The review and analysis of the pilot program demonstrated the competence of the IIC to assume limited labeling approval authority without jeopardizing uniformity or regulatory control in the labeling area. Moreover, the pilot program analysis revealed that labeling was acted upon and returned to plant management in a shorter period of time when handled through the IIC and that there was little impact upon the IIC's workload as a result of the new responsibilities.

Some commenters argued that the IIC's authority should be limited only to monitoring products and product labeling rather than approving and/or withholding the use of labeling. The Department believes that this would represent an inefficient use of Department personnel and more importantly, would contradict the language and intent of both the Federal Meat Inspection Act (FMIA) (21 U.S.C. 601 *et seq.*) and the Poultry Products Inspection Act (PPIA) (21 U.S.C. 451 *et seq.*). Section 7(e) of the FMIA (21 U.S.C. 607(e)) and section 8(d) of the PPIA (21 U.S.C. 457(d)) provide the Secretary with the authority to withhold the use of any marking, labeling, or container in use or proposed for use with respect to any article subject to the Acts if there is reason to believe that the marking or labeling or size or form of the container is false or misleading in any particular. Products which are misbranded may not be marked as "inspected and passed." Furthermore, such product may not be removed from an official establishment, sold, or otherwise distributed. It is the responsibility of the IIC to assure

compliance with these requirements. Moreover, the IIC is in the unique position of actually having the opportunity to review the product itself in order to ensure that the product and its labeling are in compliance. The SLD staff does not ordinarily have this opportunity. The Administrator, therefore, agrees with those commenters who stated that this delegation of authority would result in increased efficiency for FSIS and thus has concluded that the IIC should have the opportunity to approve labeling and labeling modifications that are sufficiently simple that the accuracy of labeling and the uniformity of labeling decisions would not be adversely affected.

To further allay some of the concerns of smaller firms, the Department wishes to emphasize the voluntary nature of this program. Establishments will continue to retain the option of submitting any and all labeling to SLD. Thus, the Department expects only benefits to accrue to those establishments using the new system. These benefits include a faster turnaround time for approval of labeling, less burdensome paperwork, and hopefully, a better understanding by plant management of labeling decisions.

The need for IIC training, as well as prompt and continuous updating of information, was noted in the comments submitted by a few industry members and a trade association. In addition, a number of commenters emphasized the importance of equitable and prudent labeling determinations. The Department recognizes the importance of IIC training to assure that equitable and prudent labeling decisions are made and that generic labeling is in compliance with the regulations. In this regard, the Department has developed a comprehensive training guide and has undertaken the responsibility of providing extensive training for all IICs with labeling responsibilities.

The Administrator disagrees with those commenters who criticized this program as potentially costly to implement. The Department believes that the cost of implementation would not be excessive. The most significant cost to the Department would be that of training the approximately 3,200 IICs, and this cost would be required whether the IIC is approving or simply monitoring product labeling. After the initial one time cost of IIC training, labeling approval would be incorporated into future IIC training and refresher courses. Moreover, the Department believes that the benefits to both the government and industry from operating a more streamlined and efficient labeling approval system far outweigh the costs involved in implementation.

One industry member who had participated in the pilot program expressed some concern about identifying IIC approvals. A system had been developed for the pilot program which identified each label by a specific number and provided for inclusion of each approved label in the SLD central labeling file. This numbering system has been revised to accommodate any problems encountered in the pilot program. The new numbering system has been highlighted in both the training guide and training sessions in an effort to eliminate any further confusion or difficulty in this area.

One processor suggested expanding the proposed IIC labeling approval authority to include labeling modifications reflecting a change in the quantity of an ingredient shown in the formula with a concurrent change in the order of predominance shown on the label. As discussed, the items proposed for inclusion in this category of labeling were considered sufficiently minor or simple that the application for label approval in question would present little opportunity for misbranding. This is not believed to be the case with a labeling modification reflecting a change in the quantity of an ingredient shown in the formula with a concurrent change in the order of predominance listed in the ingredient statement shown on the label. This type of labeling modification has the potential to mislead consumers if the necessary labeling changes are not made or are made incorrectly.

Changing the quantity of an ingredient in a formulation could create a variant from a product standard which often specifies the kind and minimum amount of meat and/or poultry, the maximum amount of nonmeat ingredients, and any other ingredients allowed or expected in the final product. For example, the standard of composition for "Chicken a la King" requires that, if a product bears this name on its label, at least 20 percent cooked poultry meat must be used in the recipe (9 CFR 381.167). With less than 20 percent cooked poultry meat in the formula, this product would no longer comply with the regulations. As a result of the potential problems associated with this type of modification, this suggestion has not been adopted.

Another industry member urged the Department to closely monitor the field delegation program during its initial critical stages to assure a smooth transition and resolve any potential problems. This commenter specifically suggested that SLD audit most of the initial labeling forwarded to it by the IIC, with a tapering off of the auditing procedures when appropriate. The Department appreciates the concern expressed by this commenter. The field delegation program represents a dramatic departure from current labeling approval practices and, as such, the Department also recognizes the value in closely monitoring this program, especially during the early stages of its implementation. In this way, the Department hopes to achieve the same success nationally that it achieved on a more limited scale during the pilot program.

2. *Generically approved labeling.* In response to some of the criticisms of the current label approval program and in an effort to lessen the regulatory burden on industry without compromising the truthfulness and accuracy of meat and poultry labeling, the Department proposed a category of labeling that would not require the formal prior approval of SLD or the IIC. Instead a copy of these generically approved labels would simply be submitted to the IIC prior to use. This category is comprised of labeling in final form which has been previously approved by SLD or the IIC and which is being submitted to the IIC with a minor modification. Since the IIC would not be formally approving such labeling prior to its use, the primary responsibility for ensuring that the labeling is in compliance with the regulations would rest with the establishment. As proposed, generic labeling would not be included in the SLD central labeling file, nor would SLD conduct an audit on such labeling.

Thirty-four comments specifically addressed the provision to establish a category of generically approved labeling. These comments were submitted by industry members, trade associations, and a labeling consulting firm.

All but one of the commenters supported the concept of generic labeling approvals. This commenter, a labeling consulting firm, questioned the legality of this approach arguing that the law seems to clearly state that the Secretary or his designee must actually approve all labeling. This issue has been carefully reviewed by the Department's Office of General Counsel (OGC), which disagrees with this commenter's interpretation of the FMIA and the PPIA. While the Acts do require the Department to approve labeling prior to use, they do not dictate the system or procedures by which such approvals are granted. Thus, this Department has concluded that certain broad classes of

labeling which meet certain specified criteria could be granted "generic" approval through the development of specific regulations. Accordingly, this aspect of the proposal is being retained.

Numerous commenters commended the Department for recognizing that many labels and labeling modifications do not need formal approval. Others cited savings in time and/or money as reasons for their support. Many industry members and trade associations, however, stated that this category of labeling, as proposed, was too narrowly defined. A number of commenters suggested expanding this category to include those labels and labeling modifications proposed for IIC approval. Many of these commenters argued that generic approval would be appropriate for this category of labeling because the items included for IIC approval present little risk of misbranding.

The Department is pleased with the strong endorsement given to the concept of generic labeling approvals. As stated in the proposal, this labeling category is expected to reduce paperwork and provide for a more meaningful utilization of auditing resources. While the Department acknowledges industry's desire to expand this category of labeling through this rulemaking, it is important to again emphasize the experimental nature of the procedure. Given the Department's responsibilities to assure that meat and poultry products are properly marked, labeled, and packaged, the Department is reluctant to expand the generic labeling category until it can be demonstrated that this procedure will continue to provide the public with labeling that is accurate and not misleading. Instead, the Department believes it best to proceed cautiously until a body of data has been gathered which can be analyzed in order to assess the validity of further change in this direction. This belief has been reinforced by those commenters who expressed concern over the elimination of a centralized labeling approval system which, they contended, would result in unfair and inconsistent labeling decisions.

In light of these concerns, the Department is reluctant at this time to expand generically approved labeling. The Department continues to subscribe to its position that this category of labeling should initially be narrowly defined. However, the Department hopes this labeling category can be expanded if it is proven successful and, as suggested by one trade association, will continue to review the approval program and provide for additional simplification wherever possible. In its continuing review of this issue, the Department is considering the possibility of proposing to expand the class of generic labels for those plants which have demonstrated the technological and managerial capacity to ensure misbranding does not occur. The Administrator has concluded that this issue should be addressed separately as a potential future amendment to its regulations. At the present time, the Department is encouraging suggestions along these lines which will lead to the development of such a proposal.

In addition to the changes suggested above, several additional labels and labeling changes not addressed in the proposal were also suggested for inclusion in the generic labeling category by a number of commenters or, according to one trade association, at least for IIC approval. These labels and labeling changes had been recommended by the American Meat Institute (AMI) in its August 1981 petition to be included within the generic labeling category and include the following:

1. The addition, deletion, increase or decrease of a permitted ingredient in a standardized product provided the product continues to comply with the established standard.

2. The addition, deletion, increase or decrease of a permitted ingredient present at less than or equal to 5 percent in a non-standardized product.

3. Labels of products shipped between plants of the same company.

4. Labels of products shipped to food service establishments without quality claims, nutritional claims, or geographical claims.

5. A change in a package vignette not effecting mandatory information.

6. The addition or deletion of open dating information. After careful examination of these items and the petitioner's rationale for including them in the generic labeling category, the Administrator has concluded that the first two suggestions, i.e., the addition, deletion, increase or decrease of a permitted ingredient in a standardized product provided the product continues to comply with the established standard and the addition, deletion, increase or decrease of a permitted ingredient present at less than or equal to 5 percent in a non-standardized product, represent modifications that have significant potential for misleading consumers if the necessary labeling changes are not made or are made incorrectly. Furthermore, such changes could frequently involve complex labeling issues. For example, the Department recently published a final rule modifying the standard, labeling requirements, and permitted uses for mechanically separated (species) (MS(S)). The promulgation of this final rule has elicited a variety of complicated questions regarding the use of MS(S) in standardized products which the Department has been responding to on a case-by-case basis. Moreover, the charts of approved substances contained in the regulations (§ 318.7 and § 381.147) list a variety of chemical substances along with their general classification, their function, the categories of products in which they may be used, and the permitted usage levels. The use of these so-called restricted ingredients is carefully limited by regulation, and excessive usage may raise potential health and safety issues. For these reasons, the changes suggested above are believed to fall outside of the scope of "minor modifications" which, in general, present little or no possibility of misbranding. Moreover, these types of changes would consume considerably more time for the IIC to approve than other changes included in this category. Accordingly, these changes have not been adopted.

The third and fourth suggestions, i.e., labels of products shipped between plants of the same company and labels of products shipped to food service establishments without quality, nutritional, or geographical claims, represent items which may reach consumers with the labeling applied by the establishment. This possibility creates the potential for misbranded product to reach the consumer because the Department has no comprehensive means of monitoring where product goes after inspection. The statutes do not distinguish between retail and wholesale product labeling. The Administrator has, therefore, concluded that these items should not be included in the generic labeling category.

The fifth suggestion, i.e., a change in a package vignette not affecting mandatory information, is one which clearly may present the potential for misleading consumers. It has long been recognized that a product vignette is a powerful marketing tool in that many purchasing decisions are made on the basis of its appeal. The Department also recognizes, however, that this is an area of labeling approval where SLD is severely limited in its ability to assure accurate and non-misleading information. It is the IIC who is actually in the best position to assure that the picture on the label accurately represents the contents of the package because it is only the IIC who has the

opportunity to review both the product and its labeling. Based on this recognition, the Department is amending the final rule to include this item as a minor modification which may be approved by the IIC.

The last suggestion, i.e., the addition or deletion of open dating information, relates to an area over which SLD and the IIC have little, if any, control since their knowledge of the handling and storage conditions of products once they leave the establishment is extremely limited. As a result, the Department believes this is a change which can be generically approved without diminishing the quality of the labeling. Thus the final rule is being amended to include this item among the minor modifications which can be generically approved, provided the open dating information is in compliance with the regulations (9 CFR § 317.8(b)(32) and § 381.129(c)) and the addition of such information does not crowd or obscure mandatory labeling information.

One meat processor also recommended that the generic labeling category should include changes in the type of packaging material used, for example, film versus casing, provided no change in the labeling is made. The Department believes that this change can be generically approved. Such changes have little potential for misleading the consumer because the original labeling has been reviewed and approved by SLD or the IIC. Changing the packaging material should have no effect on the approved labeling. The "false or misleading" provisions of the regulations will further assure that all mandatory labeling information appears as required and is sufficiently prominent. This modification is expected to give industry greater flexibility without altering the quality of the labeling. As with other generic approvals, a copy of the labeling will have to be submitted to the IIC for filing prior to use.

The proposed provisions permitting generic approval for a change in the arrangement of directions pertaining to the opening of cans or the serving of a product represents a labeling modification which the IIC can currently approve. In fact, the wording of these proposed provisions remains essentially unchanged from the current wording contained in the regulations. In reviewing these provisions, however, the Department realized that they are narrower in scope than was intended. The Department believes that changes in both the language and arrangement of directions could be generically approved without affecting the accuracy of the labeling or the uniformity of labeling decisions, provided the addition or amendment of such information does not crowd or obscure the mandatory labeling information. Accordingly, these provisions are being amended in the final rule to reflect this expanded responsibility.

In discussing the role of the IIC, a few commenters expressed concern over the IIC's authority to withhold use of generically approved labeling if it is believed to be "false or misleading." One company suggested establishing a time limit after which the IIC may not withhold the labeling or a temporary approval would be granted. A trade association suggested that the IIC should notify the establishment of any labeling problem and bring it to the attention of SLD for appropriate action. Noting the importance of holding the IIC accountable for withholding product, another trade association recommended that the IIC should identify the potential serious violation on a copy of the transmittal form and provide a copy to the establishment.

In analyzing these comments, it is useful to review the Department's statutory responsibilities in this area. As noted earlier, the FMIA and the PPIA are quite specific in regard to the use of labeling which is false or misleading. Section 7(d) of the FMIA (21 U.S.C. 607(d)) and section 8(c) of the PPIA (21 U.S.C. 457(c)) prohibit the distribution of any article under any name or other marking or labeling which is false or misleading, or in any container of a misleading form or size, but permits the use of established trade names and other marking or labeling and containers which are not false or misleading and which are approved by the Secretary. Additionally, section 7(e) of the FMIA (21 U.S.C. 607(e) and section 8(d) of the PPIA (21 U.S.C. 457(d)) provide the Secretary with the authority to withhold the use of any marking, labeling, or container in use or proposed for use with respect to any article subject to the Acts if there is reason to believe that the marking or labeling or size or form of the container is false or misleading in any particular.

As discussed in the proposals the Administrator continues to believe that the IIC, acting as the Department's representative, should continue to have the authority and responsibility to withhold the use of any labeling which is contrary to the requirements of the FMIA and the PPIA. Thus, the provision confirming such authority is being retained. Questions regarding any labeling which is being withheld by an IIC could be immediately presented by the establishment to SLD for review.

3. *Appeals of Labeling Decisions.* Nineteen comments addressed the issue of labeling appeals. More than half of these comments were submitted by industry members. The remainder were submitted by trade associations.

Almost all of the commenters advocated the development of a formal or informal procedure to expeditiously appeal labeling decisions to the Administrator. Several commenters noted the importance of establishing a timetable for resolving labeling disputes. One week was suggested by a few commenters as a reasonable time period for decisionmaking.

The Administrator continues to believe that neither the Department nor the public will be better served by the establishment of a rigid appeals system which imposes strict time limits on decisionmaking. Particularly at this time when technological innovations in food processing and increased public concern about the presence of various substances in foods generate complex issues for SLD and the Department, a requirement of decisionmaking within a specifically limited period of time may prove to be unrealistic in a number of specific cases. In fact, if the Department were to be forced to make labeling determinations within a specified time period, the Administrator would be likely to err on the side of conservatism if he has only limited information which suggests that a label might be false or misleading. This could result in a greater number of labeling denials than would otherwise be the case. Accordingly, no regulatory changes are being made regarding a formal appeals process.

It is apparent from a review of the comments to this issue that there was some confusion regarding the proposed changes in the area of labeling appeals. As indicated in the proposal, appeals of informal decisionmaking within the Department are presently controlled by § 306.5 of the meat inspection regulations and § 381.35 of the poultry products inspection regulations. The provision in the meat inspection regulations is general in scope and establishes a chain-of-command procedure for appealing decisions of any Department employee. This regulation states that any appeal from a decision of any program employee shall be made to the immediate supervisor having jurisdiction over the subject matter of the appeal, except as otherwise provided by the applicable rules of practice. This section is intended to apply to most decisions made within the Department. In light of this existing

provision, the Administrator believes it should be expressly provided that denial of a labeling application by the IIC would not be appropriately appealed to the IIC's field supervisor. Rather, an establishment would simply submit a labeling application which has been denied by the IIC directly to SLD for review.

While the appeals provision in the meat inspection regulations encompasses all types of decisionmaking, the poultry products inspection regulation is narrower in scope. This provision is specific to inspection decisions such as the decision to retain product for further examination or the decision to condemn poultry. With these types of decisions, timing becomes a critical factor. This regulation includes a 48-hour time limit within which an appeal must be filed. No change was proposed for this regulation other than, for the sake of consistency between the meat and poultry products inspection regulations, clarifying that the denial of a labeling application by the IIC would not constitute a basis for an appeal. The proposed clarification to the appeals provisions in both the meat and poultry regulations is being adopted in the final rule. The 48-hour time limit does not apply to labeling appeals.

In regard to labeling applications submitted to both the IIC and SLD, one trade association suggested a "fast track" review in Washington if an IIC rejects a label. The types of labeling which can be approved by the IIC, i.e., final labeling having SLD sketch approval and "simple" labeling are, by design, routine and noncontroversial. Thus, the Administrator has concluded that there is no need to establish a special mechanism to process these applications in Washington. Establishments have always been able to receive priority consideration from the system if time is a critical factor, and this will continue to be the case. Accordingly, this suggestion is not being adopted.

One industry member suggested including a question on the application form to identify labeling that has been submitted to the IIC. While the Department believes this information may be useful, it also realizes that this may represent an unnecessary requirement. As is presently the case, inconsistent labeling decisions can be identified through the usual auditing procedures.

4. *Temporary approvals.* Twenty-eight comments addressed the issue of temporary approvals. All of these comments were submitted by industry members and trade associations.

Most commenters supported the provision to formalize the temporary approval process. Moreover, there was no opposition to the proposed criteria for granting such approvals. These criteria include a demonstration by the applicant that: (1) The proposed labeling would not misrepresent the product; (2) use of the labeling would not present any potential health, safety, or dietary problems to the consumer; (3) denial of the request would create undue economic hardship; and (4) an unfair competitive advantage would not result from the granting of the temporary approval.

While the attempt to codify the practice of granting temporary approvals was welcomed, the 180-day limit proposed for such approvals was criticized as inadequate, unrealistic, inflexible, and/or arbitrary. Most commenters indicated that extensions for temporary approvals should be permitted on a discretionary basis, with some suggesting that temporary approvals should remain in effect until new labeling is printed. A few commenters also suggested that temporary approvals for labeling containing the word "new" should become effective on the date of use rather than on the approval date. The Department carefully considered the comments on this issue and found many of the arguments to be persuasive. In general, the Department continues to believe that 180 days provides sufficient time for applicants to correct labeling that is deficient in some respect. This time limit is generally consistent with past and present approval practices. The Department recognizes, however, that there may, on rare occasions, be extenuating circumstances beyond the control of the applicant which would require an extension of the 180 day limit. Thus, the Department is retaining the 180 day limitation on temporary approvals provided all four of the criteria are met. In response to those commenters who criticized this time limit as inflexible, the Department will consider extending a temporary approval beyond the 180 day limit if it can be shown that new circumstances, also meeting the established criteria, have developed since the original temporary approval was granted which make it impossible to correct the labeling deficiencies in the time allotted.

In regard to labeling containing the word "new," the Administrator acknowledges the concerns of those commenters addressing this issue and believes that the expiration date for "new" labeling can also be based on the date the product is introduced into the market in addition to the traditional method of establishing the expiration date on the basis of the date the labeling is approved. Accordingly, this suggestion is being adopted as an alternative to the traditional method. Information regarding the product introduction date should be submitted to SLD at the time of label approval if this alternative is selected. It is important to note that the approval for labeling containing "new" terminology is not in actuality a temporary approval as defined in this section because the label which is initially approved is not deficient in any manner; however, use of such labeling for an indefinite period of time would mislead consumers. Thus, in the interest of truthful labeling, its use has been limited to six months. Historically, six months has been considered a reasonable and adequate period of time to introduce new products into the marketplace; however, the Department will consider extending this approval if information, such as documented proof of a delay in marketing, is submitted which justifies such an extension.

A number of commenters also criticized this aspect of the proposal for limiting the IIC's authority to grant temporary approvals. Some argued that the IIC should have the authority to grant temporary approval of labeling that he or she has the authority to approve in final form. However, the Administrator continues to believe that temporary approvals by their nature represent complex labeling decisions which, for the sake of consistency, uniformity, and control, need to be submitted to SLD for approval.

Commenters further criticized the Department for suggesting that temporary approvals would generally not be granted for generically approved labeling which was subsequently found to be deficient. Several commenters indicated that this would act as a disincentive for establishments to use generically approved labeling.

The Department has reviewed this concern and realizes that generically approved labeling can present two general types of errors. The first type of error involves labeling that is submitted to the IIC for filing prior to use which contains some minor modification to previously approved labeling. This labeling, by definition, qualifies for generic approval. If, upon review by the IIC, a deficiency is discovered in such labeling, application may be made to SLD for temporary approval. In such a case, a temporary approval may be granted for 180 days if the applicant can demonstrate that the four established criteria are met.

The second type of error involves labeling that is submitted to the IIC for filing prior to use which does not qualify for generic approval. If, upon review by the IIC, a deficiency of any magnitude is discovered in such labeling, it is improbable that a temporary approval will be granted. If the Department were to literally grant temporary approvals for this type of error, widespread abuse of the concept of generic labeling could result because the Department would be condoning a system where some establishments could intentionally print erroneous labels in expectation of such an approval. Therefore, the Department is reluctant to grant temporary approvals for labeling which has this second type of error.

5. *"Sketch" labeling.* Twenty-three commenters addressed the proposed definition of "sketch" labeling. Almost all of these comments were submitted by industry members. Several trade associations and a labeling consulting firm also commented on this issue. All of the commenters objected to requiring a printer's proof to be submitted for sketch approval. This requirement was criticized as expensive, impractical, burdensome, time consuming, and/or discriminatory to small businesses. These commenters argued that hand-drawn sketches should be sufficient for IIC approval. A number of commenters suggested or endorsed the idea of recognizing two different types of "sketch" labeling, one which would be considered equivalent to a printer's proof and thus, subject to approval, and second which would be considered a rough draft submitted only for review and comment.

The Department did not intend its definition of "sketch" labeling to impose an unnecessary or unfair burden on industry. However, there was some concern raised in the comments to the pilot program which indicated that if sketch labeling is too vague the IIC may have difficulty comparing it with final labeling. As a result, the Department was interested in establishing guidelines for sketch submissions to assure that they are sufficiently representative of the final labeling. Thus, the proposed definition was intended to assist the IICs in their labeling approval responsibilities and hopefully, avoid any problems in this area. In view of the comments on this issue, the Department is amending the definition of sketch labeling to clarify that any type of copy which clearly shows all labeling material, size, location and an indication of final color, can be submitted for sketch approval in lieu of a printer's proof. Although a printer's proof is most desirable, a carefully hand-drawn sketch which indicates letter size and location, layout, and colors appearing on the final labeling is acceptable. The Department does not see merit in the suggestion that the sketch labeling be delimited to two specific types. This would only serve to complicate the labeling approval process. Thus, this suggestion is not being adopted in the final rule. SLD will continue to review and comment on rough drafts of sketches. These rough drafts cannot, however, be submitted for sketch approval.

6. *Voluntary provision.* Seven commenters, six industry members and a trade association, supported the voluntary nature of the proposed IIC/generic labeling approval system. Several of these commenters stressed the importance of retaining the option to submit applications to SLD if preferred and/or if the IIC denies an application. The Department agrees with these commenters and continues to regard the voluntary nature of the IIC/generic approval program appropriate and important to its success. Thus, the use of the IIC to approve labeling and the use of generically approved labeling will be optional. Establishments may continue to submit any and all applications for labeling to SLD.

7. *Multi-plant corporations.* Seven commenters, five industry members and two trade associations, criticized the proposal for providing insufficient relief for multi-plant operations. Many of these commenters suggested that IIC or generic labeling approval granted at one establishment should serve as an approval at all other establishments within the same company.

The Department disagrees with those commenters who contended that the proposed rule would help mostly those manufacturers with single establishments. All labeling which falls within the generic labeling category is, by definition, automatically approved. The establishment simply has to submit a copy of such labeling to the IIC prior to use. This is a dramatic departure from present practices and as noted in the proposal and most of the comments, this change is expected to save both time and money for those firms using this new system.

The Department continues to regard its decision to allow each IIC to approve labeling only for use in his or her particular plant as necessary. An IIC in one plant would have no way of quickly determining whether a label presented from another plant within the same company is actually in use as it is presented to the IIC. In order to avoid any problems in this regard, the Department is adopting, as proposed, the limited provision to permit on previously approved labeling only modifications of newly assigned or revised establishment numbers for that particular establishment. A multi-plant corporation seeking one labeling approval for use in several plants should submit its labeling application to SLD. The application should indicate all establishments which will be producing the product. Copies of the SLD-approved labeling will then be sent to the IIC at each establishment.

8. *Miscellaneous.* Three commenters, two industry members and a trade association, expressed concern over the language of § 381.132(a) of the poultry products inspection regulations. These commenters contended there is an inconsistency between this proposed section and the existing § 381.115. The former provision refers to the use of labeling "on any product" while the latter provision refers to labeling on any product "at the time it leaves the official establishment."

After carefully examining the language of these two provisions, the Administrator has concluded that § 381.132(a) needs to be further amended to clarify that it, too, refers to labeling on any product leaving the establishment. The apparent inconsistency in the language of the two provisions cited above was unintentional. The final rule will be amended accordingly.

One commenter asked for clarification regarding the operation of the labeling approval system in approved foreign establishments exporting product to the United States. This regulation expands the authority of the IIC of official establishments to approve certain labeling and labeling modifications and establishes limited categories of generically approved labeling. The effectiveness of all inspection programs in countries which export product into the United States is monitored by FSIS personnel, but the in-plant inspectors are obviously employees of the foreign governments. Since there is no IIC in a foreign establishment, there will be no change in the labeling approval system for such an establishment wishing to export product to the U.S. Labeling for export to the U.S. will continue to be submitted to SLD in the usual manner.

In reviewing the proposed provisions permitting the IIC to add, delete, or substitute the official USDA grade shield, the Department has realized that, unlike the official poultry grade shield which is applied to poultry product labeling, the official grade mark for meat

is applied only to carcasses or wholesale cuts of meat. As such, changing the official meat grade is not a labeling modification. Accordingly, this provision is being deleted from the IIC-approved labeling category of the meat inspection regulations. Many applicants, however, submit labeling which includes grading terminology. This information falls into the category of a quality claim. Labeling bearing such information, therefore, must be submitted to SLD for review.

Although there is no official meat shield for retail labeling, the use of grading terminology on labeling has increased in recent years as a competitive marketing tool. Such terminology appears in different forms on product labeling, for example, "Our Prime Selection" or "Choice of the East" and as such, it falls into the category of a quality claim because it implies that the product is of a certain quality. Moreover, it is not used in conjunction with an official shield and often is not preceded by "U.S." or "USDA." This is not the case with poultry labeling where the poultry grade can appear only in conjunction with the official poultry grade shield. To further complicate the meat grading issue, attempts have been made to use terminology alluding to Federal grades on labeling when the product itself has not been federally graded. Use of such terminology in this manner is clearly misleading and thus, contrary to the FMIA. In light of this problem, the Administrator has concluded that meat grading terminology falls outside the scope of simple labeling which may be approved by the IIC. Labeling bearing such terminology should be submitted to SLD for approval to assure that such claims are accurately and appropriately used.

As a note of clarification, this final rule deletes, as proposed, a provision currently contained in the meat inspection regulations (§ 317.4(d)) which allows the IIC to approve stencils, labels, box dies, and brands used on shipping containers and on such immediate containers as tierces, barrels, drums, boxes, crates, and large-size fiberboard containers. Historically this provision was intended to accommodate the obvious practical problems associated with a centralized review of such materials and was designed to cover very simple labeling where there was little chance for error and no possibility of misleading the public. In recent years, however, some questions have been raised regarding the scope of this provision. In fact, some applicants have submitted relatively complex labeling for large institutional packages to the IIC for approval under this authority. Consistent with the intent of the original provision, more general provisions allowing the IIC to approve single ingredient labeling and labels for shipping containers have been included in the amended meat and poultry products inspection regulations. Thus, the labeling falling within the intended scope of the existing § 317.4(d) will be encompassed by the new § 317.4(e)(3)(ii), 317.4(e)(3)(v), 381.132(c)(3)(ii), and 318.132(c)(3)(v).

List of Subjects

9 CFR Part 306

Appeals, Meat inspection.

9 CFR Part 317

Food labeling, Meat inspection.

9 CFR Part 381

Appeals, Food labeling, Poultry inspection.

This final rule promulgates the provisions of the proposal as modified and described in the preamble. Accordingly, the Federal meat and poultry products inspection regulations (9 CFR Parts 306, 317, and 381) are amended as follows:

1. The authority citation for Parts 306 and 317 reads as follows:

Authority: 34 Stat. 1260, 79 Stat. 903, as amended, 81 Stat. 584, 84 Stat. 91, 438; 21 U.S.C. 71 *et seq.*, 601 *et seq.*, 33 U.S.C. 1171(b), unless otherwise noted.

PART 306—[AMENDED]

2. The text of § 306.5 (9 CFR 306.5) is revised as follows:

§ 306.5 Appeals.

Any appeal from a decision of any Program employee shall be made to his/her immediate supervisor having jurisdiction over the subject matter of the appeal, except as otherwise provided in the applicable rules of practice. Denial of a labeling application by the inspector-in-charge shall not constitute a basis for an appeal under this section.

PART 317—[AMENDED]

3. The section title and paragraphs (a) and (d) of § 317.4 (9 CFR 317.4 (a) and (d)) are revised and paragraph (e) is added as follows:

§ 317.4 Labeling to be approved by the Administrator.

(a) No labeling shall be used on any product until it has been approved in its final form by the Administrator. For the convenience of the establishment, sketches or proofs of new labeling may be submitted in triplicate to the Standards and Labeling Division, Meat and Poultry Inspection Technical Services, in Washington, D.C., for approval, and the preparation of final labeling deferred until such approval is obtained. "Sketch" labeling is a printer's proof or other copy which clearly shows all labeling material, size, location, and an indication of final color. All final labeling shall be submitted in triplicate to the Standards and Labeling Division for approval, except where such approval may be obtained from the inspector-in-charge as specified in this section or where generic approval is granted as specified in § 317.5. Any establishment that wishes to submit any labeling to the Standards and Labeling Division, Meat and Poultry Inspection Technical Services, Washington, D.C., for approval may do so.

* * * * *

(d) Application may be made, consistent with the requirements of this section, for a temporary approval for the use of a label or other labeling that may otherwise by deemed deficient in some particular. Temporary approvals may be granted by the Standards and Labeling Division for a period not to exceed 180 calendar days. Such an approval may be granted if (1) the proposed labeling would not misrepresent the product; (2) use of the labeling would not present any potential health, safety, or dietary problems to the consumer; (3) denial of the request would create undue economic hardship; and (4) an unfair competitive advantage would not result from the granting of the temporary approval. Temporary approvals may not be extended unless the applicant demonstrates that new circumstances, meeting the above criteria, have developed since the original temporary approval was granted.

(e) Inspector-in-charge may approve labeling in certain cases. (1) At the request of the official establishment, the inspector-in-charge may approve labeling, listed in paragraph (e)(3) of this section, which has not been submitted to the Standards and Labeling Division: *Provided,* That the labeling is so used as not to be false or misleading, and that all approvals are issued in writing in response to formal applications, and that copies of the approved applications are forwarded by the inspector-in-charge for filing and possible audit to the Standards and Labeling Division, Meat and Poultry Inspection Technical Services, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, D.C. 20250.

(2) Denial of a labeling application by the inspector-in-charge precludes use of the labeling unless and until

authorization is obtained under paragraph (a) of this section.

(3) The inspector-in-charge may approve: (i) Final labeling of labeling already approved in sketch or proof form by the Standards and Labeling Division and the final labeling is prepared without modification or with only minor modification as described in paragraph (e)(3)(iii) of this section or as described in § 317.5;

(ii) Labeling for single ingredient products (such as steak or lamb chops) which do not contain quality claims (such as "blue ribbon" or "choice"), negative claims (such as "no sugar added"), geographical claims, nutritional claims, guarantees, or foreign language;

(iii) Any label or other labeling which has already been approved but which contains one or more minor modifications, as set forth in this subparagraph: *Provided,* That in the opinion of the inspector-in-charge, all mandatory information remains sufficiently prominent and the labeling as modified is so used as not to be false or misleading:

(A) Brand name changes: *Provided,* That there are no design changes, the brand name does not use a term that connotes quality or other product characteristics, the brand name has no geographic significance and the brand name does not affect the name of the product;

(B) The deletion of the word "new" on new product labeling;

(C) The addition, deletion, or amendment of handling instructions: *Provided,* That the change is consistent with § 317.2 of this subchapter;

(D) Changes reflecting a change in the quantity of an ingredient shown in the formula without a change in the order of predominance shown on the label: *Provided,* That the change in quantity of ingredients complies with any minimum or maximum limits for the use of such ingredients prescribed in Parts 318 and 319 of this subchapter;

(E) Changes in the color of the labeling: *Provided,* That the inspector-in-charge is satisfied that sufficient contrast and legibility remain; or

(F) A change in the product vignette: *Provided,* That the change does not affect mandatory labeling information;

(iv) Labeling for containers of meat and meat food products sold under contract specifications to Federal Government agencies, when such product is not offered for sale to the general public: *Provided,* That the contract specifications include specific requirements with respect to labeling, and are made available to the inspector-in-charge;

(v) Labels for shipping containers which contain fully labeled immediate containers;

(vi) Labeling for products not intended for human food: *Provided,* That they comply with Part 325 of this subchapter;

(vii) Meat inspection legends, which comply with Parts 312 and 316 of this subchapter; and

(viii) Meat carcass ink brands, and meat food product ink and burning brands, which comply with Parts 312 and 316 of this subchapter.

4. The title and contents of § 317.5 (9 CFR 317.5) are revised to read as follows:

§ 317.5 Generically approved labeling.

(a) Labeling which is generically approved under paragraph (b) of this section is approved for use without additional authorization, provided the labeling shows all mandatory information in a sufficiently prominent manner and is not otherwise false or misleading in any particular. Any determination by the inspector-in-charge that labeling being used in accordance with paragraph (b) of this section is false or misleading or that labeling alleged by an establishment to be approved under paragraph (b) of this section which the inspector-in-charge determines is not so approved, shall preclude the use of the labeling and said determination shall remain in effect unless and until an alternative decision is made by the Standards and Labeling Division. A copy of any labeling to be used in accordance with paragraph (b) of this section shall be supplied to the inspector-in-charge prior to its use.

(b) Labeling which has previously been approved but which contains the following modifications is generically approved and may be used in conformity with the requirements of paragraph (a) of this section:

(1) All features of the labeling are proportionately enlarged or reduced: *Provided,* That all minimum size requirements specified in applicable regulations are met and the labeling is legible;

(2) There is substitution of such abbreviations as "lb." for "pound," or "oz." for "ounce," or the word "pound" or "ounce" is substituted for the abbreviation;

(3) A master or stock label has been approved from which the name and address of the distributor are omitted and such name and address are applied before being used (in such case, the word "prepared for" or similar statement must be shown together with the blank space reserved for the insertion of the name and address when such labels are offered for approval);

(4) During holiday seasons, wrappers or other covers bearing floral or foliage designs or illustrations or rabbits, chicks, fireworks, or other emblematic holiday designs are used with approved labeling (the use of such designs will not make necessary the application of labeling not otherwise required);

(5) There is a change in the language or the arrangement of directions pertaining to the opening of containers or the serving of the product;

(6) The addition, deletion, or amendment of a coupon, a cents-off statement, cooking instructions, packer product code information, or UPC product code information.

(7) Any change in the name or address of the packer, manufacturer, or distributor that appears in the signature line;

(8) Any change in the net weight: *Provided,* That the size of the net weight statement complies with § 317.2 of this subchapter;

(9) The addition, deletion, or amendment of recipe suggestions for the product;

(10) Any change in punctuation;

(11) Newly assigned or revised establishment numbers for a particular establishment for which use of the labeling has been approved by the Standards and Labeling Division or the inspector-in-charge assigned to that establishment;

(12) The addition or deletion of open dating information; or

(13) A change in the type of packaging material on which the label is printed.

PART 381—[AMENDED]

5. The authority citation for Part 381 reads as follows:

Authority: Sec. 14 of the Poultry Products Inspection Act, as amended by the Wholesome Poultry Products Act (21 U.S.C. 451 *et seq.*); the Talmadge-Aiken Act of September 28, 1962, (7 U.S.C. 450); and subsection 21(b) of the Federal Water Pollution Control Act, as amended by Pub. L. 91–224 and by other laws (33 U.S.C. 1171(b)) unless otherwise noted.

6. The text of § 381.35 (9 CFR 381.35) is revised as follows:

§ 381.35 Appeal inspections; how made.

Any person receiving inspection service may, if dissatisfied with any decision of an inspector relating to any inspection, file an appeal from such decision: *Provided,* That such appeal is filed within 48 hours from the time the decision was made. Any such appeal from a decision of an inspector shall be made to his immediate superior having jurisdiction over the subject matter of the appeal, and such superior shall

determine whether the inspector's decision was correct. Review of such appeal determination, when requested, shall be made by the immediate superior of the employee of the Department making the appeal determination. The cost of any such appeal shall be borne by the appellant if the Administrator determines that the appeal is frivolous. The charges for such frivolous appeal shall be at the rate of $9.28 per hour for the time required to make the appeal inspection. The poultry or poultry products involved in any appeal shall be identified by U.S. retained tags and segregated in a manner approved by the inspector pending completion of an appeal inspection: *Provided,* further, That denial of a labeling application by the inspector-in-charge shall not constitute a basis for an appeal under this section.

7. The section title and the text of § 381.132 (9 CFR 381.132) are revised as follows:

§ 381.132 Labeling to be approved by the Administrator.

(a) No labeling shall be used on any product leaving the establishment until it has been approved in its final form by the Administrator. For the convenience of the establishment, sketches or proofs of new labeling may be submitted in triplicate to the Standards and Labeling Division, Meat and Poultry Inspection Technical Services, Washington, D.C., for approval, and the preparation of final labeling deferred until such approval is obtained. "Sketch" labeling is a printer's proof or other copy which clearly shows all labeling material, size, location, and an indication of final color. All final labeling shall be submitted in triplicate to the Standards and Labeling Division for approval, except where such approval may be obtained from the inspector-in-charge as specified in this section or where generic approval is granted as specified in § 381.134 of this subchapter. Any establishment that wishes to submit any labeling to the Standards and Labeling Division, Meat and Poultry Inspection Technical Services, Washington, D.C., for approval may do so.

(b) Application may be made, consistent with the requirements of this section, for a temporary approval for the use of a label or other labeling that may otherwise be deemed deficient in some particular. Temporary approvals may be granted for a period not to exceed 180 calendar days. Such an approval may be granted if (1) the proposed labeling would not misrepresent the product; (2) use of the labeling would not present any potential health, safety, or dietary problems to the consumer; (3) denial of the request would create undue economic hardship; and (4) an unfair competitive advantage would not result from the granting of the temporary approval. Temporary approvals may not be extended unless the applicant demonstrates that new circumstances, meeting the above criteria, have developed since the original temporary approval was granted.

(c) Inspector-in-charge may approve labeling in certain cases.

(1) At the request of the official establishment, the inspector-in-charge may approve labeling, listed in paragraph (c)(3) of this section, which has not been submitted to the Standards and Labeling Division: *Provided,* That the labeling is so used as not to be false or misleading, and that all approvals are issued in writing in response to formal applications, and that copies of the approved applications are forwarded by the inspector-in-charge for filing and possible audit to the Standards and Labeling Division, Meat and Poultry Inspection Technical Services, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, D.C. 20250.

(2) Denial of a labeling application by the inspector-in-charge precludes use of the labeling unless and until authorization is obtained under paragraph (a) of this section.

(3) The inspector-in-charge may approve:

(i) Final labeling of labeling already approved in sketch or proof form by the Standards and Labeling Division and the final labeling is prepared without modification or with only minor modification as described in paragraph (c)(3)(iii) of this section or as described in § 381.134 of this subpart;

(ii) Labeling for single ingredient products (such as chicken or turkey thighs) which do not contain quality claims (such as "blue ribbon" or "choice"), negative claims (such as "no sugar added"), geographical claims, nutritional claims, guarantees, or foreign language;

(iii) Any label or other labeling which has already been approved but which contains one or more minor modifications, as described below: *Provided,* That in the opinion of the inspector-in-charge, all mandatory information remains sufficiently prominent and the labeling as modified is so used as not to be false or misleading;

(A) Brand name changes: *Provided,* That there are no design changes, the brand name does not use a term that connotes quality or other product characteristics, the brand name has no geographic significance, and the brand name does not affect the name of the product;

(B) The deletion of the word "new" on new product labeling;

(C) The addition, deletion, or amendment of handling instructions: *Provided,* That the change is consistent with § 381.125 of this subchapter; or

(D) Changes reflecting a change in the quantity of an ingredient shown in the formula without a change in the order of predominance shown on the label: *Provided,* That the change in quantity of ingredients complies with any minimum or maximum limits for the use of such ingredients prescribed in § 381.147;

(E) Changes in the color of the labeling: *Provided,* That the inspector-in-charge is satisfied that sufficient contrast and legibility remain;

(F) The addition, deletion, or substitution of the official USDA grade shield;

(G) A change in the product vignette: *Provided,* That the change does not affect mandatory labeling information.

(iv) Labeling for containers of poultry products sold under contract specifications to Federal governmental agencies when such product is not offered for sale to the general public: *Provided,* That the contract specifications include specific requirements with respect to labeling, and are made available to the inspector-in-charge;

(v) Labels for shipping containers which contain fully labeled immediate containers. Such labels shall comply with § 381.127;

(vi) Labeling for products of poultry not intended for human food if they comply with § 381.152(c), and labels for poultry heads and feet for export for processing as human food if they comply with § 381.190(b);

(vii) Poultry inspection legends, if they comply with Subpart M of this part;

(viii) Inserts, tags, liners, pasters, and like devices containing printed or graphic matter and for use on, or to be placed within, containers, and coverings of product provided such devices contain no reference to product and bear no misleading feature;

(8) The title and contents of § 381.134 (9 CFR 381.134) are revised to read as follows:

§ 381.134 Generically approved labeling.

(a) Labeling which is generically approved under paragraph (b) of this section is approved for use without additional authorization, provided the labeling shows all mandatory information in a sufficiently prominent manner and is not otherwise false or

misleading in any particular. Any determination by the inspector-in-charge that labeling being used in accordance with paragraph (b) of this section is false or misleading or that labeling alleged by an establishment to be approved under paragraph (b) of this section which the inspector-in-charge determines is not so approved, shall preclude the use of the labeling and said determination shall remain in effect unless and until an alternative decision is made by the Standards and Labeling Division. A copy of any labeling to be used in accordance with paragraph (b) of this section shall be supplied to the inspector-in-charge prior to its use.

(b) Labeling which has previously been approved but which contains the following modifications is generically approved and may be used in conformity with the requirements of paragraph (a) of this section:

(1) All features of the label are proportionately enlarged or reduced: *Provided*, That all minimum size requirements specified in applicable regulations are met and the labeling is legible;

(2) There is substitution of such abbreviations as "lb." for "pound," or "oz." for "ounce," or the word "pound" or "ounce" is substituted for the abbreviation;

(3) A master or stock label has been approved from which the name and address of the distributor are omitted and such name and address are applied before being used (in such case, the words "prepared for" or similar statement must be shown together with the blank space reserved for the insertion of the name and address when such labels are offered for approval);

(4) During holiday seasons, wrappers or other covers bearing floral or foliage designs or illustrations of rabbits, chicks, fireworks, or other emblematic holiday designs are used with approved labeling (the use of such design will not make necessary the application of labeling not otherwise required);

(5) There is a change in the language or the arrangement of directions pertaining to the opening of containers or the serving of the product;

(6) The addition, deletion, or amendment of a coupon, a cents-off statement, cooking instructions, packer product code information, or UPC product code information;

(7) Any change in the name or address of the packer, manufacturer, or distributor that appears in the signature line;

(8) Any change in the net weight: *Provided*, That the size of the net weight statement complies with § 381.121 of this subchapter;

(9) The addition, deletion, or amendment of recipe suggestions for the product;

(10) Any changes in punctuation;

(11) Newly assigned or revised establishment numbers for a particular establishment for which use of the labeling has been approved by the Standards and Labeling Division or the inspector-in-charge assigned to that establishment;

(12) The addition or deletion of open dating information; or

(13) A change in the type of packaging material on which the label is printed.

§ 381.135 [Reserved]

9. Section 381.135 (9 CFR 381.135) is removed and the section number is reserved.

Information collection requirements contained in this regulation (§§ 306.5, 317.4, 317.5, 381.35, 381.132, and 381.134) have been approved by the Office of the Management and Budget under the provisions of 44 U.S.C. Chapter 35 and have been assigned OMB #0583–0015.

Done at Washington, D.C., on February 24, 1983.

Donald L. Houston,

Administrator, Food Safety and Inspection Service.

[FR Doc. 83–7204 Filed 3–17–83; 8:45 am]

BILLING CODE 3410-DM-M

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Part 308

Hearing

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Final rule.

SUMMARY: The Federal Deposit Insurance Corporation (FDIC) is amending § 308.61 of its regulations (12 CFR 308.61) to delegate to the Executive Secretary the authority to (1) designate presiding officers for hearings under § 308.59 of its regulations (12 CFR 308.59) and (2) set a later hearing date.

EFFECTIVE DATE: March 18, 1983.

FOR FURTHER INFORMATION CONTACT: Margaret M. Olsen, Assistant Executive Secretary, 550 17th Street, NW., Washington, D.C. 20429, telephone (202) 389–4446.

SUPPLEMENTARY INFORMATION: Section 308.59 of FDIC's regulations provides that an individual subject to suspension and removal proceedings under section 8(g) of the Federal Deposit Insurance Act ("FDI Act," 12 U.S.C. 1818(g)) or, in the case of a petition for reconsideration of a denial of an application under section 19 of the FDI Act (12 U.S.C. 1829), the bank or the affected individual, may request a hearing. Under section 308.61 of FDIC's regulations, the Board of Directors designates the presiding officer for any such hearing and may order a later hearing date upon petition. (The Executive Secretary sets the original hearing date.) For reasons of administrative ease and efficiency, the Board is delegating authority to the Executive Secretary to designate the presiding officers and to set a later hearing date.

These amendments relate solely to internal agency practices and procedures and, therefore, the notice, public comment and delayed effective date requirements of 5 U.S.C. 553 are not applicable. The amendments also would not have a significant economic impact on a substantial number of small entities and would not impose any recordkeeping or reporting requirements on any person. Thus, under FDIC's policy statement on drafting regulations entitled, "Development and Review of FDIC Rules and Regulations," a cost-benefit analysis is not required.

PART 308—[AMENDED]

Accordingly, the Board of Directors amends Part 308 as set forth below.

1. The authority citation for Part 308 reads as follows:

Authority: Sec. 2(9), Pub. L. 797, 64 Stat. 881 (12 U.S.C. 1819); sec. 18, Pub. L. 94–29, 89 Stat. 155 (15 U.S.C. 78w); sec. 901, Pub. L. 95–630, 92 Stat. 3641 (12 U.S.C. 1972); sec. 203, Pub. L. 96–481, 94 Stat. 2325 (5 U.S.C. 504).

2. Paragraph (a) of § 308.61 is revised to read as follows:

§ 308.61 Hearing.

(a) The Executive Secretary shall order a hearing to commence within 30 days after receipt of a request for hearing pursuant to § 308.59, except in the case of a petition for reconsideration of denial of a section 19 application, for which the time periods set forth in § 303.10(d) shall apply. The hearing shall be held in Washington, D.C., or at another designated place, before a presiding officer designated by the Executive Secretary. The Executive Secretary may order a later hearing date upon petition of the individual or, in the case of a section 19 denial, the affected individual or the bank afforded the hearing.

* * * * *

By order of the Board of Directors, this 14th day of March, 1983.

Hoyle L. Robinson,

Executive Secretary.

BILLING CODE 6714-01-M

FEDERAL HOME LOAN BANK BOARD

12 CFR Part 572

[No. 83-143]

Net Worth Certificates

March 7, 1983.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rule.

SUMMARY: The Federal Home Loan Bank Board ("Board") has extended until April 1, 1983, the initial filing date for a qualified institution to apply for the Federal Savings and Loan Insurance Corporation ("FSLIC") to purchase net worth certificates ("MWCs") in accordance with Title II of the Garn-St Germain Depository Institutions Act of 1982, Pub. L. 97-320, 96 Stat. 1469 (October 15, 1982). This extension will allow additional time for the dissemination of information regarding the Board's NWC program and for institutions to apply under that program.

EFFECTIVE DATE: March 7, 1983.

FOR FURTHER INFORMATION CONTACT: Robert J. Moore, Deputy Director, Policy and Programs (202-377-6480) or James A. Kristufek, Capital Assistance Program Administrator (202-377-6363), Office of Examinations and Supervision, or Thomas J. Haggerty, Senior Attorney, Division of Securities and Corporate Analysis, Office of General Counsel (202-377-6911), Federal Home Loan Bank Board, 1700 G Street, NW., Washington, D.C. 20552.

SUPPLEMENTARY INFORMATION: In order to allow additional time for the dissemination of information regarding the Board's NWC program, 12 CFR Part 572, and to allow qualified institutions to complete their application to the FSLIC to purchase NWCs in accordance with that Program, the Board has amended § 572.3(c) of the Rules and Regulations for the Federal Savings and Loan Insurance Corporation (12 CFR 572.3) to provide that any application for capital assistance based on operating losses for an applicable six-month fiscal-year period which has closed may be made until April 1, 1983. Previously, § 572.3(c), as amended, had specified a March 1, 1983, date. Section 572.3(c) continues to require that after the April 1, 1983, date applications must be filed within 30 days after the close of an applicable period.

List of Subjects in 12 CFR Part 572

Savings and loan associations.

The Board finds that observance of the notice and comment period pursuant to 5 U.S.C. 553(b) and 12 CFR 508.12, and delay of the effective date pursuant to 5 U.S.C. 553(d) and 12 CFR 508.14, are unnecessary because this amendment constitutes a benefit to applicants by extending the initial application due date. The Board had retained authority to waive that due date in any event.

Accordingly, the Board hereby amends Part 572 of Subchapter D, Chapter V of Title 12, Code of Federal Regulations, as set forth below.

SUBCHAPTER D—FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

PART 572—NET WORTH CERTIFICATES

§ 572.3 [Amended]

Amend paragraph (c) of § 572.3 by inserting the word "April" in place of the word "March" in that paragraph.

(Secs. 401, 402, 403, 405, 406, and 407, 48 Stat. 1255, 1256, 1257, 1259, and 1260, as amended (12 U.S.C. 1724, 1725, 1726, 1728, 1729, and 1730); Reorg. Plan No. 3 of 1947, 3 CFR, 1943-48 Comp. p. 1071)

By the Federal Home Loan Bank Board.

John M. Buckley, Jr.

Acting Secretary.

BILLING CODE 6720-01-M

CIVIL AERONAUTICS BOARD

14 CFR Part 389

Filing-Fee Requirements; Waiver

AGENCY: Civil Aeronautics Board.

ACTION: Waiver of Filing-Fee Requirements Under 14 CFR Part 389.

SUMMARY: Following requests on behalf of certain foreign carriers, the Board's Managing Director, acting under delegated authority, has waived the requirements of Part 389 of the Board's Organization Regulations to the extent necessary to relieve the carriers of France (by letter dated March 9, 1983) and Canada (by letter dated March 9, 1983), from paying the filing fees set forth in § 389.25. Both actions were effective immediately on March 9, 1983, and the filing of a petition for review will not alter the effectiveness.

EFFECTIVE DATE: March 9, 1983.

FOR FURTHER INFORMATION CONTACT: Allen Brown, Regulatory Affairs Division, Bureau of International Aviation, Civil Aeronautics Board; (202) 673-5578.

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6320-01-M

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 162

[T.D. 83-72]

Summary Forfeiture and Disposition of Controlled Substances

AGENCY: Customs Service, Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations to provide that: (1) Certain controlled substances which are imported into the United States without proper entry documentation may be seized and summarily forfeited to the United States; and (2) certain notice procedures are inapplicable to the disposition of such controlled substances.

These amendments are being made to eliminate the unnecessary and costly storage of large quantities of controlled substances.

EFFECTIVE DATE: March 18, 1983. These amendments were previously published as interim regulations, effective on May 11, 1982.

FOR FURTHER INFORMATION CONTACT: Steven L. Basha, Office of the Chief Counsel, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229, (202-566-2462); or David Goldfarb, Assistant Regional Counsel, U.S. Customs Service, 99 S.E. 5th Street, Miami, Florida 33131, (305-350-4321).

SUPPLEMENTARY INFORMATION:

Background

During the last few years, Customs has found it increasingly difficult to store and safeguard controlled substances that have been seized for violation of drug and/or customs laws. Accordingly, by T.D. 82-89, published in the **Federal Register** on May 14, 1982 (47 FR 20753), Customs issued interim regulations to provide that: (1) Certain controlled substances which are imported into the United States without proper entry documentation may be seized and summarily forfeited to the United States; and (2) certain notice procedures are inapplicable to the disposition of such controlled

substances. Prior to the interim regulations, § 162.45, Customs Regulations (19 CFR 162.45), required Customs to retain seized controlled substances for at least three weeks, during which time notice of their impending forfeiture was given. The three week retention necessitated the storage of the controlled substances in secure areas because of their illicit value and dangerous propensities. The problem of storage and security of seized drugs has become acute in Customs regions that have large scale drug smuggling activity. For example, the Miami, Florida, Customs Region (Southeast Region) seized over 3,400,000 pounds of marihuana in fiscal year 1981. The cost to the Government in providing secure storage for such large quantities of drugs has become excessive. Additionally, the storage of large quantities of these items often interferes with the efficient operation of other Customs business.

The Controlled Substances Act (21 U.S.C. 801, *et seq.*) and the Controlled Substances Import and Export Act (21 U.S.C. 951, *et seq.*) deem illegally imported Schedule I controlled substances (as defined in 21 U.S.C. 802(6) and 812) to be contraband that is summarily forfeited to the United States (21 U.S.C. 881(f) and 965). The Supreme Court has held that contraband is not required to be returned to the person from whom it is seized. *Trupiano v. United States*, 334 U.S. 699, 710 (1948); *United States v. Jeffers*, 342 U.S. 48, 54 (1951).

Accordingly, because illegally imported Schedule I substances are summarily forfeited to the United States upon seizure, there is no purpose served in storing such substances, or notifying the public of Customs intention to dispose of such substances. The public notice provision of § 162.45 is included in the regulations for the benefit of those parties who might have a legitimate interest in seized property, and who might wish to file a claim for such property pursuant to § 162.47, Customs Regulations (19 CFR 162.47). The fact that seized Schedule I controlled substances are deemed contraband and are summarily forfeited to the Government precludes any claim under § 162.47.

Comments

Although T.D. 82–89 specifically invited written comments on the interim regulations, none were received.

Changes to Interim Regulations

Customs has determined to adopt the interim regulations as permanent rules with the only substantive change being the addition of a sentence at the end of § 162.45a, Customs Regulations (19 CFR 162.45a). That sentence provides that when seized controlled substances are required as evidence in a court proceeding they shall be preserved to the extent and in the quantities necessary for that purpose.

Inapplicability of Delayed Effective Date Provisions

T.D. 82–89 stated that, because of the acute storage problem associated with large quantity seizures of controlled substances, and because 21 U.S.C. 881 (f) and 965 deem illegally imported Schedule I controlled substances to be contraband that is summarily forfeited to the United States, Pursuant to 5 U.S.C. 553(b)(B), notice and public procedure were impracticable, unnecessary, and contrary to the public interest. T.D. 82–89 further stated that, pursuant to 5 U.S.C. 553(d)(3), good cause existed for dispensing with a delayed effective date. For the same reasons, and for the reason that the interim regulations have been in effect since May 11, 1982, good cause exists for dispensing with a delayed effective date for the final rule.

Executive Order 12291

This amendment is not a "major rule" as defined in section 1(b) of E.O. 12291. Accordingly, a regulatory impact analysis is not required.

Regulatory Flexibility Analysis

T.D. 82–89 contained a certification pursuant to the provisions of section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that these regulations will not have a significant economic impact on a substantial number of small entities. The same certification is applicable to this document. Accordingly, regulatory flexibility analyses are not required.

Drafting Information

The principal author of this document was Gerard J. O'Brien, Jr., Regulations Control Branch, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

List of Subjects in 19 CFR Part 162

Administrative practice and procedure, Law enforcement, Penalties, Search warrants, Seizures and forfeitures, Imports, Customs duties and inspection.

Amendments to the Regulations

Part 162, Customs Regulations (19 CFR Part 162), is amended as set forth below

William von Raab,

Commissioner of Customs.

Approved: John M. Walker, Jr.,

Assistant Secretary of the Treasury.

March 3, 1983.

PART 162—RECORDKEEPING, INSPECTION, SEARCH, AND SEIZURE

1. The section heading and paragraph (b) of § 162.45, Customs Regulations (19 CFR 162.45(b)), are revised to read as follows:

§ 162.45 Summary forfeiture where value not over $10,000: Property other than Schedule I controlled substances. Notice of seizure and sale.

* * * * *

(b) *Publication.* (1) If the appraised value of any property in one seizure from one person other than Schedule I controlled substances (as defined in 21 U.S.C. 802(6) and 812) exceeds $250, the notice shall be published in a newspaper of general circulation in the Customs district and the judicial district in which the property was seized for at least three successive weeks.

(2) In all other cases, except for Schedule I controlled substances (see § 162.45a), the notice shall be published by posting in a conspicious place accessible to the public in the customhouse nearest the place of seizure and in the customhouse at the headquarters port for the Customs district, with the date of posting noted thereon, and shall be kept posted for at last three successive weeks. Articles of small value of the same class or kind included in two or more seizures shall be advertised as one unit.

* * * * *

2. Part 162, Customs Regulation (19 CFR Part 162), is amended by adding a new § 162.45a, to read as follows:

§ 162.45a Summary forfeiture of Schedule I controlled substances.

The Controlled Substances Act (84 Stat. 1242, 21 U.S.C. 801) provides that all controlled substances in Schedule I (as defined in 21 U.S.C. 802(6) and 812) that are possessed, transferred, sold or offered for sale in violation of the Act shall be deemed contraband and seized and summarily forfeited to the United States (21 U.S.C. 881(f)). By reference, the Controlled Substances Import and Export Act (21 U.S.C. 951) incorporates this contraband forfeiture provision. See 21 U.S.C. 965. Accordingly, in the case of a seizure of Schedule I controlled substances, the appropriate Regional

Commissioner of Customs or his designee shall contact the appropriate Drug Enforcement Administration official responsible for issuing permits authorizing the importation of such substances (see 21 CFR 1312). If upon inquiry the Regional Commissioner or his designee is notified that no permit for lawful importation has been issued, he shall declare the seized substances contraband and forfeited pursuant to 21 U.S.C. 881(f). Inasmuch as such substances are Schedule I controlled substances, the notice procedures set forth in section 162.45 are inapplicable. When seized controlled substances are required as evidence in a court proceeding, they shall be preserved to the extent and in the quantities necessary for that purpose.

3. Section 162.63, Customs Regulations (19 CFR 162.63), is amended to read as follows:

§ 162.63 Arrests and seizures.

Arrests and seizures under the Controlled Substances Act (84 Stat. 1242, 21 U.S.C. 801), and the Controlled Substances Import and Export Act (84 Stat. 1285, 21 U.S.C. 951), shall be handled in the same manner as other Customs arrests and seizures. However, Schedule I controlled substances (as defined in 21 U.S.C. 802(6) and 812) imported contrary to law shall be seized and forfeited in the manner provided in the Controlled Substances Act (21 U.S.C. 881(f)). See § 162.45a.

(Sec. 511(d), 1010, 84 Stat. 1276 as amended, 1291; 21 U.S.C. 881(d), 966)

(R.S. 251, as amended, sec. 624, 46 Stat. 759; 19 U.S.C. 66, 1624)

BILLING CODE 4820-02-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 5

Delegations of Authority and Organization; Commissioner of Food and Drugs

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the regulations for delegations of authority that contain the delegations of authority to the Commissioner of Food and Drugs to incorporate a revised delegation to the Commissioner to accept gifts under section 501 of the Public Health Service Act (PHS Act).

EFFECTIVE DATE: March 18, 1983.

FOR FURTHER INFORMATION CONTACT: Robert L. Miller, Office of Management and Operations (HFA–340), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4976.

SUPPLEMENTARY INFORMATION: On February 25, 1983, the Assistant Secretary for Health issued a memorandum delgating to the Commissioner the authority under section 501 of the PHS Act, as amended, to accept offers of gifts, excluding the acceptance of gifts of real property. Only the authority to accept unconditional gifts of personal property valued at $5,000 or less can be redelegated. The delegation superseded the previous delegation of this authority by the Director, Office of Management, PHS, dated August 20, 1979.

In § 5.10 (21 CFR 5.10), new paragrpah (a)(20) is being added to reflect the revised delegation and paragraph (e) is being deleted to remove the superseded delegation.

Further redelegation of the authority delegated is not authorized. Authority delegated to a position by title may be exercised by a person officially designated to serve in such position in an acting capacity or on a temporary basis.

List of Subjects in 21 CFR Part 5

Authority delegations (Government agencies), Organization and functions (Government agencies).

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 701(a) 52 Stat. 1055 (21 U.S.C. 371(a))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10), Part 5 is amended in § 5.10 by adding new paragraph (a)(20) and by removing paragraph (e) as follows:

PART 5—DELEGATIONS OF AUTHORITY AND ORGANIZATION

§ 5.10 Delegations from the Secretary, the Assistant Secretary for Health, and Public Health Service Officials.

(a) * * *

(20) Functions vested in the Secretary under section 501 of the Public Health Service Act (42 U.S.C. 219) as amended, to accept offers of gifts, excluding the acceptance of gifts of real property. Only the authority to accept unconditional gifts of personal property valued at $5,000 or less may be redelegated.

* * * * *
